Section 1. Contact Information

Statutory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program.

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(1) Contact information. Identify the manufacturer or stewardship organization responsible for the annual report submittal. Stewardship organizations shall include an updated list of participating manufacturers and any updates to their respective contact information per §18952(a)(2).

Stewardship Organization

PaintCare Inc., a non-profit 501(c)(3) organization, was formed to serve as the representative stewardship organization of architectural paint manufacturers to fulfill their obligations under the California Paint Stewardship Law. PaintCare was created by the American Coatings Association, the primary trade association of the paint and coatings industry. PaintCare's Board of Directors consists of eleven non-paid representatives of architectural paint manufacturers.

PaintCare representation is open to all manufacturers. Appendix A includes a current list of participating manufacturers and their mailing addresses.

Section 2. Executive Summary

Statutory Citation

Title 14, Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(2) Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the manufacturer or stewardship organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the manufacturer or stewardship organization's architectural paint recovery efforts during the reporting period pursuant to PRC §48705(a). This may include anticipated steps, if needed, to improve performance and a description of challenges encountered during the reporting period and how they will be addressed. This may also include a description of paint container management and market development activities if the manufacturer or stewardship organization has chosen to engage in those activities.

A. CALIFORNIA PAINT STEWARDSHIP LAW AND ANNUAL REPORT

In September 2010, Governor Schwarzenegger signed Assembly Bill 1343 (Huffman) – the California Paint Stewardship Law. This law requires manufacturers of architectural paint to develop and implement a program to reduce the generation of postconsumer architectural paint, promote the reuse of postconsumer architectural paint, and to provide a system for the management of postconsumer architectural paint in an environmentally sound manner that includes collection, transportation, processing, recycling, and proper disposal.

The California program began October 19, 2012. PaintCare, on behalf of participating paint manufacturers, submits an annual report to the California Department of Resources Recycling and Recovery (CalRecycle). Annual reports cover the period July 1 – June 30. As prescribed in Section 48700 of the California Public Resources Code and further detailed in Title 14, Section 18954 of the California Code of Regulations, the information submitted in an annual report shall be organized according to this standard outline:

- (A) Contact Information
- (B) Executive Summary
- (C) Program Outline
- (D) Description of Goals and Activities Based on the Stewardship Plan
- (E) Financing Mechanism
- (F) Education and Outreach
- (G) Audits

B. YEAR THREE PROGRAM HIGHLIGHTS

Sites, Events, Services, and Collection Volume

- Provided 733 year-round (and 23 seasonal) paint drop-off sites consisting of paint retailers, municipal household hazardous waste (HHW) facilities, solid waste transfer stations and other voluntary locations to create a network of convenient paint drop-off points in California. Through the 733 sites, provided access to a year-round site within 15 miles for 98.4% of the state's population.
- Managed paint from 192 HHW drop-off events, and planned, promoted and sponsored nine paint-only drop-off events. Paint-only event locations were chosen to provide collection opportunities in previously underserved (too few sites or high population) areas.
- Provided 184 direct large volume pick-ups from businesses, institutions and others that had accumulated more than 300 gallons of paint at their sites, and established regular pick-up with an additional 24 sites.
- Partnered with 16 door-to-door HHW programs to manage paint collected through their service.
- Collected and processed 2,717,307 gallons of postconsumer paint, of which 95% was reused, recycled back into paint or another product, and used for a purpose other than landfill. (45% of the paint came through retail and other non-municipal sites and services; 55% came from municipal sites and events.)
- Recycled approximately 1679 tons of plastic and metal paint cans.

Outreach and Education

- Continued and enhanced the comprehensive outreach campaign to educate consumers on the program, the amount and purpose of the assessment, and convenient recycling opportunities, while also promoting buying the right amount of paint and using up leftovers.

C. CHALLENGES AND LESSONS LEARNED

As the program entered its third year, the challenges of launching a large-scale, statewide waste management program provided an ongoing learning process. Of the four primary challenges discussed in the first two reports, three remained during the third year. However, much progress has been made, including new approaches to reuse and contracting, detailed below.

Hazardous Materials Business Plans and Fees

In general, businesses in California are required to submit a Hazardous Material Business Plan (HMBP) to their local hazardous materials enforcement agency if they store more than 55

gallons of hazardous waste on-site. In September 2014, California passed Assembly Bill 2748. This law relaxed HMBP requirements for businesses that are PaintCare drop-off sites. As of January 1, 2015, a business that handles paint managed under the PaintCare program needs to submit an HMBP only if the volume of PaintCare program products stored onsite at one time exceeds 1,000 gallons (approximately 10 PaintCare paint storage bins). However, local HMBP requirements still apply for any other non-PaintCare hazardous materials being stored onsite.

PaintCare has seen the effects of the passage of AB 2748, with state coordinators noticing increased interest from independent retailers now that this barrier to joining the program has been removed.

Limits on Retail Storage Space

The availability of storage space for cubic yard paint storage bins continues to be an issue for retailers, with more sites than anticipated able to store only one or two bins. Sites continue to fill up their bins quickly, particularly in heavily populated areas. This situation has continued to improve through implementation of automatic pick-up schedules. Approximately 31% of retail drop-off sites are now on an automatic pick-up schedule, ranging from monthly to twice weekly.

Establishing Partnerships with Municipal HHW Programs

PaintCare continued its efforts to establish partnerships with household hazardous waste programs through continued engagement at conferences, local meetings, in-person site visits, and conference calls. During this reporting year, 14 additional HHW programs were added, bringing the total to 81 as of June 30, 2015. (Note that many HHW programs manage several sites and/or events as part of their program; therefore, the total number of HHW facilities or events participating in PaintCare is much higher than 81.)

Increasing the Financial Incentive for Reuse

As the program year came to a close, PaintCare planned a new reimbursement structure for HHW facilities, reuse stores (e.g., Habitat for Humanity ReStores), and other partners that are able to distribute paint to the public for reuse. The new compensation model replaces the previous rate of \$0.25 a container (of any size) with a \$1.20 rate for each one-gallon container (with proportional compensation for quarts and five-gallon containers) or a \$1.60 rate when actual volume is measured. This substantial change has resulted in a high response rate from existing reuse partners and has encouraged new reuse programs to begin. As of June 30, 2015, PaintCare has 20 reuse partners. The effects of increased interest in reuse will be more fully known in the next program year.

Streamlining Contractual Arrangements

Following feedback from stakeholders, PaintCare made it easier to create or revise partnership arrangements. By utilizing streamlined acknowledgement emails (in place of signed letters) and simplified amendments, PaintCare was able to further encourage participation of HHW programs and other contracted parties.

Section 3. Program Outline

Statutory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(3) Program Outline. Describe the paint stewardship program, including information on the following topics:

(A) A description of the methods used to collect, transport, and process postconsumer architectural paint, by type, in California.

(B) Description of how each consumer of architectural paint in California had an opportunity to recycle and properly manage their postconsumer paint on a state wide basis, including the number, location, and type of collection points located in the state.

(C) Description of best management practices followed by service providers that are acting as collection points, which may include any training that the manufacturer or stewardship organization provided or required of service providers to ensure proper collection and management of postconsumer paint.

(D) A statement that the manufacturer or stewardship organization coordinated with existing household hazardous waste collection programs and retailers as potential collection points per Section 18953(a)(3)(E) and (F) during the reporting period.

A. PAINT COLLECTION SITES, EVENTS, AND SERVICES

PaintCare continued to grow its paint collection system in both urban and rural communities. The methods used to collect paint from the public include the following:

- Paint retailers including paint, hardware, and building supply stores
- HHW collection facilities and events
- Solid waste transfer stations, recycling centers and landfills
- Material reuse stores (e.g., Habitat for Humanity ReStore)
- Paint-only collection events
- Large volume direct pick-up service for sites that have accumulated more than 300 gallons of postconsumer paint (most commonly painting contractors)
- Partnership with door-to-door HHW programs

PaintCare had 733 year-round drop-off sites in California at the end of this reporting year. For the purpose of defining convenience, PaintCare considers a site or event (defined by the physical address) as “year-round” if the site is open at least one day per month, every month of the year. Sites that are open less frequently are considered supplemental sites. Sites that close or stop participating in the PaintCare program during a reporting year are also considered supplemental and are noted as having had limited participation.

In addition to 733 year-round sites, the program managed paint from 192 HHW drop-off events¹, held nine paint-only drop-events, partnered with 16 door-to-door collection programs², had 23 supplemental sites, provided 184 direct large volume pick-ups, and set up contracts and regular pick-ups schedules with 24 businesses and organizations that generate large volumes of paint on a regular basis (non-public sites)

The following tables summarize PaintCare sites, events and services during this reporting year.

YEAR-ROUND SITES	NUMBER
Paint Retailers	583
HHW Facilities	106
Transfer Stations / Landfills / Recycling Centers	25
Other Sites*	7
Paint Recyclers	6
Reuse Stores	5
HHW Event Site	1
Total	733

SUPPLEMENTAL SITES, EVENTS, AND SERVICES	NUMBER
HHW Events	192
Direct Large Volume Pick-Ups	184
Non-Public Sites	24
Door-to-Door Programs	16
HHW Facilities	11
Paint-Only Events	9
Paint Retailers (limited participation)	9
Other Sites*	2
Paint Recycler (limited participation)	1

*Other sites includes fire stations, municipal public works yards, and other types of paint drop-off sites that do not fall into the primary categories.

¹ Not included in this figure are a number of small HHW events where PaintCare pays for paint processing and transportation from a consolidation facility, but not internal transportation to the consolidation facility.

² Only stand-alone door-to-door programs are counted. While PaintCare also partners with HHW facilities that host door-to-door operations, such as Folsom and San Francisco, they are not included to avoid double counting.

The locations of the year-round sites, and supplemental sites and events are shown in the maps in Section 4 of this report as part of the convenience analysis. A full list of all sites, events, and door-to-door programs is provided in Appendix B.

Site Configuration

All PaintCare drop-off sites and events, and the LVP service accept both latex paint and oil-based paint. All retail drop-off sites, paint-only drop-off events, and the LVP service accept paint from both residents and qualifying businesses, while HHW programs (sites and events), transfer stations, and some other locations may limit participation to their normal service area and customers, which may not include businesses.

For all drop-off sites, events, and the LVP service, PaintCare pays for paint collection bins, training materials, transportation of paint from the site, and paint processing. Spill kits are provided to most sites. PaintCare also negotiates payment for additional services with HHW sites, transfer stations, and some other sites. Additional services include:

- Paint reuse
- Latex paint reprocessing
- Oil-based paint bulking
- Transportation from remote sites or events to a primary location, referred to as internal transportation

B. PAINT TRANSPORTATION AND PROCESSING

Paint Transportation

Prior to program launch, PaintCare issued RFPs for transportation and processing services for program products collected at all PaintCare drop-off sites. PaintCare selected Clean Harbors Environmental Services and Stericycle Environmental Services (formerly PSC Environmental Services) for statewide transportation services. In addition, PaintCare worked with select haulers that held existing contracts with HHW programs including Veolia Environmental Services and Waste Management. A number HHW programs also provided internal transportation services to PaintCare.

Haulers schedule pick-up appointments in two ways: (1) by request, when sites order a pick-up when their storage capacity reaches 50 percent; or (2) on a set schedule (e.g., every Monday). Haulers are responsible for delivery of empty collection bins and program supplies and for picking up full bins from drop-off sites. Haulers provide PaintCare all data on the transportation and processing of program products taken from all sites and events to their final destination. Shipments of program products from HHW facilities who have partnered with PaintCare are arranged between the facility and hauler, typically to coincide with the sites' regular shipments of other HHW. Contracted haulers and their downstream processors are subject to audit by

PaintCare.

Most drop-off sites pack unopened paint cans into cubic yard collection bins. A few sites pack paint cans into large shipping containers (20 cubic yard or larger), and some bulk (pour off) paint into drums. Full collection bins, shipping containers and drums are transported to the hauler's facilities for sorting by type. From there, latex paint is transported to a latex paint recycler and oil-based paint and other solvent-based program products are transported to downstream processors.

Commingled containers (latex and oil-based paint), and sorted latex paint containers are shipped from sites and events using a bill of lading. Oil-based paint is shipped using a hazardous waste manifest.

Latex Paint Processing

The following describes how latex paint was processed during this reporting year.

Reuse. A small portion of latex paint received by some reuse stores and some HHW sites was given away or sold, as-is, through materials reuse programs.

Recycled Paint. The largest portion of latex paint was used to manufacture recycled-content paint by HHW programs and private paint recyclers. This paint was given away to the local community by HHW programs and sold through domestic and international markets by private recyclers.

Decorative Ground Cover. A small portion of hardened latex paint was used to create a product sold as a decorative ground cover. The product is made by grinding dried paint into small pieces, and then finished with colorant and a protective coating.

Concrete Products. A portion of latex paint was used as a raw material to manufacture interlocking retaining wall blocks, and parking stops for passenger and commercial vehicles.

Energy Recovery. A portion of latex paint was combined with sawdust to create a fuel for a waste to energy facility in Southern California.

Alternative Daily Cover. One HHW program used latex paint as a component of alternative daily cover (ADC) for their landfill.

Disposal. A portion of the dry and unusable latex paint was sent to authorized landfills.

Oil-Based Paint Processing

The following describes how oil-based paint was processed during this reporting year.

Reuse. A small portion of oil-based paint received by some reuse and some HHW sites was given away or sold, as is, through materials reuse programs.

Energy Recovery. Oil-based paint was consolidated and delivered to fuels blending operations, which manufactured a fuel used for energy recovery.

Incineration. Oil-based paint was used as a fuel at two different hazardous waste incinerators.

Container Recycling

Downstream processors and HHW programs managed empty metal and plastic paint containers for recycling when feasible.

C. BEST MANAGEMENT PRACTICES FOR DROP-OFF SITES

PaintCare entered into contract agreements with sponsors of all drop-off sites, both retail and municipal, as well as drop-off events, door-to-door programs, and non-public large volume sites. For municipal sites that do not operate their own sites or events, PaintCare contracted either directly with the municipality or with their site or event operator.

PaintCare requires all sites to be staffed during operating hours, store program products in a secure location, and follow all procedures described in site trainings and PaintCare contract guidelines.

Site Training and Guidelines

With the exception of HHW sites and events for which it is optional, all other sites received an on-site, in-person training and training binder. The binder includes program guidelines, a training presentation with images, record-keeping forms, and signage. The binder is required to be kept on-site and readily available. The training and guidelines cover:

- Identification of program and non-program products
- Acceptable containers
- Whom to accept paint from and how much
- Screening procedure for Conditionally Exempt Small Quantity Generators (CESQGs) and the required log form
- Proper storage
- Spill response procedures and reporting requirements
- How to schedule a pick up
- Required paperwork and retention schedules
- Employee training

Variations of these guidelines are provided to retail stores, reuse stores, HHW facilities, transfer stations, LVP sites and any other type of site. Appendix C provides the current versions of the retail site guidelines and retail training presentation.

Retailers and other non-HHW drop-off sites may not accept products without original labels or not in original containers. However, HHW programs often receive unlabeled containers and products not in their original containers in the course of normal operations and have the skills and tools to identify whether the material is an acceptable program product. This operational distinction is an example of how site guidelines vary depending on site type.

Site Visits

Drop-off sites received site visits throughout the year by PaintCare Regional Coordinators to check on operations, answer questions, and provide additional program outreach materials. PaintCare has four Regional Coordinators in California.

Paint Collection Bins

Drop-off sites are equipped with one or more collection bins in which to store program products. Sites are required to keep collection bins in a secure location that is not directly accessible to the public.

Paint Acceptance Limits

PaintCare requires sites to accept at least 5 gallons of paint per customer per day. Some drop-off sites voluntarily accept more than 5 gallons; many accept up to 20 gallons per customer. A few stores accept up to 100 gallons, while some recyclers, transfer stations and HHW sites accept unlimited volumes of latex paint.

Scheduling Bin Pick Ups

All drop-off sites are advised to order a collection bin pick up when they have reached 50 percent of their storage capacity. Sites in urban areas receive pick-ups within five business days of a request; sites in rural areas receive pick-ups within ten business days. Many sites in high volume areas have also been placed on an automatic pick-up schedule.

D. COORDINATION WITH EXISTING HHW COLLECTION PROGRAMS & RETAILERS

HHW Programs

PaintCare has continued its efforts to partner with all HHW programs. Imperial, Kings, Mariposa, Modoc, Orange, Sierra, Tulare and Yuba-Sutter are the only counties with an HHW program that had not joined PaintCare as of June 30, 2015. Imperial County has chosen not to collect paint and refers its participants to local PaintCare retail locations. PaintCare had established 81 partnerships with HHW programs and expects this number to increase in the coming year, with Orange County joining the program in September 2015 and other county contracts also nearing completion.

Retailers

PaintCare created and maintains a mailing list of all California paint retailers including independent and corporate contacts. As the program has evolved, so have relationships with retailers. In addition to recruiting new sites through in-person site visits, PaintCare regional coordinators also worked closely with store management and corporate contacts to arrange new store site setups and transition existing stores with location changes.

Section 4. Description of Goals and Activities

Statutory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(4) Description of goals and activities based on the stewardship plan. State goals from the approved stewardship plan, the baseline from which goals were measured, and report on achievement during the reporting period. Describe any adjustments to goals stated in the approved stewardship plan that may be made for the upcoming reporting period and accompanying rationale for those changes. The annual report must include quantitative information and discussion on the following categories pursuant to PRC §48705(a) and PRC §48703(d):

(A) The total volume of architectural paint sold, by type, in the state during the preceding reporting period.

(B) The total volume of postconsumer architectural paint recovered, by type, in the state during the preceding reporting period.

(C) Disposition of postconsumer paint collected, by type and by estimated volume, including name(s) and corporate address(es) for contracted processors for each

A. PROGRAM GOALS

The California Paint Stewardship Law required PaintCare to establish goals to reduce the generation of postconsumer paint, to promote the reuse of postconsumer paint, and for the proper end-of-life management of postconsumer paint, based on current household hazardous waste program information.

This section of the report addresses architectural paint recovery and recycling goals. Section 6 (Education and Outreach) addresses postconsumer paint reduction and reuse goals.

B. PROGRAM CONVENIENCE

As described in the Program Plan, to ensure adequate collection coverage, Geographic Information System (GIS) modeling was used determine the number and distribution of drop-off sites needed based on the following criteria.

Distribution. PaintCare's goal for statewide coverage is to establish one site within 15 miles for the majority (90%) of the state's population.

Density. In addition to securing drop-off sites in locations to meet the statewide distribution criterion, PaintCare is addressing densely populated areas by striving to provide an additional site for every 30,000 residents of a population center as defined in the Program Plan.

Convenience Goals

Application of these criteria resulted in the need for approximately 750 optimally located, year-round drop-off sites.

Service Level

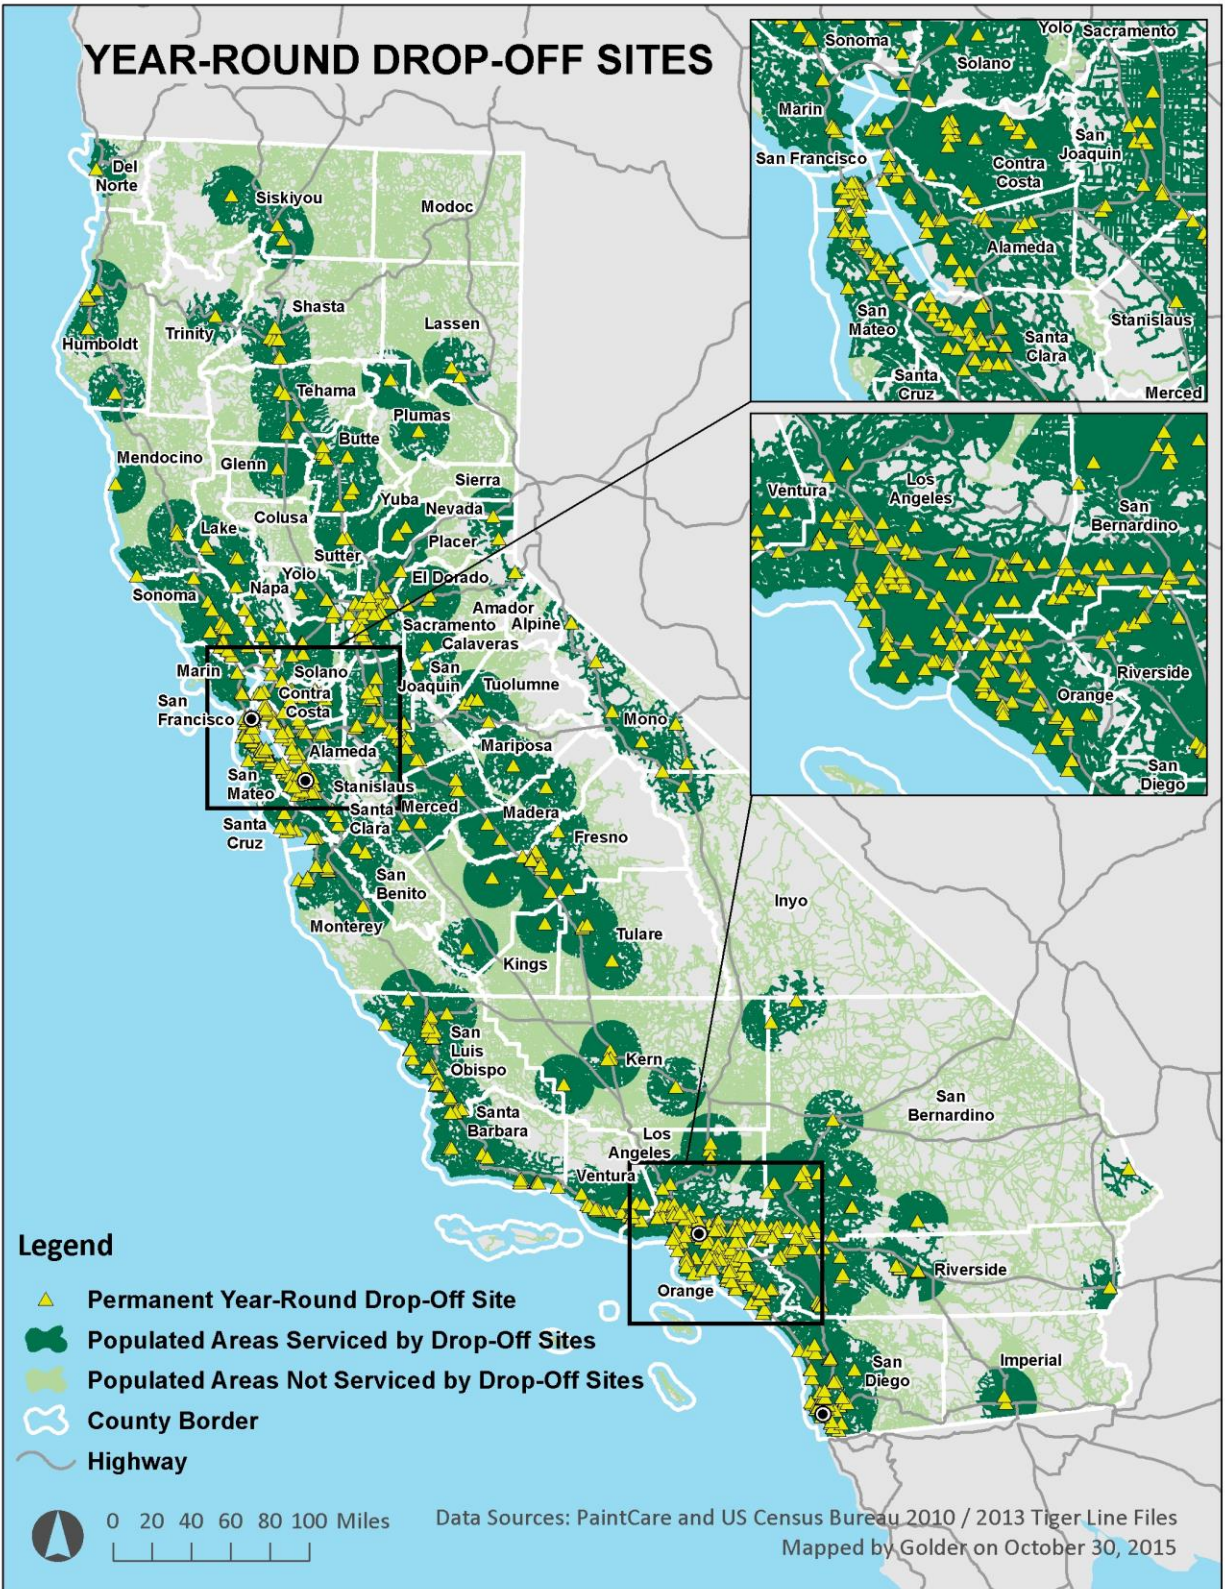

California had robust HHW programs prior to PaintCare implementation. However, service levels varied across the state, and many HHW program were not open to businesses. With the addition of more than 600 new year-round paint drop-off sites, PaintCare made it significantly more convenient to recycle paint in the state, particularly for businesses.

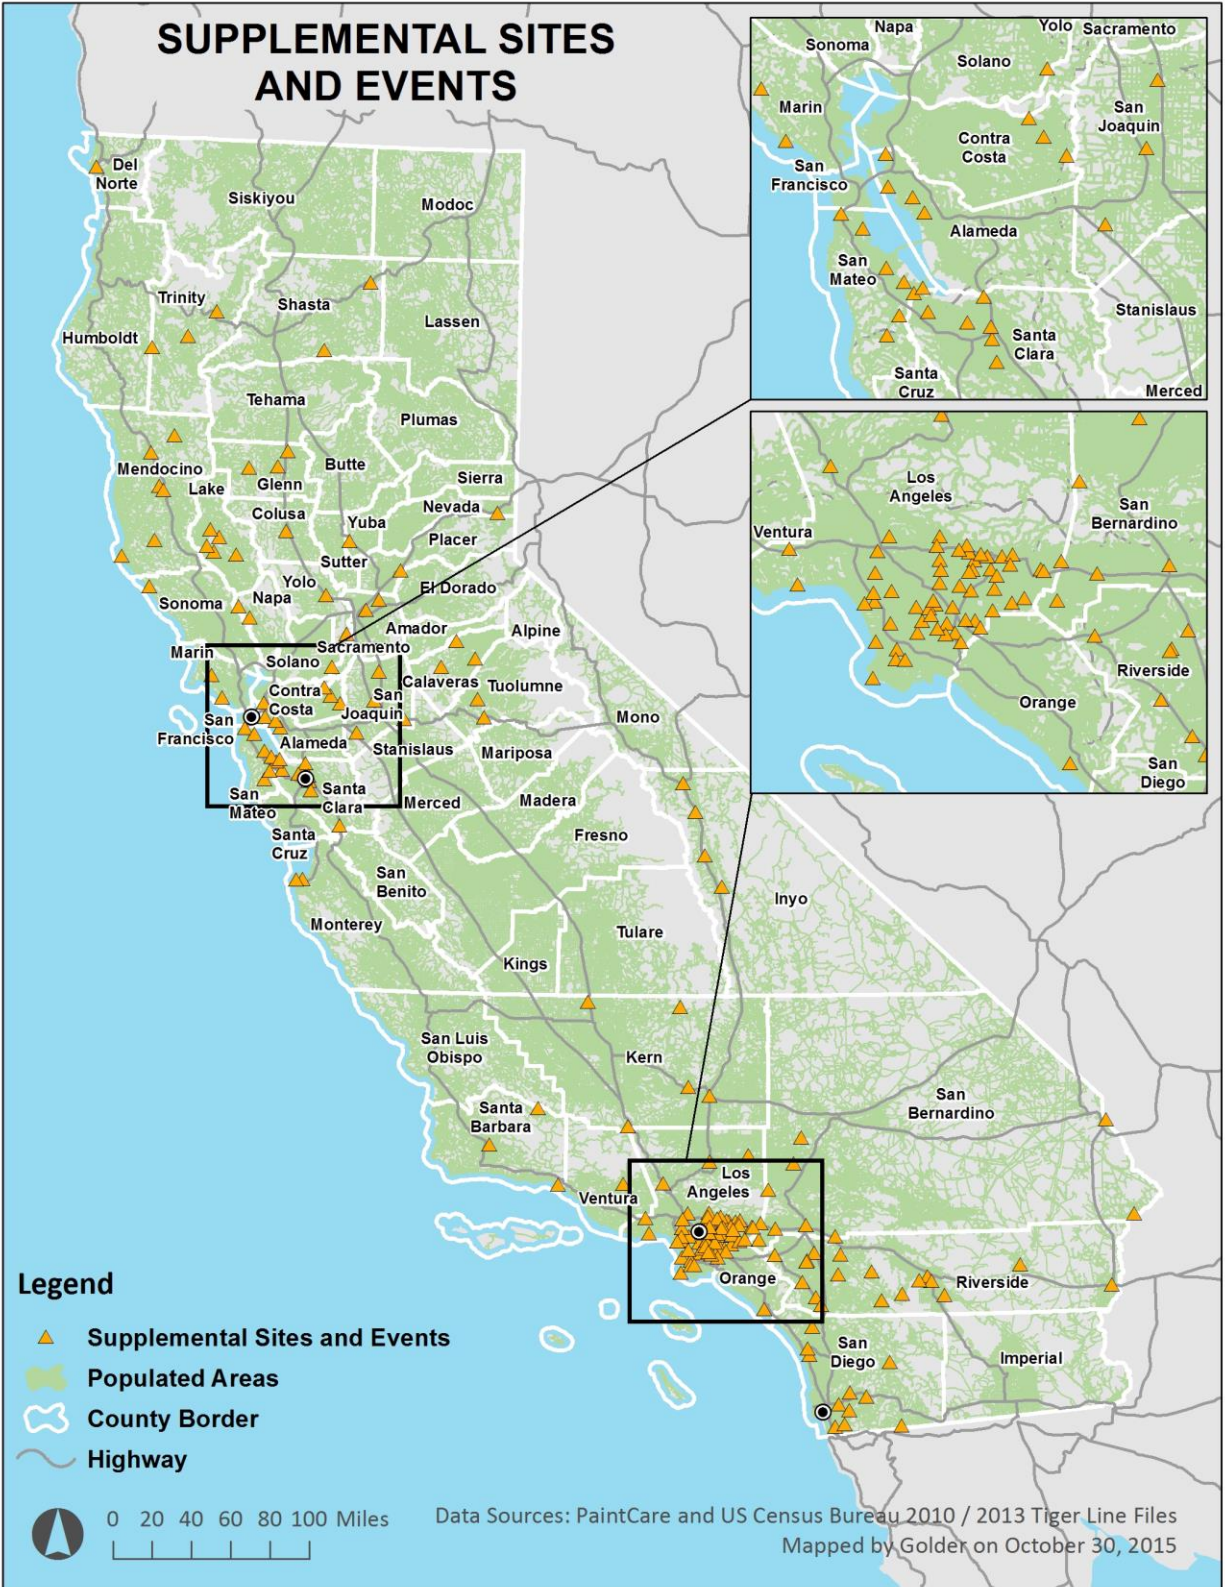

The combination of new year-round drop-off sites and existing year-round HHW sites provided a site within 15 miles to 98.4% of the state's population – satisfying the distribution goal of the program.³ Including the supplemental sites and events into the analysis increased the serviced population to 99.2%.

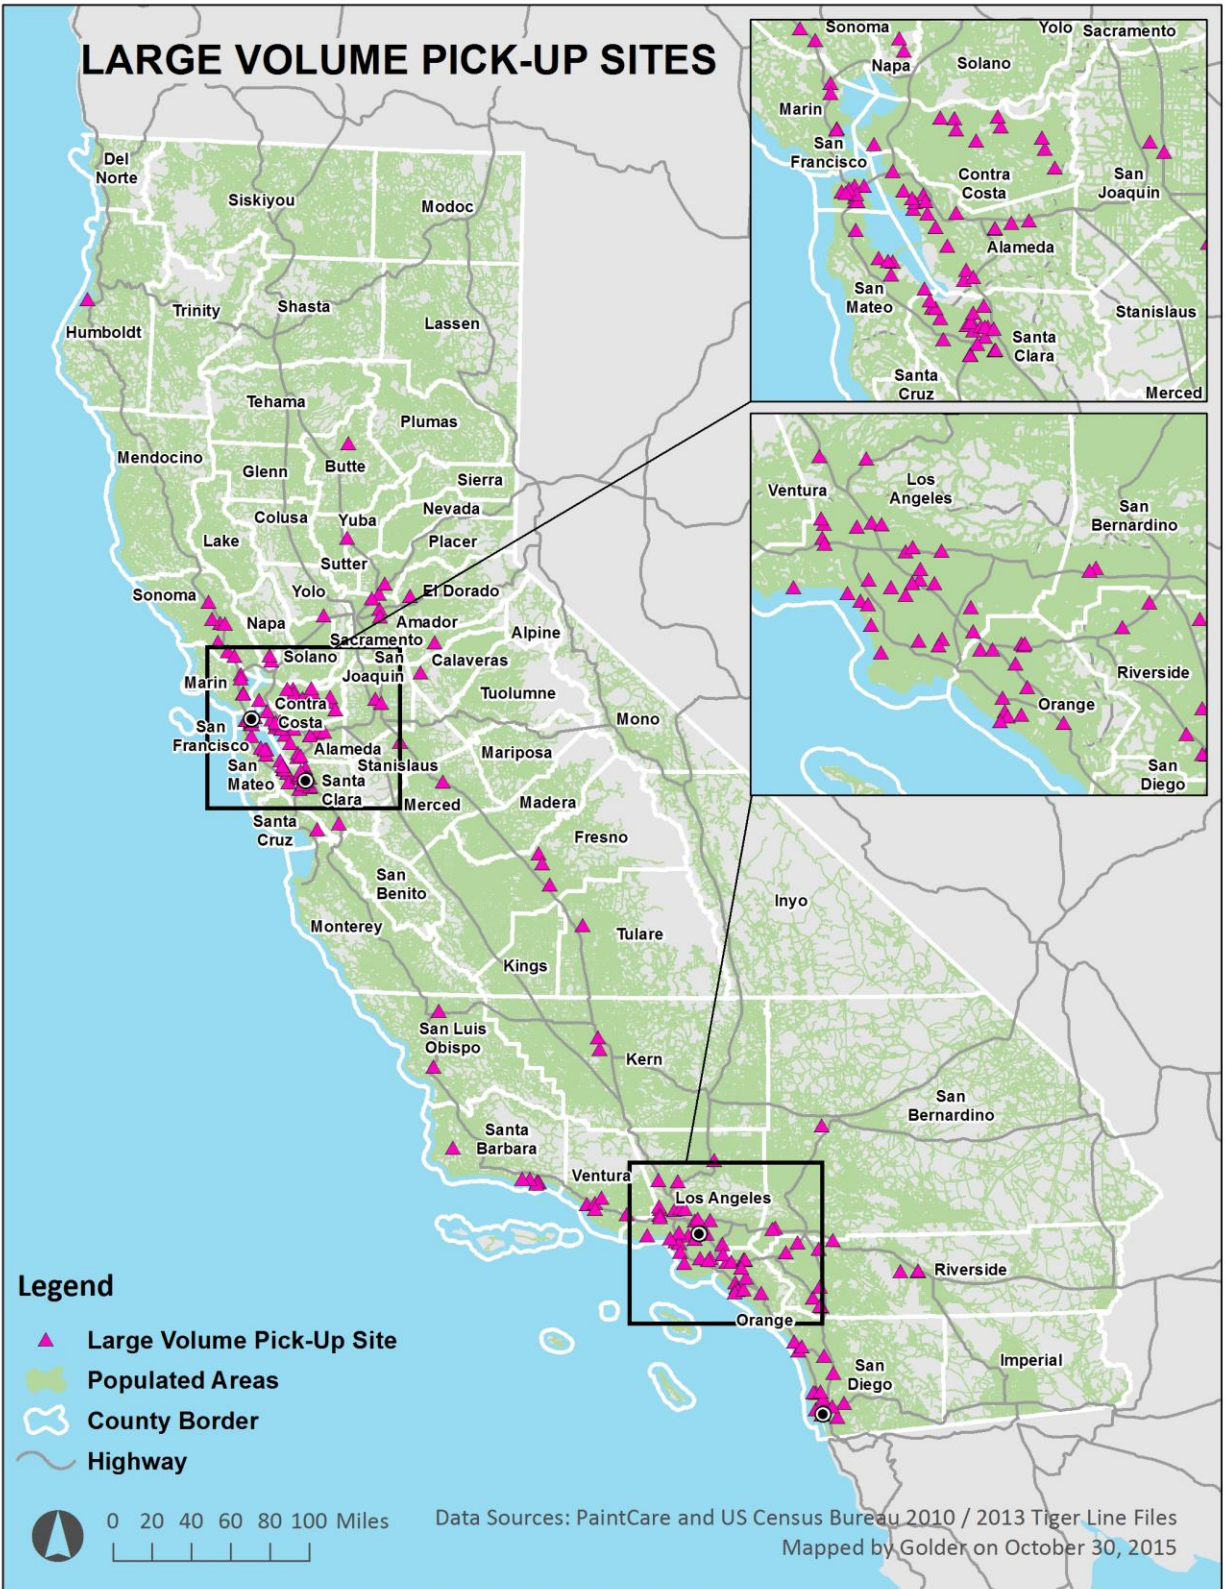

Section 3 of this report described the number and types of sites events offered by the program. The maps on the following pages shows their locations. The first map shows the locations of year-round drop-off sites and their 15-mile service radius. The second map shows the locations of supplemental sites, and HHW and paint-only events. The third maps shows the locations of LVP sites (both single pick-up locations and sites that received regular pick-ups).

Though the LVP service provides a tremendously convenient service for its users, sites are not included in any convenience analysis since they are not provide public drop-off site. Door-to-door programs are also not included in any convenience analysis, or on any map.

³ Golder Associates, an engineering firm hired by PaintCare to conduct geographic analysis and mapping, performed distribution criterion analysis of drop-off sites. However, the required density criterion analysis of drop-off sites was not performed for this report due to concerns with the accuracy of the analysis model. PaintCare notified CalRecycle of this problem in advance of submitting this report and will provide an updated report with density criterion analysis as soon as the validity of the current model has been determined, and corrected if needed.

C. PAINT SALES

The volume of architectural paint sales in this reporting year was 65,700,195 gallons, a decrease of approximately 4% from the previous year. The following table shows this volume, broken out by container size.

Paint Sales

CONTAINER SIZE	GALLONS	% VOLUME
Half pint or smaller	39,346	< 1
Larger than half pint to smaller than 1 gallon	2,580,108	4
1 gallon	23,339,626	36
Larger than 1 gallon up to 5 gallons	39,749,115	60
Total	65,700,195	100

D. PAINT RECOVERED

A total of 2,717,307 gallons of postconsumer architectural paint was processed during this reporting year. A small portion of paint collected during the year has not yet been processed and is not included in this report's processing and disposition data. A gap in the time between collection and processing will occur every year and therefore balance out from year to year.

The following table provides a breakdown of the volume of paint processed by type.

Paint Processed

TYPE	GALLONS	%
Oil-based	459,079	17
Latex	2,258,228	83
Total	2,717,307	100

In this reporting year, 55% of the paint processed came from municipal HHW programs (this includes HHW facilities and events, as well as municipal transfer stations and other municipal sites that collect paint). Paint from retail stores made up 40% of the volume, the LVP service 4%, and paint-only collection events accounted for 1%.

E. DISCUSSION OF BASELINE AND RECOVERY RATE

As described in the Program Plan, to project the anticipated volume of postconsumer paint to be collected, PaintCare considered CalRecycle's baseline HHW collection data and other data and studies available at the time, and used the following assumptions:

- Sales volume will remain the same for three years.
- 10% of architectural paint sold is leftover.
- 70% of unused paint is available for collection (7% recovery rate).
- In the first reporting period, PaintCare would experience a 3% collection volume increase over baseline HHW program collections.
- In the second reporting period, PaintCare would experience a 20% collection volume increase over the first reporting year.
- In the third reporting period, PaintCare would experience a 25% collection volume increase over the second year, reaching the target recovery rate of 7%.

The Program Plan also presented the potential flaws in the state’s HHW baseline data. Concerns included:

- Overstatement of oil-based paint collected state-wide by many HHW programs due to the combining of petroleum-based solvents, cleaners, automotive products and other non-program products in the category for oil-based paint on the state’s Form 303 (HHW program data) reporting.
- Reporting by some programs of gross weight (includes paint cans and collection bins), and reporting by others of net weight (paint only).
- Use by some programs of the conversion factor recommended on the state’s Form 303 (10 pounds/gallon), and use by others of alternative conversion factors.
- Reporting by some programs of actual product weight or volume, and reporting by others of an average derived over time based on the size of the collection bins used at their site (e.g., 55-gallon drums).

To address this, PaintCare proposed to use the volume collected in its first year as the baseline from which to plan for future collection volumes and cost. However, as only a few HHW programs were signed up with PaintCare by the end of the first reporting period, the intended use of the baseline value – to measure all HHW paint in a similar manner in order to determine a pre-retail program volume – was unattainable.

In its first Annual Report, PaintCare proposed using the second year of data as the baseline number, with the assumption that all HHW programs would have joined the program and HHW volume could be carved out from non-HHW volumes. While nearly all of the remaining HHW programs did join the PaintCare program in the second reporting year, some of the largest ones including Los Angeles (City and County) were not fully on board until the last few months of the second reporting year.

With the inclusion of Los Angeles (City and County) for the entirety of the third reporting year, PaintCare moved closer to a meaningful HHW-based baseline. However, until full-year data is available for all HHW programs, PaintCare proposes to continue to report yearly collection volumes going forward, discuss the year-over-year change, and measure the volume against the expectation of a 7% recovery rate.

F. METHODOLOGY FOR DETERMINING VOLUMES

PaintCare was provided aggregate data by each service provider for total paint reused and processed. For transporters, one of two methods was then applied: (1) For data where the weight of paint processed was provided by recyclers to transporters, standard packaging weight assumptions were made by each transporter and removed from the total weights. Next, a conversion factor of 10 pounds per gallon was applied to weight data to obtain volume. (2) For data where actual volume in gallons was provided by recyclers to transporters, no conversions were applied and the volume data was reported as-is to PaintCare.

For HHW programs that reprocessed latex paint, data provided to PaintCare was the volume processed and then given out to the public. For a reuse program operated by either an HHW program or a reuse store, data was either (1) provided as weights or number of containers and converted to gallons using the site's own methodology or through discussion with PaintCare; or, (2) an estimate of gallons was determined based on physical and visual inspection at the site.

Container Recycling

Paint cans were recycled by processors and by municipal programs conducting bulking or reprocessing activities, when feasible. During this reporting year, 1679 tons of metal and plastic paint cans were recycled.

G. PAINT DISPOSITION AND PROCESSORS

As noted in the Program Plan, either directly or through the program's haulers, PaintCare contracts for processing and proper end-of-life management of all program products. In addition, to support the waste hierarchy of reduce, reuse, recycle, PaintCare encourages and provides financial compensation for reuse programs, and to HHW programs that make recycled-content paint.

As described previously, paint was managed in the following ways during this reporting year:

Latex Paint. Reuse, recycled paint, decorative ground cover, concrete products, energy recovery, and disposal.

Oil-Based Paint. Reuse, energy recovery, and incineration.

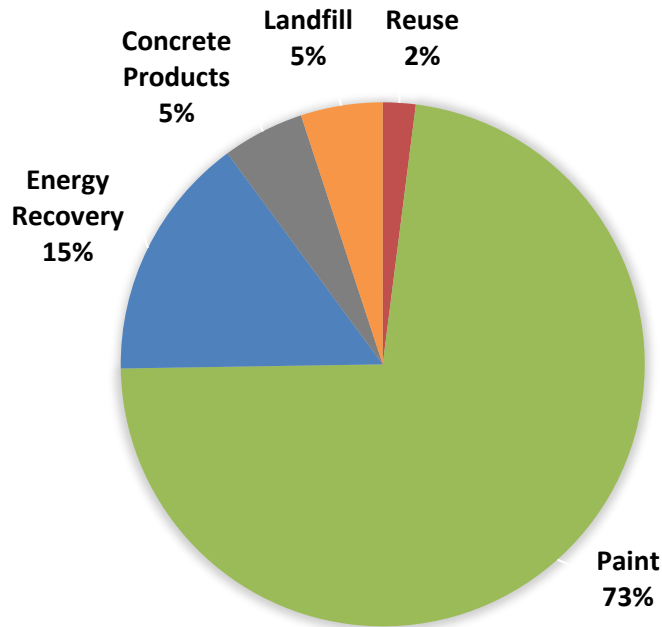

The following table and figures illustrate latex and oil-based paint disposition in this reporting year:

Summary of Paint Disposition Method by Volume and Percentage

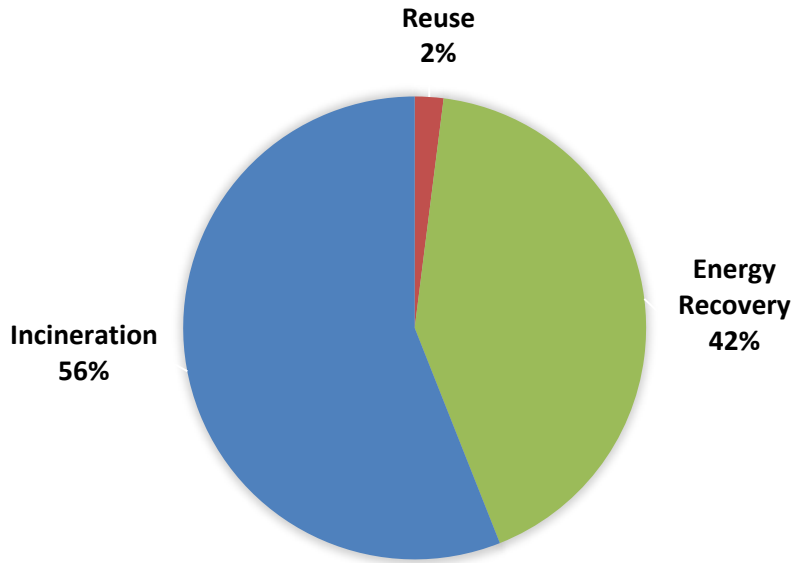

LATEX	GALLONS	PERCENT
Reuse	56,420	3
Recycled Paint	1,634,113	72
Decorative ground cover	3,555	<1
Concrete Products	109,371	5
Energy Recovery	335,623	15
Alternative Daily Landfill Cover	4,500	<1
Disposal	114,646	5
Total Latex	2,258,228	100

OIL-BASED	GALLONS	PERCENT
Reuse	10,571	2
Energy Recovery	189,258	41
Incineration	259,250	57
Total Oil-Based	459,079	100

Latex Paint Management

Oil-Based Paint Management

The following tables list paint processors that received paint directly or through PaintCare’s contracted haulers during this reporting year.

LATEX PAINT PROCESSORS

Acrylatex Coatings & Recycling, Inc.	1000 W Kirkwall Rd, Azusa, CA 91702
Amazon Environmental, Inc.	5101 Raley Blvd, Sacramento, CA 95838
Amazon Environmental, Inc.	779 Palmyrita Ave, Riverside, CA 92507
Coatings Group, LLC	1312 South Allec St, Anaheim, CA 92805
GDB International, Inc.	17396 Mockingbird Rd, Nashville, IL 62263

Giant Cement	654 Judge St, Harleyville, SC 29448
Rineco	819 Vulcan Rd, Benton, AR 72015

Section 5. Financing Mechanism

Statutory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(5) Financing Mechanism. The annual report shall include the total cost of implementing the architectural paint stewardship program and an evaluation of how the program's funding mechanism operated, including whether or not the funding was sufficient to recover, but not exceed, the administrative, operational, and capital costs of the manufacturer or stewardship organization's program. Include a statement that any surplus funds are put back into the program to reduce the costs of the program, including the assessment amount. Any proposed change in the amount of the architectural paint stewardship assessment must be submitted to the department for re-approval (see §18952. Submittals). If a manufacturer or stewardship organization conducts activities that are separate from the implementation and management of the California paint stewardship program, then the annual report shall include documentation on how the collection and expenditure of assessment funds shall be kept separate from other activities of the manufacturer or stewardship organization and the methodology for distribution of shared costs. Consistent with PRC §48705(a)(5), the annual report shall include the following:

(A) Assessment amount per container

(B) Total program cost

(C) Capital costs

(D) Cost(\$)/capita

(E) Cost(\$)/gallon collected

(F) Education/Outreach (% of total program cost)

(G) End-of-life materials management (% of total program cost, with line items for reuse, transportation, recycling, fuel incineration, and proper disposal)

(H) Program administration (% of total program cost, including annual administrative fee for service payments to the department)

(I) Surplus funding, if any, and how it will be applied to reduce program costs

A. FINANCING MECHANISM

PaintCare maintained its financing mechanism and fully covered the cost of continuing to implement the program through this reporting year. The funding system places an assessment (PaintCare fee) on every container of architectural paint sold in California. The fees were set at a rate to cover but not exceed the cost of implementing the California program.

A substantial reserve has been accumulated, due to significant delays that took place in the first two reporting periods to sign up all of the state’s HHW programs. However, at the end of the third reporting period, the number of programs not signed up with PaintCare has diminished substantially.

PaintCare Fee

The program utilizes the following approved fee schedule.

PaintCare Fee Schedule

CONTAINER SIZE	FEE
Half pint or smaller	\$ 0.00
Larger than half pint to smaller than 1 gallon	\$ 0.35
1 gallon	\$ 0.75
Larger than 1 gallon up to 5 gallons	\$ 1.60

Total Program Cost

Total program cost for this reporting year was \$26,244,982.

See Appendix D, the independent financial audit of the California PaintCare program (referred to in the financial audit by its formal name, the California Architectural Paint Recovery Program), for more detailed information on program costs.

Capital Costs

There were no capital costs during this reporting year.

Cost per Capita

The cost per capita during this reporting year was \$0.70.

Cost per capita was derived using the US Census Bureau’s 2010 California population of 37,253,956.

Cost per Gallon

The cost per gallon (processed) during this reporting period was \$9.66.

Note that PaintCare uses and reports processed volume rather than collected volume because not all paint collected during a reporting year has been delivered to a processor and/or processed during the same reporting year.

Education/Outreach

Education/outreach cost for this reporting year was \$3,859,330 – 15% of total program costs.

End-of-Life Materials Management

Transportation cost for this reporting year was \$2,509,533 – 10% of total program costs.

Processing cost for reuse, recycled paint, decorative ground cover, concrete products, alternative daily cover, energy recovery, incineration, and disposal was \$14,195,520 for this reporting year – 54% of total program costs.

Actual cost broken down by specific disposition is not available due to the format of contract pricing with transport and processing vendors. This is because of PaintCare’s requirement to maximize highest-best use (generally considered paint-to-paint recycling at this time) by downstream recyclers – the most expensive management method. The result is that PaintCare pays the same per-pound recycling rate for most of the paint collected through the program – the highest rate charged by each vendor – regardless of the ultimate disposition.

It should be noted that PaintCare does not intend to change its paint management methods and is thus unlikely to ever be able to provide actual disposition cost data. The costs for each disposition method are estimated below:

DISPOSITION METHOD	ESTIMATED COST	% OF TOTAL PROGRAM COST
Recycled Paint	\$ 8,726,772	33.25
Energy Recovery	2,850,644	10.86
Incineration	1,336,910	5.10
Disposal	612,253	2.33
Concrete Products	584,082	2.23
Reuse	46,884	0.18
Alternative Daily Landfill Cover	18,990	0.07
Decorative Ground Cover	18,985	0.07
Total	\$ 14,195,520	54.09

Administrative Costs

Administrative costs (also called indirect costs or corporate expenses) are those that are shared by all states that have passed a paint stewardship law, such as salaries for DC-based corporate staff who work on activities for all states. Other corporate expenses include construction of data management systems, legal fees, and general communications.

The corporate allocation for each PaintCare state is the proportion of its population relative to the population of all PaintCare states combined. California’s share of the corporate activity allocation was 64% at the end of this reporting period. Administrative costs were \$1,964,196. This represents 7% of total program costs.

Service payments to CalRecycle are not presented as an administrative expense in the audited financial statements, but rather as a direct California operational expense. Payment to CalRecycle for this reporting year was \$355,509. This amount represents 1% of total program cost.

Surplus Funding

The net assets or “accumulated surplus” of the California program at the end of this reporting year was \$35,114,056.

To illustrate the accumulate surplus, the following table summarizes program revenue and expenses in this reporting year.

Financial Summary

REVENUE	
Recovery fees	\$ 33,834,028
Total revenue	33,834,028
EXPENSES	
Operations	24,280,786
Administrative	1,964,196
Total expenses	26,244,982
Investment allocation	62,378
Change in net assets	7,651,424
Net assets, beginning of this reporting year	27,462,632
Net assets, end of year this reporting year	\$ 35,114,056

B. RESERVE POLICY

PaintCare has a Reserve Policy to define and quantify the reserves in each state program. The policy defines reserves as “net assets” and establishes a minimum threshold of 16% of annual expenses (or, at least two months of operating expenses). This accumulated balance allows PaintCare programs to continue to operate in times of either higher than expected paint collection or lower than expected paint sales (revenue) – or a combination of the two. Reserves or net assets represent the accumulated surplus/deficit of the program.

In October 2014, the PaintCare Board of Directors amended the reserve policy to specify a target reserve amount of 50% of a state program’s annual expenses, with a maximum amount of 75%. The previous target was 25% (or, three months of expenses).

At the end of this reporting year, the program had exceeded its budgeted surplus. However, despite the large surplus, until a consistent level of paint collection is reached, it is premature to consider changes to the current fee structure. The California program is still in the growth phase and PaintCare anticipates increasing collection volumes and costs for several years as awareness about the program grows and additional sites join the program.

Five-Year Projections

In the 2014 Annual Report, PaintCare noted that the program anticipates reaching consistent collection levels by the end year four. However, after observing that the Oregon program – the oldest PaintCare state – has continued to increase its volume into the fifth year, PaintCare is reluctant to reach conclusions about the length of time needed to reach program stasis. To ensure that the excess surplus will be brought down, PaintCare also committed to projecting expenses and growth for the next five years (with inclusion of the remaining HHW programs) and include the projection in this annual report. The following assumptions were made:

- Program revenue remains approximately the same as year three revenue
- Volume will increase ten percent between years three and four, and eight percent each year after
- Prices will increase 2.5% each year

	Five Year Projections					
	YEAR 3 FY15	YEAR 4 FY16	YEAR 5 FY17	YEAR 6 FY18	YEAR 7 FY19	YEAR 8 FY20
Total revenue	33,896,406	34,200,000	34,200,000	34,200,000	34,200,000	34,200,000
Total expenses	26,244,982	29,551,526	32,713,539	36,213,887	40,088,773	44,378,272
Change in net assets	7,651,424	4,648,474	1,486,461	(2,013,887)	(5,888,773)	(10,178,272)
Net assets, beginning of year	27,462,632	35,114,056	39,762,530	41,248,992	39,235,104	33,346,331
Net assets, end of year	35,114,056	39,762,530	41,248,992	39,235,104	33,346,331	23,168,058

This result in 6.2% recovery rate in year eighth, with the reserve reduced to 50% of expense.

C. INVESTMENT ACTIVITY

Beginning in December 2014, PaintCare (as a whole) invested a portion of its accumulated surplus in a financial portfolio. At this time, PaintCare maintains its investments for all programs in a single portfolio. The ownership interest in the investment portfolio is allocated among state programs based on their relative net asset balances.

State programs with positive net asset balances have a claim on the assets invested in the portfolio. State programs with negative net asset balances carry a liability representing an amount due to the portfolio. For those state programs that have a positive net asset balance, the rise in value is recorded as investment income and an increase to the amount due from PaintCare. For those state programs with negative net asset balances, the rise in value of the portfolio is recorded as interest expense and an increase to the amount due to PaintCare.

Section 6. Education and Outreach

Statutory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(6) Education and Outreach. Describe educational and outreach activities in context of those identified in the stewardship plan. Provide a description of educational materials that were provided to retailers, consumers, and contractors during the reporting period and provide electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), if applicable. These education and outreach materials may include, but are not limited to, any of the following per PRC §48703(e):

(A) Signage that is prominently displayed and easily visible to the consumer.

(B) Written materials and templates of materials for reproduction by retailers to be provided to contractors and consumers at the time of purchase or delivery or both.

(C) Promotional materials or activities, or both, that explains the purpose of paint stewardship and the means by which it is being carried out.

(D) Links to website(s) created and maintained by the stewardship organization.

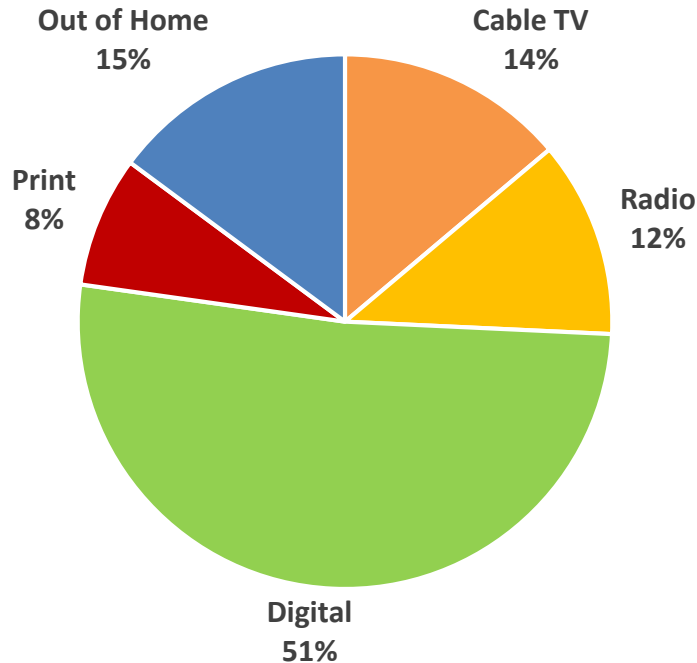

INTRODUCTION

PaintCare's education and outreach efforts focus on building awareness of the program and encompass four primary messages: reduce, reuse, recycle – which PaintCare has modified to “Buy right, Use It Up, Recycle the Rest” – and proper disposal.

PaintCare is committed to providing robust and successful education and outreach using a variety of communication tools. The efforts are illustrated in this section.

PaintCare's marketing firm for the California program is Civilian Agency (formerly AdEase) of San Diego, California.

PaintCare focuses on Demographic Market Areas or DMAs to customize the mix of media purchasing to the populations of each DMA. PaintCare, through its marketing firm, developed plans for each of the 14 DMAs incorporating all 58 counties in California. The analysis considered different audiences in each market, and determined the appropriate mix of media to reach the most people. The recommendation and the overall media mix for the calendar year 2015 is shown below.

A. SIGNAGE DISPLAYED TO CONSUMER

PaintCare developed a number of signs for drop-off sites to help them let the public know about the program, screen program products, and address concerns they have about illegal dumping. Drop-off sites may order the following signs. All signs are available in Spanish. Some signs are bilingual (English/Spanish).

DROP OFF SIGN
Intended for the front of a store to let the public know that they can drop off paint.

PROGRAM PARTNER
For HHW programs and transfer stations to let the public know that they can drop off paint.

PROGRAM PRODUCTS
Most often used near paint bins as a reference for staff to use to screen program products.

COMBINATION
To Inform the public that the site accepts paint and to provide a program products list.

NO DUMPING
To post outside in areas where the public may be inclined to leave paint after hours.

WAIT FOR ASSISTANCE
For sites that prefer customers notify staff before starting to bring paint from their vehicles.

B. WRITTEN MATERIALS (PRINTED MATERIALS)

PaintCare distributes printed point-of-sale materials for retailers to use to educate customers about the PaintCare program. The trifold brochure describes how the program works, including an explanation about the availability of drop-off sites, fees and other basic information. The brochure is now available in Chinese, Korean, Russian, Spanish, and Vietnamese at the request of retailers. The minicard is a quick reference for customers interested in PaintCare's phone number or website to find a drop-off site. In this reporting year, PaintCare also developed a counter mat with the same information as the poster that was well received by retailers.

Program Poster, Brochure, Minicard, Counter Mat, and Painting Contractors and LVP Fact Sheets

PaintCare provides two fact sheets for retailers to distribute to contractors and other commercial customers. Retailers can order any number of paper copies and they are also available for download from PaintCare’s website. The fact sheet for painting contractors was developed for retailers to help educate their customers at the start of the program and is still used. In this reporting year, it was slightly revised and translated into Vietnamese at the request of a retailer. The LVP service fact sheet explains how to request a LVP for those with at least 300 gallons of paint.

Retailers are able to order additional materials as needed, at any time. All publications mentioned above are included in Appendix E. Electronic versions of these publications and others are available from PaintCare’s website.

PaintCare also worked with two major retailers during this reporting year. Lowes developed a new co-branded counter sign; Home Depot updated the poster that hangs on shelves in the paint aisles.

C. PROMOTIONAL MATERIALS OR ACTIVITIES EXPLAINING PRODUCT STEWARDSHIP

Facebook

PaintCare’s Facebook presence increased significantly during this reporting year. In the summer 2014, PaintCare started a Facebook account for the Oregon Program and as of October 2014, it had 1000 followers. In November, the account was changed from a state-specific account to a national account and managed by the Civilian Agency. As of June 1, 2014, the account had almost 20,000 followers. The step increase at the beginning of 2015 coincides with the video blog contest described below.

PaintCare’s Facebook Followers

Press Releases and Earned Media

PaintCare did not issue any traditional program-wide press releases, but did issue a few smaller releases to the local papers in areas where new sites were added to the program. Instead, PaintCare through its marketing firm issued press releases about a video blog contest that was held in January. The video blog contest was used to generate interest in PaintCare and increase PaintCare's social media presence. The bloggers created three videos. One video showed old paint aspiring to be used, another was a spoof on a horror film in which a father finds his son playing with leftover red paint, after thinking the house was splattered with blood, and the winning film, Spring Cleaning, shows neighbors telling someone that paint can be recycled and should not be thrown in the trash. The videos are posted on PaintCare's webpage.

Commercial Radio

From October through December, radio spots aired in the Sacramento area on three stations News/Talk radio, Adult Contemporary, and Classic Rock. From April-June, additional radio spots were aired in Sacramento at the recommendation of PaintCare's marketing firm. (Digital radio was used in other parts of the state.)

Public Radio

PaintCare ran sponsorship messages on public radio in 11 markets throughout the year. Each station has slightly different requirements for messages. Two examples are below:

- KQED, San Francisco, July – December 2014: *Local underwriting is provided by PaintCare, the California Paint Stewardship Program, with more than 650 drop off locations in California. Recycle with PaintCare. More at PaintCare dot org.*
- KPCC, Los Angeles, January – June 2015: *KPCC supporters include PaintCare, a non-profit organization representing paint manufacturers. Through PaintCare, the paint industry has set up 700 locations in California where residents and businesses can drop off leftover paint, stain and varnish for recycling. Paint Care is working to build an environmentally responsible and accessible paint recycling program throughout California. Online at Paint Care dot org. "Buy Right, Use It Up, Recycle the Rest. With PaintCare."*

Print Advertising

Shared Mail

PaintCare started to use Red Plum in the fall 2014. Red Plum is a shared mail company available throughout most of California that provides an excellent alternative to newspaper advertising. In most cases, Red Plum advertising can be more targeted than newspapers, because clusters of ZIP codes are grouped together. A different ad design was used to list the PaintCare drop-off sites located in the same ZIP codes as a flyer's distribution. Below is an example of the Red Plum advertisement used in Oxnard and Ventura.

PAINT RECYCLING MADE *easy*

Do you know where to recycle your paint?

There are hundreds of PaintCare sites in California where households and businesses can recycle unwanted paint, stain and varnish all year round, including these locations in your area:

OXNARD DUNN-EDWARDS 685 E Ventura Blvd (805) 981-2990	VENTURA SHERWIN-WILLIAMS 4005 E Main St (805) 658-2132
SHERWIN-WILLIAMS 2011 Auto Center Dr (805) 278-9387	GOLD COAST RECYCLING 5275 Colt St (805) 642-9236 Mon thru Fri 5 am - 7 pm Sat 5 am - 5 pm <i>Residents of Ventura County Only</i>
VISTA PAINT 2100 Outlet Center Dr (805) 983-6436	

TO FIND OTHER DROP-OFF LOCATIONS:

www.paintcare.org

(855) 724-6809

All PaintCare sites accept at least 5 gallons per visit (some take more). Please call ahead to confirm business hours and ask if they can accept the type and amount of paint you would like to recycle. Leaking, unlabeled and empty containers are not accepted.

Newspaper

In parts of the state where shared mail advertising through Red Plum was not available, PaintCare placed ads with site listings in newspapers, such as in the first ad shown below used in the Chico/Oroville area

In six markets, where radio or other advertising options were limited or unavailable, PaintCare ran general ads in 11 newspapers without site listings.

PaintCare also used newspaper advertising to advertise each PaintCare event held during this reporting year, such as the event held in Hemet in March.

PAINT RECYCLING MADE *easy*

Do you know where to recycle your paint?

There are hundreds of PaintCare sites in California where households and businesses can recycle unwanted paint, stain and varnish all year round, including these local sites:

CHICO		OROVILLE	
HABITAT FOR HUMANITY 220 Meyers St (530) 343-7423	KELLY-MOORE 1221 Mangrove Ave (530) 345-2466	BETTER DEAL EXCHANGE 1845 Mitchell Ave (530) 533-5600	VISIONS ENVIRONMENTAL 4801 Feather River Blvd (916) 564-9121
ORCHARD SUPPLY HARDWARE 231 W East Ave (530) 332-9226	SHERWIN-WILLIAMS 2412 Cohasset Rd (530) 342-0147	<i>This site accepts large volumes. Call ahead if more than 200 gal.</i>	

TO FIND OTHER DROP-OFF LOCATIONS:
www.paintcare.org
(855) 724-6809

All PaintCare sites accept up to 5 gallons per visit (some take more). Please call ahead to confirm business hours and ask if they accept large volume containers are not accepted.

PAINT RECYCLING MADE *easy*

Do you know where to recycle your paint?

There are now hundreds of PaintCare sites in California where residents and businesses can recycle unwanted paint, stain and varnish all year-round. Most locations are paint stores.

FIND A DROP-OFF LOCATION: www.paintcare.org

(855) 724-6809

All PaintCare sites accept at least 5 gallons per visit (some take more). Please call ahead to confirm business hours and ask if they can accept the type and amount of paint you would like to recycle. Leaking, unlabeled and empty containers are not accepted.

Recycle with PaintCare

FREE PAINT-ONLY Drop-Off Event

Saturday, March 28
9 AM - 1 PM

City of Hemet Corporation Yard
3777 Industrial Ave • Hemet, CA 92545

PaintCare is holding a special paint drop-off event at the City of Hemet and surrounding communities. Households and businesses from any place in California may bring most types of latex and oil-based paint, stain or varnish.

For details on what we accept and limits on the amount of oil-based paint accepted from businesses, visit www.paintcare.org/hemet or give us a call at (855) 724-6809

Leaking, unlabeled, and empty containers are not accepted.

We accept paint from BUSINESSES too!

Magazines

The following PaintCare ad ran in the two groups of magazines in November 2014 covering the major markets statewide. AAA magazines includes Westways and Via. These magazines were also circulated in southern Oregon; therefore, the ad text mentioned the total number of sites in both states as shown below on the left. MNI Publications includes Country Living, Elle Décor, House Beautiful, More, Real Simple, This Old House, and Traditional Home. Examples of magazine advertisements are shown below.

Television

PaintCare used three video commercials for use on TV and online. In September 2014, PaintCare completed production of a television commercial, titled *Buy Right* showing a couple discussing how much paint to buy and then asking for advice at their paint store. PaintCare also used two videos from the previous year: *Use It Up* showed a woman painting small projects ending with the line "When you run out of ideas for using up leftover paint, recycle the rest with PaintCare." The third video, *Recycle the Rest*, showed a man taking paint from his garage to a paint store for recycling.

During this reporting year, PaintCare started production on a fourth video (about buying the right amount of paint). The completed commercials are posted at www.paintcare.org/media. In the fall, 2014 Cable TV was used in four rural markets where PaintCare's target audience consists of heavier TV viewers. Stations include AMC, CN, ESPN HGTV and FOOD.

Digital Pre-Roll Video and Banner Ads

PaintCare dedicated more resources to online/digital advertising during this reporting year. Two versions of the *Use It Up* television commercial (15 and 30 seconds) mentioned above were used as "pre-roll" videos or imbedded into online advertising. Online banner ads in a variety of standard dimensions were used in all markets throughout the year. A few examples are shown here:

Billboards

Throughout the year, PaintCare ran billboards in several markets, including Chico, Fresno, Los Angeles, Sacramento, San Francisco, and Yuma markets. Examples of two billboard designs used during this reporting year are shown on the following page.

Cinema

PaintCare's *Use It Up* video commercial was used in movie theaters just before the movie started (before previews) in six markets, Los Angeles, Monterey, Santa Barbara, San Diego, Francisco, and Yuma markets in 2123 theaters on 1521 screens in October 2014

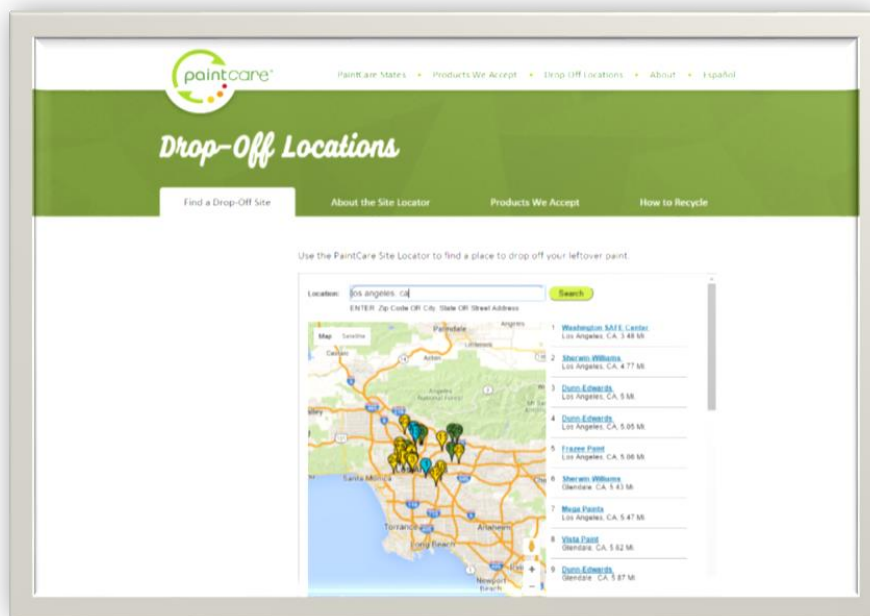

D. WEBSITE

Nearly all PaintCare advertising and outreach efforts direct the public to PaintCare's website for more information and to find a local PaintCare site. The website is easy to navigate and organized by state – and within each state by tabs (Everyone, Contractors, Retailers, Municipalities, and Official Docs). The tab for contractors was added during this reporting year to make it easier for painting contractors, one of PaintCare's critical target audiences, to find information. A screen shot of the California page is shown on the following page.

The California section of PaintCare’s Webpage

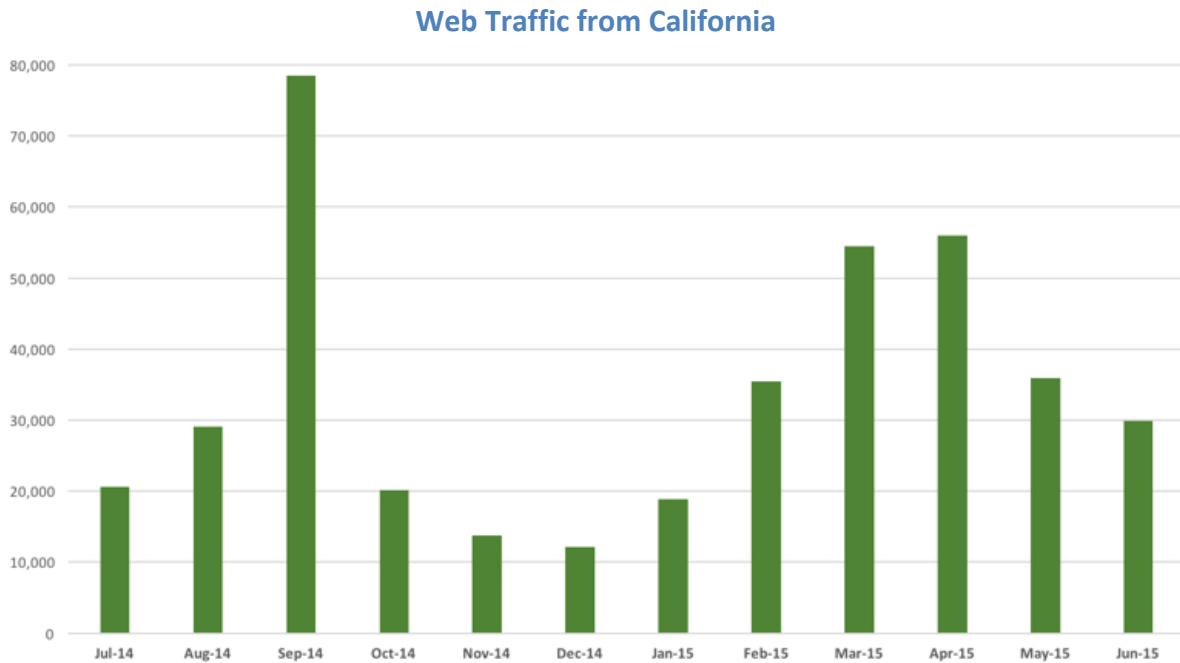

PaintCare’s site locator tool covers the entire United States. In PaintCare states, the searches result in only PaintCare site partners. In non-PaintCare states, the tool results in all known government and other paint recycling programs. PaintCare’s site locator tool, shown below, can be used to find the closest paint drop-off site to any address. The site locator is the most visited page on PaintCare’s website.

PaintCare’s Site Locator Tool

Website traffic from peaked in September 2014, coinciding with newspaper advertising and a business-to-business digital campaign.

The percentage of website users from California is consistently between 55 and 60 percent of the total users. Less advertising was conducted in November- January due to the holiday season. The large increase in users in April is attributed to the spring advertising.

E. OTHER OUTREACH

Joint Outreach Projects with Local Government

PaintCare welcomes the opportunity to work with local HHW Programs on outreach projects. PaintCare will provide creative support and funding in the form of reimbursement for projects that are preapproved. The Joint Outreach Project fact sheet and form for requesting support are included in appendix E. During this reporting year, PaintCare supported the following requests for joint projects.

- Alameda County: Direct mailing (postcard) with Alameda County's Household Hazardous Waste Program
- California Product Stewardship Council, on behalf of Mariposa County: Advertisement in program for Butterfly Festival and support of calendar with pages dedicated to paint, oil and other environmental topics (funding in part by a CalRecycle grant)
- City of San Diego: Provided artwork for bill insert (no financial reimbursement requested)
- Shasta County: Provided artwork and financial support for printing Fall newsletter
- Yolo County: Provided flyer for April HHW event

F. AWARENESS SURVEY

PaintCare conducted an online baseline “Paint Usage and Disposal Survey” in June 2013, using Survey Monkey. The survey was repeated in June 2014 and again in June 2015. A summary of results from the 2014 and 2015 surveys are included in Appendix E. This survey is used to evaluate changes over time in the level of awareness by the public about paint recycling options. PaintCare is especially interested in the questions related to how much paint people store in their homes and whether they know where to recycle unwanted paint. Highlights are below.

- How much paint is being stored in homes? PaintCare’s objective over time is for less paint to be stored in homes across the state. Last year we reported that in general respondents indicated that they were storing less paint in their homes in 2014 than in 2013. Although it may be too early to characterize these results as a trend or to attribute it to PaintCare, we again have found that respondents indicated that they are storing less paint this in 2015 than in 2014.
- Do people know what is illegal/improper when it comes to disposing of paint? PaintCare’s objective over time is that fewer people would answer that they would put liquid paint in trash or pour it down the drain. The difference between the two surveys was insignificant last year, but this year responses show that half the number of respondents indicated that they preferred to dispose of leftover paint in the trash (either liquid or dried out) or store it in their homes.
- There was a drop in the number who said that they had or would take paint to an HHW facility and an increase in the number who would take it to a paint store. Use of and awareness of paint stores as a place to take unwanted paint is a key indicator of awareness of the PaintCare program. The number of respondents who indicated that they would take paint to a store more than doubled from last year.
- The number of people indicating that they know paint can be recycled remained unchanged at 37% and the number of people who said they knew where to take paint actually decreased. These two results were unexpected because so much of PaintCare’s advertising uses the word “recycling” and indicates where to take it or how to find a drop-off location.

Section 7. Audits

Statutory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(7) Audits. The annual report shall include an independent financial audit of the California Architectural Paint Recovery Program funded from the paint stewardship assessment. The audit shall be conducted in accordance with auditing standards generally accepted in the United States of America, and standards set forth in Government Auditing Standards issued by the Comptroller General of the United States. The financial audit submitted to the department shall be prepared by an Independent Certified Public Accountant (CPA). The CPA shall not perform non-audit services for the manufacturer or stewardship organization that would impair independence as defined in the Government Auditing Standards issued by the Comptroller General of the United States (e.g., accounting services, development of internal controls, management decisions). The independent financial audit shall include:

(A) California Architectural Paint Recovery Program financial statements, as required by GAAP.

(B) An opinion on the manufacturer or stewardship organization's compliance with the financial aspects of PRC §48700 and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations.

(C) Findings and recommendations as they relate to the financial aspects of the Architectural Paint Recovery Program.

(D) Management Letter, if issued, by the manufacturer or stewardship organization's CPA.

A. AUDIT

An independent financial audit was conducted of the California PaintCare program by Rogers & Company PLLC. This independent CPA firm conducted the audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that the firm plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. The audit process includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. The audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. In Rogers & Company's opinion, the financial statements of the California PaintCare program present fairly, in all material respects, the financial position as of June 30, 2015, and the changes in its net assets and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Please see Appendix D for the independent financial audit report of the California PaintCare program. The audit addresses all requirements of Title 14, Section 18954(a)(7) of the California Code of Regulations as listed at the top of this section.

PaintCare® Drop-Off Sites

Legislation

In 2010, Governor Schwarzenegger signed Assembly Bill 1343 creating the California Architectural Paint Recovery Program. The new law requires paint manufacturers to develop and implement a program to collect, transport, and process post-consumer paint and other architectural coatings to reduce the costs and environmental impacts of their disposal in California. The program's primary goals are to: (1) reduce the generation of post-consumer architectural coatings; (2) promote reuse/using up post-consumer architectural coatings; and (3) ensure proper recycling and disposal at their end-of-life.

About PaintCare

The law allows for the formation of a non-profit stewardship organization to implement the program. To serve this purpose, PaintCare Inc. was formed by the American Coatings Association (ACA), the non-profit trade association for the paint and coatings industry. PaintCare submitted a management plan to the California Department of Resources Recycling and Recovery (CalRecycle) on behalf of paint manufacturers in April 2012. The Department approved the Plan on July 19, 2012. The California program began 90 days after Plan approval – on October 19, 2012.

Various studies have demonstrated that between 3 and 10% of all paint purchased is “leftover” – goes unused. To capture this paint, PaintCare will pay for storage containers, transportation and recycling/proper disposal for leftover paint delivered to contracted collection locations like yours. PaintCare will also conduct extensive public outreach about the Program, and promote your store as a Drop-Off Site.

Before the PaintCare Program (“Program”), California residents and businesses recycled or disposed of paint through government-sponsored household hazardous waste (HHW) programs or through a hazardous waste management company. The PaintCare Program increases recycling opportunities for California consumers by partnering with hundreds of retail and reuse stores throughout the state to serve as paint Drop-Off Sites.

PaintCare Provides

Once a contract is established between PaintCare and the Drop-Off Site, the Program will provide the following:

- Paint storage Collection Bins (usually 1 cubic yard containers)
 - Labels for paint Collection Bins
 - Spill kit (upon request)
 - Recordkeeping forms and/or log book
 - Poster identifying your site as a PaintCare Drop-Off Site
 - Educational print materials for your customers
-

**PaintCare Does
Not Provide**

The Program does not provide personal protective equipment (PPE) or gear that may be required by the U.S. Occupational Safety and Health Administration (OSHA) or California occupational and safety regulations for your place of work. It is your site's responsibility to provide appropriate PPE for your workplace.

PaintCare has no authority and disclaims any responsibility to manage, direct, or supervise your employees, representatives, or agents, including how they perform the work and achieve compliance with applicable Law. PaintCare does not have responsibility for making day-to-day and critical decisions regarding the Services that you provide.

**Who Can Be
a Drop-Off Site**

PaintCare Drop-Off Sites may be any of the following:

- Municipal household hazardous waste collection facilities (permanent and temporary)
 - Paint retailers including paint, hardware and home improvement stores, and reuse stores (i.e., stores that sell salvaged or excess building materials)
 - Waste transfer stations, landfills, public works yards, and other appropriate, publicly accessible facilities
-

General Guidelines for Drop-Off Sites

Below are general guidelines for a typical Drop-Off Site. However, we recognize that each location will have unique logistical and operational considerations. PaintCare Drop-Off Sites must make their own decisions and use their best judgment to operate in the safest manner possible in accordance with applicable Law. To be a Drop-Off Site, you must:

- Accept Program Products from participants during your regular advertised or posted operating hours
- Have appropriate signage that informs the public of the hours of operation
- Display the PaintCare poster to identify you as a Drop-Off Site – this poster should be posted in a highly visible area, preferably at the entrance
- Have adequate space, staffing and training to collect and store Program Products and consolidate them only in Drop-Off Sites provided by or approved for use by PaintCare or its contractors to hold and transport Program Products
- Provide a secure space for empty and full Collection Bins
- Pack only Program Products into Collection Bins (see Section 3 for a description of Program Products)
- Schedule shipments of Program Products from your Drop-Off Site
- Do not accept, handle, pack, or ship Non-Program Products, including unacceptable containers (see Section 3 for list of Non-Program Products and unacceptable containers) because the Drop-Off Site may assume liability for Non-Program Products if it engages in these activities under California Health & Safety Code § 25217
- Maintain records
- Train staff to be familiar with the requirements and practices of this guide
- Have adequate comprehensive and/or commercial general liability insurance to cover potential risks and liability associated with activities on premises
- Know and comply with applicable federal, state and local laws as they pertain to your Drop-Off Site and train staff accordingly – these may include zoning requirements for your activities, state permit requirements (air, hazardous waste, water quality, solid waste, storm water) and OSHA requirements
- For additional information on state law regarding collection of the Program Products, visit the Department of Toxic Substance Control’s website at www.dtsc.ca.gov

Storage Area for Collection Bins

Establish a sufficient, dedicated storage area for Collection Bins and Program Products.

Collection Bins must include secondary containment to contain liquids in the event a can leaks while in storage; however, they should also be placed on an impermeable surface (e.g., concrete, asphalt, sealed wood floor) whenever possible.

Store Collection Bins away from ignition sources.

Place Collection Bins away from storm drains and floor drains.

Protect Collection Bins from temperature extremes by storing them inside or under cover if possible.

Mark the Collection Bin with the date the first Program Product is placed in it and ensure that no Collection Bin with content is stored for more than six (6) months, as required by applicable Law.

If you store Collection Bins outdoors, you may need approval from your local fire or hazardous materials oversight agency.

Storage area information should be included in your Hazardous Materials Business Plan (HMBP) if required by your local fire or hazardous materials oversight agency.

Security

The Drop-Off Site should be secured and locked when it is closed or not attended.

Only Drop-Off Site staff should have access to the Collection Bins and storage area.

Use and Maintenance of Collection Bins

Keep Collection Bins closed except when adding Program Products.

Maintain enough space around Collection Bins to inspect for leakage and emergency access.

Do not overfill Collection Bins.

Pack 5 gallon buckets on the bottom layer of the Collection Bins for stability.

Pack all Program Products (cans, buckets, bottles) upright and as tight as possible in the Collection Bins to protect contents from shifting and leaking in transit. Use safe practices for handling, storage and management of Program Products.

Use good housekeeping standards; keep paint storage areas clean and orderly.

Accepting Program Products

What Is Architectural Paint

It is an important responsibility for PaintCare Drop-Off Sites to only accept Program Products. Section 3 includes the primary examples of architectural paint products accepted by the PaintCare Program (“Program Products”) and paint or paint-related products not accepted by the PaintCare Program (“Non-Program Products”). Drop-Off Sites that accept Non-Program Products will be responsible for managing all Non-Program Products at the Drop-Off Sites’ expense.

Generally, architectural paints include latex and oil-based house paint, stains and clear coatings. The Program excludes (a) industrial maintenance coatings, labeled “for industrial use,” or other appropriate wording; (b) Original Equipment Manufacturer coatings or coatings used for OEM applications; and (c) specifically excluded Specialty coatings.

Architectural paint is classified as either latex (water-based) or oil-based (alkyd) and the classification is important in order to decide how the product should be handled and recycled. Being able to tell the difference between latex and oil-based products is also important in determining which types of businesses can use the PaintCare Program (see next two sub-sections).

Who Can Drop Off Program Products

The Program accepts paint from the following:

Households. Residents may drop off any Program Product.

CESQG Businesses. These are businesses that generate less than 100 kilograms (about 27 gallons) of hazardous wastes per month. These businesses are called CESQGs for “Conditionally Exempt Small Quantity Generators.” They are often small painting contractors or commercial property owners, but they can be any type of business as long as they do not generate more than 27 gallons of hazardous waste per month. CESQG businesses may drop off any Program Product.

SQG and LQG Businesses. These are businesses that generate more than 100 kilograms (about 27 gallons) of hazardous waste per month. These businesses are either Small Quantity Generators or SQGs (generate 100-1000 kilograms of hazardous waste per month) or Large Quantity Generators or LQGs (generate more than 1000 kilograms of hazardous waste per month) and are typically larger painting contractors or big manufacturing businesses. These businesses are more heavily regulated and they must use a hazardous waste management company to manage their hazardous waste, including oil-based paint. They may, however, drop off latex-based Program Product at PaintCare Drop-Off Sites.

Latex Paint is Special. When post-consumer latex paint is intended for recycling, as it is when accepted at PaintCare Drop-Off Sites, it may be considered by a special California law to be handled and considered “non-hazardous waste.” Therefore SQG and LQG businesses may drop off latex paint at Drop-Off Sites, even though they may not drop off oil-based paint.

**How to Know
If a Business
Qualifies**

Each business is responsible for determining its own generator status under the applicable Law.

When a business has oil-based paint to drop off, they must sign the CESQG Certification log, included in Appendix A, to verify that they are CESQGs and therefore qualified to use the Program for oil-based paint. The log includes an explanation of what types of businesses qualify to use the Program. (If a business has only latex paint they do not need to sign anything.)

Once signed, you may accept up to 27 gallons of oil-based paint from a CESQG.

Certification logs may be reviewed by PaintCare or government agencies and compared with a list of registered hazardous waste generators to see that only CESQG businesses are using the Program for their oil-based paint.

**Can Drop-Off
Sites Charge
Fees?**

Program participants should never be charged a fee; as a PaintCare Drop-Off Site you may not charge residents and qualifying businesses that are dropping off Program Products.

What Is Acceptable

Before accepting products from participants, Drop-Off Site staff must (1) check the product label to verify that it contains a Program Product, and (2) check the condition of the container for acceptance in the Program.

Acceptable Containers and Unacceptable Containers

Acceptable

- The Program Product must be in its original container
- The container must be labeled as containing one of the designated Program Products listed below
- The container must be in good condition and not leaking
- The container must be 5 gallons in size or smaller

Not Acceptable

- The container is not original (e.g., paint was transferred into a jar)
- The container does not have an original label
- The container is leaking or has no lid
- The container is larger than 5 gallon
- The container is empty

Program Products and Non-Program Products

Acceptable Products (Program Products)

- Interior and exterior paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Unacceptable Products (Non-Program Products)

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Section 4

Operations

Greet the Consumer

Participants must be assisted and supervised when they come to drop off Program Products. Drop-Off Site staff should greet participants and verify eligibility of the participant and their leftover paint products as Program Products.

Examine the Product

Screen products to ensure that only the following are accepted:

- Container is 5 gallons in size or smaller
- Original container has original label that is readable
- Container had a lid and is not leaking
- Latex paint from anyone
- Oil-based paint from households and CESQG businesses
- IMPORTANT: Never open or allow the participant to open a program product container

Screen products to ensure that the following are not accepted:

- Non-Program Products
 - Oil-based paint from SQG or LQG businesses
-

Drop-Off Site Limits

While PaintCare Program intends to collect as much Program Product as is available, we recognize that your Drop-Off Site may have storage limitations. PaintCare Drop-Off Site may voluntarily limit the amount of Program Products they accept from a customer. We recommend setting a limit of 5-gallons per participant per visit, though you may accept more at your discretion.

If your Collection Bins are completely full, inform the participant that you are temporarily unable to accept Program Products and redirect them to the nearest alternative PaintCare Drop-Off Site (see: www.paintcare.org) or ask them to come back at a later date. Contact the PaintCare Hauler immediately to have your Collection Bins picked-up and replaced with empties.

If you have a participant with a significant amount of Program Products that your location cannot manage, contact PaintCare directly for additional assistance. We may direct the participant to another PaintCare Drop-Off Site that can manage the large load or offer a direct pickup.

Refusing an Unacceptable Product

Do not accept any containers that are larger than 5 gallons, empty, unlabeled or leaking, and do not accept Non-Program Products from any participant.

When refusing a Program Product, Drop-Off Site staff must:

- Explain why the Program Product cannot be accepted (not part of Program, unlabeled, etc.)
- Refer the individual to the local municipal HHW collection program, garbage hauler or health department for assistance; HHW facilities can typically accept Non-Program Products from households and CESQG businesses

Storing and Packing Collection Bins

Place Program Products into Collection Bins immediately upon acceptance to minimize the possibility of spills.

Place 5 gallon containers at the bottom of Collection Bins to provide stability for second layer of 1 gallon and smaller cans.

Place all Collection Bins upright to prevent leaks or spills.

Pack the Program Products as tightly as possible inside the Collection Bins. This helps to keep paint products from shifting during transit.

If being stored outside, keep lids on Collection Bins to keep out rain.

Make sure the Collection Bin lid sits flat on top the Collection Bin.

All Program Products must be stored in Collection Bins at all times.

Never overfill Collection Bins.

Contact your local fire and/or hazardous materials oversight agency to find out if you need a Hazardous Materials Business Plan (HMBP) specific to your Drop-Off Site to accept and store Program Products.

Closing a Drop-Off Site

Please notify PaintCare in writing at least 60-days before stopping collection services to give us adequate time to remove your information from Program promotional materials.

As soon as possible, remove the poster (“Recycle Your Paint Here”) from the Drop-Off Site and post a new sign at the entrance to the site to notify the public that you will no longer be accepting Program Products.

Before your last pick-up, verify that all Program Products and Collection Bins are returned to PaintCare.

Working with Haulers

PaintCare contracts with public and private transporters for the delivery of supplies, empty Collection Bins and pick-up of full Collection Bins.

Scheduling the Hauler to Pick Up Collection Bins

When half of your Collection Bins are full or you anticipate that your Collection Bins will be full within fourteen (14) days in rural areas and five (5) days in urban areas, call your Hauler to schedule a pickup. The name of your Hauler and the contact information is written on the cover of this guide.

When establishing an appointment for pick-up, please indicate:

- That your facility is a PaintCare Drop-Off Site
 - Name of Drop-Off Site and address
 - Your name
 - Your phone number
 - Number of full Collection Bins to be picked up and the number of empty Collection Bins needed for replacement
-

Preparing Collection Bins for Removal

On the scheduled pickup day, Collection Bins should be readily accessible to the Hauler for quick and efficient loading. The Hauler will bring shipping documents and Collection Bin labels. Please assist the Hauler with Collection Bin loading and off-loading and keep a copy of the shipping documents for your records.

Inspections and Records

Inspections

Drop-Off Site staff should:

- Inspect the Drop-Off Site and storage area to ensure Collection Bins are closed properly and the area is secured
- Inspect Collection Bins for damage and report any damaged Collection Bins to PaintCare for replacement or repair
- Inspect Collection Bin for damaged or missing labels and correct as necessary
- Inspect the spill kit monthly to make sure that it is complete and not damaged. Contact PaintCare’s hauler to request additional spill kit supplies. Materials will be provided at the next Collection Bin pickup.

Record Keeping

The following records are to be maintained for a minimum of 3 years:

- Inspection records
 - CESQG Certification log (see: Appendix A)
 - Employee training records (see: Appendix B)
 - Bills of Lading and/or other documentation required by applicable Law for outgoing shipments of Program Products
-

Training and Safety

Training

All employees handling Program Products must receive training in product identification, acceptance, handling, packaging, inspection and emergency response procedures before collecting Program Products or engaging in any PaintCare Program activities.

Ensure that employees conduct Program Products collection activities in a safe manner that protects workers and the environment.

Ensure Program Products collection activities follow general safety practices including proper lifting techniques.

Ensure Drop-Off Site employees are equipped for and understand hazards associated with Program Products.

Maintain training plans and records for each employee.

A form for recording staff training is included in Appendix B.

Safety

Store personal protective equipment (PPE) and spill response equipment in an accessible location adjacent to the Collection Bins.

Ensure the Drop-Off Site is equipped with appropriate emergency response equipment including a fire extinguisher, spill kit and PPE. Monthly inspections of equipment are recommended.

Ensure spill kit contains at a minimum safety goggles, gloves, absorbent, duct tape and plastic bags.

Ensure emergency procedures and emergency contact numbers including police, fire department and emergency services are posted by phone near the Drop-Off Site area.

If applicable, develop and maintain emergency action plan as required by OSHA.

If required by federal, state or local law, familiarize police, fire departments and emergency response teams with the layout of your facility, properties of Program Product handled at your facility and evacuation routes.

A form for recording emergency contacts is included in Appendix C.

Chapter 8

Spill Response

Spills

The information in this section will assist with spills from damaged or leaking Program containers. It is important that all Drop-Off Site staff understand corrective actions to minimize exposure to people or the environment.

Collection Bins should be kept in a clean, accessible area. Avoid spills through good housekeeping, safe handling techniques, proper storage and best management practices.

Clean up any spill or release of Program Product immediately and place spill residue in a sealed container in a Collection Bin. Label it. Contact PaintCare to replenish spill kit materials as needed.

Reporting

Any spill or release of Program Product to the environment through a storm drain, waterway or soil contamination of more than 10 gallons must be immediately reported to the appropriate governmental authority, including the Certified Unified Program Agency, (“CUPA”). Contact PaintCare within 24-hours of making such a report.

Post emergency contact numbers including police, fire department, and emergency services.

Spill Kits

Upon request, PaintCare provides each Drop-Off Site with a spill kit containing:

- Latex gloves
- Safety glasses
- Absorbent
- Plastic bags

Any material used should be replaced immediately after it is used. Contact PaintCare for replacement items.

Spill Response Procedures

If a spill is small enough to be managed by Drop-Off Site staff, follow these steps:

- Isolate the area and restrict access to the spill
 - Ensure personal safety, put on protective gear (glasses and gloves) provided in the spill kit
 - Stop the movement of paint by placing the leaking container upright or in a position where the least amount will spill, and place leaking container in plastic bags provided in spill kit
 - Contain the spill by placing absorbent pads or granular absorbent around and
-

on the spill – if outdoors, place barriers around storm drains to prevent a release to the environment

- Collect the contaminated absorbent material and place it in plastic bag(s) along with the leaking container and contaminated PPE, seal the bag(s) and place in the Collection Bin
 - Remove any clothing that may be contaminated, wash thoroughly to remove spilled material from your hands or body
 - Replace any used spill control supplies
 - Document the date, location and amount and type of material spilled
 - Immediately report the spill to the appropriate governmental authority
-

Appendix C – Emergency Contact Information

This form is to be completed prior to the first day of collection.

Basic Local Emergency Contacts

Facility Emergency Coordinator (name/phone): _____

Alternate Emergency Coordinator (name/phone): _____

Fire Department Phone Number 911 _____

Police Phone Number 911 _____

Hospital Phone Number _____

For Spills of Program Product:

Report any spill or release of Program Product to the environment (air, water or soil) greater than 10 gallons or any release of any Program Product to the storm drain or waters of the State to the appropriate local and state enforcement agencies immediately, and to PaintCare within 24 hours.

Local agency (name/phone): _____

State agency (name/phone): California Emergency Management Agency (Cal EMA) 1-800-852-7550 _____

PaintCare: 1-855-PAINT09 _____

Other (name/phone): _____

Other (name/phone): _____

PaintCare Drop-off Site Training

Recycle with PaintCare

What is the PaintCare Program?

Recycle with PaintCare

What's the Big Deal About Paint?

- Of all hazardous waste received by municipal programs for residents and small businesses, 50% is paint
- Approximately 10% of purchased paint goes unused
- 10% of annual sales in the US means there are 70 million gallons leftover and available for recycling each year
- In 2003, stakeholders including local, state and federal governments; paint manufacturers; paint recyclers and others began a conversation to find a cooperative solution for managing post-consumer paint
- The American Coatings Association (ACA) participated, and the dialogue led to drafting of the model, state-level, industry supported law

Model Paint Stewardship Law

- Currently, 8 states and the District of Columbia have passed the industry–supported paint stewardship law.

Oregon (2009)

California (2010)

Connecticut (2011)

Rhode Island (2012)

Minnesota (2013)

Vermont (2013)

Maine (2013)

Colorado (2014)

Washington D.C. (2015)

- California's went into effect October 19, 2012

What the Law Requires:

- Any manufacturer selling paint into CA must operate a program to manage leftover paint by:
 - Reducing the generation of postconsumer paint through “buying right” education
 - Promoting using up / donating unused paint
 - Provide system for collection and recycling
- Convenient paint drop-off sites
- Environmentally responsible paint management

About PaintCare

- Created by the American Coatings Association in 2009 when Oregon passed the paint stewardship model law
- Non-profit stewardship organization that sets up the paint recycling program on behalf of paint manufacturers
- Governed by Board of architectural paint manufacturers
- State oversight agency, CalRecycle, reviews our program plan and annual reports

AmericanCoatings
ASSOCIATION

PaintCare Funding

- Financing through a per can “PaintCare Recovery Fee” added to the product price of each container sold

Half pint or smaller: \$ 0.00

Larger than half pint to smaller than 1 gallon: \$ 0.35

1 gallon: \$ 0.75

Larger than 1 gallon to 5 gallons: \$ 1.60

- Manufacturers collect the fees, and report sales and pay the fee to PaintCare
- Funding is used for program implementation and covers the cost of paint collection, transportation and recycling, as well as outreach and administration

Who Can Be a Collection Facility?

- Municipal household hazardous waste collection facilities (permanent and temporary)
- Paint retailers: paint, hardware, home improvement, reuse stores
- Waste transfer stations, landfills, public works yards, and other appropriate, publicly accessible facilities
- Large Volume Users (LVU) including trade painters and institutions

Potential Uses for Collected Paint

- Reused or donated (latex and oil-based)
- Blended into recycled-content paint (latex) – sold domestically and exported
- Cement/asphalt blends (latex)
- Landscaping material (latex)
- Blended into fuel for cement kilns and hazardous waste incinerators (latex and oil-based)

Drop-Off Site Guidelines

Employee Training

- Any employees accepting paint from the public, placing it in the bins, or ordering pick-ups should be trained on the PaintCare Site Guidelines
- Maintain a record showing that all staff handling PaintCare materials have received this training, and are re-trained annually

Onsite Materials Needed

- Operations binder with record-keeping forms
- Storage bin(s) & labels
- Spill kit
- Program product poster
- Drop-off site poster
- Customer education materials

Where to Put Your Bin(s)

- Cubic yard area on impermeable surface (concrete, asphalt, sealed wood floor, etc.)
- Secure from the public –not a “self-serve” program
- Away from ignition sources & drains
- Protected from temperature extremes
- Indoor area ideal
- If outdoors, under a covered area
- Maintain enough space around bins for emergency access and inspecting for leaks

Products to Accept – “Program Products”

Collect the following architectural coatings in 5 gallon containers or less:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Products Not to Accept – “Non-Program Products”

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Paint Can Condition

- Original container
- Original label that can be read
- Sealed and not leaking
- 5 gallons or less in size
- No empty cans, but cans with dried latex is ok
- Never open any containers

Storing and Packing Collection Containers

- Use safe practices for handling, storage and management
- Keep collection containers closed except when adding Program Products
- Pack 5 gallon buckets on bottom layer for stability
- Do not overfill collection containers

Accept From Whom?

- Latex Program Products
 - From residents (any volume)
 - From businesses (any volume)
- Solvent and Oil-Based Program Products
 - From residents (any volume)
 - From businesses
 - 27 gallons maximum per month
 - Only if they sign the CESQG log each time they drop-off

Limits on Volume Accepted

- Website map lists whatever volume your site chooses to advertise
- PaintCare outreach materials state “at least 5 gallons per customer per visit”
- Don't take more than can fit in your bins!
 - Refer customer to closest alternative site (see: www.paintcare.org), or ask them to come back
 - Refer them to PaintCare hotline (855) Paint09
 - For help finding a site that accepts more
 - To schedule a Large Volume Pick-Up

PaintCare.org Site Locator

Use the PaintCare Site Locator to find a place to drop off your leftover paint.

 accepts up to 5 gallons  accepts up to 10-20 gal.  accepts up to 100 gal.  HHW Programs (accepts other items)

Where Should Customers Take Non-Program Products?

- Household or small business hazardous waste disposal programs
- Refer customers to their local garbage hauler, environmental health agency, or public works department, if unknown
- Contact PaintCare Coordinator for more info on local government programs in your area

Safely Storing Paint

Labels

- Bins must have labels
- On the label, add the date the first can is placed in the bin – there is a 180 day storage limit

Packing the Bin

- Make sure bins are not damaged and have liners if needed
- Immediately place paint containers in the bin and pack upright and tightly
- Close lid when not in use
- Keep paint storage area clean and orderly

What if Non-Program Products End up in the Bin?

- If you find a non-program product in the bin prior to a pick-up, your store must manage it as hazardous waste generated by your store
- Mislabeled products and other mistakes will not be returned to you – they will be managed downstream by the transporter
- Transporters will identify any “problem” sites so we can check in to determine if additional training is needed

Ordering Pick-Ups or Supplies

Contact the transporter for extra bins, liners, labels, spill kits & pick-ups:

- **Urban Area:** one week in advance of filling your bin
- **Rural Area:** two weeks in advance of filling your bin
- Indicate:
 - You are a PaintCare drop-off site
 - Site name and address, phone number
 - Number of full bins to pick up & empties for replacement
- Sign and keep copy of bill of lading (provided by transporter at the time of pick-up)

Spill Preparedness

- Store the following emergency response equipment in an easily accessible area:
 - Personal protective equipment (PPE)
 - Fire extinguisher
 - Spill kit containing safety goggles, gloves, absorbent, plastic bags
- Inspect all equipment and storage area regularly
- Post emergency procedures and contact information including police, fire department, and emergency services by a phone near the collection area

Spill Clean-Up

Clean up any spill or release of program products immediately:

1. Isolate the area
2. Use protective gear
3. Place leaking container upright in the spill kit bucket or plastic bag
4. Place absorbent around the spill, then fill in towards source
5. Place barriers around any storm drains
6. Place contaminated absorbent material and protective gear in bag or bucket with leaky container
7. Seal bag or bucket and place in bin
8. Contact PaintCare to replenish spill kit materials as needed

Spill Reporting

- Document the date, location, amount, and type of program product spilled
- Report program product spills of more than 10 gallons and release of any quantity through a storm drain, waterway, or into soil to:
 - Your local environmental enforcement agency
 - State enforcement agency: California Emergency Management Agency (Cal EMA) 1-800-852-7550
- Notify PaintCare within 24 hours of any report

Record Keeping

- Employee training log
- CESQG certification log
- Bills of lading

Keep all records on site for a minimum of three years

Closing a Drop-Off Site

- Notify PaintCare 60 days before stopping collection services
- Remove PaintCare poster from the site and post new sign to notify public you no longer accept paint
- As part of your last pick-up, verify that all program products and bins are returned to PaintCare

FAQs

- How many cans does the standard PaintCare bin hold?

Approximately 120-150 one-gallon cans, depending on bin type.

- Do we only accept brands sold in our store?
No, you must be willing to accept all brands, including ones you don't sell in your store.

- Can we turn contractors away?
No, this program is for households and businesses. You may however, limit your per-customer drop-off volume to 5 gallons if you have limited space.

FAQs

- Can we charge a fee for consumers to drop their program products at our store?
No, the customer has already paid for the service through the assessment fee
- Can store waste be placed in the PaintCare bins?
Mistints and returned program products are accepted, but obsolete products should be managed by the system your store currently has in place.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors
PaintCare Inc.

We have audited the accompanying financial statements of PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program ("the Program"), which comprise the statement of financial position as of June 30, 2015, the related statements of activities and cash flows for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Auditor's Responsibility (continued)

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Program as of June 30, 2015, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also used our report dated September 30, 2015 on our consideration of PaintCare's internal control over the Program's financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering PaintCare's internal control over the Program's financial reporting and compliance.

PaintCare Inc.
California Architectural Paint Recovery Program

Notes to Financial Statements
June 30, 2015

1. Nature of Operations

The California Architectural Paint Recovery Program (“the Program”) is authorized by Public Resources Code Section 48700 to implement measures to require paint manufacturers to develop and implement a program to collect, transport, and process postconsumer paint to reduce the costs and environmental impacts of the disposal of postconsumer paint in California. The Program is administered by PaintCare Inc. (“PaintCare”).

PaintCare, a not-for-profit 501(c)(3) organization, was created in October 2009 by the American Coatings Association (ACA), who, working with state and local government stakeholders, passed the first ever paint product stewardship law in the United States in the state of Oregon in 2009 with implementation of the Oregon Program beginning July 1, 2010. The legislation pilots an industry-led, end-of-life management program for post-consumer paint, which PaintCare operates. The PaintCare Board is made up of architectural paint manufacturers and participation in PaintCare is not limited to ACA members, but open to all architectural paint manufacturers. There are no dues or registration fees associated with PaintCare.

2. Summary of Significant Accounting Policies

Basis of Accounting and Presentation

The Program’s financial statements are prepared on the accrual basis of accounting. Unrestricted net assets represent funds that are not subject to donor-imposed stipulations and are available for support of the Program’s operations. There were no temporarily or permanently restricted net assets as of June 30, 2015.

Accounts Receivable

Accounts receivable are recorded at net realizable value and represent amounts due for post-consumer paint recovery fees. The Program provides an allowance for bad debts using the allowance method, which is based on management’s judgment considering historical information. Accounts are individually analyzed for collectability, and will be reserved based on individual evaluation and specific circumstances. When all collection efforts have been exhausted, the accounts are written-off against the related allowance. At June 30, 2015 an allowance of \$47,399 was recognized.

PaintCare Inc.
California Architectural Paint Recovery Program

Notes to Financial Statements
June 30, 2015

2. Summary of Significant Accounting Policies (continued)

Communications Costs

On behalf of the Program, PaintCare holds communication-related contracts for advertising, marketing, and consumer awareness. Communications costs are charged to operations when incurred. Communications expenses were \$3,859,330 for the year ended June 30, 2015, and are included in the accompanying statement of activities.

Revenue Recognition

The Program recognizes revenue from post-consumer paint recovery fees at the time the architectural paint product is sold by a manufacturer participant of the paint product stewardship program. Manufacturer participants in the Program pay the PaintCare recovery fee to PaintCare based on the amount of program products they sell on a monthly basis.

Program participants report their monthly unit sales of paint through a secure, HTTPS online system using their unique user ID and password. The participant must pay a paint recovery fee per unit sold according to the following fee schedule:

Half pint or smaller		No charge
Larger than half pint to smaller than 1 gallon	\$	0.35
1 gallon	\$	0.75
Larger than 1 gallon to 5 gallons	\$	1.60

As the PaintCare recovery fee is added to the wholesale price of paint and passed through uniformly to the retail purchase price of paint—so that the manufacturer, distributor, and/or retailer is made whole—in some cases, distributors or retailers have elected to undertake the obligation of the manufacturer for these fees. Thus, PaintCare has allowed remitter agreements in the Program, whereby a distributor or retailer reports and remits directly to PaintCare on behalf of a participant manufacturer's brand or brands. Reports and payment are due by the end of the month following the reporting period.

Functional Allocation of Expenses

The costs of providing the various program and supporting activities have been summarized on a functional basis in the accompanying financial statements. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

PaintCare Inc.
California Architectural Paint Recovery Program

Notes to Financial Statements
June 30, 2015

2. Summary of Significant Accounting Policies (continued)

Investment Allocation

In December 2014, PaintCare invested a portion of its accumulated surplus in a portfolio with Bank of America/Merrill Lynch. The sole objective of the portfolio is to earn a return equal to the rate of inflation and thus preserve the purchasing power of its capital. Interest, dividends, changes in market value, and other investment activities are allocated to each state program based on the relative net asset balances of each state program. Oversight of the investments is provided by the PaintCare Budget and Finance Committee and by the PaintCare Board of Directors.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Subsequent Events

In preparing these financial statements, the Program has evaluated events and transactions for potential recognition or disclosure through September 30, 2015, the date the financial statements were issued.

3. Related Party

ACA, a related party, is a separate, 501(c)(6) nonprofit organization working to advance the needs of the paint and coatings industry and the professionals who work in it. Through advocacy of the industry and its positions on legislative, regulatory, and judicial issues at the federal, state, and local levels, it acts as an effective ally, ensuring that the industry is represented and fairly considered. ACA also devotes itself to advancing industry efforts with regard to product stewardship, through its signature Coating Care[®] resources, and focuses on advancements in science and technology through its technical conferences and journals, as well as online training opportunities. ACA incorporated PaintCare for the sole purpose of implementing programs for post-consumer architectural paint including the recovery program pursuant to Public Resources Code Section 48700. ACA maintains a controlling interest in PaintCare through the ability to appoint its Board of Directors.

PaintCare Inc.
California Architectural Paint Recovery Program

Notes to Financial Statements
June 30, 2015

3. Related Party (continued)

In February 2011, ACA and PaintCare entered into an affiliation agreement whereby ACA provides staffing, an office, office equipment and furniture, supplies, and other administrative support services. The term of the agreement is for one year and automatically renews for one-year terms unless canceled by either party.

For the year ended June 30, 2015, total administrative fees charged by ACA to PaintCare were \$987,782, and of this amount, \$634,156 related to the Program. At June 30, 2015, PaintCare owed the Program \$35,264,587 related to paint recovery fees that are being held on behalf of the Program and are included in the accompanying statement of financial position.

4. Income Taxes

The Program itself is not subject to income taxes. The steward of the Program, PaintCare, is recognized as a tax-exempt organization under Internal Revenue Code Section 501(c)(3), and is exempt from income taxes except for taxes on unrelated business activities.

SUPPLEMENTARY REPORTS

**INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED
ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE
WITH *GOVERNMENT AUDITING STANDARDS***

To the Board of Directors
PaintCare Inc.

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program ("the Program"), which comprise the statement of financial position as of June 30, 2015, the related statements of activities and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated September 30, 2015.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered PaintCare's internal control over financial reporting ("internal control") over the Program to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of PaintCare's internal control over the Program. Accordingly, we do not express an opinion on the effectiveness of PaintCare's internal control over the Program.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Internal Control over Financial Reporting (continued)

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Program's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

A handwritten signature in black ink that reads "Rogers + Company PLLC". The signature is written in a cursive, slightly stylized font.

**EXAMINATION REPORT OVER COMPLIANCE WITH THE
FINANCIAL ASPECTS OF THE PUBLIC RESOURCES CODE
SECTION 48700, AND TITLE 14, DIVISION 7, CHAPTER 11,
ARTICLE 2 OF THE CALIFORNIA CODE OF REGULATIONS**

To the Board of Directors
PaintCare Inc.

We have examined PaintCare Inc.'s ("PaintCare") California Architectural Paint Recovery Program's ("the Program") compliance with the financial aspects of the Public Resources Code Section 48700, and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations during the year ended June 30, 2015. Management is responsible for PaintCare's compliance with those requirements. Our responsibility is to express an opinion on PaintCare's compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence about PaintCare's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on PaintCare's compliance with specified requirements.

In our opinion, PaintCare complied, in all material respects, with the financial aspects of the Public Resources Code Section 48700, and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations during the year ended June 30, 2015.

This report is intended solely for the information and use of the Board of Directors, management, and the California Department of Resources Recycling and Recovery, and is not intended to be and should not be used by anyone other than these specified parties.

Joint Outreach Form

California Paint Stewardship Program

Each year about 650 million gallons of architectural paint is sold in the United States. Did you know that about 10 percent goes unused and is available for recycling?

California's Paint Stewardship Law requires the paint manufacturing industry to develop a financially and environmentally sustainable program to manage postconsumer architectural paint. The program includes: education about buying the right amount of paint, tips for using up remaining paint and setting up convenient recycling locations throughout the state.

PaintCare is a non-profit organization established by paint manufacturers to run the program in California and any state with a paint stewardship law.

Program Products

These products have fees when you buy them and are accepted for free at drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled and empty containers are not accepted at drop-off sites.

⊘ Non-Program Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulk, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For information about recycling and proper disposal of non-program products, please contact your garbage hauler, local environmental health agency, household hazardous waste program or public works department.

Recycle with PaintCare

CALIFORNIA

Places to Take Old Paint

Paint recycling is more convenient with PaintCare. We set up paint drop-off sites throughout California. To find your nearest drop-off site, use PaintCare's search tool at www.paintcare.org or call our hotline at (855) 724-6809.

How to Recycle

PaintCare sites accept all brands of old house paint, stain and varnish – even if they are 20 years old! Containers must be five gallons or smaller, and a few types of paint are not accepted. See back panel for a list of what you can recycle.

All PaintCare drop-off sites accept at least five gallons of paint per visit. Some sites accept more. Please call the site in advance to make sure they can accept the amount of paint you would like to recycle.

Make sure all containers of paint have lids and original labels, and load them securely in your vehicle. Take them to a drop-off site during their regular business hours. We'll take it from there.

What Happens to the Paint?

PaintCare will make sure that your leftover paint is remixed into recycled paint, used as a fuel, made into other products or properly disposed.

Who Can Use the Program?

Residents bringing paint from their home can bring as much latex or oil-based paint as the site is willing to accept.

Businesses (painting contractors and others) can use this program with one restriction: If your business produces more than 220 pounds (about 20-30 gallons) of hazardous waste per month, you may use the drop-off sites for your latex paint only but not for your oil-based paint. To learn more about this restriction, contact PaintCare.

Large Volume Pick-Up

If you have at least 300 gallons of paint to recycle from your business or home, ask about our pick-up service. Please call for details or to request an appointment.

PaintCare Recovery Fee

PaintCare is funded by a fee paid by paint manufacturers for each can of paint they sell in the state. Manufacturers pass the fee to retailers, who then apply it to the price of paint. Stores can choose whether or not to show the fee on their receipts. Fees are based on the size of the container as follows:

- \$0.00 Half pint or smaller
- \$0.35 Larger than a half pint to smaller than 1 gallon
- \$0.75 1 gallon
- \$1.60 Larger than 1 gallon up to 5 gallons

Not a Deposit

The fee is not a returnable deposit – it is part of the purchase price. The fees are used to pay the costs of running the program: recycling, public education, staffing and other expenses.

Contact Us

Please visit www.paintcare.org or give us a call at (855) 724-6809 to find a drop-off site or to learn more.

**It's easy to recycle
your leftover paint,
stain and varnish.**

Recycle with PaintCare

Find a drop-off site near you:
(855) 724-6809 • www.paintcare.org

**Buy right.
Use it up.
Recycle the rest.**

Manufacturers of paint created PaintCare, a nonprofit organization, to set up convenient places for you to recycle leftover paint. We're working to provide environmentally sound and cost-effective recycling programs in your state and others with paint stewardship laws.

LEARN MORE

Visit www.paintcare.org or follow us on Facebook for tips on how to buy the right amount of paint, store paint properly, use up leftover paint, and find a drop-off site. We also have a free pick-up service for businesses or households with at least 300 gallons of paint to recycle.

California Paint Stewardship Program

How Does the California Paint Stewardship Program Affect Paint Retailers?

California's paint stewardship law requires paint manufacturers to set up and operate a Paint Stewardship Program in California. Funding for the program comes from a fee applied to the price of architectural paint sold in California.

The program started in October 2012

Paint Stewardship

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopt paint stewardship laws. In addition to operating the California Program, PaintCare operates programs in Colorado, Connecticut, Maine, Minnesota, Oregon, Rhode Island, and Vermont. PaintCare is also planning a program for the District of Columbia.

PaintCare's primary effort is to establish paint drop-off sites throughout each PaintCare state at paint retailers and other locations in order to provide convenient recycling opportunities for the public. Other locations include municipal household hazardous waste facilities and events, solid waste transfer stations, and landfills. There are more than 1,500 PaintCare sites in the United States; more than 700 of them are in California.

Participation as a Drop-Off Site is Voluntary

Retailers who wish to serve as drop-off sites are able to do so if they have adequate space for paint storage bins and can provide minimal staff time to accept paint from the public. By doing so, retailers can increase foot traffic and sales and provide an environmental service for their community. They make it convenient for their customers to recycle unused paint and help provide relief to local government programs that currently manage leftover paint. PaintCare provides storage bins, supplies, and site training. PaintCare also pays for paint transportation and recycling and promotes the sites to the local community.

REQUIREMENTS OF RETAILERS

1. Check Registered Manufacturers and Brands

Retailers may not sell architectural paints that are not registered. Paint manufacturers must register their company with PaintCare, and they must register all architectural paint brands they sell in the state. PaintCare publishes lists of registered manufacturers and brands at www.paintcare.org so that retailers can check to see if the products they sell are registered.

2. Pass on the Stewardship Fee

State law requires that a stewardship fee ("PaintCare Fee") is applied by manufacturers to the wholesale price of architectural paint sold in California. This fee pays for all aspects of running the program.

The fee is paid by manufacturers to PaintCare and then passed to their dealers. Retailers should see the PaintCare Fee on invoices from suppliers. The law also requires that retailers and distributors apply the fee to the price of architectural paint they sell. The law also requires that retailers and distributors apply the fee to the price of architectural paint they sell. The fees paid by customers to retailers offset the fees charged to the retailers. This ensures a level playing field for all parties.

Record Keeping

Retailers are required to maintain records for three years that identify the manufacturer, the date(s) paint was purchased from suppliers, and the date(s) paint was sold to the consumer. Retailers may maintain this information in any way they believe will verify compliance in the event of a review by CalRecycle, the state oversight agency. CalRecycle may use a variety of mechanisms to verify retailer compliance, including, but not limited to, program awareness, physical inspection, product review, and inspection of records as noted above. CalRecycle has stated that it takes a progressive enforcement approach, with education being the first step in the case of non-compliance. If you have additional questions about this requirement, please email CalRecycle at paint@calrecycle.ca.gov.

COMMON QUESTIONS ABOUT FEES

How much are the fees?

Although fees may change and vary by state in the future, fees in California and other PaintCare states are the same at this time. Fees are by container size:

\$ 0.00 – Half pint or smaller

\$ 0.35 – Larger than half pint to smaller than 1 gallon

\$ 0.75 – 1 Gallon

\$ 1.60 – Larger than 1 gallon up to 5 gallons

How are the fees calculated?

Fees are set to cover the cost of a fully operating state program. When planning the program, PaintCare estimated the annual sales of architectural paint in California and divided the estimated annual expenses of the program by the number of containers to be sold – taking into account the typical amount of unused paint for each container size. Fees may be decreased in the future if they were set too high, or they may be increased if they were set too low to cover expenses.

Is the fee a deposit to be returned to customers?

No, the fee is not a deposit. Fees are used entirely to cover the expenses of running the program and not given back as a deposit for the return of paint or empty paint cans – a common misunderstanding.

Must we show the fee on receipts?

No, but most stores do show the fee in order to explain the price increase. PaintCare encourages retailers to show the fee and list it as PaintCare Fee to aid in customer education and provide consistency across the program.

Do we return the fee if a product is returned?

Yes, the fee should be returned because it is part of the purchase price.

Is sales tax applied to the fee itself?

Yes, the fee is part of the purchase price; therefore, sales tax is collected on the fee.

Do we apply the fee to inventory purchased before the program started, even though we didn't pay a fee for the product to the distributor or manufacturer?

Yes, retailers must add the fee on all covered products sold on or after the first day of the program, regardless of when they were purchased from the supplier. Fees collected on this inventory stay with the retailer; they are not paid back to the distributor or manufacturer.

How does the public know about the fee?

PaintCare provides brochures and other printed materials for retailers to distribute to the public to help explain the purpose of the fee, how the program works, and how to find paint drop-off locations. Additional materials can be ordered at any time for free. In addition to retailer information, PaintCare works with contractor associations to get information to trade painters, and conducts general outreach including newspaper, radio, television, and on-line advertising.

What products are covered?

Architectural paints include most house paints, stains, and clear coatings (e.g., varnish and shellac). For the definition of architectural paint for the purposes of this program or examples of program and non-program products, please contact PaintCare or visit our website.

California Paint Stewardship Program

Become a Retail Drop-Off Site for Paint

The PaintCare Program makes it easy for paint retailers to provide a convenient and valuable service for their community.

Since October 2012 state law has required paint manufacturers to set up and operate a paint stewardship program in California. By now all retailers should be aware of the program, the PaintCare fees that are applied to the price of architectural paint products, and that drop-off sites that have been set up statewide. Retailers that would like to learn more about what it takes to join the program to be drop-off sites are encouraged to contact PaintCare for details.

Paint Stewardship Program in California

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement this program on behalf of paint manufacturers in PaintCare States (those that adopt paint stewardship laws). In addition to California, PaintCare operates programs in Colorado, Connecticut, Maine, Minnesota, Oregon, Rhode Island, and Vermont. PaintCare is also planning a program for the District of Columbia.

Convenient Paint Recycling

PaintCare's primary effort is to establish paint drop-off sites throughout each PaintCare state to provide convenient recycling options for the public. The program allows households and businesses to return unused architectural paint to drop-off locations throughout each PaintCare state.

PaintCare has established more than 700 paint drop-off sites across California. Most drop-off sites are at paint stores. Some sites are solid waste transfer stations, recycling centers or government-sponsored household hazardous waste programs. Participation as a drop-off site is voluntary.

Benefits to Retailers

There are many benefits to becoming a drop-off site.

As a participating retailer, you will:

- Make recycling of leftover paint more convenient for your customers
- Support the paint industry's effort to lead the way in being responsible for end-of-life management of its own products
- Promote your store as environmentally responsible
- Help relieve local government of their cost of managing leftover paint
- Help prevent the improper disposal of paint in your community

PaintCare Provides

- Listing of your store as a drop-off site on our website, and in advertisements and promotional materials
- Paint storage bins
- Transportation and recycling services for the collected paint
- Training materials and staff training at your site
- Program brochures, signage and customer education materials
- Spill kits

Drop-Off Site Responsibilities

- Provide secure storage area for paint storage bins
- Accept all brands of leftover program products from the public during operating hours
- Place unopened program products in storage bins
- Keep storage bins neat and properly packed
- Complete minimal paperwork related to tracking outgoing paint shipments
- Ensure staff are trained in PaintCare program guidelines and operating procedures
- Display “drop-off site” signs in store window and display consumer education materials

WHAT PRODUCTS ARE COVERED?

The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PaintCare Products

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Non-PaintCare Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Paint Stewardship Programs in the U.S.

About PaintCare Fees

Laws in PaintCare States* require retailers to add a stewardship assessment to architectural paint products and make sure they are not selling unregistered brands of architectural paint.

Paint Stewardship Programs

PaintCare Inc. is a non-profit organization established by American Coatings Association to implement paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws. The main goals of the program are to decrease paint waste and recycle more postconsumer paint by setting up convenient drop-off sites in each state.

1. What is the Recovery Fee and how does it work?

The PaintCare program is funded through a paint stewardship assessment called the *PaintCare Fee* – fees are applied to the purchase price of architectural paint. The fees fund collection, transportation, and processing of unused postconsumer paint, public education about proper paint management, and administrative costs. The fee is paid to PaintCare by paint manufacturers. This fee is then added to the wholesale and retail purchase price of paint, passing the cost of managing postconsumer paint to everyone who purchases paint. This reduces municipal and state government costs for paint management and provides a funding source for a more convenient, statewide paint management program.

2. Do retailers have to pass on the fee?

Yes, each state's law requires retailers to pass on the fee to consumers, ensuring a level playing field for all parties.

What are the fees?

Fees are currently the same in all PaintCare States. Fees are based on container size as follows:

\$ 0.00 – Half pint or smaller

\$ 0.35 – Larger than half pint to smaller than 1 gallon

\$ 0.75 – 1 Gallon

\$ 1.60 – Larger than 1 gallon up to 5 gallons

3. How are fees calculated?

Fees are set to cover the cost of a fully implemented program. Working with paint manufacturers, PaintCare estimates annual sales of architectural paint in each state and then divides the cost of the total program in that state by the number of containers sold in that state. Next, the fees are adjusted based on container size by taking into consideration the typical percentage of unused paint for each size (e.g., the percentage of unused paint from one 5-gallon container is typically less than from five 1-gallon containers).

PaintCare is a non-profit organization, so the fees may be decreased if set at a level beyond what is needed to cover program expenses. Likewise, the fees may be increased if PaintCare does not collect enough money to cover the costs to operate the state program.

4. Are retailers required to show the fee on the receipt?

No, but PaintCare encourages retailers to do so and to display it as *PaintCare Fee* to aid in consumer education. Most stores in PaintCare states choose to show the fee on their receipts in order to inform the consumer about the PaintCare program and to explain the price increase.

5. Do retailers return the fee if someone returns a product?

Yes. The fee should be returned as part of the purchase price.

* As of October 2015, PaintCare has programs in California, Colorado, Connecticut, Maine, Minnesota, Oregon, Rhode Island, and Vermont. PaintCare is also planning a program for the District of Columbia (September 2016).

6. Is the fee taxable?

Yes, the fee is part of the purchase price of paint. Sales tax is collected on the fee, except in a state that does not have a sales tax, such as Oregon.

7. Is the fee to be applied to paint sold to customers who are exempt from sales taxes?

Yes, government agencies and other organizations that are exempt from sales taxes in PaintCare states (except for Oregon which has no sales tax) must still pay the fee, because it is part of the price of paint.

8. Is the fee a deposit that is returned to customers when they bring paint to a drop-off site?

No, the fee is not a deposit. The fees are used entirely to cover the cost of running the program.

9. Do retailers add the fee on sales starting on the first day of the program (i.e., on inventory purchased before the first day) even though they did not pay fees on inventory to the distributor or manufacturer?

[For new programs] Yes, in order to provide for a hard start date, retailers must add the fee on all inventory sold on or after the start date of the program. Fees collected on existing inventory stay with the retailer; they are not paid back to the distributor or manufacturer.

10. How does the public know about the fee?

PaintCare provides public education materials to retailers. These materials explain the purpose of the fee, where to take paint for recycling, and other information about the program. When a new state program begins, PaintCare mails a “starter pack” of materials to retailers. As needed, retailers may order additional free materials from PaintCare. In addition to retailer information, PaintCare works with contractor associations to get information to trade painters, and conducts general outreach including newspaper, radio, television, and on-line advertising.

11. How do we as a retailer know what products to put the fee on?

Your supplier’s invoice should indicate that you are being charged the fee, so you simply pass on the fee for those items. Additionally, PaintCare and each state’s oversight agency list all architectural paint manufacturers and brands that are registered for the program on their websites. Retailers may not sell brands that are not registered with the program. If your

store sells architectural coatings that are not on the list of registered products, please notify PaintCare so we can contact the manufacturer to get them registered.

12. What Products Are Covered?

The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare Products include interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

WASHINGTON, DC 20005

Large Volume Pick-Up (LVP) Service

PaintCare offers a free pick-up service to painting contractors, property managers, and others with large amounts of leftover architectural paint.

Who is PaintCare?

PaintCare Inc. is a non-profit organization established by the American Coatings Association to operate paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws.

Paint Drop-Off Sites

In states with a paint stewardship program, PaintCare's primary effort is to set up conveniently located drop-off sites—places where residents and businesses may take their unwanted paint for no charge. Sites set their own limits on the volume of paint they accept from customers per visit (usually from 5 to 20 gallons). To find a drop-off site near you, please use PaintCare's site locator at www.paintcare.org or call (855) 724-6809.

Large Volumes Pick-Ups

For those that have accumulated a large volume or stockpile of paint, PaintCare also offers a pick-up service. Large volume means at least 300 gallons, measured by container size (not content). On a case-by-case basis, PaintCare may approve a pick-up for less than 300 gallons if there are no drop-off sites in your area. After two or three pick-ups, you may be switched to a regular service (see next page).

Drums and Bulked Paint Are Not Accepted

PaintCare only accepts paint in containers that are 5 gallons or smaller in size. Leave paint in original cans with original labels; do not combine or bulk paint from small cans into larger ones. If you have unwanted paint in drums or containers larger than 5 gallons, please contact a licensed paint recycling company or a hazardous waste transportation company to assist you.

HOW TO REQUEST A LARGE VOLUME PICK-UP

1. Sort and count your paint

We need to know the number of each container size and the type of products you have, sorted into two categories: (1) water-based paints and stains and (2) oil-based paint and stains and any other program products (sealers and clear top-coat products, such as varnish and shellac).

2. Fill out the LVP Request Form and send it in

Fill out a paper or electronic version of the "Large Volume Pick-Up Request Form" and return it to PaintCare by email, fax, or regular mail. (Visit www.paintcare.org or call PaintCare for the form.)

Scheduling

After reviewing your form, PaintCare staff will either approve your site for a pick-up or inform you of the best place to take your paint if you do not meet the volume requirement. If you qualify for a pick-up, you will be put in contact with our licensed hauler to schedule a pick-up. It may be several weeks before your pick-up occurs.

On the Day of Your Pick-Up

Sort your products into the two categories noted above and store them in an area that has easy access. If the paint is a far distance from where the hauler parks, the

path between should be at least four feet wide to accommodate movement of the boxes.

Please plan to have staff available to pack the paint cans into the boxes. The hauler may be able to provide some assistance, but we require your staff to be present and provide labor to pack boxes. Once your paint is properly packed and loaded onto the hauler's truck, you will sign a bill of lading and receive a copy for your records. Your paint will then be taken to an authorized processing facility for sorting and recycling.

Note: Paint must be in original containers and not leaking.

Repeat Service for Large Volume Users

For businesses that generate large volumes of unwanted paint on a regular basis, a service for recurring direct pick-ups is available. With this service, you will be provided with empty bins, then request a pick-up when at least three bins are filled. PaintCare will provide onsite training on how to properly pack the paint, and you will be required to sign a contract with PaintCare.

Limits on Businesses

If your business generates more than 220 pounds (20-30 gallons depending on the type) of hazardous waste per month, you may use PaintCare's programs (drop-off sites and the pick-up service) for water-based program products only. You will not be able to use the program for oil-based products.

If your business generates less than 220 pounds of hazardous waste per month, you may use PaintCare programs for both water-based program products and oil-based program products. As a business, you will need to certify that you meet this requirement.

Note: When calculating how much hazardous waste you generate in a month, do not count latex paint.

If You Have Products We Don't Accept

The program does not accept all paints (such as aerosols and automotive finishes) or other hazardous waste. If you have solvents, thinners, pesticides, or any non-PaintCare products (see list to right for examples), we recommend that residents contact their local household hazardous waste (HHW) program. Some HHW programs allow businesses to use their program for a modest fee. Otherwise, businesses should contact a licensed hazardous waste transportation company.

What Products Are Covered?

Architectural paints ("PaintCare Products") are defined as interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners

California Paint Stewardship Program

Information for Solid Waste Transfer Stations, Recycling Facilities and Landfills

California's paint stewardship law supports paint collection activities at solid waste transfer stations, recycling facilities and landfills.

The California paint stewardship law requires paint manufacturers to establish a paint stewardship program in California. Sites that participate can save money on paint management costs and expand services to their customers. Program funding comes from a "PaintCare Fee" applied to each container of architectural paint sold in California. The program started in October 2012.

Paint Stewardship Program in California

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopt paint stewardship laws. California was the second state to pass such a law.

Although this program is required by state law, it is designed and operated by the paint manufacturing industry. PaintCare currently operates programs in California, Colorado, Connecticut, Maine, Minnesota, Oregon, Rhode Island, and Vermont. PaintCare is also planning a program for the District of Columbia.

Making Paint Recycling Convenient

PaintCare has established drop-off sites statewide for households and businesses to take leftover architectural paint. Although most drop-off sites are at paint retailers, household hazardous waste facilities, solid waste transfer stations, recycling facilities and landfills may also volunteer to be PaintCare drop-off sites and have their paint transportation and processing costs covered by PaintCare.

Benefits to Drop-Off Sites

- Make recycling of leftover paint more convenient for your community
- Help your state conserve resources and keep paint out of the solid waste stream

PaintCare Partners Receive

- Storage bins for paint
- Paint transportation and processing services
- Staff training at your site
- Program brochures and site signage
- Publicity of your site (optional)

Drop-Off Site Responsibilities

- Provide secure storage area for cubic yard boxes or drums
- Accept program products from the public during normal operating hours
- Properly pack program products in collection bins
- Assist with loading and unloading of full and empty storage bins
- Complete minimal paperwork to track outgoing paint shipments
- Ensure staff are trained in PaintCare guidelines and safe operating procedures

Paint is a Resource

An important goal of PaintCare is to conserve resources and increase the amount of paint that is recycled. Through the PaintCare program, all paint including latex will be recycled to the maximum extent possible.

What Products Are Covered?

Architectural paints (“Program Products”) are defined as interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings. Here are examples:

Program Products

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Non-Program Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Joint Outreach Projects

THE BASICS

Introduction

If you are a local government that has partnered with PaintCare, we offer limited funding support for outreach activities that involve PaintCare. We are most interested in partnering with you when we are setting up new PaintCare drop-off sites, where participation is low, and when we are promoting one day HHW events to boost the amount of paint we can collect at one time. We have supported radio, newspaper and direct mail advertising and will consider other media.

Review and Approval

Project budgets and all creative work must be reviewed and pre-approved by PaintCare. Creative work includes text, images, and scripts. When possible, all projects must include PaintCare's website address and logo and mention that people can find PaintCare drop-off sites in other areas (via our website).

Proposal Form

Please complete our Proposal Form for Joint Outreach Projects and email it to your PaintCare Regional Coordinator, State Program Manager, or info@paintcare.org

The Word version of the form can be downloaded from the "municipalities" section of each state's page at www.paintcare.org.

The pdf version is here: www.paintcare.org/wp-content/xx-form-joint-outreach.pdf

WHAT WE ASK OF YOU

Print-Based

For print materials (brochures, postcards, etc.) you will be responsible for sending artwork files to your printer, coordinating mailings, and distribution. After the project is completed, along with your invoice, we ask for a description of how, when, and where the piece was distributed or used, and an electronic copy of the final piece.

Newspaper

For newspaper ads, you will be responsible for sending artwork files to the newspaper and scheduling. At the start of the project, we ask you to provide PaintCare with draft text, dimensions and due dates for the ads. After the project is completed, we ask for a list of run dates for each newspaper and a scan or clipping of each ad.

Radio

For radio advertising, you will be responsible for providing the pre-approved scripts to the stations and handling scheduling. After the project is completed, along with your invoice, we ask you to provide text of the final script with a list of run dates and times. If available, we would also like an audio file of the actual recording aired on the radio.

Other

For other types of projects, we will ask you for similar things – you will coordinate everything and send PaintCare supporting documentation along with your invoice so we have a record of the projects and examples to show others.

DESIGN ASSISTANCE

PaintCare can provide assistance with basic layout and graphic design using our in-house staff. When we provide this type of assistance we will provide electronic files for you to send for printing or ad placement. Other than editing and commenting on scripts, we do not provide in-house assistance with audio or video production. Please allow plenty of time for project planning, approvals, and some back-and-forth editing. Depending on the time of year, this may take 4-8 weeks.

REIMBURSEMENT

PaintCare provides reimbursements for pre-approved projects only. We do not provide money up front, pay vendors directly, or accept requests for reimbursements on projects that have already been completed. Generally PaintCare will reimburse for half of the total direct costs for pre-approved projects; however, we may make exceptions and offer a lower or higher amount based on how much of the message is dedicated to PaintCare, our budgets, and other PaintCare outreach taking place in your area.

To be reimbursed, send PaintCare an invoice from your government agency, samples of the final pieces as noted previously, and copies of invoices from your vendors. We ask you to combine them into one PDF and send via email to Paul Fresina at pfresina@paint.org. The "To:" space on the invoice should be addressed to PaintCare Inc., 1500 Rhode Island Ave NW, Washington DC, 20005. In the space for purchase orders please write "5839." See sample invoice on next page.

Paint Recycling Program

About the PaintCare Program

PAINTCARE

Paint manufacturers created PaintCare, a non-profit organization, to set up convenient places for households and businesses to recycle leftover paint. PaintCare sets up paint drop-off sites throughout states that adopt paint stewardship laws.

PAINTCARE PRODUCTS

These products have fees when purchased and will be accepted for free at PaintCare drop-off sites:

- Latex paints (acrylic, water-based)
- Oil-based paints (alkyd)
- Stains
- Primers and undercoaters
- Shellacs, lacquers, varnishes, urethanes
- Deck and floor paints
- Sealers and waterproofing coatings for wood, concrete and masonry

NON-PAINTCARE PRODUCTS

- Paint thinners and solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Coatings used for Original Equipment Manufacturing or shop application
- Any non-coatings (caulk, spackle, cleaners, etc.)

FEES

PaintCare fees are applied to the purchase price of architectural paint sold in the state as required by state law. Fees are applied to each container and vary by the size of the container as follows:

Half pint or less	\$ 0.00
More than half pint to less than 1 gallon	\$ 0.35
1 gallon	\$ 0.75
More than 1 gallon up to 5 gallons	\$ 1.60

For more information or to find a place to take your unwanted paint for recycling, please ask for the PaintCare brochure, visit www.paintcare.org or call (855) 724-6809.

Recycle with PaintCare

Recycle your paint here.

[DURING BUSINESS HOURS ONLY]

ACCEPTABLE

- Latex house paint
- Oil-based house paint
- Primer
- Stains and sealers
- Varnish and shellac
- All brands

NOT ACCEPTABLE

- Paint thinner
- Two-component paints
- Aerosols
- Other chemicals

PLEASE DON'T BRING CONTAINERS THAT ARE

- Leaking
- Unlabeled
- Empty

Recycle with PaintCare

For a complete list of acceptable products, please ask for the PaintCare brochure, call (855) 724-6809 or visit www.paintcare.org.

or visit www.paintcare.org.*

We're a PaintCare Drop-Off Site

WE ACCEPT

- Latex House Paint
- Oil-Based House Paint
- Primer
- Stains
- Sealers
- Varnish and Shellac

⊘ WE CAN'T ACCEPT

- Aerosols (Spray Cans)
- Auto and Marine Paints
- 2-Part Paints
- Road Marking Paint
- Industrial Paint
- Tints and Resins
- Thinner and Solvent
- Caulk and Spackle
- Wood Treatment/Preservatives
- Deck Cleaner
- Tar/Asphalt Products

CONTAINERS

- No larger than 5 gallons
- Must not be leaking
- Must have original labels
- Must have secure lids

Program Products

These products have fees and are accepted at drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Products must be in original containers with original labels.

Latex paint that is dried out and "rock hard" is also acceptable.

Non-Program Products

These products do not have fees and are not accepted at drop-off sites:

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Arts and crafts paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Leaking, unlabeled, and empty containers are not accepted at drop-off sites.

To learn more, please call (855) 724-6809 or visit www.paintcare.org

PAINT RECYCLING MADE EASY

Paint manufacturers formed PaintCare, a nonprofit organization, to make paint recycling more convenient, cost effective, and environmentally sound. Paint doesn't belong in the trash or down the drain. If you can't use it up, recycle it with PaintCare.

We're setting up locations in your state where you can bring old paint for free all year-round.

PAINTCARE PRODUCTS

(YOU CAN RECYCLE THESE)

These products have fees when you buy them and are accepted for free when you drop them off for recycling:

- Water-based paints (latex, acrylic)
- Oil-based paints (alkyd)
- Stains
- Primers
- Varnishes
- Shellacs
- Lacquers
- Urethanes
- Deck paints
- Floor paints
- Sealers
- Waterproofing coatings

NON-PAINTCARE PRODUCTS

Leaking, unlabeled, and empty containers are not accepted.

- Paint thinners and solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Coatings used for Original Equipment Manufacturing or shop application
- Any non-coatings (caulk, spackle, cleaner, etc.)

PROGRAM FUNDING

The PaintCare Fee is applied to the purchase price of architectural paint sold in your state as required by law. Fees are based on container size:

Half pint or smaller	\$ 0.00
Larger than half pint to smaller than 1 gallon	\$ 0.35
1 gallon	\$ 0.75
Larger than 1 gallon up to 5 gallons	\$ 1.60

LEARN MORE

Program Awareness Survey Results

California Paint Usage & Disposal Surveys

Online surveys were conducted using SurveyMonkey. Blue numbers indicate the number of people who responded.

	June 2014		June 2015	
	Percent	Count	Percent	Count
1. Do you currently have any leftover or unwanted paint in your home or business?		445		345
None	36.2%	161	46.4%	160
Less than 1 gallon	13.5%	60	10.7%	37
1-5 gallons (would fit in a cardboard box)	29.0%	129	27.0%	93
5-15 gallons (would fit in a shopping cart)	14.2%	63	9.9%	34
15-30 gallons (would fit in two shopping carts)	2.2%	10	1.4%	5
More than 30 gallons	0.0%	0	0.3%	1
Yes, but I don't know how much	4.9%	22	4.3%	15
2. Where did the paint come from? (check all that apply)		275		345
I did some painting myself and had some leftover	70.5%	194	39.4%	136
I hired someone to paint and they left it behind.	37.1%	102	22.3%	77
I found it in my home/business when I moved in	20.4%	56	10.7%	38
I am a painting contractor and it is from one of my jobs	1.1%	3	2.3%	8
I don't remember where the paint came from	2.9%	8	20.6%	71
Other	2.9%	8	>1%	1
<i>Other from 2015 survey:</i>				
<ul style="list-style-type: none"> • <i>It was in my mother's apartment when I moved in.</i> 				
3. In the past, which has been your preferred method to dispose of leftover or unwanted paint? (check all that apply)		424		345
Poured it down the drain	0.5%	2	0.6%	2
Put can(s) of liquid paint in the trash	6.8%	29	3.8%	13
Dried out the paint and put it in the trash	22.2%	94	11.0%	38
Stored it in the basement or garage intend to use	45.8%	194	21.4%	74
Took it to a paint store	4.7%	20	7.0%	24
Took it to a household hazardous waste event or facility	35.8%	152	24.1%	83
Gave it away to a family, friend or community organization	10.1%	43	5.5%	19
Left it behind when I moved	8.7%	37	1.4%	5
I don't remember what I did with the leftover or unwanted paint	5.7%	24	4.9%	17
I have never stored or disposed of leftover or unwanted paint	11.3%	48	19.7%	68
Other (please specify)	1.7%	7	0.6%	2
<i>Other from 2015 survey:</i>				
<ul style="list-style-type: none"> • <i>City of Folsom picks up hazardous waste upon request</i> • <i>Painting contractor took the paint when finished with the job</i> 				
4. If you had unwanted paint, what would you do with it?		422		345
Pour it down the drain	0.5%	2	0.6%	2
Put can(s) of liquid paint in the trash	3.6%	15	2.0%	7
Dry out the paint and put it in the trash	10.7%	45	12.5%	43
Take it to a paint store	8.1%	34	17.4%	60
Take it to a household hazardous waste event or facility	54.7%	231	35.4%	122
Give it away to a family, friend or community organization	10.0%	42	13.6%	47
I don't know	12.6%	53	16.2%	56
Other (please specify)	NA	6	2.3%	8

Other from 2015 survey (see question 4 on previous page)

- I keep paint for future use (2)
- Call the city to schedule a HHW pick-up
- "Google" what to do with leftover paint (2)
- Take it to the local dump
- I do not have any paint (2)

5. Did you know that paint can be recycled?

		428		345
Yes	37.1%	159	37.4%	129
No	62.9%	269	62.6%	216

6. Have you ever taken paint to be recycled or disposed? If yes, when?

		428		345
No	66.1%	283	72.8%	251
Yes, at some point during the past year	7.9%	34	9.0%	31
Yes, more than one year ago	25.9%	111	18.3%	63

7. Do you know where to take unwanted paint?

		428		345
No	67.5%	289	72.2%	249
Yes	32.5%	139	27.8%	96
If yes, where? (please specify)	NA	77	NA	49

Responses to "yes, where" from 2015:

- Local disposal center
- Call the city for information
- Paint store (17)
- Recology in San Carlos
- Berkley hazardous waste
- Home Depot (4)
- Blue bin (recycle container)
- Recycling center (6)
- HHW facility (13)
- Look up information online (2)
- "The One Place"
- Hyperion plant

8. How far is the closest paint store?

		428		345
Less than 1 mile	22.4%	96	20.0%	69
1-5 miles	58.6%	251	54.8%	189
