Saint Paul, MN 55155-4194

## Program Contacts and Program Launch Date

---

On behalf of participating paint manufacturers, on March 3, 2014, PaintCare submitted to the Minnesota Pollution Control Agency (“Agency”) the Minnesota Paint Stewardship Program Plan. On May 9, 2014, PaintCare received written comments and suggested revisions from the Agency. The Plan was revised to incorporate the suggested changes and other updates, and resubmitted on July 8, 2014. On October 8, 2014, PaintCare received additional written comments and suggested revisions from the Agency. This revised Plan incorporates the suggested changes and other updates.

In agreement with the Agency, the Minnesota Paint Stewardship Program launched on November 1, 2014.

For questions about this Plan, please contact:

- G. Transfer Station Fact Sheet and Form
- H. GIS Methodology and Results
- I. Joint Outreach Instruction and Form
- J. Assessment Fee Audit Results

# 1. Introduction

---

## Paint Stewardship in Minnesota

On May 23, 2013, Governor Mark Dayton signed into law H.F. 976, a bill containing the requirement of the Minnesota Paint Stewardship Program (“Program”).

Paint stewardship in Minnesota dates back to 2002 with the Paint Product Stewardship Initiative (PPSI). Led by the Product Stewardship Institute out of Massachusetts, PPSI involved several years of stakeholder dialogues and industry and public sector research on paint use habits and recycling opportunities. Participants included the American Coatings Association, paint manufacturers, paint recyclers, federal EPA, and many state and local governments across the United States. State and local government representatives in Minnesota were early champions of PPSI and vital to its success.

PPSI resulted in the development of a model, state-level paint stewardship law to establish an economically and environmentally-sustainable, industry-designed and implemented post-consumer paint management system. Oregon was the first state to pass this industry-supported paint stewardship law in 2009. Similar laws were passed in California in 2010; Connecticut in 2011; Rhode Island in 2012; Vermont, Maine, and Minnesota in 2013; and Colorado in 2014.

## Minnesota Paint Stewardship Law

The broad goals of the Minnesota Paint Stewardship Law (“Law”) are for paint manufacturers to:

- (a) Implement and finance a statewide product stewardship program that manages architectural paint;
- (b) Reduce the generation of post-consumer architectural paint;
- (c) Promote the reuse and recycling of post-consumer architectural paint; and,
- (d) Negotiate and execute agreements to collect, transport, and process the architectural paint for end-of-life recycling and reuse.

## Program Plan

The Minnesota Paint Stewardship Law requires a stewardship organization (or individual producers) to submit to the Minnesota Pollution Control Agency a Program Plan (“Plan”) that includes the following:

- (1) Certification that the product stewardship program will accept all discarded paint regardless of which producer produced the architectural paint and its individual components;
- (2) Contact information for the individual and the entity submitting the plan, a list of all producers participating in the product stewardship program, and the brands covered by the product stewardship program;
- (3) Description of the methods by which the discarded paint will be collected in all areas in the state without relying on end-of-life fees, including an explanation of how the collection system will be convenient and adequate to serve the needs of small businesses and residents in both

urban and rural areas on an ongoing basis and a discussion of how the existing household hazardous waste infrastructure will be considered when selecting collection sites;

- (4) Description of how the adequacy of the collection program will be monitored and maintained;
- (5) Names and locations of collectors, transporters, and recyclers that will manage discarded paint;
- (6) Description of how the discarded paint and the paint's components will be safely and securely transported, tracked, and handled from collection through final recycling and processing;
- (7) Description of the method that will be used to reuse, deconstruct, or recycle the discarded paint to ensure that the paint's components, to the extent feasible, are transformed or remanufactured into finished products for use;
- (8) Description of the promotion and outreach activities that will be used to encourage participation in the collection and recycling programs and how the activities' effectiveness will be evaluated and the program modified, if necessary;
- (9) A uniform stewardship assessment for any architectural paint sold in the state;
- (10) Evidence of adequate insurance and financial assurance that may be required for collection, handling, and disposal operations;
- (11) Five-year performance goals, including an estimate of the percentage of discarded paint that will be collected, reused, and recycled during each of the first five years of the stewardship plan; and
- (12) Discussion of the status of end markets for collected architectural paint and what, if any, additional end markets are needed to improve the functioning of the program.

## Citations

To provide context, each section of this Plan begins with citations of the relevant sections of the Law that apply to it.

## 2. Stewardship Organization

---

### Statutory Citation

*Minnesota Session Laws 2013, Chapter 114, Section 78*

*Subd. 4. Requirement to submit plan. (a) On or before March 1, 2014, and before offering architectural paint for sale in the state, a producer must submit a stewardship plan to the agency and receive approval of the plan or must submit documentation to the agency that demonstrates the producer has entered into an agreement with a stewardship organization to be an active participant in an approved product stewardship program as described in subdivision 2.*

### PaintCare Inc.

PaintCare Inc. (“PaintCare”) – a 501(c)(3) non-profit organization – was created by the American Coatings Association, a voluntary, non-profit organization working to advance the needs of the paint and coatings industry.

PaintCare was formed in 2009 to serve as the representative product stewardship organization for architectural paint manufacturers (also referred to as producers) in states that pass paint stewardship legislation. PaintCare representation is open to all architectural paint manufacturers and they may register with PaintCare at any time. PaintCare currently represents 180 paint manufacturers in its active states and will represent participating manufacturers in the Minnesota Paint Stewardship Program.

PaintCare’s corporate office is located in Washington, D.C. State program staff members are located in and/or work in the states in which PaintCare programs operate, including Minnesota.

PaintCare’s Board of Directors consists of eleven non-paid representatives of architectural paint manufacturing companies. Appendix A provides the names and companies of PaintCare’s Board of Directors at the time this Plan was submitted.

## 3. Registered Manufacturers and Brands

---

### Statutory Citation

*Minnesota Session Laws 2013, Chapter 114, Section 78*

*Subd. 3. Requirement for sale. On and after July 1, 2014, or three months after program plan approval, whichever is sooner, no producer, wholesaler, or retailer may sell or offer for sale in the state architectural paint unless the paint's producer participates in an approved stewardship plan, either individually or through a stewardship organization. (b) Each producer must operate a product stewardship program approved by the agency or enter into an agreement with a stewardship organization to operate, on the producer's behalf, a product stewardship program approved by the agency.*

*Subd. 5. Stewardship plan content. A stewardship plan must contain: (2) a list of all producers participating in the product stewardship program, and the brands covered by the product stewardship program.*

### Section Overview

This section discusses:

- Manufacturer registration
- Private label agreements
- Posting and purpose of registration lists
- Program Products

### Manufacturer Registration

Representation by PaintCare is open to all architectural paint manufacturers who are obligated to take part in the Minnesota Paint Stewardship Program.

To identify potential participants, PaintCare obtained manufacturer information through a variety of sources, including:

- Prior registrations with PaintCare for other states
- The American Coatings Association
- Internet research

Manufacturers were notified about the Minnesota Law and Program via email and a notice on PaintCare's website for reporting sales for other states.

Some manufacturers may still be unfamiliar with the Program and may need to be contacted several times to become aware of their obligations under the Law. Therefore, the identification and notification of potential manufacturers is an on-going process, and the list of registered manufacturers (and brands) is expected to change as additional manufacturers become aware of the Program.

Prior to the Program launch PaintCare provided the Agency with a current list of registered manufacturers and brands. PaintCare will provide an updated list within 30 days of any change.

### **Private Label Agreements**

Private label agreements (or services) represent products manufactured or distributed by one company for use under another company's label. They are also referred to as store brands, generic brands, and tolling agreements. These agreements are often kept confidential to protect the arrangements from competitive interests. Therefore, PaintCare will not specify which brands are produced by which manufacturer, unless the name of the manufacturer is included in the brand name. Instead, registered manufacturers and their registered brands will always be presented in two separate lists thereby assuring the confidentiality of private labeling and other brand agreements.

### **Posting and Purpose of Registration Lists**

PaintCare posts the lists of registered manufacturers and brands on the PaintCare website. The purpose of posting the lists is to make them available for retailers and distributors. Retailers and distributors use the lists to learn which brands may be legally sold in the state upon implementation of the Program. The current lists of registered manufacturers and brands are included in Appendix B and available on PaintCare's website. The lists will be updated and reposted within 30 days of any changes.

### **Program Products**

The terms Program Products, architectural paint, and paint are used interchangeably in this Plan. In addition, this Plan used the common term latex paint to mean non-combustible or water-based Program Products, and oil-based paint to mean combustible or petroleum solvent-based Program Products.

Program Products are architectural paints in containers no larger than 5 gallons in size. Program Products do not include Industrial Maintenance (IM) coatings, Original Equipment Manufacturing (OEM) coatings, and other specialty coatings. Please see Appendix C for the definition and examples of both Program Products and Non-Program Products. This definition is used to determine the products on which manufacturers are to apply the assessment ("PaintCare Recovery Fee"), as well as to determine which post-consumer products are accepted by the PaintCare drop-off sites.

PaintCare issues product notices as needed to explain certain types of products and whether they are Program Products or not. Examples of these notices are included in Appendix C.

## 4. Collection Infrastructure

---

### Statutory Citation

*Minnesota Session Laws 2013, Chapter 114, Section 78, Subd. 5. Stewardship plan content. A stewardship plan must contain:*

*(1) certification that the product stewardship program will accept all discarded paint regardless of which producer produced the architectural paint and its individual components.*

*(3) a description of the methods by which the discarded paint will be collected in all areas in the state without relying on end-of-life fees, including an explanation of how the collection system will be convenient and adequate to serve the needs of small businesses and residents in both urban and rural areas on an ongoing basis and a discussion of how the existing household hazardous waste infrastructure will be considered when selecting collection sites.*

*(4) a description of how the adequacy of the collection program will be monitored and maintained.*

*(5) the names and locations of collectors ... that will manage discarded paint.*

### Section Overview

This section discusses:

- Who can use the Program
- Pre and post-Program paint collection infrastructure
- Convenience criteria
- Drop-off site operations

### Introduction

Minnesota has a robust, statewide household hazardous waste (HHW) collection system in which all 87 counties have some form of HHW collection through permanent and seasonal facilities, temporary collection events, and partnerships with other counties. Minnesota's HHW programs were considered in the proposed paint collection system because of the extensive history within their respective communities and regions.

PaintCare welcomes partnership with all HHW programs in the state to support and utilize their existing programs for paint collection, and will increase paint recycling opportunities in Minnesota through the addition of new sites and services.

The Program anticipates paint collection infrastructure and services to include:

- Local government HHW facilities and events
- Retail paint drop-off sites (paint, hardware and building supply stores) and "reuse" stores
- Solid waste transfer stations (public and private)

- Direct pick-up service for large volumes of paint
- Paint-only drop-off events

PaintCare provided the Agency with a list of participating drop-off sites prior to Program launch and will provide updated lists upon request. A list of the current 134 participating drop-off sites is included in Appendix D.

## Audience

The PaintCare Program will serve Minnesota residents, businesses, and other entities that have unwanted, post-consumer paint, subject to programmatic limitations described here:

**Residential Generators/Homeowners.** The Program will accept any quantity of post-consumer latex or oil-based paint from this group.

**Very Small Quantity Generators (VSQGs).** Trade painters, contractors, small businesses, and other small to medium-sized organizations are typical VSQGs. The Program will accept any quantity of post-consumer latex paint from VSQGs. The Program will only accept post-consumer oil-based paint at or below the limits applied to hazardous waste generation for VSQGs. In Minnesota, VSQGs are limited to 220 pounds of total hazardous waste generation per month and are allowed to accumulate and dispose of up to 2200 pounds (about 220 gallons) at one time.

**Small Quantity Generators (SQGs) and Large Quantity Generators (LQGs).** The Program will accept any quantity of latex paint from SQGs and LQGs. The Program does not provide for collection of oil-based paint from SQGs or LQGs at this time, but PaintCare is in the process of evaluating the feasibility of including it in the future in all PaintCare states. PaintCare has hired a consultant to determine the amount of oil-based paint generated by LQGs and SQGs, both from painting contractors as well as other businesses and entities in order to determine the potential costs to the Program and any adjustment that would have to be made to the PaintCare Recovery Fee to accommodate including it in the future. Once this information has been gathered, PaintCare will present such to the PaintCare Board of Directors to determine options. PaintCare will update the Agency on these efforts by June 1, 2015.

## Acceptance of Discarded Architectural Coatings

The PaintCare Program will accept discarded architectural coatings from all manufacturers. Drop-off sites must accept all Program Products, regardless of the manufacturer of the coating or its individual components.

## Household Hazardous Waste Programs

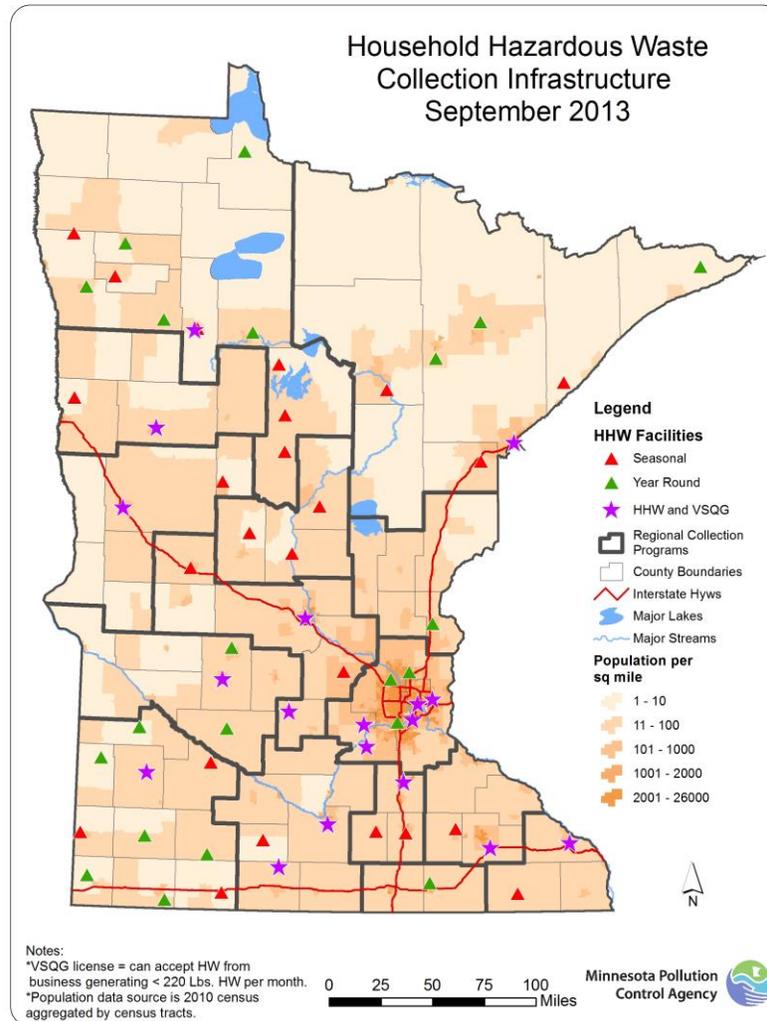

HHW facilities and events are a good Program partner because they provide their customers the convenience of recycling/disposing of other products at the same time as paint, and often have regular customers that have used their programs for many years.

With assistance from Agency staff and municipal programs in the state, PaintCare has identified and met with a large portion of the state's HHW programs. Most of these meetings have taken place on location at the program's HHW facilities. Through these meetings, PaintCare has had the opportunity to present

the benefits to municipalities of partnering with the Program. These benefits include cost savings, offering expanded services to their community, reducing waste, and increasing recycling.

Following the launch of the Program, PaintCare will continue its outreach to HHW programs to ensure they are aware of the PaintCare Program and partnership opportunity.

The following map provided by the Agency shows the most current representation of the existing HHW and VSQG collection infrastructure in the state.

An HHW-tailored PaintCare Program fact sheet and interest form was developed and distributed over the last 16 months at stakeholder and individual meetings and are available on our website. Current copies of these materials are included in Appendix E. Following receipt of a completed interest form, PaintCare contacts program staff to obtain program details and to discuss the contracting process.

PaintCare has received letters of interest from HHW programs serving 51 counties and we ultimately expect to partner with all 87 counties in the state, whether directly through county HHW programs or indirectly through regional HHW programs.

Counties and counties part of regional HHW programs that have formally expressed interest, as of submission of this revised Plan: Anoka, Becker, Big Stone, Blue Earth, Brown, Chippewa, Chisago, Clay, Cottonwood, Crow Wing, Dakota, Dodge, Douglas, Faribault, Freeborn, Goodhue, Hennepin, Hubbard, Jackson, Kandiyohi, Lac qui Parle, LeSueur, Lincoln, Lyon, Mahanomen, Marshall, Martin, McLeod, Meeker, Mower, Murray, Nicollet, Nobles, Norman, Olmsted, Otter Tail, Pipestone, Pope, Redwood, Renville, Rice, Rock, Sibley, Steele, Swift, Todd, Waseca, Washington, Watonwan, Winona, and Yellow Medicine.

All other regional programs and counties we have approached have informally expressed interest and we will follow up with them to confirm their interest going forward.

In addition to individual meetings, PaintCare has presented on the Program at a number of larger group meetings since the Law passed in the summer of 2013, including:

- Several broad stakeholder meetings held in conjunction with the Agency
- Conferences: Recycling Association of Minnesota, Minnesota Solid Waste Administrators Association, North American Hazardous Materials Management Association
- Organizations: Solid Waste Management Coordinating Board, Minnesota Product Stewardship Council, Western Lake Superior Sanitation District
- HHW programs and regional HHW program managers

As of November 1, 2015, no HHW programs are under contract. Due to PaintCare's efforts to preserve protections HHW programs currently receive through the State contracting system, the Program has not been able to contract with HHW programs using PaintCare's normal methods. PaintCare has provided multiple alternative solutions, all of which have been rejected. Thus, the Agency is now involved in contract negotiations as is the Minnesota Department of Administration.

PaintCare is confident that with the Agency's assistance, the Program can successfully be put in place without disruption to the State's HHW contract provisions. Thus, PaintCare will continue its good faith efforts to contract with HHW programs for the collection of Program Products and provide financial relief to these programs for the transport and processing of those Products.

PaintCare will update the Agency with a report on June 1, 2015 on whether or not the HHW programs are in the Program and identify which Programs are participating. If no HHW programs are participating in the Program, PaintCare will submit a revised Program Plan on June 1, 2015 with adjusted collection volume goals, Program costs, and the Recovery Fee structure to reflect the lack of HHW program participation. In the event that some HHW programs are participating and some are not, PaintCare will either submit a report identifying those HHW programs participating in the Program and certifying that no adjustments need to be made to Program Plan, or will submit a Revised Plan on June 1, 2015 with the necessary adjustments to reflect the HHW programs that are not participating.

#### **Exceptions for Household Hazardous Waste Programs**

PaintCare endeavors to partner with sites that can accept Program Products free of charge from all residents, businesses, and institutions. However, in recognition of restrictions on municipally operated HHW facilities and other sites, some exceptions may be made. These include, but are not limited to the following:

- Programs with funding tied to a specific service area (e.g., local tax or utility-based funding source) will not be required to accept Program Products from participants outside of their service area.
- HHW collection programs not currently accepting latex paint (if there are any) will not be required to change their operations to include latex paint.
- Programs not accepting waste from businesses will not be required to do so.
- Programs already charging an administrative fee for HHW, VSQG or paint collection may continue this practice as long as it is clear to customers that the fees do not relate to services funded by the PaintCare Program. Other collection sites, such as retailers, may not charge consumers an administrative fee for the handling of Program Products.

## Retailers

PaintCare has identified approximately 925 paint retailers in Minnesota including paint, hardware, and home improvement stores. Retail stores include independent, cooperative, chain and corporate stores – both small and large. In addition to paint retailers, “reuse” stores have also been identified as potential drop-off site partners.

All paint retailers are invited to participate as a PaintCare drop-off site provided they meet PaintCare’s requirements and applicable laws and regulations, including, but not limited to the following:

- Ability to provide enough space to hold a minimum number of collection containers as determined by PaintCare’s needs in their specific geographic location;
- Willingness to accept both latex and oil-based paints;
- Willingness to accept Program Products from any qualifying generator;
- Reasonable access by the public and by PaintCare’s transporter;
- Compliance with PaintCare operational guidelines and applicable state and local regulating agency requirements;
- Willingness to have their site promoted on PaintCare’s website and through other outreach methods; and
- Willingness to post and distribute PaintCare point-of-sale outreach materials including a window poster advertising their store as a drop-off site.

Although retail participation is entirely voluntary and drop-off sites are not compensated, interest has already been expressed by many retailers.

Outreach to retailers began in May and included the following activities:

- Webinars providing program information and content specific to the roles, responsibilities and opportunities of the Program.
- Three rounds of mailers to all retailers in the state. The first mailer was sent in May and included a welcome letter containing an invitation to the webinars, the Fact Sheet for Retailers, and the Facts Sheet for Trade Painters. The second mailer was sent to all retailers in July to provide

updated versions of the two fact sheets and additional information on how to partner with PaintCare. A third mailer was sent in September disseminating packets of hardcopy point-of-sale (POS) materials (brochures, poster, fact sheets) for educating customers. Copies of all three cover letters and the current version of the three fact sheets are included in Appendix F.

- One-on-one visits with over 300 retail stores to inform of the law's responsibilities and recruit participation in the collection site system.
- 2 informational seminars at the seasonal marketplace for United Hardware, a distributor with 256 partner stores in Minnesota. PaintCare will have an information booth at the January 2015 edition of this event.
- Presentation and Q&A sessions at Twin Cities Ace Hardware stores quarterly meeting (25 stores).
- Enhanced awareness of the Program by forming relationships with prominent paint retailers in Minnesota, including Target and Menard's

### **“Reuse” Stores**

Habitat for Humanity ReStores and other reuse and salvage stores and yards – sites that accept and redistribute excess or reusable building materials – have been identified as a unique group of retailers to invite to become PaintCare drop-off sites. These stores can play an important role in the Program because they contribute to “reuse.” PaintCare has identified approximately a dozen reuse stores in Minnesota.

Reuse stores that currently accept donations of paint for resale either turn away unsellable paint or are left with a disposal problem. Reuse stores that sign up with PaintCare will be able to accept (more) paint, screen out the best paint for resale, and have the unsellable paint picked up by PaintCare at no charge. These sites were notified of the opportunity to become drop-off sites and have received personal visits and communication to discuss their specific needs in advance of the Program launch.

At the time of Plan submission, 3 of 12 ReStores have expressed formal interest, with the other 9 stores still weighing their participation. We expect the majority of ReStores to eventually participate as sites.

### **Solid Waste Transfer Stations**

A fact sheet (and interest form) tailored for transfer stations, landfills and recycling facilities was developed and distributed at municipal meetings in the past 16 months and is available on PaintCare's website. Current copies of these materials are included in Appendix G.

PaintCare has worked with HHW programs and regional program managers in Minnesota to identify transfer stations that might be interested in the PaintCare Program and will continue to do so. Most transfer stations in Minnesota are operated by municipalities, others are privately run – both groups will be invited to join the Program. Following receipt of a completed interest form, PaintCare will contact transfer station staff to obtain facility details and begin the process to establish a formal agreement between PaintCare and the site.

## Exceptions for Solid Waste Transfer Stations

Similar to HHW programs, PaintCare recognizes that transfer stations may have some operational or funding restrictions and exceptions may be made to accommodate them. Use of transfer stations is usually limited to local residents and businesses. Although PaintCare allows anyone to drop off paint at any PaintCare site, transfer stations will be allowed to limit participation to their customers or community if they wish to do so.

## Large Volume Pick-Up Service

The Large Volume Pick-Up Service (“LVP Service”) will be offered to trade painters, contractors and other entities with large volumes of paint – generally more than 300 gallons. Under the LVP Service, approved users will receive a direct pick up at their site. The LVP Service will begin within the first six months of the start of the Program. Approval for use of the LVP Service will be determined by PaintCare. Potential users of the LVP Service will be asked to provide specific information about their volume of paint, paint type (latex vs. oil-based), and container sizes. Once a site is approved for an LVP, they will be put in direct contact with PaintCare’s transportation service provider to schedule a pick-up appointment. All LVP Service will comply with applicable state requirements for hazardous waste transport.

## One-Day Paint Collection Events

The objective of providing paint-only collection events is to offer services in underserved areas – areas where a needed drop-off site cannot be established. PaintCare will evaluate the need for one-day events in Minnesota prior to Program launch and continually thereafter, taking into consideration an area’s proximity to paint retailers, distance to the nearest permanent drop-off site, population of the area, and (in future years) participation level of past events in the area. Unlike municipally-sponsored HHW events, PaintCare’s paint-only collection events will not be restricted by county or other boundaries; participants from any place in Minnesota will be allowed to deliver paint to the events.

## Convenience Criteria

To ensure adequate paint collection infrastructure in Minnesota, PaintCare used Geographic Information System (GIS) modeling to determine the appropriate minimum number and distribution of drop-off sites. After simulating various approaches, PaintCare proposes the following convenience criteria for Minnesota:

**(1) Population Distribution/Distance:** At least 90% of Minnesota residents shall have a permanent site within a 15-mile radius. It is expected that in areas with no opportunities for recruiting permanent drop-off sites (i.e., no available retail store), participants will have to drive a distance greater than 15 miles to reach a drop-off site.

**(2) Population Density:** In addition to collection sites selected to meet the 15-mile distance criteria, one additional site will be added for every 30,000 residents of a population center (as described in Appendix H).

Application of these criteria results in approximately 236 strategically located permanent drop-off sites, which PaintCare considers its minimum, baseline service level goal. PaintCare recognizes that not all

sites are available to all residents within 15 miles of the site (e.g., local transfer stations) and therefore builds its state convenience models using retail stores that are available to all participants.

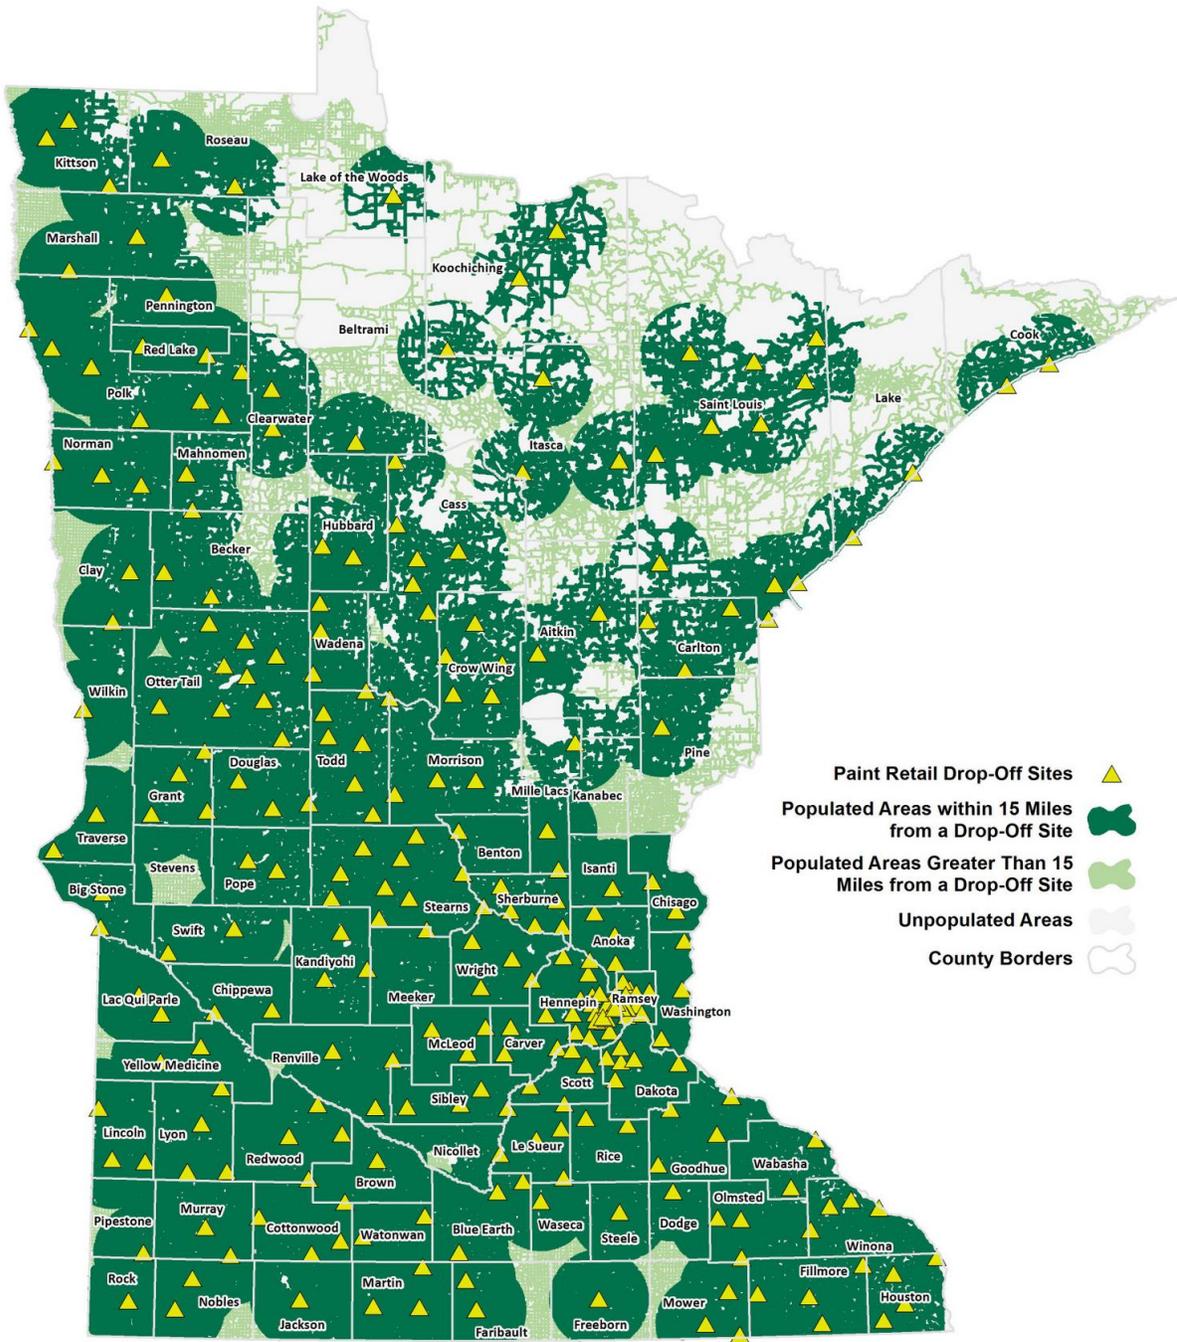

PaintCare aims to meet the baseline goal within 18 months of Program launch and expects the goal to be met primarily through new retail drop-off sites, supplemented by existing HHW facilities and transfer stations. Once the baseline is satisfied, PaintCare is likely to recruit additional drop-off sites in an effort to maximize convenience for Minnesota residents.

Each year the Annual Report will include a GIS analysis and discussion of the convenience level offered by the current drop-off sites. If PaintCare has not met or maintained its goals, the Annual Report will also discuss the efforts that will be undertaken to meet them.

The map on the following page illustrates the optimal placement of the 236 locations (based on addresses of actual, potential, retail partners) needed to meet the distribution and density criteria. Yellow triangles on the map represent a drop-off site; dark green represents a populated area with a 15 mile radius of each site. All areas of the state, including tribal lands, were given equal consideration. This map is for illustrative purposes – to get a sense of what a statewide convenient distribution of sites may look like. It does not represent the actual type, number or distribution of sites that may end up serving as drop-off sites in the Program. These sites represent the best combination of sites if PaintCare hand-selected retail sites and only met the baseline service needs of the Program. Using this set of sites is not the only way to satisfy the convenience requirement – it can be achieved through many other configurations of sites throughout the state, but it is unlikely to be accomplished with fewer than 236 sites.

Further discussion of the GIS methodology and analysis conducted by Golder Associates, an engineering firm with expertise in geographic mapping and analysis, is provided in Appendix H.

# Potential PaintCare Drop-Off Sites (Optimized to Meet Convenience Criteria)

## Site Operations

All PaintCare drop-off sites operate in accordance with applicable federal, state and local environmental laws, regulations and permits and follow all procedures in PaintCare's operational guidelines. If any discrepancies arise between PaintCare's guidelines and federal, state, or local statutory, regulatory, contract or permit conditions, the requirements of latter group must be followed.

All PaintCare drop-off sites must:

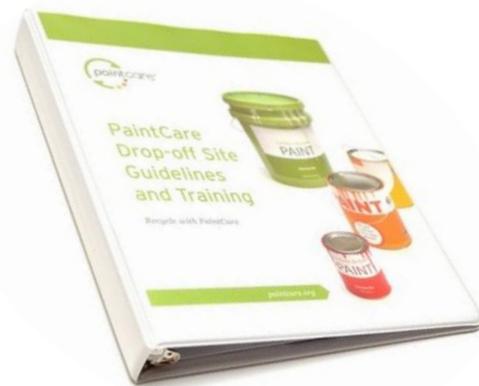

- Have an agreement in place with PaintCare;
- Provide enough space to hold a minimum number of bins as determined by PaintCare's needs in their specific geographic area;
- Accept Program Products from all site-eligible audiences;
- Provide reasonable access to the public and PaintCare's transporter;
- Be staffed during operating hours;
- Keep collected Program Products in a secure storage location;
- Be willing to have their site promoted on PaintCare's website and through other outreach methods;
- Distribute PaintCare's public outreach materials; and
- Receive and retain Agency or other local permits/licenses as required for participation in the Program.

## Site Training

All drop-off sites receive an in-person, on-site training regarding PaintCare Program operations.

Each site is provided a training binder that is reviewed during the training and that includes a training log to be signed by any site employee handling paint for the Program. Training topics include:

- Identification of Program Products
- Safe handling and storage of Program Products
- Spill clean-up and reporting
- Procedures for scheduling a paint pick-up
- Screening of businesses and generator status to determine if they qualify to use the Program for oil-based paint (limits may apply)
- Record keeping

In addition to PaintCare's guidance, the Agency has requirements that will be incorporated into the training.

## Collection Containers

Drop-off sites will be equipped with collection containers to store post-consumer paint received through the Program. Collection containers will be US DOT approved reusable (example on left) or single-use cubic yard boxes (example on right), 55-gallon drums, or other appropriate containers. Drop-off sites will be required to keep collection containers in a secure location that does not have public access. (Sites that can only hold one collection container may not be appropriate for the Program.)

## Collection Volumes

Drop-off sites may set their own limit for the amount of paint they will accept from a customer at any one time as long as the limit is at least five gallons. The maximum amount of oil-based paint a site may accept from a VSQG customer at one time is 2200 pounds (approximately 220 gallons).

## Non-Program Products

Minimization of Non-Program Products entering the Program is critical and will be achieved through public education, signage at drop-off sites, and drop-off site training on Program Product identifications. PaintCare manages any incidental non-Program Products that enter the system. In addition, PaintCare's transportation and processing service providers will provide feedback to PaintCare regarding the source (specific drop-off site), quantity and type of non-Program Products. Depending on the severity of contamination, PaintCare may do one of more of the following: (1) contact the site to let them know about the incident, (2) provide additional/refresher site training on identification of Program and non-Program Products, or (3) remove the site from the program.

## Site Visits and Monitoring

Retail and transfer station sites will receive site visits twice each year. HHWs will be visited once each year. The purpose of these visits is to ensure compliance with Program requirements, address any needs or concerns partnering sites may have, check their supplies of outreach materials, and continually solicit their feedback on how to improve the Program.

# 5. Materials Management

---

## Statutory Citations

*Minnesota Session Laws 2013, Chapter 114, Section 78, Subd. 5. Stewardship plan content. A stewardship plan must contain:*

*(5) the names and locations of ... transporters, and recyclers that will manage discarded paint.*

*(6) a description of how the discarded paint and the paint's components will be safely and securely transported, tracked, and handled from collection through final recycling and processing.*

*(7) a description of the method that will be used to reuse, deconstruct, or recycle the discarded paint to ensure that the paint's components, to the extent feasible, are transformed or remanufactured into finished products for use.*

*(12) a discussion of the status of end markets for collected architectural paint and what, if any, additional end markets are needed to improve the functioning of the program.*

## Section Overview

This section discusses:

- Transportation and processing service providers
- Paint transportation and processing procedures
- Status of end markets for post-consumer paint

## Paint Transportation

An effective transportation system is required to ensure that the paint collection infrastructure operates efficiently. PaintCare will contract for transportation of all Program Products. Transporters may include both private and public entities. Transporters must meet all applicable State and Federal DOT rules and regulations and must track Program Products from the collection sites to their final destination. Transporters, subsequent processors, and their records, will be subject to audits by PaintCare.

Following a formal bid process, PaintCare selected Clean Harbors Environmental Services and Veolia Environmental Services in Minnesota. Additional transporters may be utilized if needed. The Agency will always be informed in advance of any changes to transportation service providers. In addition, PaintCare is working with county government representatives to facilitate a process to allow HHW programs to continue paint collection under the State contract for HHW management. PaintCare intends to preserve the standard of transportation, tracking, and handling currently in use by the State of Minnesota.

As needed, transporters will drop off empty collection containers and Program supplies (e.g., spill kits) at PaintCare drop-off sites and events and pick up full collection containers in a timely manner (5 days in urban areas and 10 days in rural areas). Transporters will service drop-off sites on either an on-call basis (sites call for pick-up when their storage capacity is 50% full), or on a set schedule – whichever method is best for the individual drop-off sites.

## Paint Processing

Either directly, or through transportation service providers, PaintCare will contract for processing and proper end-of-life management of all Program Products. At this time, PaintCare is contracting for processing and end-of-life management services through Clean Harbor and Veolia. Both companies manage oil-based Program Products internally, and subcontract with Amazon Environmental in Minnesota for the management of latex and water-based Program Products. Additional processors may be utilized if needed. The Agency will always be informed in advance of any changes to service providers. The following summarizes the management options PaintCare intends to use for Program Products. These options are prioritized by highest, best use:

### Latex Paint

- Reuse
- Recycling back into paint or into another product
- Beneficial use
- Appropriate disposal

The condition in which post-consumer latex paint is received by the Program may limit the available management options. If containers are not properly sealed during storage, latex paint can harden due to evaporation and may no longer be useable or recyclable. If latex paint is frozen a number of times, it may not be as suitable for reuse or recycling. Ultimately, the method of storage and the timing of the decision to recycle/dispose of the paint are determined by the consumer. The Program's education and outreach component will encourage the return of unwanted post-consumer paint in an effort to reduce the age and improve the condition of collected paint.

### Oil-Based Paint

- Paint reuse
- Energy recovery through fuel blending or fuel incineration

While it is possible to recycle oil-based paint back into paint, no processor offers this option at this time. With the exception of a small amount of reuse, all oil-based paint will be managed by fuel blending or fuel incineration.

The following provides a more detailed description of the latex and oil-based paint management options listed previously.

**Latex: Reuse.** As discussed previously, the Program will implement and support latex paint reuse programs where possible and provide monetary compensation to sites that give reusable paint away to the public free of charge. Paint reuse programs can return good quality paint to the local community without moving the paint through a costly network of transporters and processors. This is also an important opportunity to reduce the environmental impacts of the Program. As with other second-hand products, users of "previously-owned" latex paint will be notified that the suitability of the product cannot be guaranteed. Drop-off sites will seek to obtain participant acknowledgement through a waiver or logbook entry before the paint is taken for reuse.

**Latex: Recycling Paint Back into Paint.** Latex paint may be used to make recycled-content latex paint. Once reprocessed, recycled-content paint is sold through domestic and international markets. The quality of the paint varies from high quality color-segregated and filtered paint, to low-grade gray paint most commonly used for graffiti abatement.

**Latex: Recycling Paint into Non-Paint Products.** Though options are limited at this time, latex paint may be used as a raw material for other products.

**Latex: Beneficial Use.** Latex paint may go to beneficial use – as approved by federal, state and local authority – including use in fuel substitute, as alternative daily cover (ADC), and for landfill biodegradation (an experimental technology).

**Latex: Disposal.** Latex paint may be solidified for proper disposal. In this process, liquid paint is combined with drying agents and turned into a solid suitable for landfill. Solidification represents the least desirable management method for post-consumer latex paint and will only be utilized for latex paint that is not suitable to be managed for recycling or beneficial use.

**Oil-Based: Reuse.** As with latex paint, the Program will implement and support oil-based paint reuse where possible. These programs benefit the community and reduce the life cycle impact of the post-consumer product. Users of “previously owned” oil-based paint will be notified that the suitability of the product cannot be guaranteed. Drop-off sites will seek to obtain participant acknowledgement through a waiver or logbook entry before the paint is taken away for reuse.

**Oil-Based: Fuel Blending.** Some cement kilns use high BTU value industrial by-products and hazardous wastes, including oil-based paint, as an alternative fuel source. These kilns are fully permitted for the necessary federal, state, and local requirements for hazardous waste management and monitor air emissions and kiln ash for permit compliance. Burning hazardous waste offsets the amount of other fuel sources required by the kilns to manufacture cement.

**Oil-Based: Fuel Incineration.** Permitted hazardous waste incinerators commonly use oil-based paint, flammable liquids and other hazardous wastes and industrial by-products as a substitute fuel source because it is less expensive than natural gas. Oil-based paint has a petroleum distillate base which aids in thermal destruction of other hazardous waste and validates its use in this capacity. These incinerators are fully permitted for the necessary federal, state, and local requirement for hazardous waste management and monitor air emissions and ash for permit compliance.

## Incidental Non-Program Products

Although drop-off sites will be trained and instructed to screen out non-Program Products, it is likely that a small number of containers of non-Program Products may enter the Program and be screened out during the sorting process by PaintCare’s transporters and processors. Incidental wastes will be recycled or disposed of as hazardous waste by PaintCare rather than returned to a drop-off site.

## **Empty Paint Containers**

Most, but not all, metal and plastic paint containers are already being recycled as part of existing collections by the service providers (and subcontractors) chosen for the Minnesota Program. PaintCare will discuss with its service providers what barriers exist to recycling the fraction of containers that are not currently recycled and work with them to identify additional opportunities to maximize empty paint container recycling.

## **Status of End Markets**

At the time this Plan is being submitted, there are adequate end markets for latex and oil-based post-consumer paint, comprised of both in-state and out-of-state processors of the two paint streams. Presently, the primary end market for latex paint is recycling paint back into paint. Latex paint is also used as a binder or dust control agent in the manufacture of various products including Portland cement. For oil-based paint, fuel blending and fuel incineration are the dominant end markets. If at any time in the future PaintCare sees a shift in the market or has concerns about reduced end markets, the Agency will be notified and engaged in discussion of alternative options.

## 6. Education and Outreach

---

### Statutory Citation

*Minnesota Session Laws 2013, Chapter 114, Section 78, Subd. 5. Stewardship plan content. A stewardship plan must contain:*

*(8) a description of the promotion and outreach activities that will be used to encourage participation in the collection and recycling programs and how the activities' effectiveness will be evaluated and the program modified, if necessary.*

### Section Overview

This section discusses:

- Outreach methods, messaging, and target audiences
- Lessons learned from PaintCare Programs in other states
- Stakeholder meetings
- Evaluation process

### Methods

PaintCare is committed to providing robust and successful education and outreach for the Paint Stewardship Program using a variety of communication methods, including:

- Earned media (e.g., press releases/coverage)
- Traditional media (e.g., newspaper, radio, television)
- Print materials (e.g., brochures, fact sheets)
- Online and social media (e.g. webpage, banner ads, Facebook)
- Direct, face-to-face communications (e.g., home shows, retail site visits, presentations)

Examples of PaintCare outreach materials are included at the end of this section.

### Messaging

#### **Reduce, Reuse, Recycle**

The “Reduce, Reuse, Recycle” messages have been used by environmental organizations and waste management programs for many years. To reduce the amount of post-consumer paint and to inform consumers how and where to recycle their unwanted paint, PaintCare uses a more instructive and paint-specific version of the 3Rs. PaintCare’s message is “Buy Right, Use It Up, Recycle the Rest” to say (1) purchase the right amount of paint for a job, (2) try to use up leftover paint when you can, and (3) if you still have unwanted paint, bring it to PaintCare for recycling.

## **Program Awareness**

Additional messages are used to create awareness of the Program and answer these questions:

- What is PaintCare is and why does the Program exist?
- Why was the Law passed (e.g., product stewardship, cost savings to municipalities)?
- How much is the PaintCare Recovery Fee and what is it for?
- Which products are accepted in the Program and which products are not?

## **Target Audiences**

PaintCare's outreach and education strategy will focus appropriate messages to each of the following audiences:

- Households (residents)
- Businesses that generate paint (e.g., professional painters, contractors, property managers)
- Trade associations (e.g., contractors associations, realtor associations)
- Paint retailers
- HHW programs and waste transfer stations
- Non-English speakers

The following examples illustrate how the Program may adjust the emphasis of messages in outreach materials based on target audience:

### **Households**

- Emphasize how to find a drop-off site to recycle paint – this is the message most people want to hear.
- Promote using up leftover paint to do-it-yourselfers as a primer or for small or creative projects.
- Educate consumers on how to buy the right amount of paint by describing factors that determine the correct amount of paint needed besides just calculating square footage of the walls, such as the texture of the surface to be painted, quality of paint and corresponding coverage rates, changing colors, and whether the surfaces have been previously painted or primed. PaintCare will promote that consumers consult with paint store staff rather than relying on simple square footage calculations.

### **Businesses that Generate Paint**

- Emphasize "Recycle the Rest" as more recycling opportunities are available than previously and are available statewide.
- Promote using up leftover paint.
- Promote the Large Volume Pick-Up Service to businesses with large volumes of leftover paint that they can request a direct pick-up rather than transport their paint to drop-off sites a little at a time.

## **Real Estate Agents**

Many new home buyers find paint left behind by previous owners. To help those either buying or selling a home, PaintCare will reach out to real estate agents. Although the agents usually don't generate leftover paint themselves, they are in an excellent position to help educate home buyers, sellers, as well as the trade painters who help get the homes ready to sell.

## **HHW Programs and Transfer Stations**

PaintCare has developed fact sheets and interest forms to explain how these facilities can become PaintCare drop-off sites.

## **Retailers**

Provide print materials for use by all paint retailers to educate store staff and to educate the general public (regardless of whether or not they are drop-off sites). Retailers may order these materials for no charge. Examples include:

- **Signage:** Geared at creating general awareness of the Paint Stewardship Program, such signage communicates the PaintCare Recovery Fee, how to find a drop-off site, and how to obtain more information about the Program.
- **Brochures/Cards:** Designed to help the public find drop-off sites and explain PaintCare Program.
- **Fact Sheets:** Formatted for easy printing and available from the PaintCare website, fact sheets are designed for a variety of audiences and cover a variety of subjects (e.g., general program information, how to become a paint drop-off site, etc.)
- **Window Poster/Cling:** To promote a site as a paint drop-off location. (Only for drop-off sites.)

PaintCare will send all paint retailers a "starter pack" of consumer point-of-sale (POS) outreach materials prior to the start of the Program. As needed, retailers may order additional POS materials for no charge.

## **Lessons Learned: Phasing in Outreach**

Minnesota's PaintCare Program will benefit from lessons learned – programmatically and financially – from PaintCare Programs in other states. These key lessons are discussed here.

PaintCare has learned the importance of balancing the need to tell the public about the Program (that there is a new fee on paint and that there are new drop-off sites) with the need to allow the drop-off sites time to become familiar with operations.

Prior to PaintCare, for many Minnesota residents, municipal HHW collection programs (facilities and events) were the primary option for getting rid of paint. Those who have used these programs know that they need to act in a timely manner and that the number of days is often very limited. At the start of PaintCare Programs in other states, some sites were deluged with large numbers of people hurrying to use the retail drop-off sites as soon as they learned about them. However, with PaintCare there is no immediacy to using the retail drop-off sites; PaintCare retail drop-off sites are permanent and open during regular business hours.

PaintCare will conduct a statewide outreach to all areas of the state about the program and options, but the outreach will be phased in gradually in order to avoid overwhelming sites and frustrating customers

and retailers. When collection containers become full, the sites cannot accept more paint until the full containers are replaced with empty ones. If they are turned away, the public becomes unhappy with the Program and retail sites, the retailers become frustrated turning people away, and local governments become concerned that this may lead to illegal dumping.

To address these concerns, PaintCare's approach will be to limit outreach at the start of the program to press releases that announce that there is a new Program – with a fee on new paint – and explain that drop-off sites are permanent and open year-round during regular business hours. As sites become more comfortable with the operations, PaintCare will gradually start placing media buys in phases to create more awareness about the Program and inform people how to find drop-off sites. This approach has been successful in Connecticut. Once the retailers that are serving as drop-off sites are more accustomed to the Program, outreach will expand through a combination of local newsprint, television, radio, and geo-targeted on-line advertising.

This initial strategy lacks an important element: that of informing those people who may not see any news stories that the Paint Recovery Fee is being added to their new paint purchases. PaintCare knows that trade painters and other consumers who purchase paint frequently will notice the fee and are more concerned and vocal than those who buy paint infrequently. To address these key consumers of paint, PaintCare will work with trade painters and home builder/remodeler associations, and has already started to provide fact sheets to retailers to insert in their monthly bills to regular customers and make available in the stores so that customers will not be surprised by the fees.

## Stakeholder Meetings with Retailers

As already discussed, PaintCare will make outreach materials available to all paint retailers and will assist retailers with providing consumers with information regarding available management options for post-consumer paint.

Experience in Oregon demonstrated that it is difficult to get retailers to make space for promotional and written materials about the PaintCare Program, despite offering and delivering these materials free of charge. To address this, PaintCare has worked with retail stakeholders to learn what would make them more willing or interested in utilizing PaintCare's materials and promoting the benefits of the Paint Stewardship Program.

PaintCare held two meetings with retailers: In California in June 2012, several months prior to the start of that program, and in Oregon in 2013, almost three years after the start of that program. At these meetings, PaintCare reviewed POS materials (posters, brochures, etc.), and solicited feedback about messaging, design, size, adaptability, co-branding and other elements that may factor into a retailers willingness or ability to use these materials. Key feedback from these meetings is as follows:

### June 2012 (California)

- Message should be simplified to "Recycle with PaintCare."
- Retailers requested a small card to hand customers to help them contact PaintCare by phone or via the website to find a drop-off site.
- Estimating the correct amount of paint to purchase is complicated. It requires knowledge about the type of paint, surface to be painted, and other factors. Retailers would not utilize or distribute PaintCare materials addressing this subject. Instead, retailers suggested that consumers be told to seek advice about buying the right amount of paint from store staff.

- Retailers need to provide advanced notice to their commercial customers (mostly trade painters) to provide them ample time to prepare for the new fees and incorporate the fees into their bids/estimates prior to the launch of the Program.

### **April 2013 (Oregon)**

- After the first year of the program, there are not many complaints about fees.
- Drop-off sites like being listed in newspaper ads.
- The poster about estimating paint sales was not useful. As with the California meeting, the Oregon retailers said estimating how much paint to purchase is not simple and requires more discussion than a chart could convey.
- They preferred the look of the materials developed for California (Oregon materials had not been redesigned prior to stakeholder meeting.)

### **Stakeholder Meetings with Municipalities in Minnesota**

PaintCare met with outreach staff from six Metro counties in December 2013 and held a conference call with HHW and other local government programs in more rural counties in February 2014 to present PaintCare’s outreach strategy and solicit input. The following feedback was received:

- Municipal agency program staff members were interested in working with PaintCare to promote PaintCare drop-off sites and ensure that retail drop-off sites are able to refer consumers with non-Program Products to HHW programs.
- Staff asked that the PaintCare outreach strategy eventually explain what happens to the paint they drop off (e.g., it recycled back into paint products, other products, used as a fuel).
- Some staff members were interested in using PaintCare-created images of generic-looking program product containers.

## **Coordinating Outreach with Municipal Programs**

### **Promotion of HHW Programs**

PaintCare will coordinate the promotion of HHW facilities and one day events with the county programs that establish partnerships with PaintCare. Unless otherwise agreed to by PaintCare, information about HHW facilities and events will be included on the PaintCare Site Locator (see below). HHW programs will be able to review and request changes to the program description and details (hours, acceptance policies, whether they accept paint from VSQGs, etc.). Generally, PaintCare’s prefers to list all permanent HHW facilities that are partners with PaintCare and asks the municipality to decide whether they would like to list their temporary events.

### **Joint Outreach**

PaintCare’s communication department has established a process for municipalities to coordinate joint outreach projects with PaintCare. Through these projects PaintCare assists local municipalities with funding, scriptwriting, graphic design for print, radio and other projects. To initiate a project, the municipality completes a form provided in Appendix I describing the project and budget for approval. PaintCare will consider a reimbursement proportional to the message about PaintCare. For example, in San Luis Obispo County in California, PaintCare reimbursed the county for half of its costs to run a radio

campaign that included a message about their household hazardous waste facilities and PaintCare. In Tillamook County in Oregon, PaintCare provided artwork and reimbursement for monthly newspaper ads about their HHW facility and paint collection. Counties may propose any project that includes a PaintCare message using any medium.

### **Regular Communication with HHW Programs**

In order to coordinate outreach activities, representatives from PaintCare's communications department, PaintCare's marketing firm or the state program manager will participate in conference calls or in-person meetings with communications staff from local government agencies upon request. PaintCare will organize an initial meeting with counties to solicit their input, plan ongoing communications if desired, and identify specific audiences that need to be targeted.

### **Outreach Phases / Timeline**

The first twelve months of outreach will be implemented in phases. Each year PaintCare will update and modify its outreach efforts and plan new media purchases and strategies.

- Pre-launch education including distribution of print materials to all retailers for recruitment to be drop off sites, compliance with paint stewardship law, and providing materials to customers, summer-fall 2014.
- Earned media campaign and press releases about the new program will start in November 2014.
- Public Radio sponsorships will start in January or February 2015.
- Local retail and event support consisting of limited advertising in newspaper and radio will start March or April 2015 in anticipation of spring cleaning and painting season.
- Regional media campaigns will begin and move around the state, starting with public radio sponsorships. All mass media (radio, television, newspaper, outdoor posters, online) will be based on recommendations from PaintCare's Minnesota-based marketing firm and experience in other state programs. Advertising will start in May 2015 and continue through summer and early fall.

### **Site Locator Tool**

PaintCare is committed to providing accurate, up-to-date information regarding paint recycling options available to the public and has taken on the significant task of developing its own nationwide database of paint collection programs, referred to as the *site locator tool*. This tool provides a unique, paint-specific, easy-to-use way to search for the nearest PaintCare drop-off site. Site-specific information will explain who is eligible to use a site and what limitations apply. This tool is available from PaintCare's website and through a mobile phone application. In non-PaintCare States the tool lists municipal household hazardous waste collection programs as locations where the public can bring leftover paint. In PaintCare States, it lists only PaintCare drop-off sites and HHW programs that partner with PaintCare.

### **Evaluation of Outreach**

PaintCare will conduct two consumer awareness surveys within the first two years of the program in order to measure the effectiveness of the outreach strategy. The results of the surveys will be reported in the Annual Reports and used to modify the strategy.

**Recycle with PaintCare**  
About the Oregon Program

PaintCare logo and images of paint cans.

Find a paint drop-off site near you by visiting [paintcare.org](http://paintcare.org)

PaintCare logo and images of paint cans.

**Oregon Paint Recycling Program**  
About the PaintCare Program

PAINTCARE® is a nonprofit 501(c)(3) organization, established by the American Coatings Association to implement paint stewardship programs on behalf of paint manufacturers in states that adopt a paint stewardship law.

**PROGRAM PRODUCTS**  
These products have fees and will be accepted at PaintCare partnering drop-off sites:

- Latex paints (interior, water based)
- Oil based paint (oil)
- Stains
- Primer and undercoats
- Shellac, lacquer, varnishes, urethanes
- Seal and floor paints
- Sealers and underpinning coatings for wood, concrete and masonry

**NON-PROGRAM PRODUCTS**

- Paint thinners and solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Paint additives, colorants, tints, tints
- Wood preservatives (containing pesticides)
- The, methyl, and isobutyl ketone products
- 2 component coatings
- Coatings used for Original Equipment Manufacturing or other applications
- Any non-wastings (sand, spackle, shavers, etc.)

**FEES**  
The "PaintCare Recovery Fee" is applied to the purchase price of architectural paint sold in Oregon as required by the Oregon Paint Stewardship Law. Fees are based on container size as follows:

Half pint or less	\$ 0.00
More than half pint to less than 1 gallon	\$ 0.35
1 gallon	\$ 0.75
More than 1 gallon to 5 gallons	\$ 1.60

For more information, please call for the PaintCare brochure, visit [www.paintcare.org](http://www.paintcare.org) or call (855) 724-6809.

Recycle with PaintCare

**Recycle your paint here.**  
[DURING BUSINESS HOURS ONLY]

**ACCEPTABLE**

- Latex house paint
- Oil based house paint
- Primer
- Stains and sealers
- Varnish and shellac
- All brands

**NOT ACCEPTABLE**

- Paint thinner
- Two-component paints
- Aerosols
- Other chemicals

**PLEASE DON'T BRING CONTAINERS THAT ARE**

- Leaking
- Unlabeled
- Empty

**We're planning to recycle our leftover paint.**

Do you know what to do with leftover paint? Recycling with PaintCare® is simple and convenient. Please join us in protecting the environment by recycling and properly disposing of your leftover paint.

**How does it work?**  
When you buy a gallon of new paint, 75¢ of the purchase price funds the cost of recycling your old leftover paint. (35¢ for quarts; \$1.60 for 5-gallon cans.) PaintCare is setting up drop-off sites throughout California where you will be able to bring leftover paint for no additional charge.

To learn more please call (855) 724-6809 or visit [paintcare.org](http://paintcare.org).

Recycle with PaintCare

Images of a smiling man and woman with paint cans.

**We'll take your paint!**

Do you know what to do with leftover paint?

PaintCare has more than 100 new locations in Connecticut where you can bring your old paint, stain and varnish to be recycled. Learn more about PaintCare and find your local drop-off site at [www.paintcare.org](http://www.paintcare.org).

Recycle with PaintCare

Be sure containers are not leaking and have original labels. Most locations will accept up to four gallons per visit. For more information, call (855) 724-6809.

# 7. Paint Sales and Projected Collection Volumes

---

## Statutory Citation

*Minnesota Session Laws 2013, Chapter 114, Section 78, Subd. 5. Stewardship plan content. A stewardship plan must contain:*

*(11) five-year performance goals, including an estimate of the percentage of discarded paint that will be collected, reused, and recycled during each of the first five years of the stewardship plan. The performance goals must include a specific goal for the amount of discarded paint that will be collected and recycled and reused during each year of the plan. The performance goals must be based on:*

- (i) the most recent collection data available for the state;*
- (ii) the estimated amount of architectural paint disposed of annually;*
- (iii) the weight of the architectural paint that is expected to be available for collection annually; and*
- (iv) actual collection data from other existing stewardship programs.*

*The stewardship plan must state the methodology used to determine these goals.*

## Section Overview

This section discusses:

- Architectural paint sales in the United States and Minnesota
- Studies and data regarding disposal and available collection volumes of post-consumer architectural paint
- Recent collection data for Minnesota and other stewardship programs
- Projected collection volumes under the PaintCare Program

## Architectural Paint Sales

Due to complex distribution chains that may involve layers of distributors between the manufacturer and final point of sale, most manufacturers do not know the volume of their paint sold into each individual state. To address this, PaintCare commissioned a study in the fall of 2012 by Decision Metrics, Inc., a research firm that specializes in coatings industry analysis and economic forecasting. Decision Metrics utilized key indicators including existing home sales, housing starts, state-level employment rates and commercial vacancy rates to build a national and state-level model for predicting annual sales of architectural paint.

The Decision Metrics study projected sales of 670 million gallons of architectural paint in the United States in 2013, 13.66 million gallons of which will be sold in Minnesota. This represents 2% of national sales, while Minnesota represents 1.7% of the national population.

While the volume of paint sold in Minnesota is based on estimates, assumptions about the mix (relative percentage) of container sizes come from PaintCare data in its other state programs. PaintCare has observed initially that a state's geographic size is a good predictor of container size purchase patterns,

with a small state like Connecticut selling relatively fewer 5-gallon containers when compared to larger states like California and Oregon. Therefore, as a larger state, Minnesota's projected container mix is 3.6% quart containers, 36.5% 1-gallon containers, and 59.9% 5-gallon containers. Container size mix is used to establish the PaintCare Recovery Fee structure presented in Section 8 of this Plan (Budget, Stewardship Fee, and Financial Assurance).

Following implementation, the Program will have actual sales and container mix data from manufacturers participating in the Minnesota PaintCare Program. If actual data differs significantly from estimates, then projections of revenue, post-consumer paint collection, and related costs may need to be revised. If fees need to be altered, then approval would be required from the Agency.

## Volume Available for Collection

Paint is designed to be fully consumed through application to walls, buildings and other surfaces. Although the amount of post-consumer paint received through collection programs is measurable, it is very difficult to determine the total quantity of post-consumer paint that is leftover, unwanted and available for collection. The lag time between the purchase of paint and the decision that the unused product is unwanted, and the additional time taken to return it to a drop-off site can vary greatly. In addition, architectural paint products have a long shelf-life, so consumers purchasing paint in one year may not decide that the unused portion is "unwanted" for several years.

## Studies on Leftover Paint Quantity

PaintCare considered the following data and studies to project the total amount of post-consumer paint available for collection, and the percentage of that amount to be received by the PaintCare Program:

- (1) Data from mature Canadian paint collection programs and the Oregon, California and Connecticut PaintCare programs;
- (2) "A Background Report for the National Dialogue on Paint Product Stewardship" prepared by Greiner Environmental Inc. and the Product Stewardship Institute for the Product Stewardship Institute (PSI);
- (3) Documents prepared for the Paint Product Stewardship Initiative (PPSI), including "Quantifying the Disposal of Post-Consumer Architectural Coatings" conducted by Abt Associates Inc. for the U.S. Environmental Protection Agency (EPA);
- (4) "Paint Product Stewardship Initiative Infrastructure Report" prepared by SCS Engineers for the Washington State Department of Ecology; and
- (5) "Consumer Architectural Coatings Disposal Study" conducted by NFO Research Inc. for the National Paint and Coatings Association (ACA's former name).

Links to the above studies can be found on the paint project page of the Product Stewardship Institute's website at [www.productstewardship.us/paint](http://www.productstewardship.us/paint).

In the Background Report, PSI estimated that 2.5% to 5.5% of paint sold remains as leftover paint. EPA's study estimated that 6% to 16% of paint sold remains as leftover paint.

The Infrastructure Report considered scenarios of 5%, 10%, and 15% of paint sales resulting in leftover paint, consistent with both the PSI and EPA studies. The report stated that “even with high levels of promotion, few paint collection programs are likely to capture more than 75 percent of the leftover paint in a region.”

The NFO study found that the average amount of leftover paint per household was 0.375 gallons. Consistent with the NFO study, the Infrastructure Report found that using the 5%, 10%, and 15% scenarios, the quantity of paint expected to be collected per household would be in the range of 0.15 to 0.60 gallons (low and extra high), with 0.30 and 0.45 gallons being the middle range. These values corresponded with data from existing HHW programs (that accept latex paint in addition to oil-based paint), with newer programs operating in the low ranges and more mature programs operating in the middle ranges.

### Projected Collection Volume

PaintCare considered the data and studies discussed above to estimate the amount of post-consumer paint anticipated for collection in Minnesota. The assumptions are discussed here and summarized in the table that follows.

- Sales volume will remain relatively stable in Minnesota at approximately 13.66 million gallons annually.
- 10% of architectural paint sold remains leftover and is available for recycling, equaling approximately 1,366,000 gallons.
- Mature paint stewardship programs collect about 70% of leftover paint annually. This value can also be stated as the equivalent of 7% of sales, referred to as the “recovery rate.” (Recovery rate is defined as the volume of paint collected divided by the volume of paint sold in the same year.) Because of the extensive history of public outreach conducted by governmental programs in Minnesota over the past two decades advocating responsible purchase and reuse, it is possible that less than average amounts of post-consumer paint are generated in Minnesota. For this reason, it is expected that a 7% recovery rate is an appropriate maximum goal at Program maturity. A 7% recovery rate in Minnesota represents approximately 956,000 gallons of paint.

Projected Collection Volume and Recovery Rate	Gallons
Volume sold annually	13,662,000
Volume leftover (10% of annual sales)	1,366,200
Projected Recovery Rate at Program maturity (70% of leftover/7% of sales)	956,000

Several factors make recovery rate goals and calculations problematic. They include the following:

- A wide swing in sales due to positive or negative economic conditions can change the recovery rates even if there is no actual change in collection volumes. Negative economic conditions can lead to lower paint sales. This will translate into a smaller denominator in the recovery rate calculation, which results in a higher recovery rate, even if real collection volumes did not increase. Likewise, positive economic conditions can artificially decrease the recovery rate.

- The variables used to calculate recovery rates are poorly correlated. The time at which consumers decide their unused paint is “unwanted” can vary greatly. As a result, paint brought to a drop-off site may have been purchased very recently or purchased many years ago. Meanwhile, the amount available for collection (estimated to be 10% of sales) is derived from a current and fixed time period (e.g., 2013 sales data) and does not take into account variations in paint sales over time.
- The most important factor not considered when setting recovery rate goals is the impact of source reduction on the volume available for collection. “Buy Right” and “Use it Up” are important components of the PaintCare Program and source reduction is an important goal of paint stewardship mandates. The more successful PaintCare is at providing consumers with information and tools to purchase the correct amount of paint and/or to use up what they have leftover, the less post-consumer architectural paint will be available for collection. This is the most desirable outcome of the Program, but cannot be recognized if Program success is measured by increased collection volumes.

### Baseline Collection Volume

Data provided by the Agency showed that approximately 691,000 gallons of paint was collected through the state’s HHW programs in 2013 with approximately 72% being latex and 28% being oil-based paint. (Data in other PaintCare states shows Minnesota’s collections are consistent with the typical split of 70-90% latex paint and 10-30% oil-based paint.)

Using the 2013 collection volume of 691,000 gallons and 2013 projected sales volumes of 13,662,000 gallons, Minnesota’s current approximate recovery rate of leftover paint is 50%. This rate is used as the baseline from which to set the required 5 year recovery rate goals.

It should also be noted that data provided by individual Minnesota counties/regions to PaintCare shows a trend of HHW programs experiencing declining paint collection volumes from 2010-2013. Data provided by the Agency corroborates this, reporting that collections from all counties have declined by approximately 1.4% since 2010.

The following table lists a sample of Minnesota counties and the volume of paint collected (in gallons) as reported to PaintCare by the counties:

	2010	2011	2012	2013	Change 2010-2013
Hennepin	340,811	323,995	308,900	332,425	-2.5%
WLSSD	19,236	16,213	21,074	20,157	4.6%
Chisago	14,749	15,750	19,857	14,122	-4.4%
Rice	14,431	19,466	15,478	13,895	-3.9%
Waseca	22,140	22,880	22,820	21,600	-2.5%
Olmsted	31,204	31,421	31,833	29,204	-6.8%
<b>Total</b>	<b>442,571</b>	<b>429,725</b>	<b>419,962</b>	<b>431,403</b>	<b>-2.6%</b>

## Five-Year Goals: 2015-2019

For the first year of the program, PaintCare believes that collection will complete the rebound from declines seen in Minnesota from 2010-2012 as the collection infrastructure develops and public awareness builds. Over the following three years, collection volume will reflect the growing maturity of program. By 2019, the program will be fully implemented and collection volume will stabilize at 70% of leftover paint.

Year	Gallons Available	Gallons Collected	Recovery Rate of Leftover Paint
2015*	1,366,200	710,424	52%
2016	1,366,200	806,058	59%
2017	1,366,200	901,692	66%
2018	1,366,200	929,016	68%
2019	1,366,200	956,340	70%

\* This table assumes a 12 month reporting period from July through June; however, the first “year” of the Program will be 8 months (Nov 2014 – June 2015). The actual gallons of available and collected paint for the first report will be lower than anticipated for 12 months, but the recovery rate goal remains at 52%.

Next, data from Minnesota on the split between latex and oil-based paint collection volumes, and on reuse volumes, was applied to the 5 year collection goals to project disposition volumes. In addition, experience from paint collection programs in Minnesota and across the country has shown that a minimum of 5% of paint collected is dry and/or otherwise unrecyclable. Thus, 5% of the projected collection volume has been excluded from the annual volumes in the following table.

Year	Recycling and Beneficial Use (Latex)	Fuel Blending and Fuel Incineration (Oil-Based)	Gallons Reused Locally
2015	460,355	179,027	35,521
2016	522,326	203,127	40,303
2017	584,296	227,226	45,085
2018	602,002	234,112	46,451
2019	619,708	240,998	47,817

It should be noted that while the share of sales of oil-based paint has declined in recent years, collection volumes are expected to continue to generally reflect the sales mix from previous years. PaintCare will continue to monitor and report on the development of any change to this trend.

Finally, while the projected volumes include baseline HHW data, PaintCare only includes paint volumes collected by partnering sites and programs in its collection data. PaintCare does not count paint collection volumes from entities that are not participating in the PaintCare Program and may revise its projections if HHW programs do not participate in the Programs.

## 8. Budget, Stewardship Fee & Financial Assurance

---

### Statutory Citation

*Minnesota Session Laws 2013, Chapter 114, Section 78, Subd. 5. Stewardship plan content. A stewardship plan must contain:*

*(9) the proposed stewardship assessment. The producer or stewardship organization shall propose a uniform stewardship assessment for any architectural paint sold in the state. The proposed stewardship assessment shall be reviewed by an independent auditor to ensure that the assessment does not exceed the costs of the product stewardship program and the independent auditor shall recommend an amount for the stewardship assessment. The agency must approve the stewardship assessment.*

*(10) evidence of adequate insurance and financial assurance that may be required for collection, handling, and disposal operations.*

### Section Overview

This section discusses:

- PaintCare’s funding mechanism
- Projected cost of the Minnesota PaintCare Program
- PaintCare Recovery Fee structure
- PaintCare Recovery Fee audit
- Financial assurance

### Introduction

Key to the success of the Minnesota Paint Stewardship Program is the development of a sustainable funding mechanism. Architectural paint manufacturers – through representation by PaintCare – must establish a funding system to cover the full cost of implementing the Minnesota Paint Stewardship Program.

The PaintCare Program works by placing a paint stewardship assessment on containers of architectural paint sold in Minnesota beginning on the Program start date. This assessment is referred to as the *PaintCare Recovery Fee*. The fee must be set at a rate to cover, but not exceed, the cost of implementing the Program.

### Funding Mechanism

As the representative stewardship organization, PaintCare will implement and direct all aspects of the Minnesota Paint Stewardship Program for participating manufacturers. Funding for Program implementation will come from registered manufacturers (see Section 3 of this Plan) to PaintCare in the form of the PaintCare Recovery Fee. The following steps describe the application of the PaintCare Recovery Fee:

- (1) Manufacturers add the PaintCare Recovery Fee to containers of architectural paint sold in Minnesota directly or through dealers (retailers and distributors).
- (2) Retailers and distributors pass the PaintCare Recovery Fee to their customers by including it in the price of architectural paint they sell in Minnesota.
- (3) When consumers buy architectural paint in Minnesota, the PaintCare Recovery Fee is included in the purchase price. This is how retailers (and distributors) recoup the PaintCare Recovery Fee they paid when purchasing architectural paint from their suppliers.
- (4) Within a designated timeframe (e.g., monthly, quarterly), manufacturers report sales and remit to PaintCare the PaintCare Recovery Fees for architectural paint they sold in Minnesota in the preceding reporting period. Manufacturers have already recouped the PaintCare Recovery Fees they are paying to PaintCare, because the Fees were included in the price of their architectural paint when they sold it to their dealers.

## Budget Discussion

The Program has developed a budget and proposed a fee structure that sustains the Program. The budget is based on the assumptions covered in Section 7 of this Plan that resulted in a projected recovery rate of 7% once the program is mature. The following describes the primary elements of the budget:

### Revenue

- The volume of paint sold in Minnesota is based on industry estimates while the mix of containers by size sold is based on actual sales data in other PaintCare program states.

### Operational Costs

- PaintCare estimates that the Minnesota Program, which will include a large number of well-established county and regional HHW programs, should prepare for a 7% recovery rate once the program is mature.
- In combination, paint transportation and processing costs are the most significant expenses of the Program, accounting for approximately 62% of projected Program costs.
- Collection support is another significant expense and includes the cost of collection containers, spill kits, labor to assist LVP service users pack their paint, and other paint collection related support. Collection support represents approximately 18% of projected costs.
- Communication expenses include advertising and promotional materials to increase Program visibility through education and outreach, and represent approximately 11% of planned expenses.
- Personnel, professional fees and other expenses include the cost of two full-time employees of PaintCare Minnesota, legal costs for developing and negotiating contracts, and other logistical, professional support, and miscellaneous office expenses.
- State administrative fees will be paid by PaintCare to the Agency annually. The Agency has proposed an annual fee of \$78,000 for state FY 2015, with initial set-up costs for FY 2014 of approximately \$124,000. PaintCare has budgeted \$100,000 annually to account for possible future increases.

## **Administrative Costs**

- Administrative expenses (also called indirect costs) are costs that do not directly benefit the Minnesota Program, but rather are indirectly beneficial to the Minnesota Program. Administrative costs include corporate staffing, construction of data management systems, company-wide auditing fees, legal fees, and general communications.

Administrative costs are allocated among all active PaintCare States (states where legislation has passed). Minnesota's current allocation, based on relative population size among the seven<sup>1</sup> PaintCare States, is approximately \$220,000. Minnesota's share of the administrative expenses is estimated at approximately 3% of the Minnesota Program budget.

## **Program Surplus/Deficit**

- PaintCare has adopted a policy to maintain reserves in each state program equivalent to between two and three months of operating expenses, with a target of three months, or 25% of the annual expenses (estimated at \$1,700,000 for Minnesota). Reserves are defined as "net assets" and represent the accumulated surplus (or deficit) of the Program from the inception. Maintaining a modest reserve of 25% of the annual expenses provides the Program with the flexibility to absorb fluctuations in sales volume while still maintaining expected Program services. PaintCare has budgeted for an annual surplus of 3% in the first year of the Minnesota Program. However, this surplus is not sufficient to fully recoup the pre-Program costs by the end of year one. It is anticipated that the Program may fully recoup the pre-Program costs during year two and at that point will begin to build the net asset reserve towards the target of \$1,700,000 which will require several years of operations. Revenues will be used to cover the costs of collection, transportation and processing, particularly for HHW programs as they start participating in the Program, before the reserve will be built.

---

<sup>1</sup> Since submission of the March 3, 2014 Program Plan, Colorado has become the eighth PaintCare state. However, to be consistent with the financial information that was provided in February 2014 for the Independent Financial Audit that accompanies this Plan, we are leaving the budget as presented in the original Plan submission.

## PaintCare Recovery Fee

The result of anticipated Program costs, combined with projected sales and container size mix, is the following proposed PaintCare Recovery Fee (stewardship assessment) structure. As described later in this section, an independent audit conducted on behalf of the Agency supports the proposed PaintCare Recovery Fee structure.

Container Size	Fee
Half pint or smaller	\$ 0.00
Larger than half pint to smaller than 1 gallon	\$ 0.35
1 gallon	\$ 0.75
Larger than 1 gallon to 5 gallons	\$ 1.60

The proposed fees structure for Minnesota is the same as in the five PaintCare States currently under operations – California, Connecticut, Oregon, Rhode Island and Vermont.

## Program Budget

<b>Revenue</b>	
Container size: Larger than half pint to smaller than 1 gallon	\$688,559
Container size: 1 gallon	3,739,941
Container size: Larger than 1 gallon to 5 gallons	2,618,710
<b>Total revenue</b>	<b>7,047,210</b>
<b>Expenses</b>	
Paint transportation and processing	4,257,094
Collection containers/collection support	1,168,850
Communications	750,000
Personnel, professional fees and other	315,720
State administrative fees	100,000
<b>Total direct expenses</b>	<b>6,591,664</b>
Allocation of corporate activity	220,289
<b>Total expenses</b>	<b>6,811,953</b>
<b>Change in net assets</b>	<b>235,257</b>
Pre-Program cost*	(443,081)
<b>Ending net assets</b>	<b>\$ (207,824)</b>

\* PaintCare has incurred, and will continue to incur, pre-program “start-up” costs until the Program launches. These costs include but are not limited to personnel, travel, legal costs, state administrative fees, and the allocation of corporate expenses.

## Audit of the PaintCare Recovery Fee

As required by the Minnesota Law, PaintCare shall propose a uniform paint stewardship assessment and such assessment shall be reviewed by an independent auditor to ensure that the assessment does not exceed the costs of the Program. The Agency must approve the stewardship assessment.

For the proposed assessment structure, PaintCare contracted with HRP Associates Inc., the same firm used for the pre-program audit of the Connecticut, Vermont, and Rhode Island programs.

PaintCare provided HRP Associates the requested documentation to conduct the review, including:

- PaintCare’s solicited pricing bids for paint transportation services.
- PaintCare’s solicited pricing bids for paint processing (recycling) services.
- PaintCare’s proposed budget with details of costs based on bids submitted for paint collection, transportation, processing, and outreach and education, as well as personnel, legal fees, corporate costs and other budget elements.
- PaintCare’s proposed PaintCare Recovery Fee structure.

HRP Associates’ audit results are available in Appendix J and conclude with: “HRP independently reviewed the calculations performed by PaintCare for accuracy and the calculations were deemed sufficient. Based on our review, we find the Paint Stewardship Assessment, determined by PaintCare, to be reasonable and not to exceed the actual program costs to administer the Paint Stewardship Program.”

## Insurance and Financial Assurance

PaintCare requires all contractors – drop-off sites, transporters, processors, etc. – to carry insurance appropriate to the services provided for the PaintCare Program. While the specific amount and terms may vary from contractor to contractor, they may include:

- Commercial General Liability Insurance
- Commercial Automobile Liability Insurance
- Workers' Compensation Insurance
- Environmental Pollution Liability Insurance
- Endorsements to name PaintCare as an additional insured on the required insurance coverage (other than Workers’ Compensation)

Because contractors have widely different insurance policies (e.g., commercial insurance vs. self-insurance, etc.), PaintCare evaluates (often with the assistance of outside legal counsel) the insurance terms in each contract on a case-by-case basis to ensure that the contractor maintains insurance of the types and in the amounts appropriate for the services the contractor provides to the PaintCare program. PaintCare itself also carries Pollution Liability, Commercial General Liability and Excess Umbrella Coverage to cover any liability PaintCare may incur.

PaintCare also requires all contractors to comply with all federal, state and local laws. If financial assurance requirements are applicable to a PaintCare contractor, then they must be in compliance with those laws. PaintCare does not require financial Assurance over and above applicable law.

# 9. Annual Report and Financial Audit

---

## Statutory Citation

*Minnesota Session Laws 2013, Chapter 114, Section 78, Subd. 12. Stewardship reports. Beginning October 1, 2015, producers of architectural paint sold in the state must individually or through a stewardship organization submit an annual report to the agency describing the product stewardship program. At a minimum, the report must contain:*

- (1) a description of the methods used to collect, transport, and process architectural paint in all regions of the state;*
- (2) the weight of all architectural paint collected in all regions of the state and a comparison to the performance goals and recycling rates established in the stewardship plan;*
- (3) the amount of unwanted architectural paint collected in the state by method of disposition, including reuse, recycling, and other methods of processing;*
- (4) samples of educational materials provided to consumers and an evaluation of the effectiveness of the materials and the methods used to disseminate the materials; and*
- (5) an independent financial audit.*

## Section Overview

This section discusses:

- Content of the required Annual Report
- Content and process for the required annual financial audit

## Annual Report

PaintCare will submit an Annual Report to the Agency by October 1 of each year for the previous reporting period.

The Annual Report will include, at a minimum:

- A description of the methods used to collect, transport, and process architectural paint in all regions of the state.
- The weight of all architectural paint collected in all regions of the state and a comparison to the performance goals and recycling rates established in the stewardship plan.
- The amount of unwanted architectural paint collected in the state by method of disposition, including reuse, recycling, and other methods of processing.
- Examples and discussion of education and outreach efforts and materials used in reporting year and planned for the following year
- An independent financial audit.

## Financial Audit

PaintCare undergoes an annual, independent financial audit of the organization as a whole. PaintCare conducts a competitive selection for the auditing firm and hires the auditor to conduct an independent

audit. The cost of the audit is shared by all PaintCare States, and is paid by the paint stewardship assessment.

While the audit is conducted of the organization as a whole, it also serves as the annual financial audit of the Minnesota Paint Stewardship Program.

The independent audit is conducted in accordance with auditing standards generally accepted in the United States of America. Those standards require that the auditing firm plan and perform the audit to obtain reasonable assurance that financial statements are free of material misstatement. The audit also includes examination, on a test basis, of evidence supporting the amounts and disclosures in the financial statements; evaluation of the accounting principles used and any significant estimates made by management; and appraisal of the overall financial statement presentation. PaintCare will include the audited financial statements as part of the Annual Report.

## Appendix C

## IDENTIFYING ARCHITECTURAL PAINT PRODUCTS UNDER PAINTCARE For Manufacturers and Collection Sites

Architectural paint is defined under the Paint Stewardship Program as:

*Interior and exterior architectural coatings sold in containers of five gallons or less.*

Architectural paint does not include:

*Industrial maintenance (IM), original equipment manufacturer (OEM) or specialty coatings.*

In order to distinguish between what is an architectural coating under the Paintcare program, definitions and terminology from the U.S. Environmental Protection Agency, California Air Resources Board and other state and local Architectural and Industrial Maintenance (AIM) rules were used to develop the following list. The decision table page 2 uses the definitions on page 3.

### **Program Products (maximum container size of 5 gallons):**

---

1. Water-based paint (Interior and exterior): latex, acrylic
2. Oil-Based paint (Interior and exterior): alkyd, enamel
3. Clear Coatings: Shellac, Lacquer, Varnish, Urethane
4. Deck coatings and floor paints (including elastomeric)
5. Field and lawn marking coatings
6. Melamine/metal coatings and rust preventative
7. Primers, sealers and undercoaters
8. Sealers
9. Stains
10. Water repellents (not-tar-based or bitumen-based)
11. Waterproofing sealers for concrete, masonry, and wood

### **Non-Program Products (regardless of container size):**

---

1. Empty, leaking or unlabeled containers
2. Industrial Maintenance (IM) coatings labeled as:  
(a) For industrial use, (b) Professional use, or (c) Not for residential use
3. Original Equipment Manufacturer (OEM) (shop application) paints and finishes
4. Aerosol paint (spray cans)
5. Automotive paints
6. Marine paints
7. Arts and Craft paints
8. Caulking compounds, epoxies, glues or adhesives
9. Drywall / joint compounds
10. Semi-solid products: spackle, patching compounds for roofing, stucco, wood, etc.
11. Paint additives, colorants and tints
12. Resins
13. Paint thinners, solvents, mineral spirit
14. Wood preservatives containing pesticides
15. Tar, asphalt or bitumen based products
16. Two-component coatings (epoxy)
17. Deck cleaners
18. Other non-coating products (motor oil, pesticides, cleaning solutions)

## Decision Table for Identifying Architectural Paint Products for Manufacturers and Collection Sites

### 1. Is it a coating?

If YES, go to 2. If NO, it is not in the program.

These non-coatings are excluded:

Paint thinner	Solvents
Wood preservatives	Mineral spirits
Wood treatment oils	Deck cleaners
Drywall compounds	Epoxies, glues
Roof patch, stucco patch	Wood patch
Caulking compounds	Adhesives

**Manufacturers:** Non-coatings are not assessed

**Collection Sites:** Non-coatings are not acceptable.

### 2. Is it an architectural coating?

If YES, go to 3. If NO, it is not in the program.

These non-architectural paints are excluded:

Auto paint Marine paint Aerosols

**Manufacturers:** Coatings that are not architectural are not assessed a fee.

**Collection Sites:** Coatings that are not architectural are not acceptable.

### 3. Is it an industrial maintenance (IM) coating?

If NO, go to step 4. If YES, then it is not in the program.

Products with these labels are excluded:

Professional use only Not for residential use  
For industrial use only

**Manufacturers:** IM coatings are not assessed.

**Collection Sites:** IM coatings are not acceptable.

### 4. Is it for Original Equipment Manufacturing (OEM)?

If NO, go to step 5. If YES, then it is not in the program.

**Manufacturers:** If a company can clearly document that the coating was sold exclusively for OEM use, the fee should not be assessed. However, if this coating can be sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, the fee should be assessed.

**Collection Sites:** A collection site may not always be able to distinguish these products from non-OEM products. This determination will be made by asking the business customer what the intended use of the paint was. If the intention was shop application, it is not a program product. However, if the coating was sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, it may be accepted as a program product.

### 5. Is it a specialty coating or specifically excluded?

If NO, then it is in the program. If YES, then it is not in the program.

These are excluded:

Products in containers larger than 5 gallons  
Aerosol (spray) cans  
Craft paints  
Two component coatings (epoxy)  
Tar, asphalt, bitumen-based coatings  
Resins  
Paint tints, colorants, additives  
Wood preservatives containing pesticides

**Manufacturers:** Excluded products are not assessed a fee

**Collection Sites:** Excluded products are not acceptable at collection sites.

# DEFINITIONS

## I. Architectural Coatings

---

Architectural coating means a coating recommended for application to stationary structures and their appurtenances, portable buildings, pavements, curbs, fields and lawns. This definition excludes adhesives, aerosols and coatings recommended by the manufacturer or importer solely for shop applications or solely for application to non-stationary structures, such as airplanes, ships, boats, and railcars.

## II. Industrial Maintenance Coatings

---

Industrial Maintenance (IM) coating means a high performance architectural coating, including primers, sealers, undercoaters, intermediate coats, and topcoats formulated and recommended for application to substrates exposed to one or more of the following extreme environmental conditions in an industrial, commercial, or institutional setting:

1. Immersion in water, wastewater, or chemical solutions (aqueous and non-aqueous solutions), or chronic exposure of interior surfaces to moisture condensation;
2. Acute or chronic exposure to corrosive, caustic, or acidic agents, or to chemicals, chemical fumes, or chemical mixtures or solutions;
3. Repeated exposure to temperatures above 120 °C (250 °F);
4. Repeated (frequent) heavy abrasion, including mechanical wear and repeated (frequent) scrubbing with industrial solvents, cleansers, or scouring agents; or
5. Exterior exposure of metal structures and structural components.

One of the primary ways AIM rules distinguish IM coatings from other architectural coatings is the manufacturer's recommendation for restricted usage. IM coatings must be labeled under the rules as:

1. "For industrial use only."
2. "For professional use only."
3. "Not for residential use" or "Not intended for residential use."

Thus, if the product is not intended for and not labeled as an IM coating, it should be deemed a

covered architectural coating and the fee should be assessed, unless it is specifically excluded (see below).

## III. Original Equipment Manufacturer (OEM) Coatings

---

*Shop application* means that a coating is applied to a product or a component of a product in a factory, shop, or other structure as part of a manufacturing, production, finishing or repairing process (e.g., original equipment manufacturing coatings).

Since OEM (shop application) coatings may be intended but not labeled for industrial or professional use, and may be sold in containers of 5 gallons or less, then...

### For manufacturers:

...if a company can clearly document that the coating was sold exclusively for OEM use, the fee should not be assessed. However, if this coating can be sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, the fee should be assessed.

### For collection sites:

...a collection site may not always be able to distinguish these products from non-OEM products. This determination will be made by asking the business customer what the intended use of the paint was. If the intention was shop application, it is not a program product. However, if the coating was sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, it may be accepted as a program product.

## IV. Specialty Coatings

---

Lastly, in order to identify Specialty or Special Purpose Coatings, we have used the definition from the Federated Society of Coating Technology's Coatings Encyclopedic (since AIM rules don't have a definition), which states that these coatings include aerosols, crafts paints.

# Drywall Primer-Surfacers

---

June 2012

## Purpose

The purpose of this notice is to clarify that “Drywall Primer-Surfacers” are included in the PaintCare Program. As part of the Program, manufacturers of these products must register with PaintCare and collect and remit the Assessment (“PaintCare Recovery Fee”) as with other architectural paints in states with active Paint Stewardship programs (Oregon is currently active, California is anticipated to start in Fall 2012, Connecticut is anticipated to start in 2013).

## Background

In order to assist companies with determining what coatings were architectural coatings subject to the PaintCare Recovery Fee for the Oregon program and what coatings were not, PaintCare developed a factsheet detailing what factors should be taken into consideration when making these determinations. In addition, the factsheet listed examples of program products and examples of non-program products (products that should not be assessed the fee). PaintCare, however, relies on individual manufacturers to determine what products are part of the program and what products are not, depending on their specific product lines. In some cases, PaintCare helps with this determination based on individual calls with manufacturers. In the case of Drywall Primer-Surfacers, based on these calls, it has come to our attention that some manufacturers were assessing the fee believing they were program products and some were not assessing the fee believing that they were non-program products. It appears that confusion arose when trying to distinguish drywall primer from drywall compound.

In order to ensure that all manufacturers are on a level playing field and the PaintCare Recovery Fee is indeed placed on all program products subject to the assessment, PaintCare herein clarifies that Drywall Primer-Surfacer is considered a program product and the PaintCare Recovery Fee must be assessed and remitted by all manufacturers of Drywall Primer-Surfacers. The reason for including this category under the architectural coatings that are subject to the program is as follows:

- The Drywall Primer-Surfacer products are primers. Primers are considered architectural coatings.
- MSDS sheets, either in their title and or elsewhere in the product description, for these products indicate that they are paint or primers.
- MSDS sheets indicate that they contain some type of binder or resin.

- Marketing information published by manufacturers for their own products indicate that they are vapor barriers or coatings.
- Information published by manufacturers for their own products indicate that they are vinyl, acrylic, and/or latex-based.
- Competitors have reported that they make and sell equivalent products that are not excluded by PaintCare.
- Consumers with leftover/unwanted Drywall Primer-Surfacers may bring them to a PaintCare collection site for proper recycling/disposal.

### **Action**

Starting August 1, 2012, manufacturers of “Drywall Primer-Surfacers” need to ensure that these products are registered with PaintCare and add the PaintCare Recovery Fee to the wholesale price of these products to all distributors and retailers. Manufacturers are not required to pay the fee on past sales because the fees were not charged to distributors, retailers, or consumers.

### **More Information**

For more information about the PaintCare Program and the responsibilities of manufacturers, please visit [PaintCare.org](http://PaintCare.org) or contact:

# Masonry and Concrete Sealers labeled “For Professional Use Only”

## *Purpose*

The purpose of this notice is to clarify that masonry and concrete sealers that are labeled “for professional use” are excluded from the PaintCare Program. Manufacturers of these products are not required to register with PaintCare and they are not required to collect and remit the Assessment (“PaintCare Recovery Fee”) in California or Oregon, the two states with active Paint Stewardship programs implemented by PaintCare.

## *Background*

In order to assist companies with determining what products are architectural coatings subject to the PaintCare Recovery Fee for the Oregon and California programs and what products are not, PaintCare developed a definition of architectural paint detailing what factors should be taken into consideration when making these determinations. In addition, the definition lists examples of program products and examples of non-program products (products that should not be assessed the fee). PaintCare relies on individual manufacturers to determine which, if any, of their products are part of the program. In some cases, PaintCare helps with this determination based on individual calls with manufacturers. In the case of products used as sealers for masonry and concrete — and based on inquiries from many industry representatives and manufacturers of these products — it has come to our attention that manufacturers of these sealers desire clarification on whether their products are considered architectural coatings for the purposes of active and future state PaintCare programs.

In order to ensure that all manufacturers are on a level playing field and the PaintCare Recovery Fee is placed on all program products subject to the assessment, PaintCare herein clarifies that masonry and concrete sealers labeled for professional use are not considered program products and the PaintCare Recovery Fee is not required to be assessed and remitted by manufacturers of these products. Excluding these products from the definition of architectural coatings is based on the following:

- Originally PaintCare’s definition excluded products that are both (1) Industrial Maintenance Coatings and (2) labeled “for professional use only.” [Other acceptable phrases are (a) for industrial use only, (b) not for residential use, and (c) not intended for residential use].
- The definition of an IM coating varies somewhat from one state to another and from one regulatory air district to another. Generally, determining if a coating meets the criteria for IM is

based on the manufacturers recommended use for the product and whether it meets any one of certain criteria (simply put these criteria are: regular exposure to heat, chemicals, moisture, or abrasion). Masonry sealers are intended to act as waterproofing agents and are applied where water exposure is anticipated. Thus as a category they can generally be considered by manufacturers to be IM coatings and therefore meet the first criteria.

- Some manufacturers label these products for professional use. Others do not label them for professional use. There is no prohibition on a manufacturer from labeling a product for professional use. Therefore if a manufacturer chooses to change the product label on a product that they consider IM in order to also comply with the second criteria above (in the first bullet), they may do so in order to have these products excluded from the PaintCare Program. The manufacturer may change their regular container label or use an additional sticker.
- If PaintCare finds that manufacturers start to change their labels on other products that are clearly not for professional use or industrial maintenance coatings (e.g. house paint), the professional use labeling will not exclude such products.
- An important purpose of the paint stewardship programs is to collect and recycle unused paint, stains, and coatings that are normally managed through government-sponsored household hazardous waste (HHW) programs. Sealers for masonry and concrete are not known to be a problem at HHW programs.

## *Conclusion*

Concrete and masonry sealers that are IM coatings and labeled for professional use using one of the phrases indicated above are categorically exempt from PaintCare.

## Appendix E

## Minnesota Paint Stewardship Program Information for HHW Programs

### Minnesota's paint stewardship law benefits Household Hazardous Waste programs.

A law passed in May 2013 requires paint manufacturers to establish a Paint Stewardship Program in Minnesota. Household hazardous waste programs that participate can save money on paint management costs. Program funding comes from a "PaintCare Recovery Fee" applied to each container of architectural paint sold in Minnesota starting when the program begins November 1, 2014.

#### Paint Stewardship Program in Minnesota

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopts paint stewardship laws.

Minnesota is the fifth state to pass such a law. Although this program is required by state law, it is designed and operated by the paint manufacturing industry. PaintCare currently operates programs in California, Connecticut, Oregon, Rhode Island and Vermont. PaintCare is also planning programs for Colorado, Maine and Minnesota.

#### Designing a Program for Minnesota

The new law requires PaintCare, on behalf of paint manufacturers, to submit a comprehensive Program Plan to the Minnesota Pollution Control Agency (MPCA). A detailed program plan was submitted by PaintCare to the MPCA in March 2014. Comments were received from MPCA in May 2014 and PaintCare is in the process of revising the Plan accordingly.

#### Making Paint Recycling More Convenient

PaintCare will establish drop-off sites statewide for residents and businesses to take leftover architectural paint. Although most drop-off sites will be at paint retailers, household hazardous waste (HHW) programs, solid waste transfer stations and landfills may also volunteer to be PaintCare drop-off sites and have their paint transportation and recycling costs paid by PaintCare.

#### Benefits to HHW Programs of Partnering with PaintCare

- Save on transportation and recycling costs
- Conserve resources and keep paint out of the solid waste stream
- Make recycling of leftover paint more convenient for your community

#### PaintCare Partners Receive

- Staff training at your site
- Paint collection bins
- Free transportation and recycling services
- Compensation for value-added services including paint reuse programs, bulking of oil-based paint and other services
- Publicity of HHW site or event (optional)

## Drop-Off Site Responsibilities

- Provide secure storage area for cubic yard boxes or drums
- Accept program products from the public during normal operating hours
- Properly pack program products in collection bins
- Assist with loading and unloading of full and empty storage bins
- Complete minimal paperwork to track outgoing paint shipments
- Ensure staff are trained in PaintCare guidelines and safe operating procedures

## Will PaintCare Require Operational Changes?

- If your program does not currently accept latex paint, PaintCare will not require you to do so. If you wish to start accepting latex, PaintCare will cover the transportation and processing costs.
- If your program does not currently accept paint from businesses, PaintCare will not require you to do so. If you wish to start accepting paint from businesses, PaintCare will cover the transportation and recycling/disposal costs.
- HHW programs may continue to put restrictions on who can use their programs, e.g., to residents of certain towns or cities. (PaintCare retailers accept paint from anyone in the state.)

## Water-Based (Latex) Paint is a Resource

An important goal of PaintCare is to conserve resources and increase the amount of paint that is recycled. Not all HHW programs accept water-based paint because it is expensive to manage and is not classified as hazardous. Residents and businesses are often instructed to let water-based paint dry out and then dispose of the dry paint in the trash. Through the PaintCare program, all paint including latex will be recycled to the maximum extent possible.

## Contact

Jeremy Jones, Minnesota Program Manager  
(612) 719-5216 or [jjones@paint.org](mailto:jjones@paint.org)

## What Products Are Covered?

Architectural paints (“Program Products”) are defined as interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings. Here are examples:

## Program Products

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

## Non-Program Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

## Appendix F

May 2014

**RE: Minnesota Paint Stewardship Law**

Dear Minnesota Paint Retailer:

Enclosed are materials to inform you and your customers about a new law and a new program that will make it more convenient to recycle paint in Minnesota. PaintCare currently operates similar programs in California, Connecticut, Oregon, and Vermont. We are also starting a program for Rhode Island in June and Maine in early 2015.

The start date of the Minnesota PaintCare Program has not been determined. The program start date is to be 90 days after PaintCare's Minnesota Program Plan is approved by the Minnesota Pollution Control Agency (MPCA). **At this time, we estimate the program will begin in the fall of 2014.** We will notify you once the start date is determined.

**Factsheet for Retailers.** The enclosed retailer factsheet introduces you to how the PaintCare program works and how it affects your business.

**Webinars.** In addition to providing you with print materials about the program, we are hosting four webinars to further explain the program, review the responsibilities of retailers under the law, and provide you with an opportunity to ask questions. The webinars will take place:

<b>Wednesday, May 21</b>	<b>10:30 AM – 11:30 AM</b>
<b>Thursday, May 22</b>	<b>2:00 PM – 3:00 PM</b>
<b>Wednesday, May 28</b>	<b>2:00 PM – 3:00 PM</b>
<b>Friday, May 30</b>	<b>10:30 AM – 11:30 AM</b>

Please visit [www.paintcare.org/minnesota](http://www.paintcare.org/minnesota) to sign up for a webinar.

**Factsheet for Trade Painters.** Also enclosed is a copy of a factsheet we developed at the request of paint retailers in other states to help answer common questions from professional painters. Some retailers hand these out at the counter; others insert them with monthly statements.

A common question you may receive will be about the new fee that will be applied to the price of each container of architectural paint when the program starts. The fee amounts will not be known until the MPCA approves the Program Plan that PaintCare has submitted. However, PaintCare has proposed the same fee structure used in the states and anticipates they will be approved. Fees are based on container size as follows: 35 cents for larger than half pint to smaller than 1 gallon, 75 cents for 1 gallon, and \$1.60 for larger than 1 gallon up to 5 gallons.

Although it would be better to inform your customers (and the general public) about both the approved fee amounts and how the program works at the same time, it is important for professional painters to learn about the program as soon as possible because they plan jobs well ahead of time. Therefore, while the fee structure is under review, we are starting outreach to trade painters now. We suggest that trade painters discuss the anticipated fees in advance with their customers to allow for an adjustment to any quotes or job bids for future projects.

If you would like for us to mail you additional copies of the enclosed trade painter factsheet to share with professional painters, please send an e-mail to [info@paintcare.org](mailto:info@paintcare.org) or call (855) 724-6809. Once the fees are confirmed, updated copies of the factsheet will be provided to you.

We look forward to working with you to establish a successful and convenient postconsumer paint management program for Minnesota. Feel free to contact me with any questions directly at (612) 719-5216 or [jjones@paint.org](mailto:jjones@paint.org), or visit [www.paintcare.org](http://www.paintcare.org) for more information.

Sincerely,

A handwritten signature in black ink that reads "Jeremy Jones". The signature is written in a cursive, flowing style.

Jeremy Jones  
Minnesota Program Manager

July 2014

**RE: Minnesota Paint Stewardship Law: Program Starts November 1, 2014**

Dear Minnesota Paint Retailer:

This letter and the enclosed materials are to follow up with news about the Minnesota paint stewardship program.

In May 2014, we sent Minnesota paint retailers an initial mailing about the paint stewardship program; at that time, the program's start date had not been determined. Since then, PaintCare and the Minnesota Pollution Control Agency (MPCA) have agreed to start the program on November 1, 2014.

Enclosed are materials to inform you and your customers about the new law and program that will make it more convenient to recycle paint in Minnesota.

**1. Fact sheet: Trade Painters**

Enclosed are 25 copies of a fact sheet for your customers who are painting contractors. We developed this fact sheet at the request of retailers in other states to help answer common questions from professional painters. Some retailers hand these out at the counter; others insert them with monthly statements.

**2. Fact sheet: How the Program Affects Retailers**

This fact sheet introduces you to how the PaintCare program works and how it affects your business. (This is similar to the previous fact sheet, but includes the November 1 start date.)

**3. NEW Fact sheet: How to Become a Drop-Off Site / Interest Form**

This fact sheet explains how to become a PaintCare drop-off site. Becoming a drop-off site is voluntary. Many retailers participate because of the potential for increased foot traffic and to provide an additional service to their customers and community. PaintCare has more than 50 retail drop-off sites already signed up in Minnesota.

If you would like additional copies of the enclosed trade painter fact sheet to share with your customers, please send an e-mail to [info@paintcare.org](mailto:info@paintcare.org) or call (855) 724-6809.

We look forward to working with you to establish a successful and convenient postconsumer paint management program for Minnesota. Feel free to contact me with any questions directly at (612) 719-5216 or [jjones@paint.org](mailto:jjones@paint.org), or visit [www.paintcare.org](http://www.paintcare.org) for more information.

Sincerely,

Jeremy Jones  
Minnesota Program Manager

September 2014

**Dear Minnesota Paint Retailer:**

In June 2014, we sent paint retailers a mailing announcing that the Minnesota Paint Stewardship Law would take effect on November 1, 2014. PaintCare's program plan for implementing this stewardship law will make it more convenient for households and businesses to recycle leftover, unwanted paint. The plan includes a fee (per container assessment) on new paint to fund the program.

To prepare your customers for the new fees and to explain the recycling services the program will offer, we are providing you with a packet of point-of-sale (POS) educational materials.

This packet includes:

- Program poster – 2 posters.
- Brochures with information about the PaintCare program for your customers – 50 brochures.
- Mini-cards with information about finding a paint drop-off site after November 1 – 50 cards.
- A sample factsheet for your customers who are painting contractors. We sent a packet of these previously. If you would like more copies, you may order them using the order form or by contacting us.
- Order form for printed materials – you may order additional supplies, free of charge, at any time.
- Factsheet for retailers explaining the program and your role – we've sent this previously.

**Materials for Non-English Speakers**

The program brochure and painting contractor factsheet are also available in Hmong, Somali, and Spanish. We are also happy to translate these materials into additional languages upon request. Please contact me by e-mail or phone to request additional languages.

To learn more about the PaintCare Program, please visit our website at [www.paintcare.org](http://www.paintcare.org) or contact me directly at [jjones@paint.org](mailto:jjones@paint.org) or (612) 719-5216.

Thank you,

Jeremy Jones  
Minnesota Program Manager

## Minnesota Paint Stewardship Program

# How Does the Minnesota Paint Stewardship Program Affect Paint Retailers?

**Minnesota’s paint stewardship law requires paint manufacturers to establish a Paint Stewardship Program in Minnesota. Program funding comes from a fee applied to the price of architectural paint sold in Minnesota.**

**PROGRAM START DATE: NOVEMBER 1, 2014.**

### Paint Stewardship

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopt paint stewardship laws. In addition to operating the Minnesota Program, starting November 1, 2014, PaintCare also operates programs in California, Connecticut, Oregon, Rhode Island, and Vermont. PaintCare is also planning programs for Colorado and Maine.

### Convenient Paint Recycling

PaintCare’s primary effort is to establish paint drop-off sites throughout each PaintCare state at paint retailers and other locations in order to provide convenient recycling opportunities for the public. Other locations include municipal household hazardous waste facilities and events, solid waste transfer stations, and landfills. There are 130 paint drop-off sites in both Oregon and Connecticut and more than 650 in California. Vermont has 50 sites, and Rhode Island has 25. PaintCare is planning to set up more than 200 new paint drop-off sites in Minnesota.

### Participation as a Drop-Off Site is Voluntary

Retailers who wish to serve as drop-off sites are able to do so if they have adequate space for paint storage bins and can provide minimal staff time to accept paint from the public. By doing so, retailers can increase foot traffic and sales and provide an environmental service for their community. They make it convenient for their customers to recycle leftover paint and help provide relief to local government programs that currently manage leftover paint. PaintCare provides storage bins, supplies, and site training. PaintCare also pays for paint transportation and recycling and promotes the sites to the local community.

### REQUIREMENTS OF RETAILERS

#### 1. Check Registered Manufacturers and Brands

Once the program begins, retailers may not sell architectural paints that are not registered. Paint manufacturers must register their company with PaintCare, and they must register all architectural paint brands they sell in Minnesota. PaintCare and the Minnesota Pollution Control Agency (MPCA) will publish lists of registered manufacturers and brands on their websites so that retailers can confirm that the products they sell are registered. Please visit [www.paintcare.org](http://www.paintcare.org) for registration lists.

## 2. Pass on the Stewardship Fee

When the program begins, the law requires that a stewardship fee (“PaintCare Recovery Fee”) must be applied by manufacturers to the wholesale price of all architectural paint sold in Minnesota. This fee pays for all aspects of running the program. It is paid by manufacturers to PaintCare and then passed to their dealers. Retailers should see the PaintCare Recovery Fee on invoices from suppliers after the program starts. The law also requires that retailers and distributors apply the fee to the purchase price of architectural paint they sell. The fee paid by the customer to the retailer offsets the fee charged by the manufacturer or distributor to the retailer. All manufacturers, distributors, and retailers selling architectural paint in the state must pay and pass down the fee, ensuring a level playing field for all parties.

## COMMON QUESTIONS ABOUT FEES

### How much are the fees?

Although fees may change and vary by state, fees in Minnesota and other states are the same. Fees are by container size:

\$ 0.00 – Half pint or smaller

\$ 0.35 – Larger than half pint to smaller than 1 gallon

\$ 0.75 – 1 Gallon

\$ 1.60 – Larger than 1 gallon to 5 gallons

### How are the fees calculated?

Fees are set to cover the cost of a fully operating program on a state-by-state basis. PaintCare estimated the annual sales of architectural paint in Minnesota and divided the estimated annual expenses of the program by the number of containers to be sold in the state – taking into account the typical amount of leftover paint for each container size. Fees may be decreased in the future if they were set higher than what is needed to cover program expenses, or fees may be increased if they were set too low.

### Is the fee a deposit to be returned to customers?

No, the fee is not a deposit. Fees are used entirely to cover the expenses of running the program and not given back as a deposit for the return of paint or empty paint cans – a common misunderstanding.

### Must we show the fee on receipts?

No, but in other states, most stores do show the fee in order to explain the price increase. PaintCare encourages retailers to show the fee and list it as PaintCare Recovery Fee to aid in customer education and provide consistency across the program.

### Do we return the fee if a product is returned?

Yes, the fee should be returned because it is part of the purchase price.

### Is sales tax applied to the fee itself?

Yes, the fee is part of the purchase price; therefore, sales tax is collected on the fee.

### Do we apply the fee to sales on the first day of the program for inventory purchased before the first day of the program, even though we didn't pay a fee for the product to the distributor or manufacturer?

Yes, retailers must add the fee on all covered products sold on or after the first day of the program, regardless of when they were purchased from the distributor or manufacturer. Fees collected on existing inventory stay with the retailer; they are not paid back to the distributor or manufacturer.

### How will the public know about the fee?

PaintCare provides printed materials for retailers to distribute to the public to help explain the purpose of the fee, how the program works, and how to find a paint drop-off location. Before the program starts, PaintCare provides a “starter pack” of brochures and other information materials to all paint retailers. Additional materials can be ordered as needed. The cost of the materials is covered by the program. In addition to retailer information, PaintCare works with contractor associations to get information to trade painters, and conducts general outreach including newspaper, radio, television, and on-line advertising.

## Minnesota Paint Stewardship Program

# Information for Trade Painters

### Minnesota's paint stewardship law affects trade painters.

**PROGRAM START DATE: November 1, 2014.**

The law requires paint manufacturers to establish a paint stewardship program in Minnesota. The program will be funded by a fee on each container of architectural paint sold in the state. The program will set up drop-off sites at retail stores and other locations throughout the state where residents and businesses, including trade painters, will be able to take most leftover paint for recycling, free of charge.

#### Paint Stewardship

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopt paint stewardship laws. In addition to the Minnesota program, PaintCare operates programs in California, Connecticut, Oregon, Rhode Island, and Vermont. PaintCare is also planning programs for Colorado and Maine.

The primary goals of the program are to decrease paint waste and recycle more postconsumer paint by setting up convenient drop-off sites in the state. Although the program is required by state law, it is designed and operated by the paint manufacturing industry.

#### PaintCare Recovery Fee and Funding

As required by the law, a paint stewardship fee (known as the *PaintCare Recovery Fee*) must be added by manufacturers to the wholesale price of architectural paint sold in Minnesota. Manufacturers pay this fee to PaintCare to fund setting up drop-off sites for leftover, postconsumer architectural paint, and for the transportation, recycling and proper disposal of that paint. It also pays for outreach and administrative costs. The fees are based on container size as follows:

- \$ 0.00 – Half pint or smaller
- \$ 0.35 – Larger than half pint to smaller than 1 gallon
- \$ 0.75 – 1 Gallon
- \$ 1.60 – Larger than 1 gallon to 5 gallons

The law also requires that each distributor and retailer include the PaintCare Recovery Fee with their sale price. While displaying the fee on invoices and receipts is not required of retailers, PaintCare encourages retailers to show the fee and list it as *PaintCare Recovery Fee* to aid in customer and dealer education and to provide consistency across the program.

#### Notice for Trade Painters

Trade painters may pass the fees on to their customers in order to recoup the fees they pay on the products.

**When estimating jobs, you should take these fees into account by checking with your supplier to make sure the quotes for paint products include the fees. You should also let your customers know that you will be including these fees in your quotes.**

### **New Paint Drop-Off Sites**

PaintCare will establish paint drop-off sites across the state. Most drop-off sites will be at paint stores. Other sites may include transfer stations, recycling centers, and government-run household hazardous waste programs. Participation as a drop-off site is voluntary.

### **Use of Retail Drop-Off Sites by Businesses**

Retail sites will provide a convenient recycling option at no cost for trade painters and other businesses.

Businesses that generate up to 220 pounds (20-30 gallons depending on type) of hazardous wastes per month will be able to use these sites to recycle all eligible architectural paint (both water and solvent-based), with some restrictions on quantities per month.

Larger businesses (those that generate more than 220 pounds of hazardous waste per month) will be able to use the PaintCare sites for their water-based program products only; they will not be able to use the sites for oil-based paint or other solvent-based products.

*Note: Latex paint does not count toward the 220 pound monthly hazardous waste generation limit.*

### **Pick-Up Service for Large Volumes**

Businesses with at least 300 gallons of postconsumer paint to recycle may qualify to have their paint picked up by PaintCare at no additional cost. To learn more or to request this service, call (855) 724-6809.

### **Program Contact**

Jeremy Jones  
Minnesota Program Manager  
jjones@paint.org  
(612) 719-5216

### **What Products Are Covered?**

Architectural paints (“Program Products”) are defined as interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM) or specialty coatings. Here are examples:

#### **PROGRAM PRODUCTS**

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

#### **NON-PROGRAM PRODUCTS**

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

---

## Minnesota Paint Stewardship Program

# How to Become a Retail Drop-Off Site

### A new Minnesota law affecting paint retailers takes effect November 1, 2014.

The new law requires paint retailers to add a stewardship assessment (fee) to architectural paint products and to make sure they are not selling unregistered brands of architectural paint. Retailers may also volunteer to be paint drop-off sites.

This fact sheet explains how a retailer can partner with PaintCare to be a drop-off site for unwanted paint.

#### Paint Stewardship Program in Minnesota

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement this program on behalf of paint manufacturers in PaintCare States (those that adopt paint stewardship laws). PaintCare currently operates in California, Connecticut, Oregon, Rhode Island and Vermont. PaintCare is also planning programs for Colorado, Maine and Minnesota.

#### Convenient Paint Recycling

PaintCare's major effort is to establish paint drop-off sites throughout each PaintCare state – at paint retailers and other locations – in order to provide convenient recycling opportunities for the public. Other locations include solid waste transfer stations and municipal household hazardous waste facilities and events.

As of July 2014, there are more than 130 paint drop-off sites in both Oregon and Connecticut, and more than 650 in California. Vermont has 40 sites, and Rhode Island will have 25 by the end of the summer 2014.

The program allows residents and businesses to return unused architectural paint to drop-off locations throughout each PaintCare state. Although household hazardous waste (HHW) programs in Minnesota may continue to accept paint from residents and some businesses, many of these programs are not open year-round and may not be as conveniently located as retail stores.

#### Benefits to Retailers

There are many benefits to becoming a drop-off site.

As a participating retailer, you will:

- Make recycling of leftover paint more convenient for your customers
- Support the paint industry's effort to lead the way in being responsible for end-of-life management of its own products
- Promote your store as environmentally responsible or *green*
- Increase customer foot traffic and sales
- Help relieve local government of their cost of managing leftover paint
- Do your part to help prevent the improper disposal of paint products

## PaintCare Provides

- Listing of your store as a drop-off site on website, and in advertisements and promotional materials
- Storage bins
- Transportation and recycling services for the collected paint
- Training materials and staff training at your site
- Spill kits
- Program brochures, signage and customer education materials

## Drop-Off Site Responsibilities

- Provide secure storage area for collection bins
- Accept all brands of leftover program products from the public during operating hours
- Place unopened program products in collection bins
- Keep storage bins neat and properly packed
- Assist transportation service provider with loading and unloading of full and empty storage bins
- Complete minimal paperwork related to tracking outgoing paint shipments
- Ensure staff are trained in PaintCare program guidelines and operating procedures
- Post “drop-off site” signs in store window and display consumer education materials

## What Products Are Covered?

Architectural paints (“Program Products”) are defined as interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings. Here are examples:

### Program Products

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

### Non-Program Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

## Appendix G

## Minnesota Paint Stewardship Program Information for Solid Waste Transfer Stations, Recycling Facilities and Landfills

### Minnesota's paint stewardship law supports paint collection activities at solid waste transfer stations, recycling facilities and landfills.

A law passed in May 2013 requires paint manufacturers to establish a Paint Stewardship Program in Minnesota. Sites that participate can save money on paint management costs and expand services to their customers. Program funding comes from a "PaintCare Recovery Fee" applied to each container of architectural paint sold in Minnesota starting when the program begins November 1, 2014.

#### Paint Stewardship Program in Minnesota

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopt paint stewardship laws. Minnesota is the fifth state to pass such a law. Although this program is required by state law, it is designed and operated by the paint manufacturing industry. PaintCare currently operates programs in California, Connecticut, Oregon, Rhode Island and Vermont. PaintCare is also planning programs in Colorado, Maine and Minnesota.

#### Designing a Program for Minnesota

The new law requires PaintCare, on behalf of paint manufacturers, to submit a comprehensive Program Plan to the Minnesota Pollution Control Agency (MPCA). A detailed plan was submitted by PaintCare to the MPCA in March 2014. Comments were received from MPCA in May 2014 and PaintCare is in the process of revising the Plan accordingly.

#### Making Paint Recycling More Convenient

PaintCare will establish drop-off sites statewide for residents and businesses to take leftover architectural paint. Most drop-off sites will be at paint retailers; however, household hazardous waste (HHW) programs, solid waste transfer stations, recycling facilities and landfills may also volunteer to be PaintCare drop-off sites and have their paint transportation and recycling costs paid by PaintCare.

#### Benefits to Transfer Stations

- Make recycling of leftover paint more convenient for your community
- Save money on paint generated at your site or managed through load check programs
- Help your state conserve resources and keep paint out of the solid waste stream

#### PaintCare Partners Receive

- Storage bins for paint
- Free transportation and recycling services
- Staff training at your site
- Program brochures and site signage
- Publicity of our your site (optional)

## Drop-Off Site Responsibilities

- Provide secure storage area for cubic yard boxes or drums.
- Accept program products from the public during normal operating hours
- Properly pack program products in collection bins
- Assist with loading and unloading of full and empty storage bins
- Complete minimal paperwork to track outgoing paint shipments
- Ensure staff are trained in PaintCare guidelines and safe operating procedures

## Water-Based (Latex) Paint is a Resource

An important goal of PaintCare is to conserve resources and increase the amount of paint that is recycled. Not all HHW programs accept water-based paint because it is expensive to manage and is not classified as hazardous. Residents and businesses are often instructed to let water-based paint dry out and then dispose of the dry paint in the trash. Through the PaintCare program, all paint including latex will be recycled to the maximum extent possible.

## Appendix H

**DATE** March 03, 2014**PROJECT No.** 1214410013-005-TM-Rev0**TO** PaintCare Inc.**FROM** Bryan Waller**EMAIL** Bryan\_Waller@golder.com**TECHNICAL MEMO TO PAINTCARE: GIS METHOD USED TO CALCULATE DISTANCE AND POPULATION COVERAGE OF THE PAINTCARE SERVICE LOCATIONS IN MINNESOTA**

---

The following GIS analysis was undertaken to evaluate two service area-based distance criteria (90% and 95% of State-wide population with access to a paint collection site) and two population density criteria (one site per 30,000 and 50,000 population, respectively).

To complete this analysis, service areas were defined as 15 mile driving distances from a paint collection site. Once all sites were located, and service areas were established, the distance criterion was evaluated based on the coverage of all combined service areas and a population distribution layer. Based on past experience conducting this type of analysis for PaintCare in other states, the authors determined that a fine-grained population distribution with sub-county-scale urban-population ranges was required to complete this analysis.

To create this layer, the authors settled upon the creation of a population coverage layer comprised of both Census Population Places and Census Block Groups. The census data is based on the 2010 census taken by the US Census Bureau. This combination resulted in a population distribution that not only covers the entire State, but also classifies populated places by population range (<10,000 persons, 10,000-20,000 person etc.) Using these data, it was established that if an entire populated place was entirely covered by the combined service areas, it was assumed that 100% of the population had access to a collection site. If 90% of a populated place was covered by the combined service areas it was assumed that 90% of its residents had access to a collection and so on.

The service level (or population density) criterion was evaluated by counting the number of intersecting service areas within each populated place. For instance, if a populated place had a population of 100,000 people and had access to five overlapping service areas, its level of service would be one site for every 20,000 persons.

To complete this analysis, two authors used a GIS algorithm to find the optimal amount of sites that satisfied each of the four respective criteria, two for distance and two for population density. It should be noted that two criterion types are mutually exclusive within and between types and have been evaluated separately. The analysis yielded the results displayed below in Table 1.

The table below shows the results of the four scenarios:

**Table 1: Analysis Results**

Site Count	Criterion		Population	
	Population within 15 miles	Average Service Level	With Access To A Site	With No Access To A Site
162	89.88%	49,980	4,560,216	513,277
172	90.01%	46,064	4,566,496	506,996
236	92.49%	28,832	4,692,562	380,930
400	95.07%	14,984	4,823,623	249,870

We trust that this memorandum is sufficiently detailed for your requirements. Please contact us if you have any questions or would like additional information.

## Appendix I

# Joint Outreach Projects

## THE BASICS

### Introduction

If you are a local government that has partnered with PaintCare, we offer limited funding support for outreach activities that involve PaintCare. We are most interested in partnering with you when we are setting up new PaintCare drop-off sites, where participation is low, and when we are promoting one day HHW events to boost the amount of paint we can collect at one time. We have supported radio, newspaper and direct mail advertising and will consider other media.

### Review and Approval

Project budgets and all creative work must be reviewed and pre-approved by PaintCare. Creative work includes text, images, and scripts. When possible, all projects must include PaintCare's website address and logo and mention that people can find PaintCare drop-off sites in other areas (via our website).

### Proposal Form

Please complete our Proposal Form for Joint Outreach Projects and email it to your PaintCare Regional Coordinator, State Program Manager, or [info@paintcare.org](mailto:info@paintcare.org)

## WHAT WE ASK OF YOU

### Print-Based

For print materials (such as brochures, postcards, bill inserts) you will be responsible for sending artwork files to your printer, coordinating mailings, and distribution. After the project is completed, along with your invoice, we ask for a description of how, when, and where the piece was distributed or used, and an electronic copy of the final print piece.

### Newspaper

For newspaper ads, you will be responsible for sending artwork files to the newspaper and scheduling. At the start of the project, we ask you to provide PaintCare with draft text, dimensions and due dates for the ads. After the project is completed, we ask for a list of run dates for each newspaper and a scan or clipping of each ad.

### Radio

For radio advertising, you will be responsible for providing the pre-approved scripts to the stations and handling scheduling. After the project is completed, along with your invoice, we ask you to provide text of the final script with a list of run dates and times. If available, we would also like an audio file of the actual recording aired on the radio.

### Other

For other types of projects, we will ask you for similar things – you will coordinate everything and send PaintCare supporting documentation along with your invoice so we have a record of what was accomplished.

## DESIGN ASSISTANCE

PaintCare can provide assistance with basic layout and graphic design using our in-house staff. When we provide this type of assistance we will provide electronic files for you to send for printing or ad placement. Other than editing and commenting on scripts, we do not provide in-house assistance with audio or video production.

Please allow plenty of time for project planning, approvals, and some back-and-forth editing. Depending on the time of year, this may take 4-8 weeks.

## REIMBURSEMENT

PaintCare provides reimbursements for pre-approved projects only. We do not provide money up front, pay vendors directly, or accept requests for reimbursements on projects that have already been completed. Generally PaintCare will reimburse for half of the total direct costs for pre-approved projects; however, we may make exceptions and offer a lower or higher amount based on how much of the message is dedicated to PaintCare, our budgets, and other PaintCare advertising taking place in your area.

To be reimbursed, you will need to send PaintCare an invoice from your government agency, samples of the final pieces as previously noted, and copies of invoices from your vendors. We ask you to combine them into one PDF and send via email to Paul Fresina at [pfresina@paint.org](mailto:pfresina@paint.org). The "To:" space on the invoice should be addressed to PaintCare Inc., 1500 Rhode Island Ave NW, Washington DC, 20005. In the space for purchase orders please write "5839." See sample invoice on next page.

{Sample Invoice}

Environmental Services Program  
Washington County  
123 Government Way  
Anytown, State 55776

June 9, 2013

Invoice: 2452187

Purchase Order: 5839

Paul Fresina  
PaintCare Inc.  
1500 Rhode Island Ave. NW  
Washington DC, 20005

**Description:**

- Newspaper ad promoting one day event held in Anytown on May 1, 2013
- Three 5x5 ads ran on April 13, 20, 17 in the *County Journal*
- Total invoices from newspapers: \$1,487.00
- Invoice and copy of one ad are attached
- Per prior discussion, PaintCare agreed to reimburse county for \$750
- Contact person: Marie Chen, 202-555-1212

Invoice Amount: \$750.00

Remit to: Environmental Services Program  
Washington County  
123 Government Way  
Anytown, State 55776

# HRP Associates, Inc.

*Creating the Right Solutions Together*

February 26, 2014

Ms. Valerie Bernardo, CPA  
PaintCare  
1500 Rhode Island Avenue, NW  
Washington, DC 20005

RE: INDEPENDENT AUDIT, PAINT STEWARDSHIP PROGRAM, MINNESOTA (HRP #PAI2001.SW)

Dear Ms. Bernardo:

HRP Associates, Inc. (HRP) has completed an Independent Audit of PaintCare's calculations of the Paint Stewardship Assessment to be placed on the sale of each container of architectural paint sold in the State of Minnesota to administer a Paint Stewardship Program. A summary of the Audit Findings are provided below.

## **Retail Paint Management Services Bids**

To accomplish the goals of the Paint Stewardship Program, PaintCare developed a Request for Proposal for Paint Processing for the Minnesota Program. The RFP was for all PaintCare collection, transportation, and processing activities from retail drop-off sites and all other non-household hazardous waste collection facility drop-off sites. HRP reviewed the bids that were received and a total of five bids were received from the solicitation. The bids ranged from companies that currently collect paint in Minnesota utilizing "milk run" programs, to those that have run the State of Minnesota Hazardous Waste Contract, and those that currently have contracts with PaintCare in other States.

Negotiations are underway with the Lowest Responsible Bidders. These bidders have been selected based upon their qualifications, relevant past experience, technical understanding, and ability to service a statewide program. In addition, the Lowest Responsible Bidders are capable of handling both latex and oil-based paints unsorted, which is a key component of handling materials from retail pick-up locations. These bidders also have the technical knowledge and demonstrated the ability to complete the scope of work as outlined in the RFP.

Pricing from the Lowest Responsible Bidder was used in PaintCare's calculations of the Paint Stewardship Assessment, discussed below.

## **Household Hazardous Waste (HHW) Paint Management Services**

The State of Minnesota has negotiated statewide transport/processing contracts (commonly known as "the state contracts") with Veolia and Clean Harbors for use by Minnesota HHW programs, pursuant to which Veolia and Clean Harbors may use only State-authorized processing facilities for managing paint and other waste. These state contracts provide favorable terms and pricing to each HHW program.

[www.hrpassociates.com](http://www.hrpassociates.com)

Moreover, by utilizing State-authorized transport/processing vendors pursuant to the state contracts, each HHW program receives indemnification from the State in addition to the protections provided for in the state contracts. Disrupting the existing system in Minnesota could have the undesirable consequence of causing HHW programs who participate in the PaintCare program to forfeit certain legal protections or other benefits that they would otherwise enjoy under the current state contract system. To avoid such adverse effects, PaintCare has opted for a reimbursement-style payment system for Minnesota HHW programs and therefore did not go out to bid for HHW drop-off sites.

### **Program Costs**

The calculations and assumptions made to determine the program costs were reviewed and found to be reasonable. HRP reviewed the calculations which consists of a 12-month period and represents the program once it reaches maturity (estimated to be at the end of the third year).

PaintCare's anticipated expenses took into account the costs for processing, transportation, collection, collection containers, communications, personnel fees, legal fees, state permitting, and travel, in addition to corporate budget expenses. The expenses and assumptions made are acceptable and within industry standards.

Corporation expenditures were allocated to the Minnesota Program based upon a weighted average of the population of each State that PaintCare is operating a Paint Stewardship Program. Based upon Minnesota's population, the State is allocated only 10% of the total corporate costs. HRP reviewed these calculations and they are accurate.

### **Paint Assessment**

The anticipated volume of paint containers sold were based off of market research. The anticipated volume of paint containers collected were based on industry and NGO studies, and Paint Stewardship Programs that have already been implemented. A reasonable estimate of the percent of postconsumer paint to be recycled was developed based upon experience from previous programs and industry studies. The Bidder and State Contract pricing were then used to analyze the actual operating costs as well as the Program Administrative Costs.

HRP independently reviewed the calculations performed by PaintCare for accuracy and the calculations were deemed sufficient. Based on our review, we find the Paint Stewardship Assessment, determined by PaintCare, to be reasonable and not to exceed the actual total program costs to administer the Paint Stewardship Program. However it should be noted that due to this being the first year of the program, the "pre-program costs" that are taken into account project that there will be a deficit in the first year of the program. The Paint Stewardship Assessment (fee structure) is identical to the fee assessed in California, Connecticut, and Oregon.

If you have any questions or require additional information, please feel free to contact HRP at (860) 674-9570.

Sincerely,  
HRP ASSOCIATES, INC.

Nancy E. Garry, P.E.  
Project Manager
