Appendix C

IDENTIFYING ARCHITECTURAL PAINT PRODUCTS UNDER PAINTCARE
For Manufacturers and Collection Sites

Architectural paint is defined under the Paint Stewardship Program as:
Interior and exterior architectural coatings sold in containers of five gallons or less.

Architectural paint does not include:
Industrial maintenance (IM), original equipment manufacturer (OEM) or specialty coatings.

In order to distinguish between what is an architectural coating under the Paintcare program, definitions and terminology from the U.S. Environmental Protection Agency, California Air Resources Board and other state and local Architectural and Industrial Maintenance (AIM) rules were used to develop the following list. The decision table page 2 uses the definitions on page 3.

Program Products (maximum container size of 5 gallons):

1. Water-based paint (Interior and exterior): latex, acrylic
2. Oil-Based paint (Interior and exterior): alkyd, enamel
3. Clear Coatings: Shellac, Lacquer, Varnish, Urethane
4. Deck coatings and floor paints (including elastomeric)
5. Field and lawn marking coatings
6. Melamine/metal coatings and rust preventative
7. Primers, sealers and undercoaters
8. Sealers
9. Stains
10. Water repellents (not-tar-based or bitumen-based)
11. Waterproofing sealers for concrete, masonry, and wood

Non-Program Products (regardless of container size):

1. Empty, leaking or unlabeled containers
2. Industrial Maintenance (IM) coatings labeled as:
   (a) For industrial use, (b) Professional use, or (c) Not for residential use
3. Original Equipment Manufacturer (OEM) (shop application) paints and finishes
4. Aerosol paint (spray cans)
5. Automotive paints
6. Marine paints
7. Arts and Craft paints
8. Caulking compounds, epoxies, glues or adhesives
9. Drywall / joint compounds
10. Semi-solid products: spackle, patching compounds for roofing, stucco, wood, etc.
11. Paint additives, colorants and tints
12. Resins
13. Paint thinners, solvents, mineral spirit
14. Wood preservatives continaing pesticides
15. Tar, asphalt or bitumen based products
16. Two-component coatings (epoxy)
17. Deck cleaners
18. Other non-coating products (motor oil, pesticides, cleaning solutions)

Decision Table for Identifying Architectural Paint Products
for Manufacturers and Collection Sites

1. Is it a coating?

If YES, go to 2.	If NO, it is not in the program. *These non-coatings are excluded:* Paint thinner — Solvents Wood preservatives — Mineral spirits Wood treatment oils — Deck cleaners Drywall compounds — Epoxies, glues Roof patch, stucco patch — Wood patch Caulking compounds — Adhesives	**Manufacturers:** Non-coatings are not assessed **Collection Sites:** Non-coatings are not acceptable.

2. Is it an architectural coating?

If YES, go to 3.	If NO, it is not in the program. These non-architectural paints are excluded: Auto paint — Marine paint — Aerosols	**Manufacturers:** Coatings that are not architectural are not assessed a fee. **Collection Sites:** Coatings that are not architectural are not acceptable.

3. Is it an industrial maintenance (IM) coating?

If NO, go to step 4	If YES, then it is not in the program. *Products with these labels are excluded:* Professional use only — Not for residential use For industrial use only	**Manufacturers:** IM coatings are not assessed. **Collection Sites:** IM coatings are not acceptable.

4. Is it for Original Equipment Manufacturing (OEM)?

If NO, go to step 5	If YES, then it is not in the program. **Manufacturers:** If a company can clearly document that the coating was sold exclusively for OEM use, the fee should not be assessed. However, if this coating can be sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, the fee should be assessed.	**Collection Sites:** A collection site may not always be able to distinguish these products from non-OEM products. This determination will be made by asking the business customer what the intended use of the paint was. If the intention was shop application, it is not a program product. However, if the coating was sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, it may be accepted as a program product.

5. Is it a specialty coating or specifically excluded?

If NO, then it is in the program	If YES, then it is not in the program. *These are excluded:* Products in containers larger than 5 gallons Aerosol (spray) cans Craft paints Two component coatings (epoxy) Tar, asphalt, bitumen-based coatings Resins Paint tints, colorants, additives Wood preservatives containing pesticides	**Manufacturers:** Excluded products are not assessed a fee **Collection Sites:** Excluded products are not acceptable at collection sites.

DEFINITIONS

I. Architectural Coatings

Architectural coating means a coating recommended for application to stationary structures and their appurtenances, portable buildings, pavements, curbs, fields and lawns. This definition excludes adhesives, aerosols and coatings recommended by the manufacturer or importer solely for shop applications or solely for application to non-stationary structures, such as airplanes, ships, boats, and railcars.

II. Industrial Maintenance Coatings

Industrial Maintenance (IM) coating means a high performance architectural coating, including primers, sealers, undercoaters, intermediate coats, and topcoats formulated and recommended for application to substrates exposed to one or more of the following extreme environmental conditions in an industrial, commercial, or institutional setting:

1. Immersion in water, wastewater, or chemical solutions (aqueous and non-aqueous solutions), or chronic exposure of interior surfaces to moisture condensation;
2. Acute or chronic exposure to corrosive, caustic, or acidic agents, or to chemicals, chemical fumes, or chemical mixtures or solutions;
3. Repeated exposure to temperatures above 120 °C (250 °F);
4. Repeated (frequent) heavy abrasion, including mechanical wear and repeated (frequent) scrubbing with industrial solvents, cleansers, or scouring agents; or
5. Exterior exposure of metal structures and structural components.

One of the primary ways AIM rules distinguish IM coatings from other architectural coatings is the manufacturer's recommendation for restricted usage. IM coatings must be labeled under the rules as:

1. ''For industrial use only.''
2. ''For professional use only.''
3. ''Not for residential use'' or ''Not intended for residential use.''

Thus, if the product is not intended for and not labeled as an IM coating, it should be deemed a covered architectural coating and the fee should be assessed, unless it is specifically excluded (see below).

III. Original Equipment Manufacturer (OEM) Coatings

Shop application means that a coating is applied to a product or a component of a product in a factory, shop, or other structure as part of a manufacturing, production, finishing or repairing process (e.g., original equipment manufacturing coatings).

Since OEM (shop application) coatings may be intended but not labeled for industrial or professional use, and may be sold in containers of 5 gallons or less, then…

For manufacturers:
…if a company can clearly document that the coating was sold exclusively for OEM use, the fee should not be assessed. However, if this coating can be sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, the fee should be assessed.

For collection sites:
…a collection site may not always be able to distinguish these products from non-OEM products. This determination will be made by asking the business customer what the intended use of the paint was. If the intention was shop application, it is not a program product. However, if the coating was sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, it may be accepted as a program product.

IV. Specialty Coatings

Lastly, in order to identify Specialty or Special Purpose Coatings, we have used the definition from the Federated Society of Coating Technology's Coatings Encyclopedic (since AIM rules don't have a definition), which states that these coatings include aerosols, crafts paints.

Drywall Primer-Surfacers

June 2012

Purpose

The purpose of this notice is to clarify that "Drywall Primer-Surfacers" are included in the PaintCare Program. As part of the Program, manufacturers of these products must register with PaintCare and collect and remit the Assessment ("PaintCare Recovery Fee") as with other architectural paints in states with active Paint Stewardship programs (Oregon is currently active, California is anticipated to start in Fall 2012, Connecticut is anticipated to start in 2013).

Background

In order to assist companies with determining what coatings were architectural coatings subject to the PaintCare Recovery Fee for the Oregon program and what coatings were not, PaintCare developed a factsheet detailing what factors should be taken into consideration when making these determinations. In addition, the factsheet listed examples of program products and examples of non-program products (products that should not be assessed the fee). PaintCare, however, relies on individual manufacturers to determine what products are part of the program and what products are not, depending on their specific product lines. In some cases, PaintCare helps with this determination based on individual calls with manufacturers. In the case of Drywall Primer-Surfacers, based on these calls, it has come to our attention that some manufacturers were assessing the fee believing they were program products and some were not assessing the fee believing that they were non-program products. It appears that confusion arose when trying to distinguish drywall primer from drywall compound.

In order to ensure that all manufacturers are on a level playing field and the PaintCare Recovery Fee is indeed placed on all program products subject to the assessment, PaintCare herein clarifies that Drywall Primer-Surfacer is considered a program product and the PaintCare Recovery Fee must be assessed and remitted by all manufacturers of Drywall Primer-Surfacers. The reason for including this category under the architectural coatings that are subject to the program is as follows:

- The Drywall Primer-Surfacer products are primers. Primers are considered architectural coatings.
- MSDS sheets, either in their title and or elsewhere in the product description, for these products indicate that they are paint or primers.
- MSDS sheets indicate that they contain some type of binder or resin.

- Marketing information published by manufacturers for their own products indicate that they are vapor barriers or coatings.
- Information published by manufacturers for their own products indicate that they are vinyl, acrylic, and/or latex-based.
- Competitors have reported that they make and sell equivalent products that are not excluded by PaintCare.
- Consumers with leftover/unwanted Drywall Primer-Surfacers may bring them to a PaintCare collection site for proper recycling/disposal.

Action

Starting August 1, 2012, manufacturers of "Drywall Primer-Surfacers" need to ensure that these products are registered with PaintCare and add the PaintCare Recovery Fee to the wholesale price of these products to all distributors and retailers. Manufacturers are not required to pay the fee on past sales because the fees were not charged to distributors, retailers, or consumers.

Masonry and Concrete Sealers labeled "For Professional Use Only"

Purpose

The purpose of this notice is to clarify that masonry and concrete sealers that are labeled "for professional use" are excluded from the PaintCare Program. Manufacturers of these products are not required to register with PaintCare and they are not required to collect and remit the Assessment ("PaintCare Recovery Fee") in California or Oregon, the two states with active Paint Stewardship programs implemented by PaintCare.

Background

In order to assist companies with determining what products are architectural coatings subject to the PaintCare Recovery Fee for the Oregon and California programs and what products are not, PaintCare developed a definition of architectural paint detailing what factors should be taken into consideration when making these determinations. In addition, the definition lists examples of program products and examples of non-program products (products that should not be assessed the fee). PaintCare relies on individual manufacturers to determine which, if any, of their products are part of the program. In some cases, PaintCare helps with this determination based on individual calls with manufacturers. In the case of products used as sealers for masonry and concrete — and based on inquiries from many industry representatives and manufacturers of these products — it has come to our attention that manufacturers of these sealers desire clarification on whether their products are considered architectural coatings for the purposes of active and future state PaintCare programs.

In order to ensure that all manufacturers are on a level playing field and the PaintCare Recovery Fee is placed on all program products subject to the assessment, PaintCare herein clarifies that masonry and concrete sealers labeled for professional use are not considered program products and the PaintCare Recovery Fee is not required to be assessed and remitted by manufacturers of these products. Excluding these products from the definition of architectural coatings is based on the following:

- Originally PaintCare's definition excluded products that are both (1) Industrial Maintenance Coatings and (2) labeled "for professional use only." [Other acceptable phrases are (a) for industrial use only, (b) not for residential use, and (c) not intended for residential use].

- The definition of an IM coating varies somewhat from one state to another and from one regulatory air district to another. Generally, determining if a coating meets the criteria for IM is

based on the manufacturers recommended use for the product and whether it meets any one of certain criteria (simply put these criteria are: regular exposure to heat, chemicals, moisture, or abrasion). Masonry sealers are intended to act as waterproofing agents and are applied where water exposure is anticipated. Thus as a category they can generally be considered by manufacturers to be IM coatings and therefore meet the first criteria.

- Some manufacturers label these products for professional use. Others do not label them for professional use. There is no prohibition on a manufacturer from labeling a product for professional use. Therefore if a manufacturer chooses to change the product label on a product that they consider IM in order to also comply with the second criteria above (in the first bullet), they may do so in order have these products excluded from the PaintCare Program. The manufacturer may change their regular container label or use an additional sticker.

- If PaintCare finds that manufacturers start to change their labels on other products that are clearly not for professional use or industrial maintenance coatings (e.g. house paint), the professional use labeling will not exclude such products.

- An important purpose of the paint stewardship programs is to collect and recycle unused paint, stains, and coatings that are normally managed through government-sponsored household hazardous waste (HHW) programs. Sealers for masonry and concrete are not known to be a problem at HHW programs.

Conclusion

Concrete and masonry sealers that are IM coatings and labeled for professional use using one of the phrases indicated above are categorically exempt from PaintCare.

Appendix D

Minnesota Paint Stewardship Program

Information for HHW Programs

Minnesota's paint stewardship law benefits Household Hazardous Waste programs.

A law passed in May 2013 requires paint manufacturers to establish a Paint Stewardship Program in Minnesota. Household hazardous waste programs that participate can save money on paint management costs. Program funding comes from a "PaintCare Recovery Fee" applied to each container of architectural paint sold in Minnesota starting when the program begins November 1, 2014.

Paint Stewardship Program in Minnesota
PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopts paint stewardship laws.

Minnesota is the fifth state to pass such a law. Although this program is required by state law, it is designed and operated by the paint manufacturing industry. PaintCare currently operates programs in California, Connecticut, Oregon, Rhode Island and Vermont. PaintCare is also planning programs for Colorado, Maine and Minnesota.

Designing a Program for Minnesota
The new law requires PaintCare, on behalf of paint manufacturers, to submit a comprehensive Program Plan to the Minnesota Pollution Control Agency (MPCA). A detailed program plan was submitted by PaintCare to the MPCA in March 2014. Comments were received from MPCA in May 2014 and PaintCare is in the process of revising the Plan accordingly.

Making Paint Recycling More Convenient
PaintCare will establish drop-off sites statewide for residents and businesses to take leftover architectural paint. Although most drop-off sites will be at paint retailers, household hazardous waste (HHW) programs, solid waste transfer stations and landfills may also volunteer to be PaintCare drop-off sites and have their paint transportation and recycling costs paid by PaintCare.

Benefits to HHW Programs of Partnering with PaintCare
- Save on transportation and recycling costs
- Conserve resources and keep paint out of the solid waste stream
- Make recycling of leftover paint more convenient for your community

PaintCare Partners Receive
- Staff training at your site
- Paint collection bins
- Free transportation and recycling services
- Compensation for value-added services including paint reuse programs, bulking of oil-based paint and other services
- Publicity of HHW site or event (optional)

Drop-Off Site Responsibilities

- Provide secure storage area for cubic yard boxes or drums
- Accept program products from the public during normal operating hours
- Properly pack program products in collection bins
- Assist with loading and unloading of full and empty storage bins
- Complete minimal paperwork to track outgoing paint shipments
- Ensure staff are trained in PaintCare guidelines and safe operating procedures

Will PaintCare Require Operational Changes?

- If your program does not currently accept latex paint, PaintCare will not require you to do so. If you wish to start accepting latex, PaintCare will cover the transportation and processing costs.
- If your program does not currently accept paint from businesses, PaintCare will not require you to do so. If you wish to start accepting paint from businesses, PaintCare will cover the transportation and recycling/disposal costs.
- HHW programs may continue to put restrictions on who can use their programs, e.g., to residents of certain towns or cities. (PaintCare retailers accept paint from anyone in the state.)

Water-Based (Latex) Paint is a Resource

An important goal of PaintCare is to conserve resources and increase the amount of paint that is recycled. Not all HHW programs accept water-based paint because it is expensive to manage and is not classified as hazardous. Residents and businesses are often instructed to let water-based paint dry out and then dispose of the dry paint in the trash. Through the PaintCare program, all paint including latex will be recycled to the maximum extent possible.

Contact

Jeremy Jones, Minnesota Program Manager
(612) 719-5216 or jjones@paint.org

What Products Are Covered?

Architectural paints ("Program Products") are defined as interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings. Here are examples:

Program Products

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Non-Program Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Interest Form

Household Hazardous Waste Programs
To Be a PaintCare Partner for Paint Collection

Use this form to let us know that your program is interested in becoming a PaintCare drop-off site. PaintCare has published fact sheets for each state where we have a paint stewardship program to explain details about working with PaintCare to become a paint drop-off site. Please visit **www.paintcare.org** or call **(855) 724-6809** to request a state-specific fact sheet.

Appendix E

May 2014

RE: Minnesota Paint Stewardship Law

Dear Minnesota Paint Retailer:

Enclosed are materials to inform you and your customers about a new law and a new program that will make it more convenient to recycle paint in Minnesota. PaintCare currently operates similar programs in California, Connecticut, Oregon, and Vermont. We are also starting a program for Rhode Island in June and Maine in early 2015.

The start date of the Minnesota PaintCare Program has not been determined. The program start date is to be 90 days after PaintCare's Minnesota Program Plan is approved by the Minnesota Pollution Control Agency (MPCA). **At this time, we estimate the program will begin in the fall of 2014.** We will notify you once the start date is determined.

Factsheet for Retailers. The enclosed retailer factsheet introduces you to how the PaintCare program works and how it affects your business.

Webinars. In addition to providing you with print materials about the program, we are hosting four webinars to further explain the program, review the responsibilities of retailers under the law, and provide you with an opportunity to ask questions. The webinars will take place:

Wednesday, May 21	**10:30 AM – 11:30 AM**
Thursday, May 22	**2:00 PM – 3:00 PM**
Wednesday, May 28	**2:00 PM – 3:00 PM**
Friday, May 30	**10:30 AM – 11:30 AM**

Please visit www.paintcare.org/minnesota to sign up for a webinar.

Factsheet for Trade Painters. Also enclosed is a copy of a factsheet we developed at the request of paint retailers in other states to help answer common questions from professional painters. Some retailers hand these out at the counter; others insert them with monthly statements.

A common question you may receive will be about the new fee that will be applied to the price of each container of architectural paint when the program starts. The fee amounts will not be known until the MPCA approves the Program Plan that PaintCare has submitted. However, PaintCare has proposed the same fee structure used in the states and anticipates they will be approved. Fees are based on container size as follows: 35 cents for larger than half pint to smaller than 1 gallon, 75 cents for 1 gallon, and $1.60 for larger than 1 gallon up to 5 gallons.

Although it would be better to inform your customers (and the general public) about both the approved fee amounts and how the program works at the same time, it is important for professional painters to learn about the program as soon as possible because they plan jobs well ahead of time. Therefore, while the fee structure is under review, we are starting outreach to trade painters now. We suggest that trade painters discuss the anticipated fees in advance with their customers to allow for an adjustment to any quotes or job bids for future projects.

If you would like for us to mail you additional copies of the enclosed trade painter factsheet to share with professional painters, please send an e-mail to info@paintcare.org or call (855) 724-6809. Once the fees are confirmed, updated copies of the factsheet will be provided to you.

We look forward to working with you to establish a successful and convenient postconsumer paint management program for Minnesota. Feel free to contact me with any questions directly at (612) 719-5216 or jjones@paint.org, or visit www.paintcare.org for more information.

Sincerely,

Jeremy Jones
Minnesota Program Manager

Minnesota Paint Stewardship Program

How Will the Minnesota Paint Stewardship Program Affect Paint Retailers?

A law passed in May 2013 requires paint manufacturers to establish a Paint Stewardship Program in Minnesota. Program funding comes from a stewardship fee applied by retailers on the sale of architectural paint sold in Minnesota when the program begins in the fall of 2014.

The start date of the Minnesota PaintCare Program has not been set. The start date is to be 90 days after PaintCare's Minnesota Program Plan is approved by the Minnesota Pollution Control Agency (MPCA). Retailers will be notified when approval is received.

Paint Stewardship

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopt paint stewardship laws. PaintCare currently operates programs in California, Connecticut, Oregon, and Vermont. PaintCare is also planning programs for Maine, Minnesota, and Rhode Island.

Convenient Paint Recycling

PaintCare's primary effort is to establish paint drop-off sites throughout each PaintCare state at paint retailers and other locations in order to provide convenient recycling opportunities for the public. Other locations include solid waste transfer stations and municipal household hazardous waste facilities and events. As of May 2014, there are more than 120 paint drop-off sites in both Oregon and Connecticut, and more than 600 in California. PaintCare is planning to set up more than 200 new paint drop-off sites in Minnesota.

Participation as a Drop-Off Site is Voluntary

Retailers who wish to serve as drop-off sites are able to do so if they have adequate space for paint storage bins and can provide minimal staff time to accept paint from the public. By doing so, retailers can increase foot traffic and sales, and provide an environmental service for their community. They make it convenient for their customers to recycle leftover paint and help provide relief to local government programs that currently manage leftover paint. PaintCare provides storage bins, supplies, and site training. PaintCare also pays for paint transportation and recycling, and promotes the sites to the local community.

REQUIREMENTS OF RETAILERS

1. Check Registered Manufacturers and Brands

Once the program begins, retailers may not sell architectural paints that are not registered. Paint manufacturers must register their company with PaintCare, and they must register all architectural paint brands they sell in Minnesota. PaintCare and the MPCA will publish lists of registered manufacturers and brands on their websites so that retailers can confirm that the products they sell are registered. Please visit www.paintcare.org for registration lists.

2. Pass on the Stewardship Fee

When the program begins, the law requires that a stewardship fee ("PaintCare Recovery Fee") must be added by manufacturers to the wholesale price

of all architectural paint sold in Minnesota. This fee pays for all aspects of running the program. It is paid by manufacturers to PaintCare and then passed to their dealers. Retailers should see the *PaintCare Recovery Fee* on invoices from suppliers after the program starts. The law also requires that retailers and distributors apply the fee to the purchase price of architectural paint they sell. The fee paid by the customer to the retailer offsets the fee charged by the manufacturer or distributor to the retailer. All manufacturers, distributors, and retailers selling architectural paint in the state must pay and pass down the fee, ensuring a level playing field for all parties.

COMMON QUESTIONS ABOUT FEES

How much are the fees?
Although fees may change and vary by state, fees in the states with active programs and those proposed for Minnesota are the same. Fees are by container size:

$ 0.00 – Half pint or smaller
$ 0.35 – Larger than half pint to smaller than 1 gallon
$ 0.75 – 1 Gallon
$ 1.60 – Larger than 1 gallon to 5 gallons

When will fees for Minnesota be known?
Fees have been proposed in PaintCare's Minnesota Program Plan submitted in March to the MPCA. PaintCare anticipates that MPCA will approve the Plan in the summer of 2014 and that the program will begin in the fall of 2014.

How are the fees calculated?
Fees are set to cover the cost of a fully operating program on a state-by-state basis. PaintCare estimated the annual sales of architectural paint in Minnesota and divided the estimated annual expenses of the program by the number of containers to be sold in the state – taking into account the typical amount of leftover paint for each container size. Fees may be decreased in the future if they are higher than what is needed to cover program expenses, or may be increased if set too low.

Is the fee a deposit to be returned to customers?
No, the fee is not a deposit. Fees are used entirely to cover the expenses of running the program and not given back as a deposit for the return of paint or empty paint cans – a common misunderstanding.

Must we show the fee on receipts?
No, but in other states, most stores do show the fee in order to explain the price increase. PaintCare encourages retailers to show the fee and list it as *PaintCare Recovery Fee* to aid in customer education and provide consistency across the program.

Do we return the fee if a product is returned?
Yes, the fee should be returned because it is part of the purchase price.

Is sales tax applied to the fee itself?
Yes, the fee is part of the purchase price; therefore, sales tax is collected on the fee.

Do we apply the fee to sales on the first day of the program for inventory purchased before the first day of the program, even though we didn't pay a fee for the product to the distributor or manufacturer?
Yes, retailers must add the fee on all covered products sold on or after the first day of the program, regardless of when they were purchased from the distributor or manufacturer.

How will the public know about the fee?
PaintCare provides printed materials for retailers to distribute to the public to help explain the purpose of the fee, how the program works, and how to find a paint drop-off location. Before the program starts, PaintCare provides a "starter pack" of brochures and other information materials to all paint retailers. Additional materials can be ordered as needed. The cost of the materials is covered by the program.

Minnesota Paint Stewardship Program

How Will the Minnesota Paint Stewardship Program Affect Paint Retailers?

A law passed in May 2013 requires paint manufacturers to establish a Paint Stewardship Program in Minnesota. Program funding comes from a stewardship fee applied by retailers on the sale of architectural paint sold in Minnesota when the program begins November 1, 2014.

Paint Stewardship
PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopt paint stewardship laws. PaintCare currently operates programs in California, Connecticut, Oregon, Rhode Island and Vermont. PaintCare is also planning programs for Colorado, Maine and Minnesota.

Convenient Paint Recycling
PaintCare's primary effort is to establish paint drop-off sites throughout each PaintCare state at paint retailers and other locations in order to provide convenient recycling opportunities for the public. Other locations include municipal household hazardous waste facilities and events, solid waste transfer stations and landfills. As of June 2014, there are more than 130 paint drop-off sites in both Oregon and Connecticut, and more than 650 in California. By the end of the summer 2014, Vermont will have 50 sites and Rhode Island will have 25. PaintCare is planning to set up more than 200 new paint drop-off sites in Minnesota.

Participation as a Drop-Off Site is Voluntary
Retailers who wish to serve as drop-off sites are able to do so if they have adequate space for paint storage bins and can provide minimal staff time to accept paint from the public. By doing so, retailers can increase foot traffic and sales, and provide an environmental service for their community. They make it convenient for their customers to recycle leftover paint and help provide relief to local government programs that currently manage leftover paint. PaintCare provides storage bins, supplies, and site training. PaintCare also pays for paint transportation and recycling, and promotes the sites to the local community.

REQUIREMENTS OF RETAILERS

1. Check Registered Manufacturers and Brands
Once the program begins, retailers may not sell architectural paints that are not registered. Paint manufacturers must register their company with PaintCare, and they must register all architectural paint brands they sell in Minnesota. PaintCare and the MPCA will publish lists of registered manufacturers and brands on their websites so that retailers can confirm that the products they sell are registered. Please visit www.paintcare.org for registration lists.

2. Pass on the Stewardship Fee
When the program begins, the law requires that a stewardship fee ("PaintCare Recovery Fee") must be added by manufacturers to the wholesale price of all architectural paint sold in Minnesota. This fee pays for all aspects of running the program. It is paid by manufacturers to PaintCare and then passed to their dealers. Retailers should see the *PaintCare Recovery Fee* on invoices from suppliers after the program starts. The law also requires that retailers and distributors apply the fee to the purchase price of architectural paint they sell. The fee paid by the customer to the

retailer offsets the fee charged by the manufacturer or distributor to the retailer. All manufacturers, distributors, and retailers selling architectural paint in the state must pay and pass down the fee, ensuring a level playing field for all parties.

COMMON QUESTIONS ABOUT FEES

How much are the fees?

Although fees may change and vary by state, fees in the states with active programs and those proposed for Minnesota are the same. Fees are by container size:

$ 0.00 – Half pint or smaller
$ 0.35 – Larger than half pint to smaller than 1 gallon
$ 0.75 – 1 Gallon
$ 1.60 – Larger than 1 gallon to 5 gallons

When will fees for Minnesota be known?

Fees have been proposed in PaintCare's Minnesota Program Plan submitted in March to the MPCA. PaintCare anticipates that MPCA will approve the Plan and fee structure in the summer of 2014. Retailers will be notified as soon as MPCA approves the plan.

How are the fees calculated?

Fees are set to cover the cost of a fully operating program on a state-by-state basis. PaintCare estimated the annual sales of architectural paint in Minnesota and divided the estimated annual expenses of the program by the number of containers to be sold in the state – taking into account the typical amount of leftover paint for each container size. Fees may be decreased in the future if they are higher than what is needed to cover program expenses, or may be increased if set too low.

Is the fee a deposit to be returned to customers?

No, the fee is not a deposit. Fees are used entirely to cover the expenses of running the program and not given back as a deposit for the return of paint or empty paint cans – a common misunderstanding.

Must we show the fee on receipts?

No, but in other states, most stores do show the fee in order to explain the price increase. PaintCare encourages retailers to show the fee and list it as *PaintCare Recovery Fee* to aid in customer education and provide consistency across the program.

Do we return the fee if a product is returned?

Yes, the fee should be returned because it is part of the purchase price.

Is sales tax applied to the fee itself?

Yes, the fee is part of the purchase price; therefore, sales tax is collected on the fee.

Do we apply the fee to sales on the first day of the program for inventory purchased before the first day of the program, even though we didn't pay a fee for the product to the distributor or manufacturer?

Yes, retailers must add the fee on all covered products sold on or after the first day of the program, regardless of when they were purchased from the distributor or manufacturer. Fees collected on existing inventory stay with the retailer; they are not paid back to the distributor or manufacturer.

How will the public know about the fee?

PaintCare provides printed materials for retailers to distribute to the public to help explain the purpose of the fee, how the program works, and how to find a paint drop-off location. Before the program starts, PaintCare provides a "starter pack" of brochures and other information materials to all paint retailers. Additional materials can be ordered as needed. The cost of the materials is covered by the program. In addition to retailer information, PaintCare works with contractor associations to get information to trade painters, and conducts general outreach including newspaper, radio, television, and on-line advertising.

What Products are Covered?

Architectural paints ("Program Products") are defined as interior and exterior architectural coatings sold in containers of 5 gallons or smaller. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

Program Products

These products have fees and are accepted at drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

🚫 Non-Program Products

These products have no fees and are not accepted at drop-off sites:

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Note: Leaking, unlabeled and empty containers are not accepted at drop-off sites

Minnesota Paint Stewardship Program

Information for Trade Painters

A new Minnesota law affecting trade painters takes effect in the fall of 2014.

The new law requires paint manufacturers to establish a paint stewardship program in Minnesota. The program will be funded by a fee on each container of architectural paint sold in the state. The program will set up drop-off sites at retail stores and other sites throughout the state where residents and businesses will be able to take most leftover paint for recycling, free of charge.

The start date of the Minnesota PaintCare Program has not been set. The program start date is to be 90 days after PaintCare's Minnesota Program Plan is approved by the Minnesota Pollution Control Agency (MPCA). PaintCare will notify stakeholders when approval is received.

Paint Stewardship Led by Industry

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopt paint stewardship laws. PaintCare currently operates programs in California, Connecticut, Oregon, and Vermont. PaintCare is also planning programs for Maine, Minnesota, and Rhode Island.

The primary goals of the program are to decrease paint waste and recycle more postconsumer paint by setting up convenient drop-off sites in each PaintCare state. Although the program is required by state law, it is designed and operated by the paint manufacturing industry.

PaintCare Recovery Fee and Funding

As required by the law, a paint stewardship fee ("PaintCare Recovery Fee") must be added by manufacturers to the wholesale price of all architectural paint sold in Minnesota. Manufacturers pay this fee to PaintCare to fund setting up drop-off sites for leftover, postconsumer architectural paint, and for the transportation, recycling, and proper disposal of that paint. It also pays for consumer education and program administrative costs. The proposed fees are based on container size as follows:

$ 0.00 – Half pint or smaller
$ 0.35 – Larger than half pint to smaller than 1 gallon
$ 0.75 – 1 Gallon
$ 1.60 – Larger than 1 gallon to 5 gallons

The law also requires that each distributor and retailer include the PaintCare Recovery Fee with their sale price. While displaying the fee on invoices and receipts is not required of retailers, PaintCare encourages showing the fee and listing it as *PaintCare Recovery Fee* to aid in customer and dealer education and to provide consistency across the program.

Advance Notice for Trade Painters

Trade painters may pass the fees on to their customers in order to recoup the fees they pay on the product.

When you calculate quotes for future jobs, be sure to take these fees into account. Check with your suppliers to make sure the quotes for paint products allow for the fees. Let your customers know that you may need to revise your quote once the start date is known.

New Paint Drop-Off Sites

PaintCare will establish paint drop-off sites across the state. Most drop-off sites will be at paint stores. Other sites may include solid waste transfer stations, recycling centers, and government-sponsored household hazardous waste programs. Participation as a drop-off site is voluntary.

Use of Retail Drop-Off Sites by Businesses

Retail sites will provide a convenient recycling option at no cost for trade painters and other businesses. Businesses that generate up to 220 pounds (20-30 gallons depending on type) of hazardous wastes per month will be able to use these sites to recycle all eligible architectural paint (both water and solvent-based), with some restrictions on quantities per month.

Larger businesses (those that generate more than 220 pounds of hazardous waste per month) will be able to use the PaintCare sites for their water-based program products only; they will not be able to use the sites for oil-based paint or other solvent-based products.

Note: Latex paint does not count toward the 220 pound monthly hazardous waste generation limit.

Pick-Up Service for Large Volumes

Businesses with at least 300 gallons of postconsumer paint to recycle may qualify to have their paint picked up by PaintCare at no additional cost. To learn more or to request this service, call (855) 724-6809.

paintcare®

Minnesota Paint Stewardship Program
Information for Solid Waste Transfer Stations, Recycling Facilities and Landfills

Minnesota's paint stewardship law supports paint collection activities at solid waste transfer stations, recycling facilities and landfills.

A law passed in May 2013 requires paint manufacturers to establish a Paint Stewardship Program in Minnesota. Sites that participate can save money on paint management costs and expand services to their customers. Program funding comes from a "PaintCare Recovery Fee" applied to each container of architectural paint sold in Minnesota starting when the program begins November 1, 2014.

Paint Stewardship Program in Minnesota

PaintCare Inc. is a non-profit organization established by the American Coatings Association to implement state-mandated paint stewardship programs on behalf of paint manufacturers in states that adopt paint stewardship laws. Minnesota is the fifth state to pass such a law. Although this program is required by state law, it is designed and operated by the paint manufacturing industry. PaintCare currently operates programs in California, Connecticut, Oregon, Rhode Island and Vermont. PaintCare is also planning programs in Colorado, Maine and Minnesota.

Designing a Program for Minnesota

The new law requires PaintCare, on behalf of paint manufacturers, to submit a comprehensive Program Plan to the Minnesota Pollution Control Agency (MPCA). A detailed plan was submitted by PaintCare to the MPCA in March 2014. Comments were received from MPCA in May 2014 and PaintCare is in the process of revising the Plan accordingly.

Making Paint Recycling More Convenient

PaintCare will establish drop-off sites statewide for residents and businesses to take leftover architectural paint. Most drop-off sites will be at paint retailers; however, household hazardous waste (HHW) programs, solid waste transfer stations, recycling facilities and landfills may also volunteer to be PaintCare drop-off sites and have their paint transportation and recycling costs paid by PaintCare.

Benefits to Transfer Stations

- Make recycling of leftover paint more convenient for your community
- Save money on paint generated at your site or managed through load check programs
- Help your state conserve resources and keep paint out of the solid waste stream

PaintCare Partners Receive

- Storage bins for paint
- Free transportation and recycling services
- Staff training at your site
- Program brochures and site signage
- Publicity of our your site (optional)

Drop-Off Site Responsibilities

- Provide secure storage area for cubic yard boxes or drums.
- Accept program products from the public during normal operating hours
- Properly pack program products in collection bins
- Assist with loading and unloading of full and empty storage bins
- Complete minimal paperwork to track outgoing paint shipments
- Ensure staff are trained in PaintCare guidelines and safe operating procedures

Water-Based (Latex) Paint is a Resource

An important goal of PaintCare is to conserve resources and increase the amount of paint that is recycled. Not all HHW programs accept water-based paint because it is expensive to manage and is not classified as hazardous. Residents and businesses are often instructed to let water-based paint dry out and then dispose of the dry paint in the trash. Through the PaintCare program, all paint including latex will be recycled to the maximum extent possible.

TO PaintCare Inc.

FROM Bryan Waller   **EMAIL**   Bryan_Waller@golder.com

TECHNICAL MEMO TO PAINTCARE: GIS METHOD USED TO CALCULATE DISTANCE AND POPULATION COVERAGE OF THE PAINTCARE SERVICE LOCATIONS IN MINNESOTA

The following GIS analysis was undertaken to evaluate two service area-based distance criteria (90% and 95% of State-wide population with access to a paint collection site) and two population density criteria (one site per 30,000 and 50,000 population, respectively).

To complete this analysis, service areas were defined as 15 mile driving distances from a paint collection site. Once all sites were located, and service areas were established, the distance criterion was evaluated based on the coverage of all combined service areas and a population distribution layer. Based on past experience conducting this type of analysis for PaintCare in other states, the authors determined that a fine-grained population distribution with sub-county-scale urban-population ranges was required to complete this analysis.

To create this layer, the authors settled upon the creation of a population coverage layer comprised of both Census Population Places and Census Block Groups. The census data is based on the 2010 census taken by the US Census Bureau. This combination resulted in a population distribution that not only covers the entire State, but also classifies populated places by population range (<10,000 persons, 10,000-20,000 person etc.) Using these data, it was established that if an entire populated place was entirely covered by the combined service areas, it was assumed that 100% of the population had access to a collection site. If 90% of a populated place was covered by the combined service areas it was assumed that 90% of its residents had access to a collection and so on.

The service level (or population dens ity) criterion was evaluated by counting the number of intersecting service areas within each populated place. For instance, if a populated place had a population of 100,000 people and had access to five overlapping service areas, its level of service would be one site for every 20,000 persons.

To complete this analysis, two authors used a GIS algorithm to find the optimal amount of sites that satisfied each of the four respective criteria, two for distance and two for population density. It should be noted that two criterion types are mutually exclusive within and between types and have been evaluated separately. The analysis yielded the results displayed below in Table 1.

Joint Outreach Projects

THE BASICS

Introduction

If you are a local government that has partnered with PaintCare, we offer limited funding support for outreach activities that involve PaintCare.
We are most interested in partnering with you when we are setting up new PaintCare drop-off sites, where participation is low, and when we are promoting one day HHW events to boost the amount of paint we can collect at one time. We have supported radio, newspaper and direct mail advertising and will consider other media.

Review and Approval

Project budgets and all creative work must be reviewed and pre-approved by PaintCare. Creative work includes text, images, and scripts. When possible, all projects must include PaintCare's website address and logo and mention that people can find PaintCare drop-off sites in other areas (via our website).

Proposal Form

Please complete our Proposal Form for Joint Outreach Projects and email it to your PaintCare Regional Coordinator, State Program Manager, or info@paintcare.org

WHAT WE ASK OF YOU

Print-Based

For print materials (such as brochures, postcards, bill inserts) you will be responsible for sending artwork files to your printer, coordinating mailings, and distribution. After the project is completed, along with your invoice, we ask for a description of how, when, and where the piece was distributed or used, and an electronic copy of the final print piece.

Newspaper

For newspaper ads, you will be responsible for sending artwork files to the newspaper and scheduling. At the start of the project, we ask you to provide PaintCare with draft text, dimensions and due dates for the ads. After the project is completed, we ask for a list of run dates for each newspaper and a scan or clipping of each ad.

Radio

For radio advertising, you will be responsible for providing the pre-approved scripts to the stations and handling scheduling. After the project is completed, along with your invoice, we ask you to provide text of the final script with a list of run dates and times. If available, we would also like an audio file of the actual recording aired on the radio.

Other

For other types of projects, we will ask you for similar things – you will coordinate everything and send PaintCare supporting documentation along with your invoice so we have a record of what was accomplished.

DESIGN ASSISTANCE

PaintCare can provide assistance with basic layout and graphic design using our in-house staff. When we provide this type of assistance we will provide electronic files for you to send for printing or ad placement. Other than editing and commenting on scripts, we do not provide in-house assistance with audio or video production.

Please allow plenty of time for project planning, approvals, and some back-and-forth editing. Depending on the time of year, this may take 4-8 weeks.

REIMBURSEMENT

PaintCare provides reimbursements for pre-approved projects only. We do not provide money up front, pay vendors directly, or accept requests for reimbursements on projects that have already been completed. Generally PaintCare will reimburse for half of the total direct costs for pre-approved projects; however, we may make exceptions and offer a lower or higher amount based on how much of the message is dedicated to PaintCare, our budgets, and other PaintCare advertising taking place in your area.

To be reimbursed, you will need to send PaintCare an invoice from your government agency, samples of the final pieces as previously noted, and copies of invoices from your vendors. We ask you to combine them into one PDF and send via email to Paul Fresina at pfresina@paint.org. The "To:" space on the invoice should be addressed to PaintCare Inc., 1500 Rhode Island Ave NW, Washington DC, 20005. In the space for purchase orders please write "5839." See sample invoice on next page.

{Sample Invoice}

Environmental Services Program
Washington County
123 Government Way
Anytown, State 55776

June 9, 2013

Invoice: 2452187

Purchase Order: 5839

Paul Fresina
PaintCare Inc.
1500 Rhode Island Ave. NW
Washington DC, 20005

Description:

- Newspaper ad promoting one day event held in Anytown on May 1, 2013

- Three 5x5 ads ran on April 13, 20, 17 in the *County Journal*

- Total invoices from newspapers: $1,487.00

- Invoice and copy of one ad are attached

- Per prior discussion, PaintCare agreed to reimburse county for $750

- Contact person: Marie Chen, 202-555-1212

Invoice Amount: $750.00

Remit to: Environmental Services Program
               Washington County
               123 Government Way
               Anytown, State 55776

Washington, DC 20005

RE: INDEPENDENT AUDIT, PAINT STEWARDSHIP PROGRAM, MINNESOTA (HRP
        #PAI2001.SW)

Dear Ms. Bernardo:

HRP Associates, Inc. (HRP) has completed an Independent Audit of PaintCare's
calculations of the Paint Stewardship Assessment to be placed on the sale of each
container of architectural paint sold in the State of Minnesota to administer a Paint
Stewardship Program. A summary of the Audit Findings are provided below.

Retail Paint Management Services Bids

To accomplish the goals of the Paint Stewardship Program, PaintCare developed a
Request for Proposal for Paint Processing for the Minnesota Program. The RFP was
for all PaintCare collection, transportation, and processing activities from retail drop-
off sites and all other non-household hazardous waste collection facility drop-off
sites.   HRP reviewed the bids that were received and a total of five bids were
received from the solicitation. The bids ranged from companies that currently collect
paint in Minnesota utilizing "milk run" programs, to those that have run the State of
Minnesota Hazardous Waste Contract, and those that currently have contracts with
PaintCare in other States.

Negotiations are underway with the Lowest Responsible Bidders. These bidders
have been selected based upon their qualifications, relevant past experience,
technical understanding, and ability to service a statewide program.   In addition, the
Lowest Responsible Bidders are capable of handling both latex and oil-based paints
unsorted, which is a key component of handling materials from retail pick-up
locations.   These bidders also have the technical knowledge and demonstrated the
ability to complete the scope of work as outlined in the RFP.

Pricing from the Lowest Responsible Bidder was used in PaintCare's calculations of
the Paint Stewardship Assessment, discussed below.

Household Hazardous Waste (HHW) Paint Management Services

The State of Minnesota has negotiated statewide transport/processing contracts
(commonly known as "the state contracts") with Veolia and Clean Harbors for use by
Minnesota HHW programs, pursuant to which Veolia and Clean Harbors may use
only State-authorized processing facilities for managing paint and other waste.
These state contracts provide favorable terms and pricing to each HHW program.

Moreover, by utilizing State-authorized transport/processing vendors pursuant to the state contracts, each HHW program receives indemnification from the State in addition to the protections provided for in the state contracts. Disrupting the existing system in Minnesota could have the undesirable consequence of causing HHW programs who participate in the PaintCare program to forfeit certain legal protections or other benefits that they would otherwise enjoy under the current state contract system. To avoid such adverse effects, PaintCare has opted for a reimbursement-style payment system for Minnesota HHW programs and therefore did not go out to bid for HHW drop-off sites.

Program Costs

The calculations and assumptions made to determine the program costs were reviewed and found to be reasonable. HRP reviewed the calculations which consists of a 12-month period and represents the program once it reaches maturity (estimated to be at the end of the third year).

PaintCare's anticipated expenses took into account the costs for processing, transportation, collection, collection containers, communications, personnel fees, legal fees, state permitting, and travel, in addition to corporate budget expenses. The expenses and assumptions made are acceptable and within industry standards.

Corporation expenditures were allocated to the Minnesota Program based upon a weighted average of the population of each State that PaintCare is operating a Paint Stewardship Program. Based upon Minnesota's population, the State is allocated only 10% of the total corporate costs. HRP reviewed these calculations and they are accurate.

Paint Assessment

The anticipated volume of paint containers sold were based off of market research. The anticipated volume of paint containers collected were based on industry and NGO studies, and Paint Stewardship Programs that have already been implemented. A reasonable estimate of the percent of postconsumer paint to be recycled was developed based upon experience from previous programs and industry studies. The Bidder and State Contract pricing were then used to analyze the actual operating costs as well as the Program Administrative Costs.

HRP independently reviewed the calculations performed by PaintCare for accuracy and the calculations were deemed sufficient. Based on our review, we find the Paint Stewardship Assessment, determined by PaintCare, to be reasonable and not to exceed the actual total program costs to administer the Paint Stewardship Program. However it should be noted that due to this being the first year of the program, the "pre-program costs" that are taken into account project that there will be a deficit in the first year of the program. The Paint Stewardship Assessment (fee structure) is identical to the fee assessed in California, Connecticut, and Oregon.

If you have any questions or require additional information, please feel free to contact HRP at (860) 674-9570.

Sincerely,
HRP ASSOCIATES, INC.
