Section 1. Contact Information

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program.

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(1) Contact information. Identify the manufacturer or stewardship organization responsible for the annual report submittal. Stewardship organizations shall include an updated list of participating manufacturers and any updates to their respective contact information per §18952(a)(2).

Stewardship Organization

PaintCare Inc., a non-profit 501(c)(3) organization, was formed to serve as the representative stewardship organization of architectural paint manufacturers to fulfill their obligations under the California Paint Stewardship Law. PaintCare was created by the American Coatings Association, the primary trade association of the paint and coatings industry. PaintCare's Board of Directors consists of eleven non-paid representatives of architectural paint manufacturers.

PaintCare representation is open to all architectural paint manufacturers.

A current list of participating manufacturers and their mailing addresses is included in the appendix.

Section 2. Executive Summary

Regulatory Citation

Title 14, Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(2) Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the manufacturer or stewardship organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the manufacturer or stewardship organization's architectural paint recovery efforts during the reporting period pursuant to PRC §48705(a). This may include anticipated steps, if needed, to improve performance and a description of challenges encountered during the reporting period and how they will be addressed. This may also include a description of paint container management and market development activities if the manufacturer or stewardship organization has chosen to engage in those activities.

A. California Paint Stewardship Law and Annual Report

In September 2010, Governor Schwarzenegger signed Assembly Bill 1343 (Huffman), the California Paint Stewardship Law. This law requires manufacturers of architectural paint to develop and implement a program to reduce the generation of postconsumer architectural paint, promote the reuse of postconsumer architectural paint, and to provide a system for the management of postconsumer architectural paint in an environmentally sound manner that includes collection, transportation, processing, recycling, and proper disposal.

The California program began October 19, 2012. PaintCare, on behalf of participating paint manufacturers, submits an annual report to the California Department of Resources Recycling and Recovery (CalRecycle). Annual reports cover the period July 1 – June 30. As prescribed in Section 48700 of the California Public Resources Code and further detailed in Title 14, Section 18954 of the California Code of Regulations, the information submitted in an annual report shall be organized according to this standard outline:

- (A) Contact Information
- (B) Executive Summary
- (C) Program Outline
- (D) Description of Goals and Activities Based on the Stewardship Plan
- (E) Financing Mechanism
- (F) Education and Outreach
- (G) Audits

B. Year Seven Program Highlights

B1. Sites and Services

- Provided 793 year-round paint drop-off sites consisting of paint retailers, municipal household hazardous waste (HHW) facilities, solid waste transfer stations, and other voluntary locations to create a network of convenient paint drop-off points in California. The program provided access to a year-round site within 15 miles for 98.9% of the state's population, exceeding the target of 90%.
- Managed paint from 250 HHW drop-off events at 164 locations. PaintCare also planned, promoted, and held 11 paint-only drop-off events. Paint-only event locations were chosen to provide recycling opportunities in areas with either high local demand or limited access based on existing locations.
- In 2019 and 2020, PaintCare increased rural convenience and strengthened partnerships with county programs by adding year-round HHW, transfer station, or landfill drop-off sites in Kern, Modoc and Tulare counties.
- Provided 469 large volume pickups (LVP) from businesses, institutions, and others that had accumulated more than 200 gallons of paint at their sites. In addition, provided recurring large volume pickup (RLVP) services to 71 sites, up from 63 last year. The LVP service now represents 7% of total program collection volume. The LVP service was temporarily suspended in March 2020 and resumed in May 2020.

B2. Collection Volume

- Collected and processed 3,565,881 gallons of postconsumer paint, of which 96% was reused, recycled back into paint or another product, or used for a purpose other than landfill disposal; 47% of the paint came through retail and other non-municipal sites and services; 53% came from municipal sites and services.
- Reuse volume continued to increase. PaintCare increased its outreach to recruit new reuse sites, as well as support for the HHW facilities, reuse stores, and paint recyclers that made paint available for reuse. As of June 30, 2020, PaintCare had 39 reuse partners – four more than last year.
- The program recycled approximately 2,013 tons of plastic and metal paint cans.

B3. Operations

- Conducted a grant program that awarded \$100,000 to a paint recycler seeking to develop new methods of recycling latex paint that cannot be recycled back into paint. The winning recycler, Visions Recycling, Inc., used its grant to obtain pre-cast molds to make landscape décor, perform research to price and position products in the marketplace, and showcase their products at a national trade show.
- From the onset of COVID-19 in March 2020 and forward, PaintCare maintained a robust communication structure that kept program stakeholders and the general public informed of the state of program services and infrastructure. PaintCare met regularly with CalRecycle to keep the agency informed of the program's actions and the impact of COVID-19 on the program, the public, and its drop-off site partners. In addition, PaintCare shared HHW program and retail drop-off site closure updates with the HHW Information Exchange (HHWIE) listserv, providing statewide visibility on program status.
- Continued efforts to establish partnerships with municipal and county programs through engagement at conferences, ESJPA (rural counties) and HHWIE meetings, in-person site visits, and conference calls.
- PaintCare followed through on its effort to solicit input from stakeholders on paint reuse, with the aim of understanding what measures PaintCare could take to encourage highest and best use of collected paint through increased reuse. The onset of the COVID-19 pandemic curtailed some of these efforts, but PaintCare intends to reassess local needs and assist those interested in expanding reuse in FY21 and beyond.

B4. Outreach and Education

- Continued the comprehensive outreach campaign to educate consumers on the program, the amount and purpose of the PaintCare fee, and convenient recycling opportunities, while also promoting buying the right amount of paint and using up leftovers.
- Public outreach activities were significantly impacted by the COVID-19 pandemic that began in March 2020. Some advertising campaigns scheduled for the second half of the year were canceled due to limitations in PaintCare's paint drop-off sites and services. PaintCare's website and social media were used to provide updates to the public about PaintCare's availability and to promote paint reuse messaging.
- PaintCare received the 2019 Outstanding Industry Partner Award from the North American Hazardous Materials Management Association (NAHMMMA) in recognition of ten years of successful paint stewardship programs across multiple states.

Section 3. Program Outline

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(3) Program Outline. Describe the paint stewardship program, including information on the following topics:

(A) A description of the methods used to collect, transport, and process postconsumer architectural paint, by type, in California.

(B) Description of how each consumer of architectural paint in California had an opportunity to recycle and properly manage their postconsumer paint on a state-wide basis, including the number, location, and type of collection points located in the state.

(C) Description of best management practices followed by service providers that are acting as collection points, which may include any training that the manufacturer or stewardship organization provided or required of service providers to ensure proper collection and management of postconsumer paint.

(D) A statement that the manufacturer or stewardship organization coordinated with existing household hazardous waste collection programs and retailers as potential collection points per Section 18953(a)(3)(E) and (F) during the reporting period.

A. Paint Drop-Off Sites and Services

A1. Site Types

PaintCare continued to grow its paint collection system in both urban and rural communities. The sites and services used to collect paint from the public include the following:

- Paint retailers, including paint, hardware, and building supply stores
- HHW collection facilities and events
- Solid waste transfer stations, recycling centers, and landfills
- Material reuse stores (e.g., Habitat for Humanity Restores)
- Paint-only drop-off events
- Large volume pickup service for sites that have accumulated more than 200 gallons of postconsumer paint (most commonly painting contractors). [Note: Sites that receive a single or infrequent pickup (less than 3 per year) are referred to as “large volume pickups” (LVP), while sites that receive pickups on an ongoing basis are called “recurring large volume pickup” (RLVP) sites.]
- Partnership with door-to-door HHW programs

PaintCare had 793 year-round drop-off sites in California at the end of the year. For the purpose of defining convenience, PaintCare defines a site (including an event site) by its physical address and considers it to be “year-round” if the site is open at least one day per month, every month of the year. Sites that are open less frequently are considered supplemental sites. Sites that close permanently or stop participating in the PaintCare program during the year are also considered supplemental and are noted as being partial-year only.

The program managed paint from 250 HHW drop-off events, held 11 paint-only drop-off events, partnered with 16 door-to-door collection programs, had 15 other supplemental sites, completed 469 LVP appointments, and served 71 RLVP sites.

Paint-only event locations were chosen to provide recycling opportunities in underserved areas with either high local demand or limited access based on existing drop-off locations. In lieu of holding a paint-only event, PaintCare also consults with communities on alternative means of paint recovery, such as LVP/RLVP services.

The following tables summarize PaintCare sites and services during the year, with a comparison to the previous two years.

SUMMARY OF PAINTCARE DROP-OFF SITES AND SERVICES

Year-Round Sites

Site Type or Service	Year 6 FY2018	Year 7 FY2019	Year 8 FY2020
Paint Retailers	650	580	596
HHW Facilities	120	120	120
Transfer Stations	33	42	47
Landfills	3	4	6
Recycling Centers	4	4	4
Other Sites	5	5	6
Paint Recyclers	6	5	5
Reuse Stores	5	5	9
HHW Event Site	1	1	0
Total	827	766	793

Supplemental Sites and Services

Site Type or Service	Year 6 FY2018	Year 7 FY2019	Year 8 FY2020
HHW Events	331	323	250
Large Volume Pickups	505	560	469
Recurring Large Volume Pickup Sites	60	63	71
Door-to-Door Programs	16	16	16
Seasonal HHW Facilities	8	9	7
PaintCare Paint-Only Events	11	13	11
Paint Retailers (partial-year only)	9	89	8
Other Sites (partial-year only)	2	1	0

[Notes regarding the tables above: (1) Only stand-alone door-to-door programs are counted in the table above. While PaintCare also partners with HHW facilities that also host door-to-door operations, such as the city of Folsom, they are not included in the Door-to-Door Programs category to avoid counting multiservice HHWs twice. (2) The Other Sites category in the top table includes fire stations, municipal public works yards, and other miscellaneous types of paint drop-off sites that do not fall into the primary categories. The

Other Sites category in the bottom table is a catch-all category for sites other than retail stores that closed or left the program during the year. As such closures rarely occur, they are grouped together to keep the table compact.]

The locations of the year-round sites, supplemental sites, and LVP/RLVP sites are shown in the maps in section 4 of the report. A full list of all sites and door-to-door program partners is provided in the appendix.

A2. Site Configuration

All PaintCare drop-off sites accept both latex paint and oil-based paint. LVP/RLVP sites may also manage both latex and oil-based paint through PaintCare, but with some limits on oil-based paint volumes.

Retail drop-off sites and paint-only drop-off events accept paint from both residents and qualifying businesses, while HHW programs, transfer stations, and some other locations may limit participation to their normal service area and customers, which may or may not include businesses. LVP/RLVP sites may be households, businesses, or others (i.e., government agencies or nonprofits).

PaintCare pays for paint collection bins, training materials, transportation of paint from the site, and paint processing for all drop-off and LVP/RLVP sites. Spill kits are also provided to most sites. PaintCare also negotiates payment for additional services with HHW sites, transfer stations, and some other sites. Additional services include:

- Paint reuse
- Latex paint reprocessing
- Oil-based paint bulking
- Internal transportation (from remote sites to a primary location)

B. Paint Transportation and Processing

B1. Paint Transportation

PaintCare employed two main haulers for statewide transportation services: Clean Harbors Environmental Services and Clean Earth (formerly Stericycle). PaintCare also worked with select haulers that held existing contracts with HHW programs, such as Veolia Environmental Services, Waste Management, US Ecology, and Visions Paint — and worked with Acrylatex to service some of the LVP customers. Several HHW programs also provided transportation services for PaintCare.

Haulers schedule pick up appointments in two ways: (1) by request as needed or (2) on a set schedule (e.g., every Monday). Haulers are responsible for delivery of empty collection bins and program supplies and for picking up full bins from drop-off sites. Haulers provide PaintCare all data on the transportation and processing of PaintCare products taken from

all sites to their final destination. Shipments of PaintCare products from HHW facilities that have partnered with PaintCare are arranged between the facilities and haulers, typically to coincide with the sites' regular shipments of other HHW. Contracted haulers and their downstream processors are subject to audit by PaintCare.

Various paint collection containers are used in the program. Most drop-off sites pack paint cans into cubic yard bins. A few sites pack paint cans into 55-gallon drums and large shipping containers (20 cubic yards or larger), and some bulk (pour off) paint into drums. Full collection bins of commingled paint (latex and oil-based paint cans in the same collection container) are transported to the haulers' facilities for sorting by type. From there, latex paint is transported to a latex paint recycler and oil-based paint is transported to downstream processors. Collection containers of paint sorted by type at drop-off sites (typically by HHW programs) are either shipped to the haulers' facilities for transportation efficiency or are shipped directly to downstream processors.

Containers are shipped using either a bill of lading or a hazardous waste manifest as appropriate.

B2. Latex Paint Processing

The following describes how latex paint was processed:

Reuse. Reuse programs generally screen for paint containers that are at least 50% full and in good condition and give them away free or sell them to the local community.

Recycled Paint. The largest portion of latex paint was used to manufacture recycled-content paint by HHW programs (also referred to as "reprocessing" in this report) and private paint recyclers. The following HHW programs reprocessed paint during the year: Kern, Lake, Mendocino, Salinas Valley, San Bernardino, Santa Cruz, San Rafael, San Francisco, and Sonoma. Recycled paint was given away to the local community by HHW programs and sold through domestic and international markets by private recyclers.

Decorative Ground Cover. A small portion of hardened latex paint was used by Acrylatex Coatings & Recycling in Azusa, CA, to create a product sold as a decorative ground cover. The product is made by grinding dried paint into small pieces, and then finished with colorant and a protective coating.

Concrete Products. A portion of latex paint was used by Visions Environmental in Oroville, CA, as a raw material to manufacture retaining wall blocks, landscape stones, and parking stops for passenger and commercial vehicles.

Energy Recovery. A portion of latex paint was processed by Amazon Environmental in Riverside, CA, by combining with sawdust to create a biomass fuel for a California-based cement kiln.

Alternative Daily Cover. The County of Santa Cruz used a small portion of latex paint as a component of alternative daily cover (ADC) for their landfill.

Disposal. Dry and unusable latex paint was sorted by Acrylatex, Clean Harbors, GDB International, and Visions and sent to various permitted landfills.

B3. Oil-Based Paint Processing

The following describes how oil-based paint was processed:

Reuse. Reuse programs generally screen for paint containers that are at least 50% full and in good condition and give them away free or sell them to the local community.

Energy Recovery. The majority of oil-based paint was processed via energy recovery at Rineco in Benton, AR.

Incineration. A portion of the oil-based paint was used as a fuel in the incineration process at Clean Harbors' facilities in Kimball, NE and Aragonite, UT.

B4. Container Recycling

Downstream paint processors and HHW programs sent empty metal and plastic paint containers for recycling when possible. Commodity market conditions have an impact on the extent to which container recycling is feasible.

The program recycled approximately 2,013 tons of plastic and metal paint cans.

C. Best Management Practices for Drop-Off Sites

PaintCare has contract agreements with all its drop-off sites, as well as door-to-door programs, and RLVP sites. For municipal sites that do not operate their own sites, PaintCare contracted either directly with the municipality or with their site operator.

PaintCare requires all sites to be staffed during operating hours, store PaintCare products in a secure location, and follow all procedures covered in site trainings and PaintCare site guidelines.

C1. Site Training and Guidelines

With the exception of HHW programs for which it is optional, all other sites received an on-site, in-person training. These sites receive a binder that includes program guidelines, a training presentation, record-keeping forms, and signage. The binder is required to be kept on-site and readily available. The training and guidelines cover.

- Identification of program and non-PaintCare products
- Acceptable containers
- Whom to accept paint from and how much
- Screening procedure for Very Small Quantity Generators (VSQGs) and the required log form
- Proper storage
- Spill response procedures and reporting requirements
- How to schedule a pickup
- Required paperwork and retention schedules

Variations of these guidelines are provided to retail stores, reuse stores, transfer stations, RLVP sites, and others. The current version of the site guidelines is in the appendix.

Retailers and other non-HHW drop-off sites are not allowed to accept PaintCare products without original labels or not in original containers. However, HHW programs often receive unlabeled containers and products not in their original containers in the course of normal operations and have the skills and tools to identify whether the material is an acceptable program product.

C2. Site Visits

Drop-off sites received site visits throughout the year by PaintCare regional coordinators to check on operations, answer questions, and provide additional program outreach materials. PaintCare has six regional coordinators in California.

C3. Paint Collection Bins

Drop-off sites are equipped with collection bins in which to store PaintCare products, with sites required to ship a minimum of two bins unless otherwise granted an exception by PaintCare. Sites are required to keep collection bins in a secure location that is not directly accessible to the public. Depending on the location of the bins, and preference of the site, PaintCare supplies two types of bins: fiber bins (made of corrugated cardboard) and reusable bins (plastic).

C4. Paint Acceptance Limits

PaintCare requires sites to accept at least 5 gallons of paint per customer per day. Some drop-off sites voluntarily accept more than 5 gallons; many accept up to 20 gallons per customer. A few stores accept up to 100 gallons, while some recyclers, transfer stations, and HHW sites accept unlimited volumes of latex paint.

C5. Scheduling Bin Pickups

All drop-off sites are advised to order a bin pickup before they reach their storage capacity. Sites in urban areas receive pickups within five business days of a request; sites in rural areas receive pickups within ten business days. Many sites in high volume areas have also been placed on an automatic pickup schedule.

D. Coordination with Existing HHW Programs and Retailers

D1. HHW Programs and Solid Waste Facilities

PaintCare continued its efforts to partner with all HHW programs. During the program year, PaintCare added a permanent HHW facility in Modoc County and maintained all existing partnerships. Kings County is the only county HHW program that has expressed interest but has yet to complete a contract. Imperial County has chosen not to collect paint at their HHW facility and refers its residents and businesses to local PaintCare retail locations.

The program also added non-HHW sites at solid waste facilities in Kern, Modoc and Tulare counties.

D2. Retailers

PaintCare maintains a comprehensive list of California paint retailers including independent and corporate stores. PaintCare recruits new sites through in-person site visits and coordination with corporate contacts at paint retailers. Following the loss of 90 drop-off sites in FY2019, PaintCare continued its efforts to recruit and retain retail drop-off sites. While 6 stores closed or moved in FY2020, PaintCare added 24 new sites, resulting in a net addition of 16 retail drop-off sites.

Section 4. Description of Goals and Activities

Statutory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(4) Description of goals and activities based on the stewardship plan. State goals from the approved stewardship plan, the baseline from which goals were measured, and report on achievement during the reporting period. Describe any adjustments to goals stated in the approved stewardship plan that may be made for the upcoming reporting period and accompanying rationale for those changes. The annual report must include quantitative information and discussion on the following categories pursuant to PRC §48705(a) and PRC §48703(d):

(A) The total volume of architectural paint sold, by type, in the state during the preceding reporting period.

(B) The total volume of postconsumer architectural paint recovered, by type, in the state during the preceding reporting period.

(C) Disposition of postconsumer paint collected, by type and by estimated volume, including name(s) and corporate address(es) for contracted processors for each

A. Program Goals

The California Paint Stewardship Law requires PaintCare to establish goals to reduce the generation of postconsumer paint, to promote the reuse of postconsumer paint, and for the proper end-of-life management of postconsumer paint, based on current household hazardous waste program information.

This section of the report addresses architectural paint recovery and recycling goals. Section 6 (Education and Outreach) addresses postconsumer paint reduction and reuse goals.

B. Program Convenience

As described in the Program Plan, to ensure adequate collection coverage, Geographic Information System (GIS) modeling was used determine the number and distribution of drop-off sites needed to provide a convenient program. A report detailing updates to the GIS modeling was included in the appendix of the 2016 annual report. The following convenience criteria were applied and resulted in a goal of 750 drop-off sites:

Distribution Criterion. To provide statewide coverage, establish sites within 15 miles of 90% of the state's population.

Density Criterion. To address densely populated areas, provide an additional site for every 50,000 residents of an Urbanized Area, as defined by the U.S. Census Bureau.

For transfer stations, HHW sites and events in California, PaintCare continually updates defined service areas for each location (typically confined to a city or county). Only those residents within a 15-mile radius (the "distribution" criterion) of each location, and that are also within a given location's known service area, are counted. Service area updates may produce slight changes in the distribution criterion results from year to year. Population is based on the US Census Bureau decennial (2010) Census Block level data.

B1. Convenience Level

California had a fair number of HHW programs prior to implementation of the PaintCare program. However, service levels varied across the state, and many HHW programs did not accept paint (and other hazardous waste) from businesses. With the addition of more than 600 additional year-round paint drop-off sites, PaintCare has made it significantly more convenient to recycle paint in the state, especially for businesses.

The combination of additional year-round drop-off sites (primarily paint retailers) and partnerships with the existing year-round HHW programs provided a site within 15 miles of 98.9% of the state's population – satisfying the distribution target of the program. When including supplemental sites and events in the distribution analysis, population coverage increases to 99.4%.

The density criterion applies to Urbanized Areas with a population of 50,000 or greater – there are 57 such areas in California. Four of the larger Urbanized Areas have been subdivided into smaller regions to better manage and understand local convenience levels, increasing the number of areas to 73. GIS modeling determined the target number of sites needed within each area.

In 54 of the 73 areas, the program is meeting the density criterion targets. PaintCare showed progress by meeting the target in three areas (Turlock, Lancaster-Palmdale and Hanford) while narrowing the shortfall in five areas (Fresno, West San Gabriel Valley, East Bay North and South, and Santa Clarita). When including supplemental sites in the analysis, 60 of 73 areas meet the targets. The details for each area, including the target number of sites and density coverage levels at the end of the year are included in the appendix.

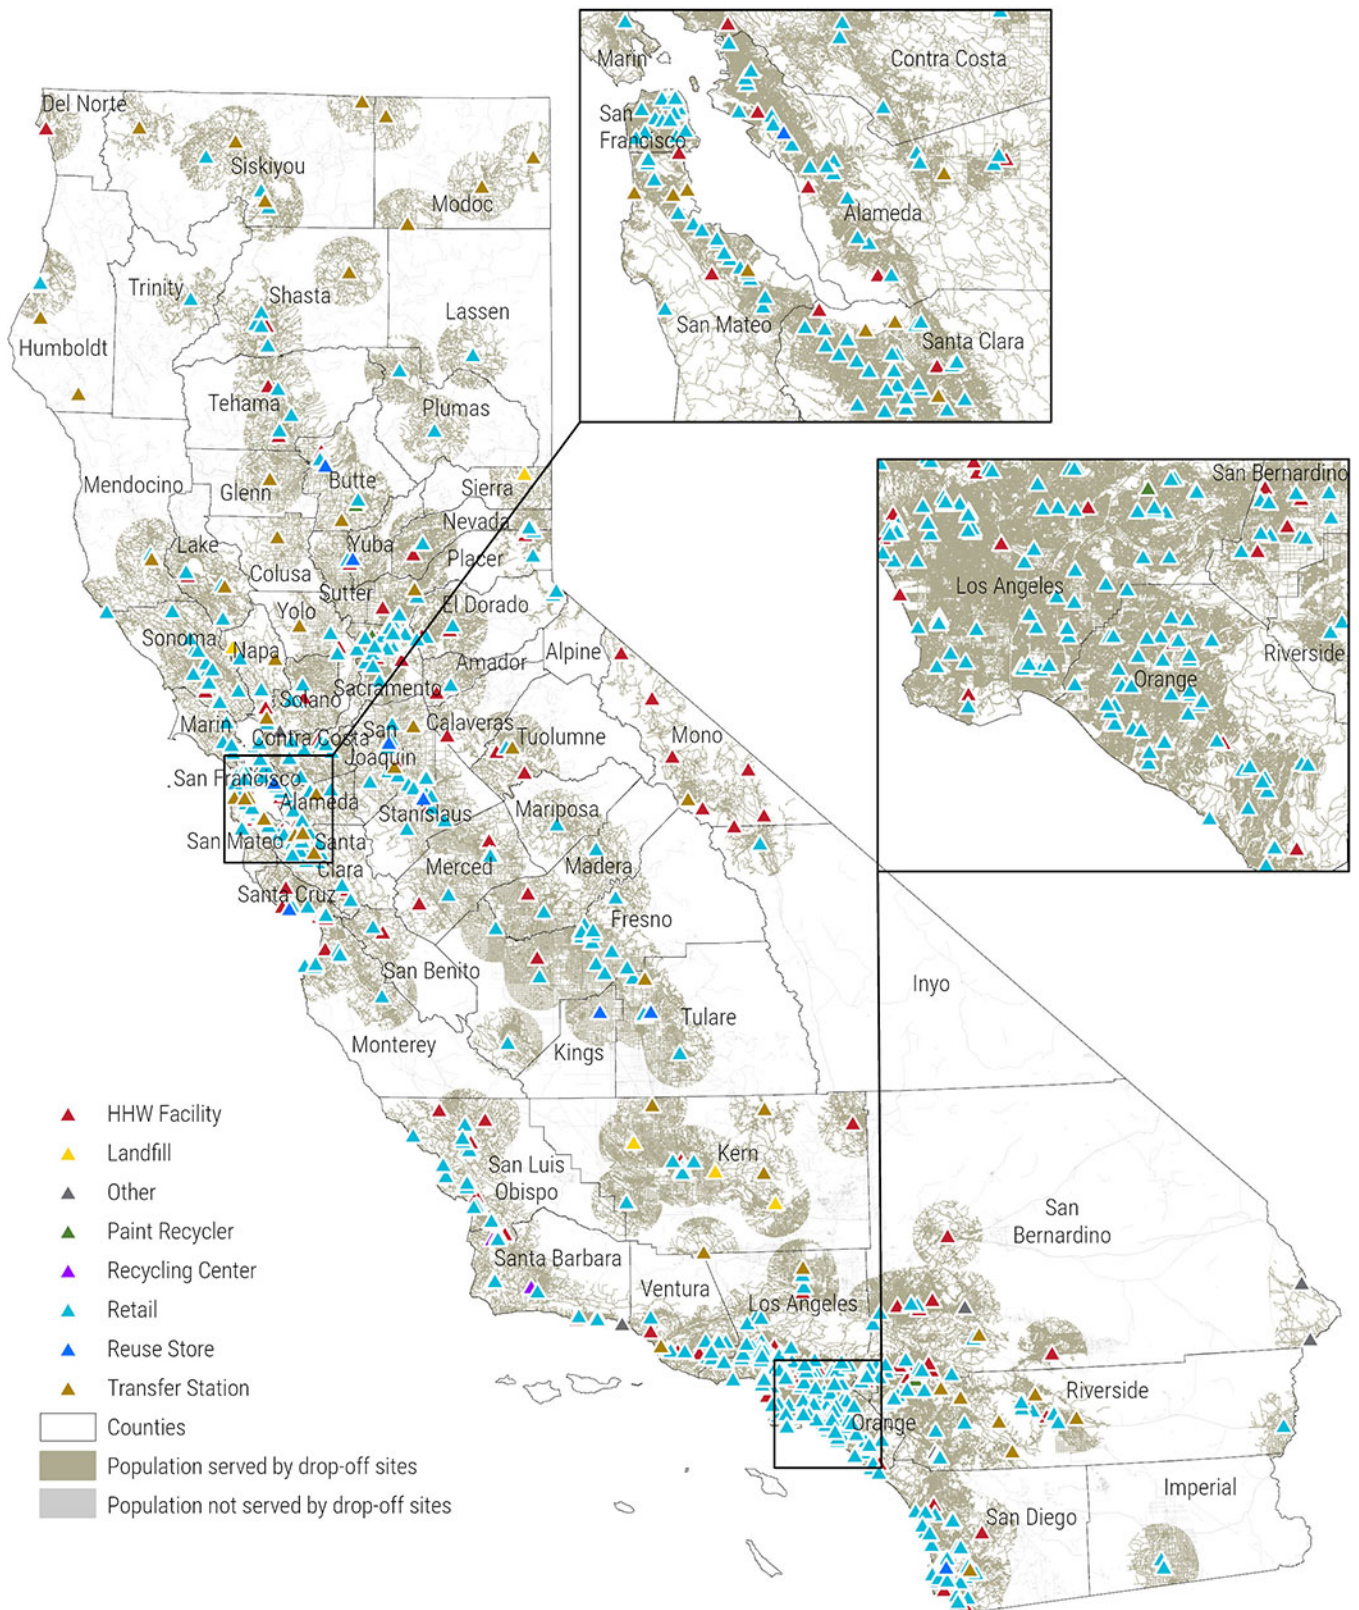

As a result of the COVID-19 pandemic, many HHW programs were compelled by state public health orders to curtail their activities in the spring of 2020. The result was 38 fewer HHW event sites and 73 fewer events.

B2. Site Maps

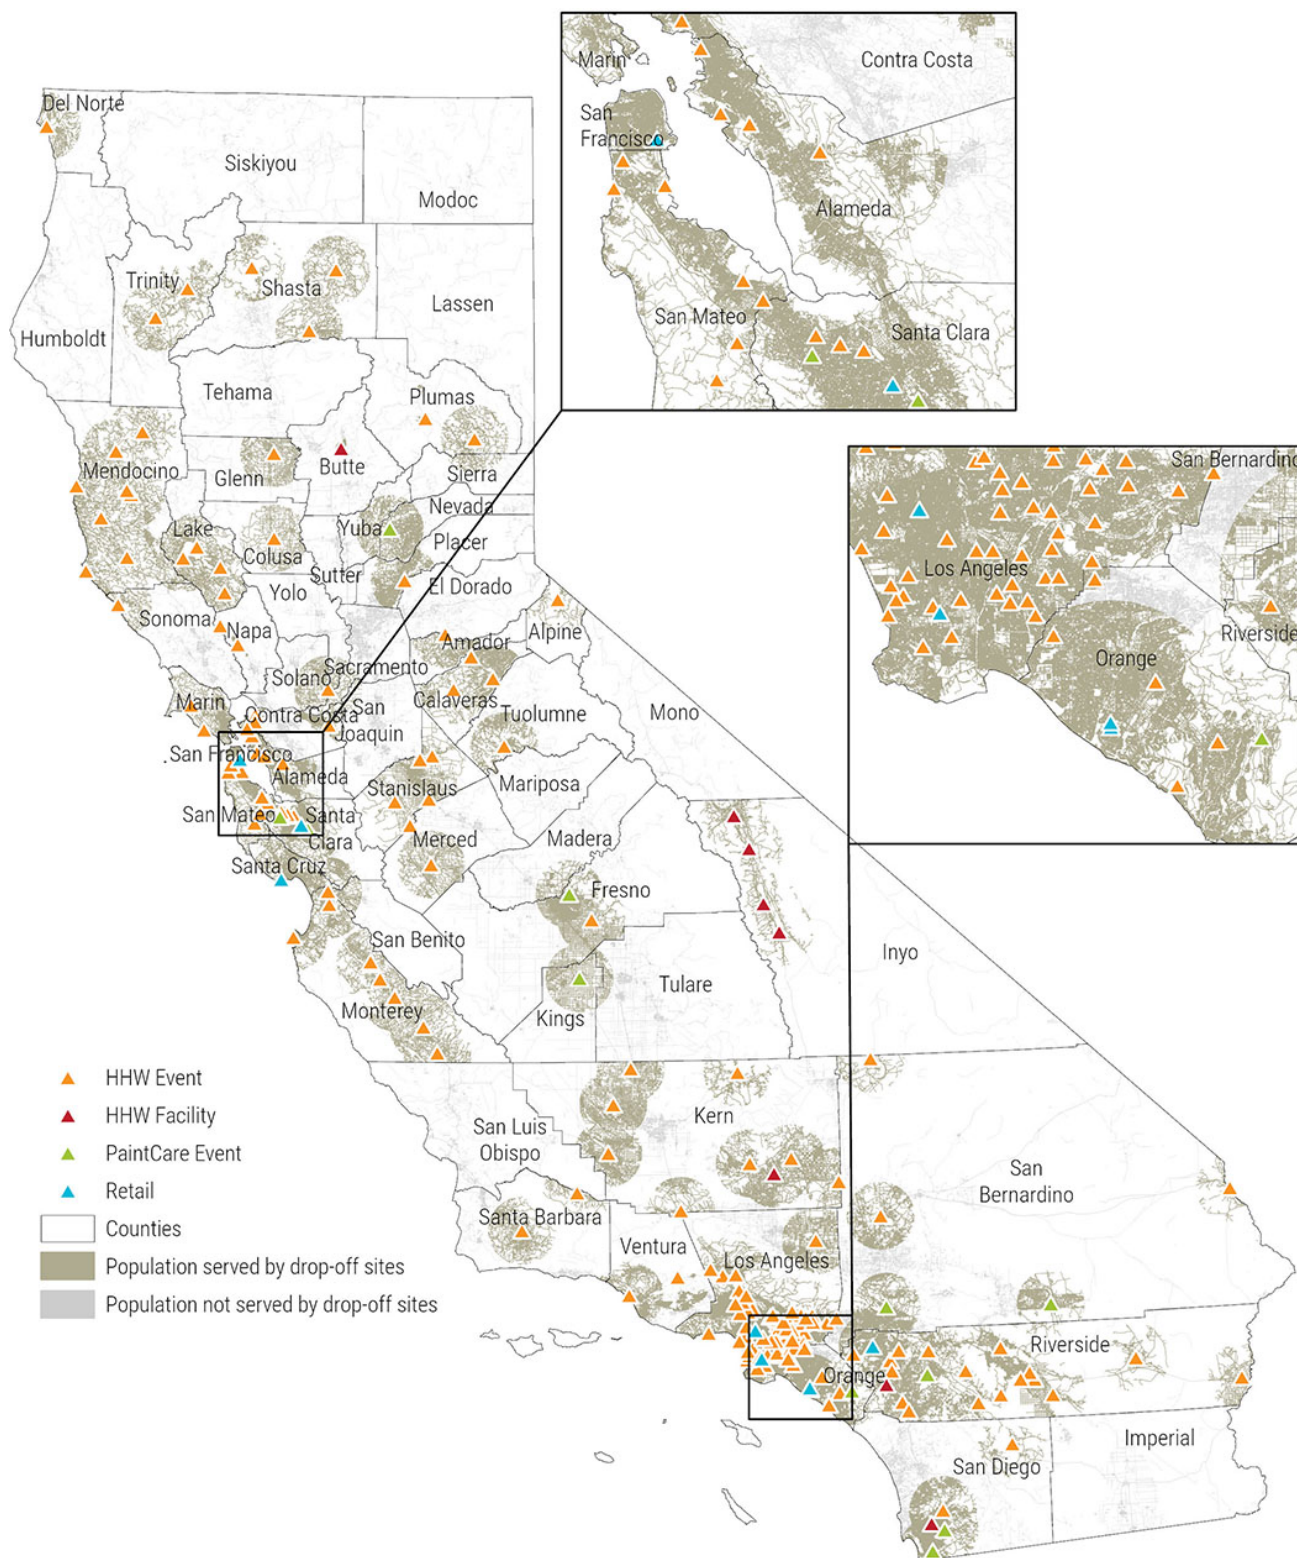

Section 3 of this report described the number and types of paint drop-off sites offered by the program. The maps on the following pages show their locations. Appendix Section A includes a list of sites used to generate these maps with site types and city names.

- Map 1 shows the locations of year-round drop-off sites and their service areas within a 15-mile radius.
- Map 2 shows the locations of supplemental sites and their service areas within a 15-mile radius.
- Map 3 shows both year-round and supplemental sites and their service areas within a 15-mile radius.
- Map 4 shows the locations of LVP and RLVP sites. Though the LVP/RLVP service provides tremendous convenience for its users, these sites are not included in any convenience analysis because they are not public drop-off sites and therefore do not add to the program's convenience level for the general public. Similarly, door-to-door programs are also not included in any convenience analysis, nor are they included in any map since we do not track their service area.

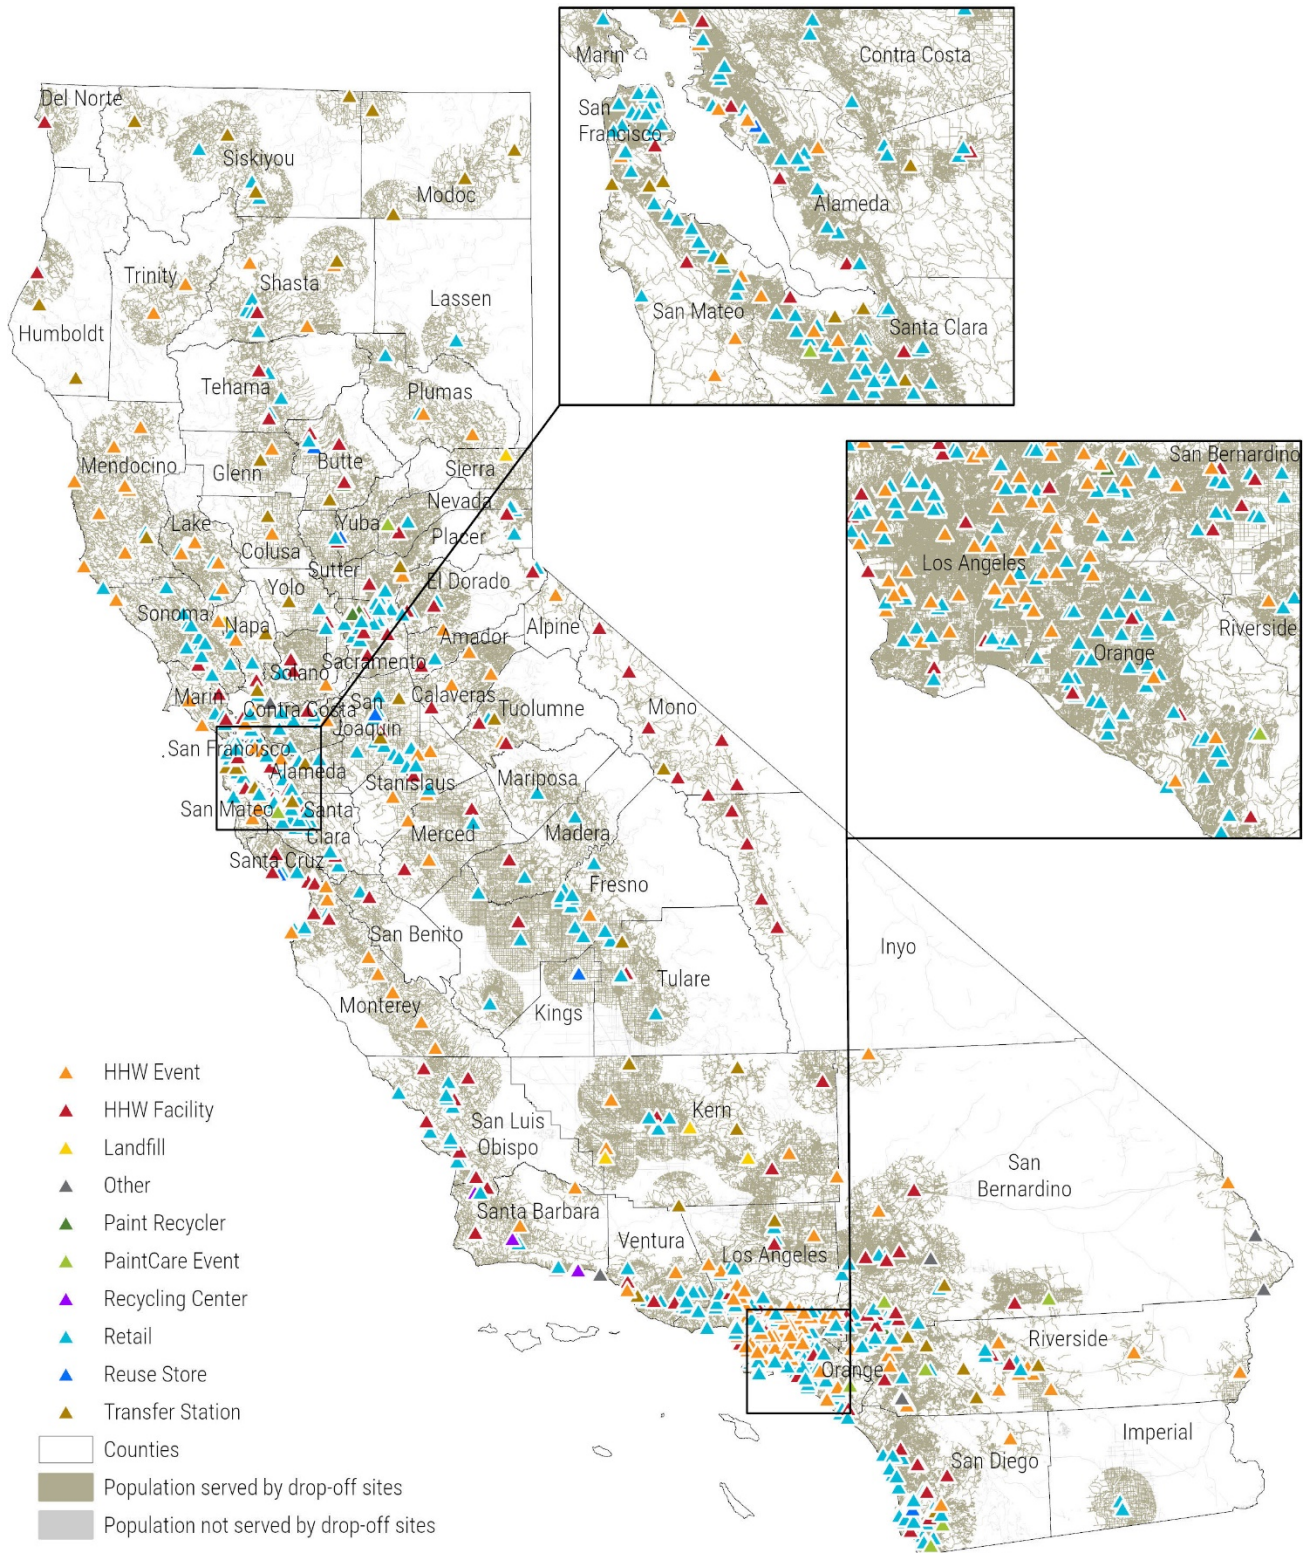

Map 1. Year-Round Drop-Off Sites

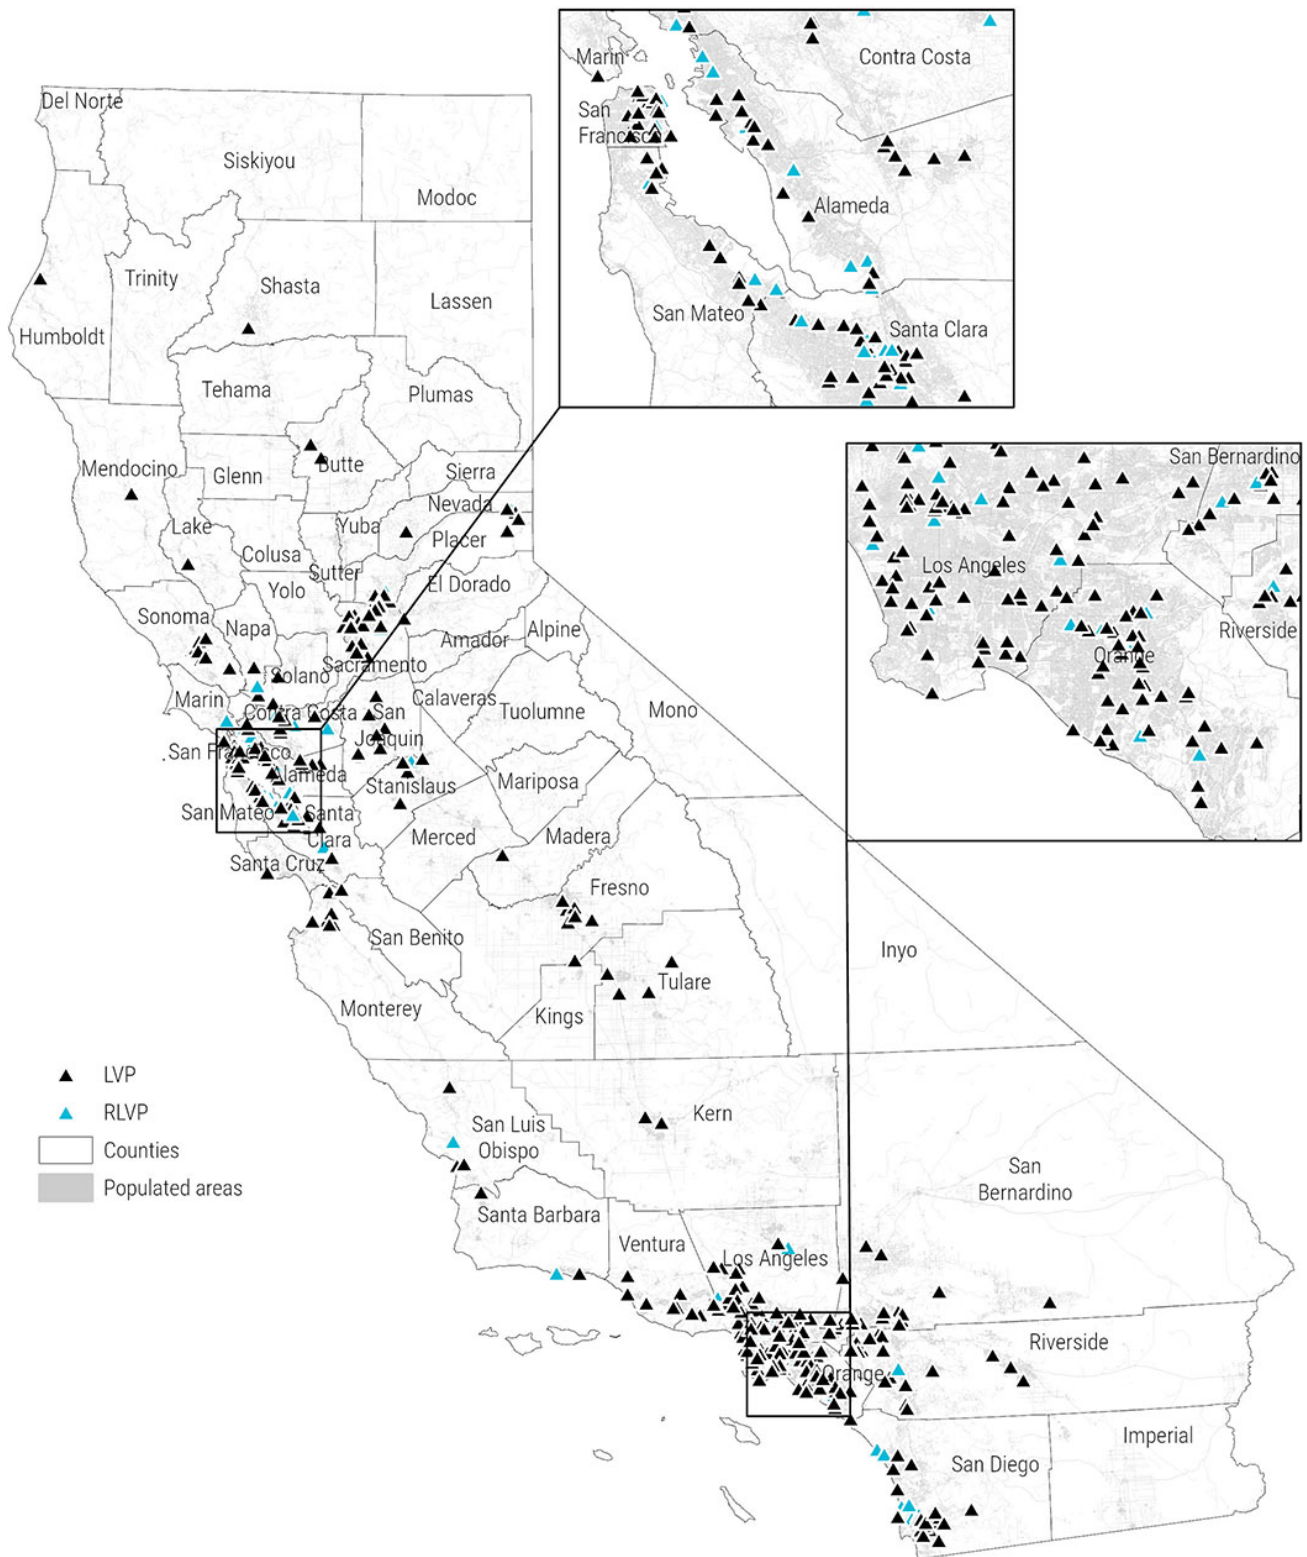

Map 2. Supplemental Drop-Off Sites

Map 3. Year-Round and Supplemental Drop-Off Sites

Map 4. Large Volume Pickup Sites

C. Paint Sales

The volume of architectural paint sold in the year was just under 72 million gallons, an increase from the previous year. The following table shows paint sales, broken out by container size categories, in the last five program years.

Paint Sales

Container Size	Year 5 FY2017 Gallons	Year 6 FY2018 Gallons	Year 7 FY2019 Gallons	Year 8 FY2020 Gallons
Half pint or smaller	32,586	27,412	29,839	30,780
Larger than half pint to less than 1 gallon	2,536,965	2,423,459	2,270,114	2,536,353
1 Gallon	24,508,395	23,232,726	22,690,523	23,824,173
Larger than 1 gallon up to 5 gallons	43,166,625	45,474,525	45,048,420	45,542,330
Total Gallons	69,244,571	71,158,122	70,038,896	71,933,636

D. Paint Processed and Recovery Rate

A total of 3,565,881 gallons of postconsumer architectural paint was processed during the year. A small portion of paint collected during the year has not yet been processed and is not included in this report's processing and disposition figures; a gap in the time between collection and processing occurs every year but generally balances out from year to year.

Due to the impact of COVID-19, which resulted in the temporary closure of many program drop-off sites, year eight results reflect a decline in paint collection volume in the months of March, April and May 2020. The following tables provide the breakdown of the volume of paint processed by type and the recovery rate for each of the past four years. Recovery rate is the volume of paint collected and processed compared to the volume of paint sold in the same year.

The first table also shows year-over-year changes in the volume of paint processed.

Gallons Processed

Description	Year 5 FY2017	Year 6 FY2018	Year 7 FY2019	Year 8 FY2020
Oil-Based Paint Processed, Gallons	622,417	650,988	666,519	702,749
Latex Paint Processed, Gallons	2,841,732	3,230,925	3,221,725	2,863,132
Total Paint Processed, Gallons	3,464,149	3,881,913	3,888,244	3,565,881
Change versus Prior Year, Gallons	337,097	417,764	6,331	(322,363)
Change versus Prior Year, Percent	11%	12%	<1%	(8%)

Recovery Rate

Description	Year 5 FY2017	Year 6 FY2018	Year 7 FY2019	Year 8 FY2020
Total Paint Processed, Gallons	3,464,149	3,881,913	3,888,244	3,565,881
Paint Sold, Gallons	69,244,571	71,158,122	70,038,896	71,933,636
Recovery Rate, Percent	5.0%	5.5%	5.6%	5.0%

This year, 53% of paint processed came from municipal programs (this includes HHW facilities and events, as well as municipal transfer stations and other municipal sites that collect paint). Paint from retail stores made up 35% of the volume, LVP/RLVPs claimed a 7% share, paint recyclers received 4% and paint-only drop-off events accounted for 1% as shown in the following table:

Latex Paint Management

Site Type	Percent
HHW Program	50
Retail	35
LVP	7
Paint Recycler	4
Transfer Station	3
Paint Only Event	1

E. Methodology for Determining Volumes

PaintCare was provided aggregate data by each service provider for total paint reused and processed.

For haulers, one of two methods were applied: (1) For data where the weight of paint processed was provided by recyclers to haulers, packaging weight assumptions were made by each hauler and removed from the total weights. Next, a conversion factor of 10 pounds per gallon was applied to weight data to obtain volume. (2) For data where actual volume of paint processed was provided by recyclers to haulers, no conversions were applied, and volume was reported without modification.

For HHW programs that reprocessed latex paint, data provided to PaintCare was the volume of paint reprocessed and given out to the public. If the paint was not given away in the year, even if reprocessed during the year, it was not counted in the year.

For reuse programs, data was calculated one of the following two ways: (1) containers larger than 1 quart and at least 50% full were counted and, then converted to gallons by assuming an average fullness of 75%; or, (2) containers of any size and fullness were measured and reported in gallons using an accepted methodology (with documentation provided to PaintCare upon request).

F. Paint Disposition and Processors

PaintCare contracts for processing and proper end-of-life management of all PaintCare products either directly or through the program's haulers. In addition, to support the waste hierarchy of reduce, reuse, recycle, PaintCare encourages and provides financial compensation for reuse and reprocessing.

As described previously, paint was managed in the following ways:

Latex Paint. Reuse, recycled paint, decorative ground cover, concrete products, energy recovery, alternative daily landfill cover (ADC), and disposal.

Oil-Based Paint. Reuse, energy recovery, incineration.

The following tables show latex and oil-based paint disposition for the most recent and previous two years:

Summary of Paint Management

Latex Paint

Disposition	Year 6 Gallons	Year 6 Percent	Year 7 Gallons	Year 7 Percent	Year 8 Gallons	Year 8 Percent
Reuse	125,669	4	125,604	4	152,126	5
Recycled Paint	2,274,397	70	2,290,516	71	1,950,037	68
Decorative Ground Cover	6,320	<1	7,547	<1	1,347	<1
Concrete Products	179,913	6	169,086	5	163,703	6
Energy Recovery	423,646	13	393,006	12	454,825	16
ADC	1,907	<1	1,125	<1	1,643	<1
Disposal	219,073	7	234,841	7	139,451	5
Total Latex	3,230,925	100	3,221,725	100	2,863,132	100

Oil-Based Paint

Disposition	Year 6 Gallons	Year 6 Percent	Year 7 Gallons	Year 7 Percent	Year 8 Gallons	Year 8 Percent
Reuse	16,181	2.5	16,775	3	11,008	2
Energy Recovery	311,884	48	368,844	55	423,365	60
Incineration	322,923	49.5	280,900	42	268,376	38
Total Oil-Based	650,988	100	666,519	100	702,749	100

The following lists provide the names and addresses of paint processors that managed PaintCare paint during the year.

Latex Paint Processors

- Acrylatex Coatings & Recycling, Inc., 1000 W Kirkwall Rd, Azusa, CA 91702
- Amazon Environmental, Inc., 5101 Raley Blvd, Sacramento, CA 95838
- Amazon Environmental, Inc., 779 Palmyrita Ave, Riverside, CA 92507
- Clean Harbors, 6920 Sycamore Canyon Blvd, Riverside, CA 92507
- GDB International, Inc., 6775 Speedway Blvd, Las Vegas, NV 89115
- Visions Environmental, LLC, 4801 Feather River Blvd #20, Oroville, CA 95965
- Visions Paint Recycling, Inc., 4105 S Market Ct Ste A, Sacramento, CA 95834

Oil-Based Paint Processors

- Clean Harbors Environmental Services (Kimball Facility), 2247 South Hwy 71, Kimball, NE 69145
- Clean Harbors Environmental Services (Aragonite Facility), 11600 North Aptus Road, Aragonite, UT 84029
- Rineco, 819 Vulcan Rd, Benton, AR 72015

G. Grant Program

In FY19, PaintCare awarded \$100,000 to a California paint recycler seeking to develop new methods of recycling latex paint that cannot be recycled back into paint. In FY20, the winning recycler, Visions Recycling, Inc., used its grant to obtain pre-cast molds to make landscape décor, such as step stones and flowerpots. The money was also used to perform research to price and position products in the marketplace. Visions was also able to use the grant funds to showcase their products at True Value's national trade show in New Orleans. Currently, these products can be purchased at various locations in California, such as Habitat for Humanity ReStores. With latex paint replacing heavier product components, such products can be up to 40% lighter, providing the benefits of lightweighting, in addition to recycling.

Section 5. Financing Mechanism

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(5) Financing Mechanism. The annual report shall include the total cost of implementing the architectural paint stewardship program and an evaluation of how the program's funding mechanism operated, including whether or not the funding was sufficient to recover, but not exceed, the administrative, operational, and capital costs of the manufacturer or stewardship organization's program. Include a statement that any surplus funds are put back into the program to reduce the costs of the program, including the assessment amount. Any proposed change in the amount of the architectural paint stewardship assessment must be submitted to the department for re-approval (see §18952. Submittals). If a manufacturer or stewardship organization conducts activities that are separate from the implementation and management of the California paint stewardship program, then the annual report shall include documentation on how the collection and expenditure of assessment funds shall be kept separate from other activities of the manufacturer or stewardship organization and the methodology for distribution of shared costs. Consistent with PRC §48705(a)(5), the annual report shall include the following:

- (A) Assessment amount per container
- (B) Total program cost
- (C) Capital costs
- (D) Cost(\$)/capita
- (E) Cost(\$)/gallon collected
- (F) Education/Outreach (% of total program cost)
- (G) End-of-life materials management (% of total program cost, with line items for reuse, transportation, recycling, fuel incineration, and proper disposal)
- (H) Program administration (% of total program cost, including annual administrative fee for service payments to the department)
- (I) Surplus funding, if any, and how it will be applied to reduce program costs

A. Financing Mechanism

PaintCare maintained its financing mechanism and fully covered the cost of continuing to implement the program through the year. The funding system places an assessment (PaintCare fee) on every container of architectural paint sold in California. The fees were set at a rate to cover but not exceed the cost of implementing the California program.

Reserves have been accumulated, due to delays that took place in the first two years to sign up HHW programs. In FY2020, due to increased fee revenue and other unexpected impacts from the COVID-19 pandemic, such as state public health orders that resulted in temporary site closures, reserves increased this year. Based on current projections, the program is likely to use a portion of its surplus in FY2021 and in subsequent years.

A1. PaintCare Fee

The program utilizes the following approved fee structure.

PaintCare Fees

Container Size	Fee (\$)
Half pint or smaller	0.00
Larger than half pint to smaller than 1 gallon	0.35
1 gallon	0.75
Larger than 1 gallon up to 5 gallons	1.60

A2. Total Program Cost

Total program cost for the year was \$30,648,342

The independent financial audit of the California PaintCare program (referred to in the financial audit by its formal name, the California Architectural Paint Recovery Program) is in the appendix. Detailed information on program costs are included in the audit.

A3. Capital Costs

There were no capital costs during the year.

A4. Cost per Capita

The cost per capita for the year was \$0.77.

Cost per capita was calculated using the California Department of Finance estimate of 2019 California population of 39,959,000.

A5. Cost per Gallon

The cost per gallon (of paint processed) during the year was \$8.59, compared to \$8.65 the previous year.

Note that PaintCare reports and uses processed gallons in its calculation, rather than collected volume, because not all paint collected during the year is delivered to a processor and/or processed during the same year.

A6. Education/Outreach

Education/outreach cost for the year was \$2,772,951 – 9% of total program costs.

A7. End-of-Life Materials Management

Transportation cost for the year was \$3,129,648 – 10% of total program costs.

Processing cost for all disposition methods was \$17,577,413 for the year – 57% of total program costs.

Actual cost broken down by specific disposition is not available due to the format of transport and processing vendors' contract pricing, which maximizes (and charges the program for) highest-best use, generally considered to be paint-to-paint recycling at this time.

The costs for each disposition method are estimated below:

Disposition Method	Estimated Cost (\$)	% of Total Program Cost (\$30,648,342)
Recycled Paint	9,923,635	32
Energy Recovery	4,469,062	15
Incineration	1,365,751	4
Concrete Products	833,076	3
Reuse	261,014	<1
Disposal	709,659	2
Alternative Daily Landfill Cover (ADC)	8,361	<0.1
Decorative Ground Cover	6,855	<0.1
Total	17,577,413	57

A8. Administrative Costs

Administrative costs (also called indirect costs or corporate expenses) are those that are shared by all jurisdictions that have passed a paint stewardship law, such as salaries for DC-based corporate staff who work on activities for all states. Other examples of corporate expenses include construction of data management systems, legal fees, and general communications.

The corporate allocation for each PaintCare jurisdiction is the proportion of its population relative to the population of all PaintCare jurisdictions combined. California's share of the corporate activity allocation was 64%. Administrative costs were \$2,843,138 or 9% of total program costs.

Service payments to CalRecycle are not presented as an administrative expense in the audited financial statements, but rather as a direct California operational expense. Payment to CalRecycle was \$412,640 or 1% of total program costs.

A9. Surplus Funding

The net assets of the California program at the end of the year were \$56,855,233. Net assets are also referred to as reserves. The following tables summarize program revenue and expenses for four years.

Financial Summary

Revenue

Revenue Category	Year 5 FY2017 (\$)	Year 6 FY2018 (\$)	Year 7 FY2019 (\$)	Year 8 FY2020 (\$)
Containers larger than half pint to smaller than 1 gallon	3,551,751	3,392,842	3,178,125	3,550,894
1-Gallon containers	17,631,296	17,424,545	17,017,852	17,868,130
Containers larger than 1 gallon up to 5 gallons	13,813,320	14,551,848	14,415,470	14,573,546
Total revenue	34,996,367	35,369,235	34,611,457	35,992,569

Expenses

Expense Category	Year 5 FY2017 (\$)	Year 6 FY2018 (\$)	Year 7 FY2019 (\$)	Year 8 FY2020 (\$)
Paint processing	18,387,814	19,592,350	19,229,945	17,577,413
Paint transportation	3,339,063	3,497,224	3,431,137	3,129,648
Collection supplies and support	3,025,711	3,088,154	3,134,671	2,851,573
Communications	3,753,494	3,449,964	3,394,905	2,772,951
Personnel, professional fees, and other	1,189,683	2,184,444	1,348,563	1,060,980
State administration fees	154,935	167,633	224,526	412,640
Allocation of corporate activity	2,554,998	2,679,071	2,855,647	2,843,138
Total expenses	32,405,698	34,658,840	33,619,394	30,648,343

Other

Description	Year 5 FY2017 (\$)	Year 6 FY2018 (\$)	Year 7 FY2019 (\$)	Year 8 FY2020 (\$)
Allocation of investment activity	1,728,879	1,380,251	2,567,226	2,098,712
Change in net assets (revenue less expenses)	4,319,548	2,090,646	3,559,289	7,442,938
Net assets, beginning of year	39,442,812	43,762,360	45,853,006	49,412,295
Net assets, end of year	43,762,360	45,853,006	49,412,295	56,855,233

Reserve Level

Description	Year 5 FY2017	Year 6 FY2018	Year 7 FY2019	Year 8 FY2020
Reserves (% of Annual Expenses)	135%	132%	147%	186%

A10. Five-Year Projection

PaintCare believes that collection volume in California will increase from FY2020 based on collection data from the first few months of FY2021, eventually exceeding that of FY2019. However, following a projected rebound in FY2021, PaintCare believes that collection volumes will stabilize and grow modestly in following years. The status of reserves and their use is reviewed below, with projections based on the following assumptions:

- Program revenue remains approximately the same as it was FY2019, the increase in FY2020 being viewed as a unique event driven by the onset of COVID-19. Data from recent years indicates a neutral revenue trend, with only slight annual fluctuations.
- PaintCare will continue to try to increase the number of drop-off sites each year to meet convenience targets, resulting in increased cost of collection, transportation and processing.
- The cost of collection, processing, and transportation is projected to increase by 8-10% in FY2021 due to an increase in collection volume and an increase in the cost of collection, transportation and processing; and by an estimated 2-4% per year in FY2022-FY2025 for the same reasons.
- Future gains or losses due to investment allocation cannot be precisely forecast. However, assuming neutral revenue from paint sales and increasing expenses, even if investment allocation is substantially higher than projected, reserves would still be projected to diminish, only at a slower rate.

Given the economic uncertainties associated with the ongoing pandemic, PaintCare will conduct an updated evaluation of program expenses and revenue in Spring 2021. See also Evaluation of PaintCare Program Expenses and Revenue in section G of the appendix.

Five Year Projection

Projection of Revenue

Revenue Category	Actual FY2020 (\$)	FY2021(\$)	FY2022 (\$)	FY2023 (\$)	FY2024 (\$)	FY2025 (\$)
Total revenue	35,992,569	34,611,546	33,919,315	33,240,929	33,573,338	33,909,072

Projection of Expenses

Expense Category	Actual FY2020 (\$)	FY2021 (\$)	FY2022 (\$)	FY2023 (\$)	FY2024 (\$)	FY2025 (\$)
Paint processing	17,577,413	19,229,945	19,614,544	20,399,126	20,603,117	20,809,148
Paint transportation	3,129,648	3,431,137	3,499,760	3,639,750	3,676,148	3,712,909
Collection supplies and support	2,851,573	3,134,672	3,197,365	3,325,260	3,358,513	3,392,098
Communications	2,772,951	4,500,000	4,500,000	4,500,000	4,500,000	4,500,000
Personnel, professional fees, and other	1,060,970	1,388,381	1,322,090	1,357,409	1,433,964	1,431,800
State administration fees	412,640	400,000	400,000	400,000	400,000	400,000
Allocation of corporate activity	2,843,138	3,000,000	3,060,000	3,121,200	3,183,624	3,247,296
Total expenses	30,648,343	35,084,135	35,593,759	36,742,745	37,155,366	37,493,251

Projection of Other Revenue

Description	Actual FY2020 (\$)	FY2021 (\$)	FY2022 (\$)	FY2023 (\$)	FY2024 (\$)	FY2025 (\$)
Allocation of investment activity	2,098,712	0	0	0	500,000	500,000
Change in net assets (revenue less expenses)	7,442,938	(472,589)	(1,674,444)	(3,501,816)	(3,042,028)	(3,084,180)
Net assets, beginning of year	49,412,295	56,855,233	56,382,644	54,708,200	51,206,384	48,164,356
Net assets, end of year	56,855,233	56,382,644	54,708,200	51,206,384	48,164,356	45,080,177

Projection of Reserve Level

Description	Actual FY2020	FY2021	FY2022	FY2023	FY2024	FY2025
Reserves (% of Annual Expenses)	186%	161%	154%	139%	130%	120%

B. Reserves Policy

Reserves represent the accumulated surplus (cash and investments) of PaintCare's programs. The reserves provide each program with a balance that is sufficient to pay its bills in times of either higher than expected paint collection (higher expenses), lower than expected paint sales (lower revenue), or a combination of the two.

PaintCare's Reserves Policy has a target reserve as a percentage of annual expenses. It also sets a range with minimum and maximum thresholds. If the reserves fall below the minimum threshold or rise beyond the maximum threshold, an evaluation of the program's expenses and revenue will be performed to determine if changes are needed in operations, outreach, and/or the fee structure to bring the reserve balance within range.

The PaintCare Board of Directors has established a target reserve of 100% of annual expenses. The minimum threshold is 75% (i.e., nine months) of expenses and the maximum is 125% (i.e., 15 months).

At the end of FY2020, the California program had built a reserve of \$56,855,233, 186% of FY2020 operating expenses.

C. Investment Activity

PaintCare invests a portion of its reserves (from most PaintCare programs) in a financial portfolio. PaintCare maintains investments for all programs in a single portfolio. Claim of ownership in the investment portfolio was shared by all participating programs and allocated among them based on relative net asset balances. Programs that have positive net asset balances have a claim on the assets invested in the portfolio; programs with negative net asset balances carry a liability representing an amount due to the portfolio.

D. Formation of Limited Liability Companies

In 2015, to better separate each state program in terms of liability and financial independence, PaintCare began implementing a plan to transition operations for each program from PaintCare Inc. to a wholly owned subsidiary company dedicated to managing that particular program. It has completed this process for Connecticut, Maine, New York, Rhode Island and Washington. The remaining programs continue as before. While this process has taken longer than expected, PaintCare still plans to transition the remaining jurisdictions to sole-member limited liability companies over the course of the next two to three years.

Section 6. Education and Outreach

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(6) Education and Outreach. Describe educational and outreach activities in context of those identified in the stewardship plan. Provide a description of educational materials that were provided to retailers, consumers, and contractors during the reporting period and provide electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), if applicable. These education and outreach materials may include, but are not limited to, any of the following per PRC §48703(e):

- (A) Signage that is prominently displayed and easily visible to the consumer.
- (B) Written materials and templates of materials for reproduction by retailers to be provided to contractors and consumers at the time of purchase or delivery or both.
- (C) Promotional materials or activities, or both, that explains the purpose of paint stewardship and the means by which it is being carried out.
- (D) Links to website(s) created and maintained by the stewardship organization.

Introduction

PaintCare's education and outreach efforts focus on building awareness of the program and encompass four primary messages: reduce, reuse, recycle, which PaintCare has modified to "Buy right, Use It Up, Recycle the Rest" and proper disposal. PaintCare is committed to providing robust and successful education and outreach using a variety of communication tools. The main objective of outreach was to drive the public to PaintCare's website to find a drop-off site using PaintCare's site locator search tool.

Most creative work is done by PaintCare's in-house communications team. PaintCare's marketing firm for the California program, Civilian Agency of San Diego, handles most of the advertising purchases. PaintCare uses Demographic Market Areas (DMA) to customize the mix of media purchasing to the populations of each DMA. PaintCare, through its marketing firm, developed plans for each of the 14 DMAs incorporating all 58 counties in California. The plans considered different audiences in each market and determined the appropriate mix of media to reach the most people.

Most public outreach activities were temporarily suspended or altered when the COVID-19 pandemic began in March 2020 causing limitations in PaintCare's paint drop-off sites and

services. Advertising campaigns that were secured prior to the start of the pandemic were delayed or, if they could not be delayed, were shifted to Use It Up messaging while discretionary travel was limited. PaintCare's website and social media were used to provide updates to the public about PaintCare's availability and to promote paint reuse messaging.

The relative amount of spending dedicated to outreach activities about the California program are summarized in the following table:

Relative Spending on Outreach Activities

Activity	Percent
Digital Ads	32
Event Promotion	6
Fulfillment	3
Print	8
Public Relations	1
Radio	4
Streaming Audio	9
Social Media	21
Video	12
Other	4

A. Signage Displayed to Customers

PaintCare developed a number of signs for drop-off sites to help inform the public about the program, screen PaintCare products, and address concerns about illegal dumping. Drop-off sites may order the following signs: PaintCare products (English/Spanish), Program Partner, Combination (program partner with simplified products list), No Dumping, and Please Wait for Assistance. The following are examples of signs available to drop-off sites:

B. Print Materials

B1. Point of Sale Print Materials

PaintCare continued to distribute print materials to retailers for them to make available to consumers in their stores to educate them about the PaintCare program. Staff fulfilled requests for materials by mail, distributing a total of 32,397 brochures, mini cards, fact sheets, and posters during the year. Program staff also delivered additional materials in person during site visits.

PaintCare provided counter mats to retailers for use in the paint department to reference when customers have questions. The counter mat is popular with retailers and more likely than the poster to be seen by customers while they wait for their paint to be mixed.

Larger versions of the materials shown below are included in the appendix of this report and are available on the PaintCare website.

In November 2019, PaintCare sent a mailing recognizing PaintCare's 10th anniversary since the first paint stewardship law passed in Oregon in 2009. The mailing was sent to all known paint retailers in California, including both PaintCare drop-off sites and retailers that do not act as drop-off sites. The cover letter thanked retailers for their support and participation and reminded them how to order additional educational materials to distribute to paint consumers. Copies of PaintCare point of sale materials were enclosed in the package along with an infographic poster listing some of PaintCare's national paint management statistics to date. In total, 2,084 packets were sent to paint retail locations throughout the state, including 108,368 brochures, fact sheets, and mini cards

B2. Fact Sheets

Several fact sheets are available on PaintCare's website for different target audiences, and printed versions are distributed upon request. Minor updates are made throughout the year. Current versions of the fact sheets on PaintCare's website include:

- How Does the Paint Stewardship Program Affect Paint Retailers?
- How to Become a Retail Drop-Off Site
- About PaintCare Fees
- Information for Solid Waste Facilities Including Transfer Stations, Recycling Centers, and Landfills
- Reuse Programs – Compensation and Reporting
- Information about the Large Volume Pickup Service
- Information for Painting Contractors
- Information for Paint Purchasers

B3. Translations

PaintCare translates program brochures and fact sheets into languages other than English upon requests from paint retailers and other stakeholders. Translations of the program brochure and fact sheets including Information for Painting Contractors, PaintCare Products, Information about the Large Volume Pickup Service, and About PaintCare Fee

are available in the following languages: Amharic, Arabic, Armenian, Chinese, Farsi, French, Hmong, Khmer, Korean, Lao, Polish, Portuguese, Russian, Spanish, Somali, Thai, Turkish, and Vietnamese. PaintCare maintains a Spanish language translation button on its website, making the site fully bilingual. Additionally, live interpretation in Spanish and other languages is available on PaintCare's telephone hotline by request.

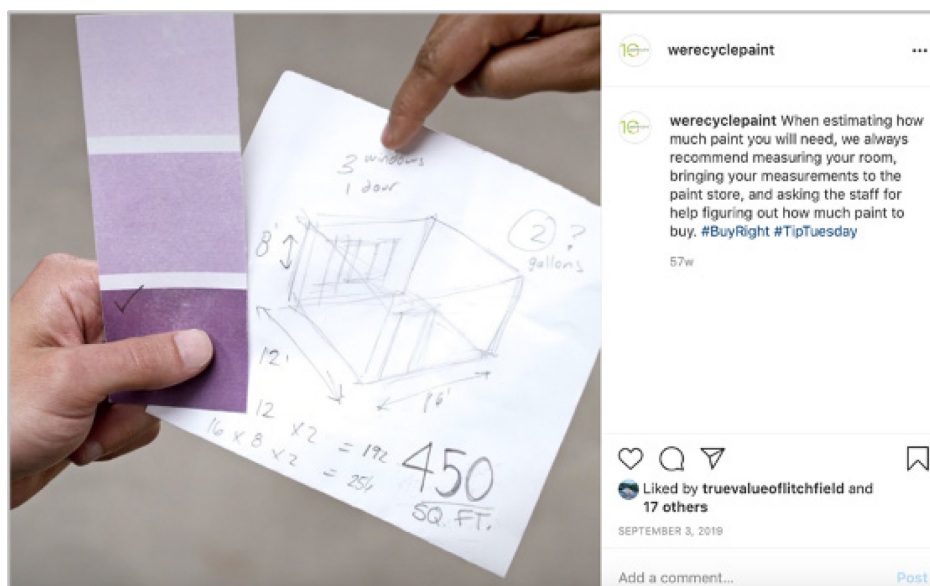

C. Promotional Materials/Activities Explaining Product Stewardship

C1. Press Releases and Earned Media

PaintCare issued a statewide press release in November 2019 about the previous year's annual report and local press announcements in areas where PaintCare events were being held. These resulted in the program being mentioned in at least 24 press stories, including coverage in the Ventura County Reporter, Westside Connect, Valley News, the Times of San Diego, the Hi-Desert Star, Palo Alto Online, and the VC Star.

C2. Social Media

Throughout the year PaintCare continued to grow its Facebook, Instagram, and Twitter presence and posted messaging to audiences on those platforms. Social media messages included promotion of PaintCare's three key messages: buy the right amount of paint, use up leftover paint, and recycle the rest with PaintCare. The following image shows a PaintCare Instagram post about planning the right amount of paint for a project to decrease the amount of waste:

Social media were also used extensively from March to June 2020 to inform the public about temporary impacts on PaintCare's services from the COVID-19 pandemic and to advise them to consider refraining from dropping off paint until later. The following image

shows a PaintCare Facebook post advising the public about COVID-19 impacts on PaintCare's services:

From July 2019 through March 2020, PaintCare ran a variety of interactive social media advertising campaigns on Facebook, Instagram, and Pinterest promoting Buy Right, Use It Up, and Recycle the Rest messages. The following images show samples of "Instagram Stories" advertisements that allowed viewers to swipe through each stage of the painting process:

PaintCare planned to run an Instagram “influencer” campaign related to Earth Day in April 2020. An influencer campaign means paying popular Instagram accounts to post approved, mission-aligned images and copy, exposing it to many more followers than would otherwise be available to an organization. The influencer campaign was delayed until July 2020 out of an abundance of caution during the COVID-19 pandemic. While the cost of the campaign was paid in FY2020, the activity was carried out in FY2021 and will be covered in next year’s annual report.

C3. Streaming Audio

From July to September 2019 and February to March 2020, PaintCare utilized streaming audio platforms Pandora, iHeartRadio, and Entercom to run 15- and 30-second audio commercials. The following script was used:

“Over the years, a lot has changed. And our paint colors reflect the styles of the times. You know another thing that’s changed? What to do with old house paint. Now you can recycle your leftover paint with PaintCare. It’s easy and convenient. And that’s a change that will never go out of style. Find a drop-off location near you at PaintCare.org.

The commercials during the July to September period were also run in Spanish translation.

C4. Public Radio

PaintCare sponsored KQED-FM’s California Report program monthly throughout the year. Since the California Report is picked up by numerous public radio stations throughout the state, PaintCare’s message ran thousands of times on 19 public radio organizations in over 70 cities. Additionally, an accompanying digital banner advertisement was placed on KQED’s website. The following script was used from July 2019 to March 2020:

“Support for the California Report comes from PaintCare. Now with 770 drop-off sites in California where households and businesses can recycle their leftover paint. More at [PaintCare dot org](https://PaintCare.org).”

During the April to June 2020 period, the script was changed to encourage people to use up leftover paint rather than encouraging drop-off during the COVID-19 pandemic. The following script was used during this period:

“Support for the California Report comes from PaintCare. Ideas to use up leftover house paint taking up space can be found at [PaintCare dot org](https://PaintCare.org).”

C5. Print Advertising

In March through June 2020, PaintCare ran print advertisements in Red Plum direct mail circulars to encourage the public to find a local drop-off site. In areas with a large percentage of Spanish-speaking populations, the ads were bilingual. In April, the message of the ads was switched to promote using up leftover paint rather than finding a drop-off site

during the COVID-19 pandemic. The following images show Red Plum direct mail ads with a bilingual message about finding a drop-off site (left) and using up leftover paint (right):

PaintCare also used newspaper and direct mail advertising to promote PaintCare drop-off events held during the year.

C6. Video

Monthly throughout the year PaintCare ran several online video commercial campaigns. In October and November 2019, PaintCare ran a video promoting the Buy Right message, featuring a household learning to take measurements in order to buy the right amount of paint for their need.

In July 2019 through March 2020, PaintCare ran a video promoting the Recycle the Rest message, featuring a single room being repainted as trends change over the course of decades and leftover paint stacks up in the closet. This video also ran in Spanish translation during four months of the campaign. The following images are still frames from the Recycle the Rest video:

In January through March 2020, PaintCare ran another video with a Recycle the Rest message, featuring a woman repainting her walls after her child has drawn on them. This video also ran in Spanish translation during March 2020.

C7. Digital Advertising

Throughout the year, PaintCare ran monthly digital ad campaigns on numerous websites promoting its key messages. Ads in a variety of dimensions were used, and some ads were translated into Spanish language. Two examples of digital banner ads are shown below:

During the year, PaintCare ran a digital ad campaign promoting its individual paint retail drop-off sites. The campaign consisted of an interactive digital banner ad displayed on websites and apps on smartphones. When viewers touch the banner, it opens to full screen displaying PaintCare's image and message. Using the phone's location settings, it also displays the PaintCare drop-off site nearest to the viewers at that time. This ad allows viewers to click through to the PaintCare website to learn more or call the store directly by clicking on the store phone number.

PaintCare also ran digital advertising on Nextdoor, a digital platform (website and app) for local residents to share information and resources with their immediate neighbors. The following image shows the PaintCare ad promoting finding a nearby drop-off site for leftover paint:

Monthly throughout the year, PaintCare ran “native display” digital ads in English and Spanish, which are ads that appear to be embedded within a web article. Native display ads were used to promote paint reuse messaging. The following image shows the PaintCare native display ad promoting using up leftover paint:

C8. Outdoor Advertising

In July 2019, PaintCare ran a digital billboard ad in Riverside, California. The opportunity was provided by an advertising partner as “added value” connected to PaintCare’s other paid campaigns, and there was no additional cost to run the billboard. The following image shows the billboard which promoted the ease and convenience of finding a drop-off site for leftover paint:

C9. Joint Outreach Projects with Local Government

PaintCare welcomes the opportunity to work with local HHW programs on outreach projects. PaintCare provides creative support and funding in the form of reimbursement for projects that are preapproved. This year PaintCare supported a portion of the cost for an outreach flyer distributed by Shasta County Department of Resource Management; a portion of the cost of a digital ad campaign coproduced by Alameda County's StopWaste program and Habitat for Humanity Restores; and a portion of an advertising supplement developed in partnership with Del Norte, Trinity, Siskiyou, Glenn, and Mono counties. The advertising supplement was inserted in newspapers throughout those counties and provided information and guidance about recycling programs. The following image shows the page dedicated to paint recycling:

KEEPING LEFTOVER PAINT OUT OF RURAL CALIFORNIA

A California paint recycling program provides drop-off locations where local residents can recycle unwanted paint and other hazardous materials.

Tom Keller, a Solid Waste Maintenance Worker who helps to oversee the paint recycling program at Benton Crossing Landfill, says residents appreciate having a place to recycle hazardous items such as paint.

"We get so many people saying, 'thank you for taking it, it's great to see.' Everything about it—they just love it," Keller says.

As a California native, Keller has worked at Benton Crossing Landfill for 13 years. Keller is also involved in the Benton Paiute Reservation as a Paiute tribe member. He welcomes anyone with leftover paint to recycle it at the landfill. On some days, a local resident might drop off just one bucket after repainting a dining room. On others, a group of workers might show in multiple vans after a large-scale construction job.

Before PaintCare, a program that creates drop-off locations for paint recycling, helped implement the program at the landfill, Keller says workers would consolidate paint and store it in 55-gallon drums, where they would then be shipped out to another facility. The process has become much more streamlined since PaintCare became involved.

"They simplified the whole thing and we just now separate our latex and oil and put them in boxes and then they get shipped out," Keller explains.

Keller says that having a safe place to process oil paint and other materials is important because it keeps it out of the surrounding environment.

"To have the facility here, you're protecting everything about the area," he says. "I mean, you don't want to contaminate the grounds. You don't want to kill off trees or anything like that if you dump it out in the forest."

STAKEHOLDER

Disposing of leftover paint can be difficult in rural areas where access to proper facilities is limited. That's where PaintCare's paint recycling program comes in. Daria Kent, Northern California Regional Coordinator at PaintCare, says having a paint recycling program ensures its recycled properly.

"In some cases, paint has been found stockpiled in storage units, homes and garages, as well as in ditches or behind abandoned lots," she says. "Rural areas are sometimes served only by public household hazardous waste facilities or transfer stations, sometimes located remotely and with limited days and hours of operation."

PaintCare teams up with as many waste management facilities, paint stores, hardware retailers and hardware yards as they can to make sure everyone has access to recycling.

"The good news is that PaintCare is always striving to provide services to these areas," Kent says. "For example, for businesses and residents with 200 gallons or more of paint,

measured by container size not volume, PaintCare can provide direct pickup at no cost."

In 2019, PaintCare had 560 large-volume pickups in California, and 71% of the latex paint they collected was recycled back into paint again. On top of that, they also provided 766 year-round drop-off sites across the state.

This program is funded by a fee tacked on to new paint sales, meaning residents don't have to pay to recycle their paint later. According to PaintCare's latest annual report, 86.5% of residents live within a drop-off site.

Ultimately, PaintCare established a convenience standard for drop-off locations to ensure paint is as easy to drop off as it is to purchase.

Daria Kent, Northern California Regional Coordinator of PaintCare

"PaintCare established a convenience standard for drop-off locations to ensure paint is as easy to drop off as it is to purchase. With that many locations, it's never been easier to recycle unwanted paint."

You can find a location near you by checking our paintcare.org.

Paint Recycling Made Easy

PaintCare is a nonprofit created by paint manufacturers to manage leftover paint, something especially important in rural California.

STAKEHOLDER

C10. Annual Webinar

PaintCare typically hosts an annual public webinar, providing an opportunity for interested parties to better understand the program and to highlight key results from the previous year. This webinar typically takes place soon after the January public meeting held by CalRecycle, so as to better incorporate stakeholder feedback and recommendations from CalRecycle's annual compliance determination. The meeting was not held this year as the traditional timing coincided with the onset of COVID-19. PaintCare intends to resume holding the annual webinar in 2021.

D. Website

Nearly all PaintCare advertising and outreach efforts direct the public to PaintCare's website for more information and to find a local paint drop-off site. PaintCare's website is updated throughout the year. The website is easy to navigate and features topics on buying the right amount of paint, storage tips, reuse tips, and recycling. It has special pages for manufacturers and a general section for retailers, explains what products are covered by the program, and has a California-specific page with tabs for different audiences (Everyone, Contractors, Retailers, Waste Facilities, and Official Docs).

The most frequently visited part of the website is the site locator tool which can be used to find a PaintCare drop-off site in California and states with PaintCare programs.

Monthly Website Traffic from California

Month	Visitors

E. Awards

In September 2019, PaintCare received the Outstanding Industry Partner Award from the North American Hazardous Materials Management Association (NAHMMA). The award recognized PaintCare's ten years of successful paint stewardship programs across multiple states that support local government efforts to manage postconsumer paint. The award was announced at the NAHMMA national conference in Denver, CO on September 17, 2019.

F. Awareness Survey

In March 2020 PaintCare ran its annual public awareness survey to measure the ongoing effectiveness of its outreach activities with the assistance of market research firm KB Insights. KB Insights analyzed the data to help PaintCare better understand trends and guide future outreach targeting.

Following are some highlights from the survey results:

- 689 surveys were completed by residents of California, providing 90% confidence in the accuracy of the measured results for the population within +/-3%.
- 42% of California respondents knew that paint can be recycled. Of those 70% knew where to take it and 62% knew about the fee added to paint purchases to support future recycling.
- About half of California respondents (51%) purchased paint in the last year. Of those, over half reported seeking help from paint retail staff and two-thirds reported taking measurements themselves in order to purchase the right amount of paint and reduce the amount left over.
- 54% of California respondents reported that they will choose a sustainable option if they have leftover paint in the future. The options included dropping it off at a paint retail store (14%) or HHW facility (28%) or giving it away to someone else who needs it (12%).

The full report for this year's awareness survey is included in the appendix of this report.

Section 7. Audits

Regulatory Citation

Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program

Section 18954. Annual Report Compliance Criteria.

(a) The annual report must contain the following:

(7) Audits. The annual report shall include an independent financial audit of the California Architectural Paint Recovery Program funded from the paint stewardship assessment. The audit shall be conducted in accordance with auditing standards generally accepted in the United States of America, and standards set forth in Government Auditing Standards issued by the Comptroller General of the United States. The financial audit submitted to the department shall be prepared by an Independent Certified Public Accountant (CPA). The CPA shall not perform non-audit services for the manufacturer or stewardship organization that would impair independence as defined in the Government Auditing Standards issued by the Comptroller General of the United States (e.g., accounting services, development of internal controls, management decisions). The independent financial audit shall include:

- (A) California Architectural Paint Recovery Program financial statements, as required by GAAP.
- (B) An opinion on the manufacturer or stewardship organization's compliance with the financial aspects of PRC §48700 and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations.
- (C) Findings and recommendations as they relate to the financial aspects of the Architectural Paint Recovery Program.
- (D) Management Letter, if issued, by the manufacturer or stewardship organization's CPA.

Audit

An independent financial audit was conducted of the California PaintCare program by Rogers & Company PLLC. This independent CPA firm conducted the audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that the firm plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. The audit process includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. The audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. In Rogers & Company's opinion, the financial statements of the California PaintCare program present fairly, in all material respects, the financial position as of June 30, 2020, and the changes in its net assets and its cash flows

for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The independent financial audit report of the California PaintCare program is in the appendix and addresses all requirements of Title 14, Section 18954(a)(7) of the California Code of Regulations as listed above.

Independent Auditor's Report

To the Board of Directors of PaintCare Inc.

We have audited the accompanying financial statements of PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program ("the Program"), which comprise the statement of financial position as of June 30, 2020; the related statements of activities, functional expenses, and cash flows for the year then ended; and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall

presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Program as of June 30, 2020, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also used our report dated September 22, 2020, on our consideration of PaintCare's internal control over the Program's financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering PaintCare's internal control over the Program's financial reporting and compliance.

Notes to Financial Statements

PaintCare Inc. California Architectural Paint Recovery Program - June 30, 2020

1. Nature of Operations

The California Architectural Paint Recovery Program (“the Program”) is authorized by Public Resources Code Section 48700 to implement measures to require paint manufacturers to develop and implement a program to collect, transport, and process postconsumer paint to reduce the costs and environmental impacts of the disposal of postconsumer paint in California. The Program is administered by PaintCare Inc. (“PaintCare”).

PaintCare, a not-for-profit 501(c)(3) organization, was created in October 2009 by the American Coatings Association (ACA), who, working with state and local government stakeholders, passed the first ever paint product stewardship law in the United States in the state of Oregon in 2009. The paint stewardship legislation guides an industry-led, end-of-life management program for post-consumer paint, which PaintCare operates. The PaintCare Board is made up of architectural paint manufacturers and participation in PaintCare is not limited to ACA members, but open to all architectural paint manufacturers. There are no dues or registration fees associated with PaintCare.

2. Summary of Significant Accounting Policies

Basis of Accounting and Presentation

The Program’s financial statements are prepared on the accrual basis of accounting. Net assets without donor restrictions represent funds that are not subject to donor-imposed stipulations and are available for support of the Program’s operations. There were no assets with donor restrictions as of June 30, 2020.

Accounts Receivable

Accounts receivable are recorded at net realizable value and represent amounts due for post-consumer paint recovery fees. The Program provides an allowance for bad debts using the allowance method, which is based on management’s judgment considering historical information. Accounts are individually analyzed for collectability, and will be reserved based on individual evaluation and specific circumstances. When all collection efforts have been exhausted, the accounts are written-off against the related allowance. At June 30, 2020, an allowance of \$37,368 was recognized.

Investment Allocation

PaintCare invests a portion of its accumulated surplus in a portfolio with Bank of America/Merrill Lynch. The sole objective of the portfolio is to earn a return equal to the rate of inflation and thus preserve the purchasing power of its capital. Interest, dividends, changes in market value, and other investment activities are allocated to each state program based on the relative net asset balances of each state program. Oversight of the investments is provided by the PaintCare Budget and Finance Committee and by the PaintCare Board of Directors.

Revenue Recognition

The Program recognizes revenue from post-consumer paint recovery fees at the time the architectural paint product is sold by a manufacturer participant of the paint product stewardship program. Manufacturer participants in the Program pay the PaintCare recovery fee to PaintCare based on the amount of program products they sell on a monthly basis.

Program participants report their monthly unit sales of paint through a secure, HTTPS online system using their unique user ID and password. The participant must pay a paint recovery fee per unit sold, based on container size, according to the established fee schedule. As the PaintCare recovery fee is added to the wholesale price of paint and passed through uniformly to the retail purchase price of paint—so that the manufacturer, distributor, and/or retailer is made whole—in some cases, distributors or retailers have elected to undertake the obligation of the manufacturer for these fees. Thus, PaintCare has allowed remitter agreements in the Program, whereby a distributor or retailer reports and remits directly to PaintCare on behalf of a participant manufacturer's brand or brands. Reports and payment are due by the end of the month following the reporting period.

Functional Allocation of Expenses

The costs of providing the various program and supporting activities have been summarized on a functional basis in the accompanying financial statements. The statement of functional expenses presents the natural classification detail of expenses by function. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

Change in Accounting Principles

Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers (Topic 606), as amended, supersedes or replaces nearly all revenue recognition guidance under accounting principles generally accepted in the United States of America. These standards establish a new contract and control-based revenue recognition model, change the basis for deciding when revenue is recognized over time or at a point in time, and expand disclosures about revenue. The Program has implemented Topic 606 and has adjusted, if applicable, the presentation in these financial statements accordingly. The implementation had no impact on the previously reported net assets.

11 In June 2018, the FASB issued ASU 2018-08, Clarifying the Scope and the Accounting Guidance for Contributions Received and Contributions Made. This standard assists entities in evaluating whether transactions should be accounted for as contributions or exchange transactions and determining whether a contribution is conditional. The Program has implemented the provisions of ASU 2018-08 applicable to both contributions received and to contributions made in these financial statements under a modified prospective basis. The implementation had no impact on the previously reported net assets.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Subsequent Events

In preparing these financial statements, the Program has evaluated events and transactions for potential recognition or disclosure through September 22, 2020, the date the financial statements were available to be issued.

3. Liquidity and Availability

At June 30, 2020, financial assets available for general expenditures, that is, without donor or other restrictions limiting their use, within one year of the statement of financial position date, consist of net accounts receivable totaling \$3,719,565. There are additional liquid assets available to the Program that are the liquid assets of PaintCare as a whole. PaintCare strives to maintain liquid financial assets sufficient to cover 90 days of general expenditures for the Program. Financial assets in excess of daily cash requirements are handled and invested in money market funds and highly liquid securities by PaintCare.

4. Related Party

ACA, a related party, is a separate, 501(c)(6) nonprofit organization working to advance the needs of the paint and coatings industry and the professionals who work in it. ACA serves its members as an advocate on legislative, regulatory, and judicial issues at the federal, state, and local levels. ACA also provides members with such services as research and technical information, statistical management information, legal guidance, and community service project support and acts as a forum for the exchange of information and ideas among the industry and its business partners. ACA incorporated PaintCare for the sole purpose of implementing programs for post-consumer architectural paint, including the recovery program pursuant to Public Resources Code Section 48700. ACA maintains a controlling interest in PaintCare through the ability to appoint its Board of Directors.

In February 2011, ACA and PaintCare entered into an affiliation agreement whereby ACA charges PaintCare an administrative fee, annually, to cover the following expense

categories: allocation of time incurred by PaintCare officers, allocation of other direct labor, and allocation of occupancy and infrastructure costs. The term of the agreement is for one year and automatically renews for one-year terms unless canceled by either party.

For the year ended June 30, 2020, total administrative fees charged by ACA to PaintCare were \$2,151,495, and of this amount, \$1,367,762 related to the Program. At June 30, 2020, PaintCare owed the Program \$56,797,062 related to paint recovery fees that are being held on behalf of the Program and are included in the accompanying statement of financial position.

5. Methods Used for Allocation of Expenses from Management and General Activities

The financial statements report certain categories of expenses using the direct allocation method. Each expense is assigned to a functional category based on direct usage.

6. Income Taxes

The Program itself is not subject to income taxes. The steward of the Program, PaintCare, is recognized as a tax-exempt organization under Internal Revenue Code Section 501(c)(3), and is exempt from income taxes except for taxes on unrelated business activities.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Directors of PaintCare Inc.

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States, the financial statements of PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program ("the Program"), which comprise the statement of financial position as of June 30, 2020; the related statements of activities, functional expenses, and cash flows for the year then ended; and the related notes to the financial statements; and have issued our report thereon dated September 22, 2020.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered PaintCare's internal control over financial reporting ("internal control") over the Program to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of PaintCare's internal control over the Program. Accordingly, we do not express an opinion on the effectiveness of PaintCare's internal control over the Program.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control

that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Program's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

**EXAMINATION REPORT OVER COMPLIANCE WITH THE FINANCIAL ASPECTS OF
THE PUBLIC RESOURCES CODE SECTION 48700, AND TITLE 14, DIVISION 7,
CHAPTER 11, ARTICLE 2 OF THE CALIFORNIA CODE OF REGULATIONS**

To the Board of Directors of PaintCare Inc.

We have examined PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program's ("the Program") compliance with the financial aspects of the Public Resources Code Section 48700, and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations during the year ended June 30, 2020. Management is responsible for PaintCare's compliance with those requirements. Our responsibility is to express an opinion on PaintCare's compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence about PaintCare's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on PaintCare's compliance with specified requirements.

In our opinion, PaintCare complied, in all material respects, with the financial aspects of the Public Resources Code Section 48700, and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations during the year ended June 30, 2020.

This report is intended solely for the information and use of the Board of Directors, management, and the California Department of Resources Recycling and Recovery, and is not intended to be and should not be used by anyone other than these specified parties.

Schedule of Findings

PaintCare Inc. - California Architectural Paint Recovery Program
for the Year Ended June 30, 2020

Section I – Summary of Independent Auditors’ Results

Financial Statements

Description	Result
Type of auditor’s report issued:	Unmodified
Internal control over financial reporting: Material weakness(es) identified?	No
Internal control over financial reporting: Significant deficiency(ies) identified that are not considered to be material weaknesses?	None Reported
Noncompliance material to financial statements	No

Section II – Financial Statement Findings

There were no financial statement findings reported during the 2020 audit.

Appendix C. Outreach Materials

Brochure

Recycle with PaintCare

California

California Paint Stewardship Program

Each year about 780 million gallons of architectural paint is sold in the United States. Did you know that about 10 percent goes unused and is available for recycling?

California's Paint Stewardship Law requires the paint manufacturing industry to develop a financially sustainable and environmentally responsible program to manage postconsumer architectural paint.

The program includes education about buying the right amount of paint, tips for using up remaining paint and setting up convenient recycling locations throughout the state.

Paint manufacturers established PaintCare, a nonprofit organization, to run paint stewardship programs in states with applicable laws.

Places to Take Old Paint

Paint recycling is more convenient with PaintCare. We set up paint drop-off sites throughout California. To find your nearest drop-off site, use PaintCare's search tool at www.paintcare.org or call our hotline at (855) 724-6809.

How to Recycle

PaintCare sites accept all brands of old house paint, stain and varnish — even if they are 20 years old! Containers must be five gallons or smaller, and a few types of paint are not accepted. See back panel for a list of what you can recycle.

All PaintCare drop-off sites accept up to five gallons of paint per visit. Some sites accept more. Please call the site in advance to make sure they can accept the amount of paint you would like to recycle.

Make sure all containers of paint have lids and original labels, and load them securely in your vehicle. Take them to a drop-off site during their regular business hours. We'll take it from there.

What Happens to the Paint?

PaintCare will make sure that your leftover paint is remixed into recycled paint, used as a fuel, made into other products or properly disposed.

Who Can Use the Program?

People bringing paint from their homes can bring as much latex or oil-based paint as the site is willing to accept.

Businesses (painting contractors and others) can use this program with one restriction: If your business produces more than 220 pounds (about 20-30 gallons) of hazardous waste per month, you may use the drop-off sites for your latex paint only but not for your oil-based paint. Contact PaintCare to learn more about this restriction.

Large Volume Pickup

If you have at least 200 gallons of paint to recycle at your business or home, ask about our free pickup service. Please call for more details or to request an appointment.

PaintCare Fee

PaintCare is funded by a fee paid by paint manufacturers for each can of paint they sell in the state. Manufacturers pass the fee to retailers, who then apply it to the price of paint. Stores can choose whether or not to show the fee on their receipts. Fees are based on the size of the container as follows:

- \$ 0.00 Half pint or smaller
- \$ 0.35 Larger than half pint and smaller than 1 gallon
- \$ 0.75 1 Gallon
- \$ 1.60 Larger than 1 gallon up to 5 gallons

Not a Deposit

The fee is not a deposit — it is part of the purchase price. The fees are used to pay the costs of running the program: recycling, public education, staffing and other expenses.

Contact Us

To learn more or find a drop-off site, please visit www.paintcare.org or call (855) 724-6809.

PaintCare Products

These products have fees when you buy them and are accepted for free at drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled and empty containers are not accepted at drop-off sites.

Non-PaintCare Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulk, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For information about recycling and proper disposal of non-PaintCare products, please contact your garbage hauler, local environmental health agency, household hazardous waste program or public works department.

It's easy to recycle your leftover paint, stain and varnish. Recycle with PaintCare

Find a drop-off site near you:

(855) 724-6809 • www.paintcare.org

Buy right. Use it up. Recycle the rest.

Manufacturers of paint created PaintCare, a nonprofit organization, to set up convenient places for you to recycle leftover paint. We're working to provide environmentally sound and cost-effective recycling programs in your state and others with paint stewardship laws.

LEARN MORE

Visit www.paintcare.org or follow us on Facebook for tips on how to buy the right amount of paint, store paint properly, use up leftover paint, and find a drop-off site. We also have a free pickup service for businesses or households with at least 200 gallons of paint to recycle.

In-Store Poster

Paint Recycling Program

About the PaintCare Program

PAINTCARE
Paint manufacturers created PaintCare, a non-profit organization, to set up convenient places for households and businesses to recycle leftover paint. PaintCare sets up paint drop-off sites throughout states that adopt paint stewardship laws.

PAINTCARE PRODUCTS
These products have fees when purchased and will be accepted for free at PaintCare drop-off sites:

- Latex house paints (acrylic, water-based)
- Oil-based house paints (alkyd)
- Stains
- Primers and undercoaters
- Shellacs, lacquers, varnishes, urethanes
- Deck and floor paints
- Sealers and waterproofing coatings for wood, concrete and masonry

NON PAINTCARE PRODUCTS

- Paint thinners and solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Coatings used for Original Equipment Manufacturing or shop application
- Any non-coatings (caulk, spackle, cleaners, etc.)

FEES
PaintCare fees are applied to the purchase price of architectural paint sold in the state as required by state law. Fees are applied to each container and vary by the size of the container as follows:

Half pint or smaller	\$ 0.00
Larger than half pint and smaller than 1 gallon	\$ 0.35
1 gallon	\$ 0.75
More than 1 gallon up to 5 gallons	\$ 1.60

For more information or to find a place to take your unwanted paint for recycling, please ask for the PaintCare brochure, visit www.paintcare.org or call (855) 724-6809.

WE CAN HELP Recycle YOUR PAINT
www.paintcare.org

Paint Recycling Made Easy

Paint manufacturers formed PaintCare, a nonprofit organization, to make paint recycling more convenient, cost effective, and environmentally sound. Paint doesn't belong in the trash or down the drain. If you can't use it up, recycle it with PaintCare. We're setting up locations in your state where you can bring old paint for free all year-round.

What types of paint products can be recycled with PaintCare?

PAINTCARE PRODUCTS (YOU CAN RECYCLE THESE)
These products have fees when you buy them and are accepted for free when you drop them off for recycling:

- Water-based paints (latex, acrylic)
- Oil-based paints (alkyd)
- Stains
- Primers
- Varnishes
- Shellacs
- Lacquers
- Urethanes
- Floor paints
- Sealers
- Waterproofing coatings

NON-PAINTCARE PRODUCTS
Leaking, unlabeled, and empty containers are not accepted.

- Paint thinners and solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Paint additives, colorants, tints, dyes
- Wood preservatives (containing pesticides)
- Asphalt, tar, and bitumen-based products
- 2 component coatings
- Coatings used for Original Equipment Manufacturing or shop application
- Any non-coatings (caulk, spackle, cleaner, etc.)

PROGRAM FUNDING
The PaintCare Fee is applied to the purchase price of architectural paint sold in your state as required by law. Fees are based on container size.

Half pint or smaller	\$0.00
Larger than half pint and smaller than 1 gallon	\$0.35
1 gallon	\$0.75
More than 1 gallon up to 5 gallons	\$1.60

LEARN MORE: Please ask for a PaintCare program brochure, visit www.paintcare.org, or call (855) 724-6806.

Fact Sheet for Painting Contractors

CALIFORNIA PAINT STEWARDSHIP PROGRAM
Information for Painting Contractors
UPDATED — JUNE 2019

California's Paint Stewardship Program began October 2012.

The California Paint Stewardship law requires paint manufacturers to set up and operate a paint stewardship program in California. The program is funded by a fee on each container of architectural paint sold in the state. The program sets up drop-off sites at retail stores and other sites throughout the state where households and businesses are able to take most types of leftover paint for recycling, free of charge.

Paint Stewardship
The American Coatings Association (ACA) worked with various stakeholders interested in the management of postconsumer paint to develop a Paint Stewardship Program in the United States. PaintCare Inc. is a nonprofit organization established by ACA to implement the program on behalf of paint manufacturers in states that adopt paint stewardship laws. PaintCare operates programs in California, Colorado, Connecticut, the District of Columbia, Maine, Minnesota, Oregon, Rhode Island, and Vermont. PaintCare is currently developing a program for Washington, expected to launch in 2020.

The main goals of the program are to decrease paint waste and recycle more postconsumer paint by setting up convenient drop-off sites in each PaintCare state.

Fees and Funding
As required by state law, a paint stewardship assessment (PaintCare Fee) must be added by manufacturers to the wholesale price of all architectural paint sold in the state. This fee is paid by manufacturers to PaintCare to fund setting up drop-off sites for leftover, postconsumer paint, and for the transportation, recycling, and proper disposal of that paint. The fees also pay for consumer education and program administrative costs.

The fees are based on container size as follows:

- \$0.00—Half pint or smaller
- \$0.25—Larger than half pint up to smaller than 1 gallon
- \$0.75—1 gallon
- \$1.60—Larger than 1 gallon up to 5 gallons

The law also requires that each distributor and retailer include the PaintCare Fee with their sale price of architectural paint sold in the state. Displaying the fee on invoices and receipts is not mandatory for distributors or retailers; however, PaintCare encourages them to show the fee and list it as PaintCare Fee to aid in customer and dealer education and to ensure transparency.

Notice for Painting Contractors
It is expected that contractors will pass the fees on to their customers in order to recoup the fees they pay on the product.

When estimating jobs, contractors should take these fees into account by checking with your suppliers to make sure the quotes for paint products include the fees. You should also let your customers know that you will be including these fees in your quotes.

New Paint Drop-Off Sites
PaintCare has established more than 800 paint drop-off sites across California. Most drop-off sites are at paint stores. Other sites include certain solid waste transfer stations, recycling centers, and government-sponsored household hazardous waste programs. Participation as a drop-off site is voluntary.

Use of Retail Drop-Off Sites by Businesses
Retail drop-off sites provide a convenient and no cost recycling option for painting contractors and other businesses. Businesses that generate less than 220 pounds of hazardous waste* per month will be able to use these sites to recycle all program products (both water and oil-based) with some restrictions on quantities per month.

Larger businesses (those that generate more than 220 pounds of hazardous waste per month) may use the drop-off sites for their water-based program products only; they are not able to use the sites for oil-based paint or other solvent-based products.

*220 pounds is about 20-30 gallons of paint. When counting how much hazardous waste you generate in a month, oil-based paint counts (because by law it is a hazardous waste), but latex and other water-based paint does not count toward the 220 pound monthly total.

Pick-Up Service for Large Volumes
Businesses with at least 200 gallons of postconsumer paint to recycle may qualify to have their paint picked up by PaintCare at no additional cost. To learn more about this service or to request an appointment, please visit www.paintcare.org/pickup or call (855) 724-6809.

WHAT PRODUCTS ARE COVERED?
The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare Products include interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PaintCare Products

- Interior and exterior architectural paints (latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings))
- Deck coatings, floor paints (including elastomers)
- Primers, sealers, undercoats
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Non-PaintCare Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, stains
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Fact Sheet for Large Volume Pickup Service

PAINT STEWARDSHIP PROGRAMS IN THE U.S.
Large Volume Pickup (LVP) Service
UPDATED — MAY 2020

PaintCare offers a free pickup service to painting contractors, property managers, and others with large amounts of leftover architectural paint.

Who is PaintCare?
PaintCare is a nonprofit organization established by the American Coatings Association to operate paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws.

Paint Drop-Off Sites
In states with a paint stewardship program, PaintCare's primary effort is to set up conveniently located drop-off sites—places where residents and businesses may take their unwanted paint for no charge. Sites set their own limits on the volume of paint they accept from customers per visit (usually from 5 to 20 gallons). To find a drop-off site near you, please use PaintCare's site locator at www.paintcare.org or call (855) PAINT09.

Large Volume Pickups
For those who have accumulated a large volume of paint, PaintCare also offers a pickup service. Large volume means at least 200 gallons, measured by container size (not volume). On a case-by-case basis, PaintCare may approve a pickup for less than 200 gallons if there are no drop-off sites in your area. After two or three pickups, you may be switched to a repeat pickup service (see next page).

Drums and Bulked Paint Are Not Accepted
PaintCare only accepts paint in containers that are 5 gallons or smaller in size. Leave paint in original cans with original labels; do not combine or bulk paint from small cans into larger ones. If you have unwanted paint in drums or containers larger than 5 gallons, please contact a paint recycling company or a hazardous waste transportation company to assist you.

HOW TO REQUEST A LARGE VOLUME PICKUP

- Sort and count your paint**
Tally the number of each container size and the type of products you have, sorted into two categories: (1) water-based paints and stains, and (2) oil-based paint and stains and any other program products (sealers and clear top-coat products, such as varnish and shellac).
- Fill out the LVP Request Form**
Fill out the Large Volume Pickup Request Form on our website. Upon request, the form is also available as a PDF and can be returned to PaintCare by email, fax, or regular mail. Visit www.paintcare.org/pickup or call PaintCare for the form.

Scheduling
After reviewing your form, PaintCare staff will either approve your site for a pickup or inform you of the best place to take your paint if you do not meet the requirements. If approved, you will be put in contact with our licensed hauler to schedule a pickup. It may be several weeks before your pickup occurs.

On the Day of Your Pickup
Sort your products into the two categories noted above and store them in an area that has easy access for the hauler. If the paint is far from where the hauler parks, the path between should be at least four feet wide to accommodate movement of the bases.

The hauler is responsible to pack the paint into the shipping containers. Once your paint is properly packed and loaded onto the hauler's truck, you will sign a shipping document and receive a copy for your records. Your paint will then be taken to an authorized processing facility for recycling.

Repeat Service for Large Volume Pickups
For businesses that generate large volumes of unwanted paint on a regular basis, a service for recurring direct pickups is available. With this service, you will be provided with empty bins and can request a pickup when at least three bins are filled. Your full bins will be swapped with empty bins each time a pickup occurs. You will be required to sign a contract with PaintCare, and PaintCare will provide onsite training how to properly pack the paint.

Business Limits
To use the PaintCare program for oil based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/NSG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil based paint, but it can still use the program for latex products.

If You Have Products We Don't Accept
PaintCare does not accept all paints (such as aerosols and automotive finishes) or other hazardous waste. If you have solvents, thinners, pesticides, or any non-PaintCare products (see list to right for examples), we recommend that residents contact their local household hazardous waste (HHW) program. Some HHW programs also allow businesses to use their program for a modest fee. Otherwise, businesses should contact a licensed hazardous waste transportation company.

What Products Are Covered?
The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings added in containers that are no larger than 5 gallons. They do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including lanterned coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Feld and base paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Road patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

901 NEW YORK AVE NW WASHINGTON, DC 20001 (855) PAINT09 www.paintcare.org info@paintcare.org

Paint stewardship programs in the U.S.

Large Volume Pickup (LVP) Service

Updated — May 2020

PaintCare offers a free pickup service to painting contractors, property managers, households, and others with large amounts of leftover architectural paint.

Who is PaintCare?

PaintCare is a nonprofit organization established by the American Coatings Association to operate paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws.

Paint Drop-Off Sites

In states with a paint stewardship program, PaintCare's primary effort is to set up conveniently located drop-off sites—places where residents and businesses may take their unwanted paint for no charge. Sites set their own limits on the volume of paint they accept from customers per visit (usually from 5 to 20 gallons). To find a drop-off site near you, please use PaintCare's site locator at www.paintcare.org or call (855) 724-6809.

Large Volume Pickups

For those who have accumulated a large volume of paint, PaintCare also offers a pickup service. Large volume means at least 200 gallons, measured by container size (not

volume). On a case-by-case basis, PaintCare may approve a pickup for less than 200 gallons if there are no drop-off sites in your area. After two or three pickups, you may be switched to a repeat pickup service (see next page).

Drums and Bulked Paint Are Not Accepted

PaintCare only accepts paint in containers that are 5 gallons or smaller in size. Leave paint in original cans with original labels; do not combine or bulk paint from small cans into larger ones. If you have unwanted paint in drums or containers larger than 5 gallons, please contact a licensed paint recycling company or a hazardous waste transportation company to assist you.

How to Request a Large Volume Pickup

1. Sort and count your paint

Tally the number of each container size and the type of products you have, sorted into two categories: (1) water-based paints and stains and (2) oil-based paint and stains and any other program products (sealers and clear top-coat products, such as varnish and shellac).

2. Fill out the LVP Request Form and send it in

Fill out the Large Volume Pickup Request Form on our website. Upon request, the form is also available as a PDF and can be returned to PaintCare by email, fax, or regular mail. Visit www.paintcare.org/pickup or call PaintCare for the form.

Scheduling

After reviewing your form, PaintCare staff will either approve your site for a pickup or inform you of the best place to take your paint if you do not meet the requirements. If approved, you will be put in contact with our licensed hauler to schedule a pickup. It may be several weeks before your pickup occurs.

On the Day of Your Pickup

Sort your products into the two categories noted above and store them in an area that has easy access for the hauler. If the paint is a far distance from where the hauler parks, the path between should be at least four feet wide to accommodate movement of the boxes.

The hauler is responsible to pack paint into the shipping containers. Once your paint is properly packed and loaded onto the hauler's truck, you will sign a shipping document and receive a copy for your records. Your paint will then be taken to an authorized processing facility for recycling.

Repeat Service for Large Volume Users

For businesses that generate large volumes of unwanted paint on a regular basis, a service for recurring direct pickups is available. With this service, you will be provided with empty bins and can request a pickup when at least three bins are filled. Your full bins will be swapped with empty bins each time a pickup occurs. You will be required to sign a contract with PaintCare, and PaintCare will provide onsite training on how to properly pack the paint.

Business Limits

To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSQG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products.

If You Have Products We Don't Accept

PaintCare does not accept all paints (such as aerosols and automotive finishes) or other hazardous waste. If you have solvents, thinners, pesticides, or any non-PaintCare products (see list to right for examples), we recommend that residents contact their local household hazardous waste (HHW) program. Some HHW programs also allow businesses to use their program for a modest fee. Otherwise, businesses should contact a licensed hazardous waste transportation company.

WHAT PRODUCTS ARE COVERED?

The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold.

PaintCare Products include interior and exterior architectural coatings sold in containers of 5 gallons or less. However, they do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PaintCare Products

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives

- Field and lawn paints

Non-PaintCare Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Appendix D. Site Guidelines

Drop-Off Site Guidelines

This document contains detailed information of PaintCare's program guidelines and operations procedures. In combination with the state-specific guidelines, this comprehensive document can be used for self-training yourself and your staff without PaintCare staff. The training slides that proceeds this document summarizes the most important information of this Drop-Off Site Guidelines document in a concise manner. The training slides are used during training by PaintCare staff and can be used as a supplement for self-training.

Contents

Guidelines Section 1. Training and Safety
Guidelines Section 2. General Guidelines
Guidelines Section 3. Collection Bins and Storage Area
Guidelines Section 4. Accepting PaintCare Products
Guidelines Section 5. Limit per Participant
Guidelines Section 6. Working with Haulers
Guidelines Section 7. Spill Response
Guidelines Section 8. Inspections and Records
Guidelines Section 9. Direct Reuse

Retailer Guidelines Section 1. Training and Safety

Training

For the safety of the program and your staff, all employees handling PaintCare products must receive training in product identification, acceptance, handling, packaging, inspection, and emergency response procedures before collecting PaintCare products or engaging in any PaintCare program activities.

Training helps ensure that employees conduct PaintCare products collection activities in a safe manner that protects workers and the environment.

Ensure that drop-off site employees are equipped for and understand hazards associated with PaintCare products.

Maintain training plans and records for each employee. Record staff training using the form included in the PaintCare training binder.

Safety

Store personal protective equipment (PPE) and spill response equipment in an accessible location adjacent to the collection bins. Ensure those materials are protected from the weather.

The drop-off site must be equipped with appropriate emergency response equipment including a fire extinguisher, spill kit and PPE. Monthly inspections of equipment are recommended.

PaintCare products collection activities need to follow general safety practices including proper lifting techniques.

Post emergency procedures and emergency contact numbers including police, fire department and emergency services by a phone — in close proximity to the drop-off site area, if possible.

If applicable, develop and maintain an emergency action plan as required by OSHA.

If required by federal, state or local law, familiarize police, fire departments, and emergency response teams with the layout of your facility, properties of PaintCare product(s) handled at your facility, and evacuation routes.

For your convenience, a form for recording emergency contacts is included in the PaintCare binder.

Retailer Guidelines Section 2. General Guidelines

PaintCare Provides Your Site

- Operations binder with recordkeeping forms/logs
- Signage identifying your site as a PaintCare drop-off site
- Educational print materials for the public

PaintCare's Hauler Provides Your Site

- Paint collection bins
- Labels and/or markings for paint collection bins

General Guidelines for Drop-Off Sites

Each PaintCare drop-off site has unique logistical and operational considerations. Each drop-off site must make its own decisions and use its best judgment to operate in the safest manner possible in accordance with applicable law. To ensure the highest standards of safety for you and your staff, drop-off sites must:

- Have appropriate signage that informs the public of the hours of operation
- Accept PaintCare products from participants during your regular advertised or posted operating hours
- Display PaintCare signage to identify you as a drop-off site – signage should be posted in a highly visible area, at the entrance of your site
- Assist and supervise participant when they come to drop off PaintCare products. Drop-off site staff should greet participants and must verify eligibility of the participant and their leftover paint products as PaintCare products (see Section 5 for a description of PaintCare products)
- **IMPORTANT:** Never allow a participant to open a PaintCare product container
- Have adequate space, staffing, and training to collect and store PaintCare products
- Provide a secure space for empty and full collection bins
- Except for PaintCare products that you choose to manage on-site (e.g., via direct reuse), place all PaintCare products immediately in collection bins approved for use by PaintCare and provided by its contractors
- Pack only PaintCare products into collection bins
- Schedule shipments of PaintCare products from your drop-off site
- Maintain all records relating to the program (see Section 9)
- Train staff to be familiar with the requirements and practices of this guide
- Follow state-specific guidelines (located in this binder, following the cover page)

Retailer Guidelines Section 3. Collection Bins and Storage Area

Storage Area and Collection Bin Placement

Establish a dedicated storage area for collection bins and PaintCare products.

Place collection bins on an impermeable surface (e.g., sealed wood floor) at all times.

Place collection bins away from ignition sources, storm drains and floor drains.

Ensure there is adequate ventilation if stored indoors.

Protect collection bins from precipitation and temperature extremes. If stored outdoors, keep collection bins under cover (to prevent exposure to precipitation) and move indoors at times to protect against temperature extremes. If you store collection bins outdoors, you may need approval from your local fire or hazardous materials oversight agency.

Comply with any local fire codes or other regulations that might pertain to your storage of collection bins at your site.

Maintain enough space around collection bins to inspect for leakage and emergency access.

Use good housekeeping standards; keep paint storage areas clean and orderly.

Setting Up, Packing and Maintaining Collection Bins

Collection bins must be set up, used, and closed according to the manufacturer's closure instructions. PaintCare's haulers should set up the collection bins that they provide, unless otherwise requested by the drop-off site staff.

Ensure cardboard bins have liners. The liners provide secondary containment to contain liquids in the event a can leaks while in storage or transit. Reusable plastic bins that are leak-proof by design don't need liners. PaintCare's haulers are responsible for including secondary containment with all collection bins they provide to the drop-off site staff.

Collection bins must be structurally sound. If you see any evidence of damage that may cause a leak or spill, notify PaintCare immediately.

Mark the collection bin with the date the first PaintCare product is placed in it.

Place paint containers in bins immediately. Keep collection bins closed except when adding PaintCare products.

Pack 5-gallon buckets on the bottom layer of the collection bins for stability.

Pack all PaintCare products (cans, buckets) upright and as tight as possible in the collection bins to protect contents from shifting and leaking in transit.

Do not open containers to verify product.

Do not overfill collection bins; allow enough space for a lid to fit securely.

Do not take PaintCare product out of the bin.

Security

The drop-off site and collection bin storage area must be secured and locked when closed or not attended.

Only drop-off site staff should have access to the collection bins and storage area until the collection bins are ready for pick-up by PaintCare's hauler. Never allow "self-serve," public access to the collection bins.

Retailer Guidelines Section 4. Accepting PaintCare Products

What are PaintCare Products

PaintCare drop-off sites should accept only PaintCare products (architectural paint products) for management under the PaintCare program.

Listed below are the primary examples of architectural paint products accepted by the PaintCare program and paint or paint-related products not accepted by the PaintCare program.

Generally, PaintCare products include latex and oil-based house paint, stains, and clear coatings (varnish, shellac, etc.). The program excludes anything that is:

- in an aerosol spray can
- intended and labeled "for industrial use only"
- mostly used in the manufacture of equipment
- on the list of specifically excluded products for some other reason

PaintCare products are classified as either latex (water-based) or oil-based (alkyd) and the classification is important in order to decide how the product should be handled and processed. Knowing how to tell the difference between latex and oil-based products is also important in determining which types of businesses/organizations can use the PaintCare program (if your site accepts paint from this audience).

PaintCare Products and Non-PaintCare Products

Acceptable products (PaintCare products)

- Interior and exterior paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings and floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)

- Metal coatings, rust preventatives
- Field and lawn paints

Unacceptable products (Non-PaintCare products)

- Paint thinner, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For more information, please see www.paintcare.org/products-we-accept.

If non-PaintCare Products end up in a drop-off site's bin, such products will not be returned to the drop-off site and will be managed by PaintCare's hauler. Haulers identify Non-PaintCare Products and report all instances to PaintCare. PaintCare staff will notify the site of any contamination in the bins. If the problem persists, additional training may be provided.

Who Can Drop Off PaintCare Products

The program accepts PaintCare products from the following:

Households. Households may drop off any volume of PaintCare product, subject to the volume limit set by the site.

Businesses/Organizations. Non-households may also drop off any volume of latex PaintCare product, subject to the volume limit set by the site. Non-households may only drop off oil-based PaintCare products if they comply with federal and state hazardous waste generator rules that, among other criteria, require that the business/organization (1)

generates no more than 100 kilograms (about 25 gallons or 220 pounds) of hazardous waste per calendar month, and (2) does not accumulate more than 1,000 kg of hazardous waste at any time. Painting contractors and commercial property owners typically meet these criteria. For more information about these criteria, please see: <http://www.paintcare.org/vsqq>

How to Know If a Business/Organization Qualifies

Each business or organization is responsible for determining its own generator status under applicable law.

When a business/organization has oil-based PaintCare product to drop off at your site, it must sign the Paint Drop-Off Log included in this binder to verify that it qualifies to use the program for oil-based paint. The log includes an explanation of the requirements. (If a business/organization has only latex paint, it does not need to sign the log.)

Once a business/organization signs the Paint Drop-Off Log, you may accept oil-based paint from that business/organization to the extent permissible under applicable law. Paint Drop-Off Logs may be reviewed by PaintCare or government agencies and compared with a list of registered hazardous waste generators to verify that only qualified businesses/organizations are using the program for their oil-based paint.

Acceptable Containers vs. Unacceptable Containers

Before accepting products from participants for management under the PaintCare program, drop-off site staff must (1) check the condition of the container for acceptance in the program, and (2) check the product label to verify that it contains a PaintCare product.

Acceptable

- The PaintCare product must be in its original container*
- The container is labeled as containing one of the designated PaintCare products listed below*
- The container must be in good condition and not leaking*
- The container must be 5 gallons in size or smaller
- The container contains dry latex paint

Not Acceptable

- The container is not original (e.g., paint was transferred into a jar)*
- The container does not have an original label (Drop-off sites permitted to accept household hazardous waste may accept unlabeled and leaking containers by following the procedures described below.)
- The container is leaking or has no lid*

- The container is larger than 5 gallons
- The container is empty

Unlabeled and Leaking Containers

A drop-off site permitted to accept household hazardous waste may, at its discretion, choose to accept unlabeled and/or leaking containers if it follows the protocols below and otherwise complies with all applicable laws:

Unlabeled Containers: A drop-off site may accept containers that do not have an original label if a staff person appropriately trained in identifying unknown wastes (1) identifies the material in the container as a PaintCare product, and (2) applies a label identifying the contents to the container before placing it in a collection bin.

Leaking Containers: A drop-off site may accept a leaking container or a container with no lid if an appropriately trained drop-off site staff person (1) verifies that the container contains a PaintCare product, (2) places the contents of the leaking/open container into an appropriate substitute container (which can include bulking such PaintCare products into 55-gallon drums), and (3) applies an appropriate label to the substitute container.

Refusing an Unacceptable Product or Container

Do not accept non-PaintCare products from any participant unless they are accepted as part of normal site operations and are not placed in PaintCare collection bins. Do not accept into the PaintCare program any PaintCare products in unacceptable containers unless your site is permitted to manage household hazardous waste as described on the previous page.

When refusing a PaintCare product, drop-off site staff must explain why the PaintCare product cannot be accepted (e.g., material is not part of the program, cannot accept material from non-exempt generator). If you have a participant with products that your location cannot manage, refer the participant to their local hazardous waste disposal program, garbage hauler, environmental health agency, or public works department. Local contact information is provided following the cover page of the binder.

Retailer Guidelines Section 5. Limit per Participant

How to Handle Storage Limitations

While the PaintCare program intends to collect as much PaintCare product as possible, we recognize that your drop-off site may have storage limitations. PaintCare drop-off sites, in agreement with PaintCare, may limit the amount of PaintCare products they accept per participant.

If your collection bins are completely full, inform the participant that you are temporarily unable to accept PaintCare products and redirect them to the nearest alternative PaintCare drop-off site (refer to the site locator at www.paintcare.org or contact PaintCare hotline at 855-724-6809) or ask them to come back at a later date. Contact the PaintCare hauler immediately to have your collection bins picked up and replaced.

If you have a participant with a significant amount of PaintCare products that your location cannot manage, ask the participant to contact PaintCare directly for additional assistance. We may direct the participant to another PaintCare drop-off site that can manage the large load or offer a direct pickup.

Large Volume Pickups (LVP)

PaintCare offers a free pick-up service to painting contractors, property managers, households and others with a large volume of leftover PaintCare products. Typically, a minimum of 200 gallons (by container size) is required to qualify for the LVP service.

To refer a participant to the LVP service:

- Provide the participant an LVP fact sheet
- Ask the participant to request a pick-up using the online LVP form
- The LVP fact sheet and online form are available at www.paintcare.org (select the “Large Volume Pickup” button on the homepage)
- For additional questions, refer the participant to PaintCare for assistance

Retailer Guidelines Section 6. Working with Haulers

PaintCare contracts with haulers for the delivery of supplies, delivery of empty collection bins, and pick-up of full collection bins.

Scheduling the Hauler to Pick Up Collection Bins

When you anticipate your collection bins will be full within your site’s pick-up timeframe (generally 5 business days in urban areas, 10 business days in rural areas), call your hauler to schedule a pickup, or use their online order system if they have one. The name and contact information of your hauler is provided at the front of your training binder.

When establishing an appointment for pick-up, please indicate:

- Your site is a PaintCare drop-off site
- Name of drop-off site and address
- Your name
- Your phone number

- Number of full collection bins to be picked up
- Number of empty collection bins needed for replacement

Preparing Collection Bins for Pickup

On the scheduled pickup day, collection bins and your loading area must be readily accessible to the hauler for quick and efficient loading.

- Identify which bins are full and ready for pickup
- Make sure the path between your bins and the hauler's vehicle is clear and at least 4 feet wide to accommodate movement of bins

The hauler will bring the necessary shipping documents and labels for the collection bins. The hauler is responsible for labeling, loading and off-loading collection bins, and will provide a copy of the shipping documents to the drop-off site. Sign and keep a copy of the shipping documents for your records.

Retailer Guidelines Section 7. Spill Response

Spills

The information in this section will assist with spills from damaged or leaking program containers. It is important that all drop-off site staff understand corrective actions to minimize exposure to people and the environment.

Collection bins must be kept in a clean, accessible area. Clean up any spill or release of PaintCare product immediately and place spill residue in a sealed container, label it and place sealed container in a collection bin. Contact the hauler or PaintCare to replenish spill kit materials as needed.

Reporting

Report spills as required by law, summarized in the state-specific guidelines at the front of this binder. Contact PaintCare within 24 hours of making such a report.

Prominently post emergency contact numbers including police, fire department, and emergency services.

Spill Response Procedures

Always follow all applicable spill response procedures set forth in your operating permit or as otherwise required by applicable law.

If a spill is small enough to be managed by drop-off site staff, follow these steps:

- Isolate the area and restrict access to the spill

- Ensure personal safety, put on protective gear (glasses and gloves) provided in the spill kit
- Stop the movement of paint by placing the leaking container upright or in a position where the least amount will spill, and place leaking container in plastic bags provided in spill kit, or into the spill kit container
- Contain the spill by placing absorbent pads or granular absorbent around and on the spill – if outdoors, place barriers around storm drains to prevent a release to the environment
- Collect the contaminated absorbent material and place it in plastic bag(s) or spill kit container, along with the leaking container and contaminated PPE, seal the bag(s) and place in the collection bin
- Remove any clothing that may be contaminated, wash thoroughly to remove spilled material from your hands or body
- Replace any used spill control supplies
- Document the date, location, and amount and type of material spilled

Retailer Guidelines Section 8. Inspections and Records

Inspections and Record Keeping

Drop-off site staff are responsible for regularly inspecting collection bins and spill kits to ensure that such materials are in proper working order, include any necessary labeling, etc. Please report any damaged materials or other problems to PaintCare immediately so PaintCare may arrange for prompt replacement or repair.

Maintain the following records for a minimum of 3 years:

- Internal and external inspection records
- Paint Drop-Off Logs (provided in PaintCare training binder)
- Direct Reuse and Reprocessed Paint Waivers (provided in PaintCare training binder)
- Employee training records (provided in PaintCare training binder) – discussed in Section 1
- Bills of lading and/or other documentation required by applicable law for outgoing shipments of PaintCare products

Retailer Guidelines Section 9. Direct Reuse and Paint Processing

Direct reuse is an additional service permitted for certain site types. These guidelines only apply to sites with a contract with PaintCare to engage in direct reuse. Paint retailers are not direct reuse sites.

Requirements for Direct Reuse

PaintCare encourages reuse of leftover paint through direct reuse (also known as a “paint exchange” or “swap shop”). Reuse sites return good quality unused paint to the local community at low or no cost.

When selecting products to place in the direct reuse area, products must be in their original container, have an original label, and be in good physical and aesthetic condition. Contents must be liquid and relatively new. The container must be closed securely before placing it in the reuse storage area. Containers must never be opened by participants at the drop-off site. Direct reuse products must be displayed by drop-off site staff in a storage area separate from the PaintCare collection bins.

Requirements for Paint Reprocessing

PaintCare also encourages on-site latex paint reprocessing. On average, 30-60% of latex paint brought to the site is reprocessed back into usable paint available for return to the community. Containers of reprocessed paint offered to the public at a drop-off site must not display any unauthorized third-party branding; generally new containers are used to pack reprocessed paint.

A household hazardous waste facility permitted to conduct paint reprocessing must have and follow its own procedures for sorting and reprocessing paint. At a minimum, these procedures will include:

- Open each container to visually inspect the contents
- Determine if the contents are latex, oil-based, or other paint
- Determine if the condition of the paint is suitable for recycling (e.g., not moldy, rusty, etc.)
- Sort containers according to type, quality, and color

For containers of products suitable for paint reprocessing:

- Bulk contents into larger container (e.g. drum) for mixing
- Mix paint until homogenous
- Repackage paint into 5-gallon or smaller containers

- Label as reprocessed paint

For containers of products unsuitable for reprocessing, either:

- Close container and pack in a collection bin (must be completely resealed and not leaking)
- Sort and bulk the contents into a drum

Participant Waiver

Participants taking paint from a drop-off site must sign the Direct Reuse and Reprocessed Paint Waiver log included in the training binder (or an approved equivalent thereof) explaining that the paint is taken “as-is” with no guarantee of quality or contents. The participant must read, complete, and sign the form and the staff must verify what has been taken by the participant. The staff must record on the log the volume taken by each participant and the total volume.

Appendix E. Registered Manufacturers

Registered Manufacturers California Paint Stewardship Program as of 6/30/2020

1. 2Guard, 1276 S Lyon St, Santa Ana, CA 92705
2. AP Nonweiler Co., 3321 County Rd A, Oshkosh, WI 54901
3. Ace Hardware Paint Division, 2200 Kensington Ct, Oakbrook, IL 60523

Appendix G. Expenses and Revenue Evaluation

Evaluation of PaintCare Program Expenses and Revenue

1. Introduction

PaintCare provides a five-year projection each fall in its annual report to CalRecycle. The projection reflects PaintCare's view of a most likely scenario, though it considers other possible outcomes. It is built using a revenue and expense modeling template which considers the previous five years' finances and planned increases or decreases in each budget category. The core program budget variables are:

Revenue from fees: (94% of revenue in FY20)

While PaintCare has no control over this variable, the projection considers both historic and current year trends. Annual paint sales in the previous four years have increased some years and decreased in others, averaging less than 0.2% change. In normal economic circumstances, annual changes beyond plus or minus 2% are seen as unlikely.

Investment Gain (Loss): (6% of revenue in FY20)

Though the exact return on the program's investment strategy cannot be determined, high, low and middle return levels based on historic outcomes can be envisioned.

Paint Collection, Transportation and Processing (CTP): (77% of expenses in FY20)

Overall drop-off site counts and associated CTP volumes are growing at a slower pace, as the program has shifted from program build-out to program maintenance. Sites also tend to remain in the program once active or are soon replaced by others if they stop participation, adding to stability of costs. Variables that may increase costs in future years include vendor price increases and additional CTP costs stimulated by increased marketing, outreach or expanding sites or services.

Communications: (9% of expenses in FY20)

While PaintCare has mandatory communications expenses simply to operate the program, it also has discretion to increase this budget area to grow and enhance the program. Dedicating more funds toward this area may simultaneously be able to improve the results of the program and moderate the program's surplus by stimulating additional paint reuse or recovery for recycling. PaintCare had intended to spend an additional \$1 million in FY20 to raise mass awareness of the program. The timing and unprecedented impacts of COVID-19 made this additional expense not possible.

2. Projection Scenarios Discussion

PaintCare creates three plausible scenarios that show what happens when core program budget variables are modified within expected ranges. The projection also uses each scenario to model the outcome of reducing program fees by five cents across all container sizes beginning in FY22.

PaintCare prefers to make budgetary adjustments to reach its reserve policy target, in lieu of revising the fee structure, to avoid the need to increase fees again in the near future. From experience in other states, PaintCare understands that even the smallest change to the fee structure demands substantial time and effort from various program stakeholders to prepare, gain approval and implement. Scenario B reveals how adding \$1 million annually to enhance the program achieves the desired result without a fee decrease.

Scenario A

In this scenario, there is a steady return to historic patterns of sales growth and increases in CTP. Growth in CTP costs reflects the maturity of the stewardship program, while a return to stability in revenue from fees reflects the historic stability of the paint market. Under these conditions, an additional \$1 million each year in expenses would not return the program to its target reserve level (145% in FY25). Reducing the program fee by five cents in this scenario would return the program to its target range (117% in FY26),

Scenario B (chosen scenario)

PaintCare has chosen to include an updated five-year projection that reflects the current state of economic uncertainty, with revenue from fees declining by 2% in FY22-FY23, while CTP costs continue to grow, as in Scenario A. Under these conditions, the program would return to its target reserve range (111% in FY26). Reducing the program fee by five cents in this scenario would return the program to its target range (84% in FY26), albeit lower than 100% and declining year-over-year.

Scenario C

In this scenario, a strong recovery from the economic impact of COVID-19 results in revenue from fees steadily increasing each year beginning in FY22. During the same timeframe, CTP costs decline due a decline in recycling activities. Under these conditions, the program would still be above its target reserve range (204% in FY26), even with additional spending. Reducing the program fee by five cents in this scenario would not result in the program reaching its target range.

3. Projection Scenarios: Assumptions and Outcomes

Scenario assumptions are a preliminary assessment of the continued impact of COVID-19 and are subject to change. All three scenarios assume that FY21 will result in a 4% year-over-year decline in revenue from fees, a 9% increase in CTP expenses, and no investment return. Revenue from fees and investment return are projected to change to differing degrees, with each scenario forecasting a different cadence.

Description	Scenario A	Scenario B	Scenario C
Note	Expenses track closely with revenue from fees	Expenses outpace revenue from fees	Expenses are outpaced by revenue from fees
Revenue from fees	1% increase each year.	2% decrease each year FY22-FY23, 1% increase each year FY24-FY26	No increase in FY22, 2% increase each year FY23-FY26
Investment return	\$1 million return each year FY22-FY26	No investment return FY22-FY23, \$500,000 return each year FY24-FY26	No investment return FY22, \$1.5 million return each year FY23-FY26
CTP	Average annual increase of 1.8%	Average annual increase of 1.8%	Average annual decrease of 1%
Communications or other additional expenses	+\$1 million per year starting in FY21	+\$1 million per year starting in FY21	+\$1 million per year starting in FY21
Does scenario result in compliance with Reserve Policy?	No. Reserve ends FY26 at 145%.	Yes. Reserve ends FY26 at 111%.	No. Reserve ends FY26 at 204%.
With fee decrease: does it result in compliance with Reserve Policy?	Yes. Reserve ends FY26 at 117%.	Yes. Reserve ends FY26 at 84%.	No. Reserve ends FY26 at 173%.

4. Projection Scenarios: Reserve Balance Summary

The FY21 tables below shows the baseline — the similar starting point of each scenario at the end of the current fiscal year. The full projection for Scenario A showing all years FY21-FY26 is provided at the end of this submission.

FY21 – Revenue

Description	Scenario A	Scenario B	Scenario C
Revenue from fees	\$34,611,546	\$34,611,546	\$34,611,546
Investment gain (loss)	0	0	0
Total Revenue	\$34,611,546	\$34,611,546	\$34,611,546

FY21 – Expenses

Description	Scenario A	Scenario B	Scenario C
CTP	\$25,795,754	\$25,795,754	\$25,795,754
Communications	\$4,500,000	\$4,500,000	\$4,500,000
All other expenses	\$4,788,381	\$4,788,381	\$4,788,381
Total Expenses	\$35,084,135	\$35,084,135	\$35,084,135

FY21 – Other

Description	Scenario A	Scenario B	Scenario C
Total Change in Net Assets	\$(472,588)	\$(472,588)	\$(472,588)
Net Assets, beginning of year	\$56,855,233	\$56,855,233	\$56,855,233
Net Assets, end of year	\$56,382,644	\$56,382,644	\$56,382,644
Reserve level	161%	161%	161%

The FY26 tables below shows the end point of each scenario.

FY26 – Revenue

Description	Scenario A	Scenario B	Scenario C
Revenue from fees	\$36,377,083	\$34,248,162	\$37,464,651
Investment gain (loss)	\$1,000,000	\$500,000	\$1,500,000
Total Revenue	\$37,377,083	\$34,748,162	\$38,964,651

FY26 – Expenses

Description	Scenario A	Scenario B	Scenario C
CTP	\$28,193,297	\$28,193,297	\$24,531,505
Communications	\$4,500,000	\$4,500,000	\$4,500,000
All other expenses	\$5,183,201	\$5,183,201	\$5,183,201

FY26 – Other

Description	Scenario A	Scenario B	Scenario C
Total Change in Net Assets	(\$499,415)	(\$3,628,336)	\$4,749,944
Net Assets, beginning of year	\$53,379,647	\$45,080,177	\$65,191,378
Net Assets, end of year	\$54,880,232	\$41,951,177	\$69,941,322
Reserve level	145%	111%	204%

The FY25 table below shows the end point for each scenario, with a \$0.05 fee decrease in all container categories. All other variables and values from FY26 are held constant.

FY26 – (\$0.05 Fee Decrease in FY22)

Description	Scenario A	Scenario B	Scenario C
Revenue from fees	\$34,234,039	\$32,230,537	\$35,257,536
Total Change in Net Assets	(\$2,642,459)	(\$5,145,961)	\$2,542,829
Net Assets, beginning of year	\$47,017,562	\$37,148,117	\$56,767,282
Net Assets, end of year	\$44,375,103	\$32,002,156	\$59,330,111
Reserve level	117%	84%	173%

5. Options for Use of Reserve Funds

Beginning in 2019, PaintCare and CalRecycle used monthly update meetings to consider where PaintCare could increase the highest and best use of paint managed under the program, and where additional program funds would be useful to this end. Meeting topics included increasing program convenience, adjustments to the contracting process, and use of increased expenditures to stimulate higher volumes of paint recovery and/or rates of paint reuse and recycling. From the discussions, stimulating additional reuse and recycling volumes emerged as key consensus areas where PaintCare could leverage its program funds and role as a stewardship organization to greatest effect.

Concurrently, PaintCare held a series of brainstorming sessions with its staff that generated options and preferred alternatives for increasing the program's measurable reuse volume. In 2020, PaintCare consulted with California reuse partners to discuss interest in increasing reuse, and if PaintCare could provide financial support. Due to COVID-19, reuse partners are generally reluctant to pursue expansion at present. PaintCare will continue to work with reuse partners in FY21 to gauge their readiness to proceed with reuse expansion.

6. Conclusion

PaintCare is considering using excess reserve funds by increasing its annual expenses by a minimum of \$1 million beginning in FY21 in two key areas:

- Increased Communications budget, with the intention of increasing utilization of program services by raising mass awareness of the program. Additional communication expenses will be approved as needed to support marketing of community paint reuse activities and events.
- Increased financial support for activities that increase paint reuse, with exact details to be specified in consultation with reuse partners.

The exact amount and timing of spending excess reserve funds requires approval of PaintCare's Board of Directors and is subject to revision. A decision to maintain or revise course will be made twice yearly, during spring budgeting and fall annual report preparation.

Revenue Projection for Revenue FY21-FY26

Description	FY2021 Forecast Year 9 (\$)	FY2022 Forecast Year 10 (\$)	FY2023 Forecast Year 11 (\$)	FY2024 Forecast Year 12 (\$)	FY2025 Forecast Year 13 (\$)	FY2026 Forecast Year 14 (\$)

Reserve level	161%	154%	139%	130%	120%	111%

7. Statement on the Impact of COVID-19

As of the date of submission, the long-term effects of the COVID-19 pandemic on PaintCare's finances remain unknown. At present, HHW and retailer drop-off sites remain open and report increased customer traffic, suggesting an FY21 increase in CTP costs. Despite an unanticipated increase in paint sales in late FY2020, broader economic indicators have shown short-term volatility, with the expectation that FY21 sales will reverse course. The projections included in this submission attempt to reflect these impacts based on best available current information. PaintCare will continue to monitor the programmatic impact of COVID-19 closely and update its budget and projections accordingly.

Appendix H. Awareness Survey

FY2020 Awareness Survey

Introduction

In March 2020, PaintCare surveyed 689 individuals throughout California in order to measure consumer behavior, paint recycling awareness, and effectiveness of outreach activities. Surveys were conducted via web survey using a panel of respondents reflective of the demographic composition of California. The sample size provides 90% confidence in the accuracy of the measured results for the population within +/-3%.

The results were analyzed by KB Insights to help PaintCare better understand trends in the data and help guide future targeting. Data from all PaintCare state programs were included in the analysis, providing the additional benefit of comparing results between programs throughout the nation. The following report focuses only on California outcomes for FY2020.

FY2020 California results are presented below in four categories: behavioral outcomes, awareness outcomes, marketing outcomes, and recycling intentions.

A. Behavioral Outcomes

- About half (51%) of California respondents purchased paint in the last year. Of those, over half reported seeking help from paint retail staff and two-thirds reported taking measurements themselves in order to purchase the right amount of paint and reduce the amount left over.
- About half of respondents who knew that paint can be recycled said they had taken paint to be recycled in the past, a key performance index used to track recycling success.
- The percentages of people who store paint at their home/business vs. those who do not are also used as a barometer for recycling success. In FY2020, 72% of respondents said they were storing paint at home; 28% were not. Among those who were storing paint, the median amount stored was “less than 1 gallon.”

Question: “How much leftover or unwanted paint do you have in your home or business at this time (e.g., primer, interior or exterior house paint, stain, deck sealer, or clear finishes like varnish)?” (Sample size: 668)

Answer	Percent
None	28
Less than 1 gallon	25
1 to 5 gallons (would fit in a cardboard box)	26
5 to 15 gallons (would fit in a shopping cart)	13
15 to 29 gallons (would fit in 2 shopping carts)	3
More than 30 gallons	1
I have some paint, but I do not know how much.	4

- Over 80% of stored paint is left over from jobs that consumers did themselves or that a contractor left behind.

Question: Where did most of the leftover paint come from that you currently have in your home/business? (Sample Size: 481)

Answer	Percent
I did some painting myself and I had some leftover paint when I was done.	59
I hired someone to paint, and they left it behind.	22
I found the paint in my home or business when I moved in.	10
I don't remember where the paint came from.	4
I am a professional painter or contractor, and it is from one or more of my jobs.	3
Other	2

FY20 results for each of the aforementioned measures were similar to those in FY19 (i.e., within the +/-3% confidence interval).

Comparison of FY2019 and FY2020 Behavioral Outcomes

Behavioral Trend (Question)	FY2019 Percent	FY2020 Percent
Have you purchased paint in the last year? For the purposes of this question, "paint" includes primer, interior or exterior house paint, stain, deck sealer, and clear finishes like varnish.	48	51
Before purchasing, did you take any measurements of the area to be painted to figure out how much paint was needed for the project?	65	66
Did the staff of the paint retail store assist you with figuring out exactly how much paint you needed for your specific project?	55	55
Have you ever taken paint somewhere to be recycled?	51	51
How much leftover or unwanted paint do you have in your home or business at this time? (% "None")	29	28

B. Awareness Outcomes

- 42% of FY20 respondents knew that paint can be recycled prior to receiving the survey.
- Of those, 70% knew where to take it and 62% knew about the fee added to paint purchases to support future recycling.
- The upward trends for two awareness measures were statistically significant (i.e. outside the +/-3% confidence interval): knowledge of the fee and knowledge of recycling locations. The upward trend for recycling awareness was more probable than not but fell within the +/- 3% interval at a 90% level of confidence.

Comparison of FY2019 and FY2020 Awareness Outcomes

Awareness Trends (Question)	FY2019 Percent	FY2020 Percent
Prior to this survey, did you know that paint can be recycled?	40	42
Are you aware that when you buy paint in California, there is a small fee added to the price to pay for a program to recycle any leftover paint you have?	58	62
If you wanted to take paint somewhere to be recycled, do you know where to take it?	65	70

C. Marketing Outcomes

- 13% of respondents said they had heard of PaintCare before completing the survey.
- 10% remembered a PaintCare advertisement.
- 12% had heard of PaintCare via other means, such as from a friend/relative/colleague, brochure/card at a paint retail store, sign/poster at a paint retail store, from a local hazardous waste center, received information in the mail, Facebook/social media, and/or online research.
- 10% of respondents said that they had attended a collection event at some time in the past.
- FY2020 results for each of the aforementioned marketing measures appear to have increased slightly since the previous year; however, because changes fall within the +/-3% confidence interval, our confidence level falls below 90%.

Comparison of FY2019 and FY2020 Marketing Outcomes

Marketing Trend (Question)	FY2019 Percent	FY2020 Percent
Have you ever heard of PaintCare before?	11	13
Do you recall seeing an advertisement for PaintCare in the last several months?	8	10
Do you recall hearing about PaintCare in any of the following other ways (list)?	10	12
Have you ever attended one of PaintCare's one-day collection events?	8	10

D. Recycling Intentions

- In order to contrast future recycling intentions to past behavior, questions were asked both about how consumers have disposed of paint in the past and what they intend to do in the future.
- Almost a quarter of respondents reported that they chose a sustainable option for paint disposal in the past, including: dropping it off at a paint retail store (5%) or HHW (15%), or giving it away to someone else who needs it (3%).

Question: Which has been your preferred method to dispose of leftover or unwanted paint? (Sample Size: 665)

Answer	Percent
Stored it in the basement, garage, or a closet because I intended to use it someday	27
Not applicable - I have never stored or disposed of leftover or unwanted paint.	22
Took it to a household hazardous waste facility/event or transfer station	15
Dried it out and put it in the trash	9
Put cans of liquid paint in the trash	6
Took it to a paint, hardware, or lumber store	5
I don't remember what I did with the leftover or unwanted paint.	5
Mixed it with hardener or kitty litter and put it in the trash	4
Gave it away to family, friends, or a community organization	3
Poured paint down the drain	2
Left it behind when I moved	1
Other (please specify)	1

- In contrast, over half of respondents reported that they will choose a sustainable option if they have leftover paint in the future, such as dropping it off at a paint retail store (14%) or HHW (28%) or giving it away to someone else who needs it (12%).

Question: If you wanted to get rid of unwanted paint in the near future, what would you most likely do with it? (Sample Size: 662)

Answer	Percent
Take it to a household hazardous waste facility/event or transfer station	28
I don't know	17
Dry it out and put it in the trash	13
Take it to a paint/hardware/lumber store	14
Give it away to a family member, friend, or community organization	12
Put cans of liquid paint in the trash	7
Mix it with hardener or kitty litter and put it in the trash	5
Other (please specify)	2
Pour paint down the drain	2

Finally, respondents were asked to rate the likelihood that they would recycle paint in the future. 75% said they would be either extremely likely or likely to recycle paint in the future. Note: that this question was added in FY2020 so no trend information is available for this metric.
