Section 1. Contact Information

Annual Report Regulatory Citation

California Code of Regulations, Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program, Section 18954. Annual Report Compliance Criteria requires PaintCare to submit an annual report that includes, in relevant part:

(1) Contact information. Identify the manufacturer or stewardship organization responsible for the annual report submittal. Stewardship organizations shall include an updated list of participating manufacturers and any updates to their respective contact information per §18952(a)(2).

A. Stewardship Organization

PaintCare Inc., a non-profit 501(c)(3) organization, was formed to serve as the representative stewardship organization of architectural paint manufacturers to fulfill their obligations under the California Paint Stewardship Law. PaintCare was created by the American Coatings Association, the primary trade association of the paint and coatings industry. PaintCare's Board of Directors consists of eleven non-paid representatives of architectural paint manufacturers.

PaintCare representation is open to all architectural paint manufacturers. The list of registered manufactures as of the end of the year and their mailing addresses is provided in the appendix.

B. Program Contacts

Current contact for the California program:

Terri Marsman
California Program Manager
(209) 404-8625
tmarsman@paint.org

The names and titles of PaintCare staff are available upon request. Program information is available at www.paintcare.org.

Section 2. Executive Summary

Annual Report Regulatory Citation

California Code of Regulations, Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program, Section 18954. Annual Report Compliance Criteria requires PaintCare to submit an annual report that includes, in relevant part:

(2) Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the manufacturer or stewardship organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the manufacturer or stewardship organization's architectural paint recovery efforts during the reporting period pursuant to PRC §48705(a). This may include anticipated steps, if needed, to improve performance and a description of challenges encountered during the reporting period and how they will be addressed. This may also include a description of paint container management and market development activities if the manufacturer or stewardship organization has chosen to engage in those activities.

A. California Paint Stewardship Law and Annual Report

In September 2010, Governor Schwarzenegger signed Assembly Bill 1343 (Huffman), the California Paint Stewardship Law. This law requires manufacturers of architectural paint to develop and implement a program to reduce the generation of postconsumer architectural paint, promote the reuse of postconsumer architectural paint, and to provide a system for the management of postconsumer architectural paint in an environmentally sound manner that includes collection, transportation, processing, recycling, and proper disposal. The California program began October 19, 2012.

PaintCare, on behalf of participating paint manufacturers, submits an annual report to the California Department of Resources Recycling and Recovery (CalRecycle). Since the program began, annual reports covered the period of July 1 – June 30. On October 13, 2023, Assembly Bill 1526 was signed into law by Governor Gavin Newsom, amending section 48705 of the California Public Resources Code and changing the annual report period to the calendar year. As prescribed in Section 48700 of the California Public Resources Code and further detailed in Title 14, Section 18954 of the California Code of Regulations, the information submitted in an annual report shall be organized according to this standard outline:

- (A) Contact Information
- (B) Executive Summary
- (C) Program Outline
- (D) Description of Goals and Activities Based on the Stewardship Plan

- (E) Financing Mechanism
- (F) Education and Outreach
- (G) Audits

B. Program Highlights

B1. Sites and Services

Drop-Off Sites. The program had 875 year-round paint drop-off sites at the end of the year; 667 were paint retailers, representing 42% of likely paint retail participants. The remaining sites included 120 household hazardous waste (HHW) facilities, 55 transfer stations, seven landfills, four recycling centers, 12 reuse stores, three paint recyclers and seven other sites e.g., fire stations and public works yards.

The program also managed paint from supplemental drop-off sites that included nine seasonal HHW facilities, 263 HHW events, one seasonal transfer station, 11 sites that accepted paint for part of the year, and nine PaintCare events.

During the report period, 99.4 % of California residents lived within 15 miles of a drop-off site.

Services. The program provided 844 direct large volume pickups (LVP) from businesses and others that had accumulated more than 100 gallons of paint at their locations and serviced 71 locations set up as recurring large volume pickup (RLVP) sites. PaintCare also partnered with 19 HHW door-to-door (D2D) collection programs.

B2. Collection Volume

Paint Collection Volume. The program collected 3,432,553 gallons of postconsumer paint.

Paint Processing. Latex paint was 89% of the paint processed: 4% was reused, 83% was made into recycled-content paint, and 13% was landfilled. Oil-based paint was 11% of the paint processed: 3% was reused, 46% was processed for energy recovery, and 51% was incinerated.

Paint Recovery Rate. The recovery rate—the volume of postconsumer paint collected divided by the volume of new paint sales in the same period—was 5.3%.

Container Recycling. The program recycled 2,002 tons of plastic and metal paint cans.

B3. Operations

PaintCare continued to support reuse efforts in the state and added new reuse stores in Lake Elsinore, Marysville, San Luis Obispo, and two in Temecula. In addition, PaintCare provided infrastructure support to the Monterey Regional Waste Management District to expand its reuse program. At the end of the year, PaintCare had 30 reuse partners, which included HHW facilities and reuse stores.

PaintCare continued efforts to establish partnerships with municipal and county programs through engagement at conferences and attendance at stakeholder meetings, including the Regional Council or Rural Counties Environmental Services Joint Powers Authority and the Household Hazardous Waste Information Exchange, in-person site visits, and conference calls.

PaintCare worked with HHW facilities and transporters to increase the use of reusable plastic bins for latex paint collection.

B4. Outreach and Education

Public outreach activities included the distribution of point-of-sale print materials, fact sheets, and signage, as well as messaging delivered via direct mail, digital ads, streaming audio, radio, social media, and online video.

PaintCare sponsored mural projects utilizing reuse paint at the Yolo County HHW facility and the City of Palmdale public works yard.

PaintCare began a three-year effort to visit non-drop-off site paint retailers in California. The site visits focused on educating store staff about the PaintCare program, providing point-of-sale materials, and discussing the retailers' obligations under the stewardship law, including monitoring the registered brands list and charging the correct fee on program products.

In May, PaintCare received the Environmental Initiative Award at the SEAL (Sustainability, Environmental Achievement and Leadership) Business Sustainability Awards, recognizing businesses that demonstrate environmental and sustainability initiatives.

Section 3. Program Outline

Annual Report Statutory Citation

California PRC, Division 30. Part 7. Chapter 5. Architectural Paint Recovery Program, Section 48705 requires PaintCare to submit an annual report that includes, in relevant part:

(3) A description of methods used to collect, transport, and process postconsumer architectural paint in this state.

Annual Report Regulatory Citation

California Code of Regulations, Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program, Section 18954 requires PaintCare to submit an annual report that includes, in relevant part:

(3) Program Outline. Describe the paint stewardship program, including information on the following topics:

(A) A description of the methods used to collect, transport, and process postconsumer architectural paint, by type, in California.

(B) Description of how each consumer of architectural paint in California had an opportunity to recycle and properly manage their postconsumer paint on a state-wide basis, including the number, location, and type of collection points located in the state.

(C) Description of best management practices followed by service providers that are acting as collection points, which may include any training that the manufacturer or stewardship organization provided or required of service providers to ensure proper collection and management of postconsumer paint.

(D) A statement that the manufacturer or stewardship organization coordinated with existing household hazardous waste collection programs and retailers as potential collection points per Section 18953(a)(3)(E) and (F) during the reporting period.

A. Paint Drop-Off Sites and Services

A1. Site Types

The overall goal of the program is to increase recycling opportunities for households, businesses, and others with leftover paint. All suitable locations were invited to participate as paint drop-off sites, provided they meet the program's operational requirements. PaintCare partners with paint retailers, hardware stores, lumber centers, material reuse stores, household hazardous waste programs, solid waste facilities (e.g.,

transfer stations, recycling centers, landfills), and other site types to serve as paint drop-off sites.

The program's drop-off sites and services are summarized in the following tables. PaintCare considers a site (including events) as year-round if it was open at least one day per month in the reporting year or if it is a new site and the site plans to be open at least one day per month going forward.

Sites that are open less frequently are considered supplemental sites. Sites that stopped participating in the program during the year are listed as "partial year." All sites and HHW D2D collection program sponsors are listed in the appendix.

Year-Round Drop-Off Sites

Site Type	2021	2022	2023
Household Hazardous Waste Facility	122	122	120
Landfill	7	7	7
Other Site	4	7	7
Paint Recycler	5	3	3
Paint Retailer	626	647	667
Recycling Center	4	4	4
Reuse Store	8	7	12
Transfer Station	53	56	55
Total Sites	829	853	875

Supplemental Drop-Off Sites

Site Type	2021	2022	2023
Household Hazardous Waste Event Site/Number of Events	181/292	180/289	156/263
Household Hazardous Waste Facility (Partial Year)	0	0	1
Household Hazardous Waste Facility (Seasonal)	6	10	9
PaintCare Event Site/Number of Events	15/18	15/18	9/9
Paint Recycler (Partial Year)	0	2	0
Paint Retailer (Partial Year)	8	11	9
Reuse Store (Partial Year)	2	1	1
Transfer Station (Seasonal)	1	1	1
Total Sites	213	220	186

Services

Site/Service Type	2021	2022	2023
Direct Large Volume Pickup Site/Number of Pickups	566/643	581/670	718/844
Recurring Large Volume Pickup Site	73	74	71
HHW Door-to-Door Collection Program	19	19	19

[Notes regarding the tables above: (1) Only stand-alone D2D programs are counted in the table above. While PaintCare also partners with HHW facilities that host D2D operations, such as the city of Folsom, they are not included in the Door-to-Door Programs category to avoid counting multiservice HHW programs twice. (2) The Other Sites category in the upper table includes fire stations, public works yards, and other miscellaneous types of paint drop-off sites that do not fall into the primary categories. (3) PaintCare developed a new supplemental site type to represent HHW sites that were open part of the year in 2023.]

The locations of the year-round sites, supplemental sites, and LVP/RLVP sites are shown in the maps in section 4 of the report. A full list of all sites and D2D program partners is provided in the appendix.

The program's drop-off sites and services are described below.

Household Hazardous Waste Programs. PaintCare partners with household hazardous waste programs—either directly or indirectly—to cover the costs of their

paint collection bins, transportation, processing and in some cases additional on-site paint management activities. HHW programs are typically good program partners because they have an existing customer base and provide an “all-in-one” HHW drop-off opportunity.

Mono County consolidated operations to the Pumice Valley Landfill and Transfer Station HHW Facility, closing the Benton Road HHW facility, and another facility in Los Angeles County, the LAG SAFE Center HHW facility was closed temporarily for construction.

Paint Retailers. At the end of the year, PaintCare identified 2,369 paint retailers—including paint, hardware, and home improvement stores—with 1,588 considered potential paint retail drop-off sites. This number may change from year to year as stores open and close. PaintCare does not consider a store to be a potential drop-off site if it belongs to a corporate chain and the corporate headquarters has indicated that—as a group—they are not interested in serving as drop-off sites at this time. These are primarily big box stores, but they have included some non-big box stores in the past.

Of the 1,588 potential retail drop-off sites, 667 (42%) were participating as drop-off sites at the end of the year. Retail participation as a drop-off site is voluntary, and sites are not compensated.

PaintCare added 29 new retail sites and nine retail sites stopped participating. Of the nine stores that stopped participating, two paint retailers made operational changes and seven closed.

Reuse Stores. A special group of retailers are material reuse stores. Even though only some of these stores sell paint, they are considered to be potential drop-off sites. Those who are drop-off sites may operate paint reuse programs by donating or selling good quality leftover paint back to the local community to use, rather than sending it downstream through PaintCare for processing. PaintCare provided compensation for reuse services.

Of the 45 potential reuse drop-off sites, 12 (27%) were participating as drop-off sites at the end of the year. Two participated in the reuse program.

PaintCare continued its efforts to recruit and retain reuse store drop-off sites. The program added five new reuse sites, one each in Lake Elsinore, Marysville, and San Luis Obispo and two in Temecula. One reuse store in Modesto moved to a new location.

Solid Waste Facilities. PaintCare partners with solid waste facilities, including transfer stations, recycling centers, and landfills to be paint drop-off sites for their customers.

One transfer station was reclassified as an HHW seasonal facility.

Paint Recycler. Acrylatex in Azusa, Visions in Oroville, and Visions in Sacramento are latex paint recyclers and served as drop-off sites for the program. They accepted large quantities of leftover paint from eligible program participants in the state.

Other Sites. PaintCare partnered with several additional drop-off sites that don't fit under one of the above categories including public works yards and fire stations. PaintCare had seven other sites.

PaintCare Events. PaintCare held nine events. Of the nine events, seven were paint drop-off events to help clean out large volumes of stored-up paint and to increase paint drop-off opportunities. The total number of participants at these events was 2,211.

PaintCare had reuse tables at three of the drop-off events. Paint collected in the program that met the criteria for reuse was given away for free to participants.

Reuse focused paint giveaway events made up two of the nine PaintCare events. These events were held in Sacramento and Marysville. A total of 4,951 gallons of paint was given away to 401 participants.

Large Volume Pickup Service. PaintCare's LVP service provided a convenient option for painting contractors and other eligible program participants who accumulated large volumes of paint. The minimum amount to receive a direct pickup was 100 gallons. Typically, users of the service have accumulated paint over many years due to the institutional, logistical, and financial barriers to disposal. PaintCare aimed to remove these barriers by providing a free and convenient service. Common users of this service include contractors, builders, property managers, academic institutions, and homeowners, and are further described in the appendix.

Recurring Large Volume Pickup Service. Some LVP sites receive pickups on an on-going basis. RLVP sites sign a contract with PaintCare to allow them to keep PaintCare collection bins on site and fill them as they accumulate leftover paint. In addition, staff at these locations are trained by PaintCare on how to segregate products and store them until picked up by a transporter.

HHW Door-to-Door Collection Programs. PaintCare covered downstream transportation and processing costs for paint collected through HHW D2D programs. The program served 19 municipalities.

A2. Site Configuration

Nearly all PaintCare drop-off sites accept both latex paint and oil-based paint. LVP/RLVP sites may also manage both latex and oil-based paint through PaintCare, but with some limits on oil-based paint volumes.

Retail drop-off sites and PaintCare events accept paint from both households and qualifying businesses, while HHW programs, solid waste facilities, and some other locations may limit participation to their normal service area and customers, which may or may not include businesses. LVP/RLVP sites may be households, businesses, or others (i.e., government agencies or nonprofits).

PaintCare pays for paint collection bins, training materials, transportation of paint from the site, and paint processing for all drop-off and LVP/RLVP sites. Spill kits are provided to most sites. PaintCare may also negotiate payment for additional services with HHW sites, and solid waste facilities. Additional services include:

- Paint reuse
- Latex paint reprocessing
- Oil-based paint bulking
- Internal transportation (from remote sites to a primary location)

B. Paint Transportation and Processing

B1. Paint Transportation

PaintCare contracted with the following companies for transportation services. Individual sites are assigned to transporters based on costs and logistics.

Transporters

Name	Site Type Serviced
Acrylatex	LVP/RLVP, Paint Retailer
ACTenviro	HHW Event/Facility, Paint Recycler, LVP/RLVP, Other Site, PaintCare Event, Paint Retailer, Reuse Store, Solid Waste Facility
Clean Earth	HHW D2D Collection Program, HHW Event/Facility, LVP/RLVP, PaintCare Event, Paint Retailer, Reuse Store, Solid Waste Facility
Clean Harbors	HHW D2D Collection Program, HHW Event/Facility, Paint Recycler, LVP/RLVP, Other Site, PaintCare Event, Paint Retailer, Reuse Store, Solid Waste Facility
HHW Programs	HHW Event/Facility
Recology San Francisco	HHW Paint Retailer
US Ecology	HHW Event/Facility
Veolia	HHW Event/Facility
Visions	HHW Event/Facility, Paint Retailer, LVP, Solid Waste Facility
WM-Curbside	HHW D2D Collection Program, HHW Event/Facility

Transporters schedule pick up appointments in two ways: (1) by request as needed or (2) on a set schedule (e.g., every Monday). Transporters are responsible for delivery of empty collection bins and program supplies and for picking up full bins from drop-off sites. Transporters provide PaintCare all data on the transportation and processing of PaintCare products taken from all sites to their final destination. Shipments of PaintCare products from HHW facilities that have partnered with PaintCare are arranged between the HHW program and transporter, typically to coincide with the sites' regular shipments of other HHW. Contracted transporters and their downstream processors are subject to audit by PaintCare.

Various paint collection containers are used in the program. Most drop-off sites pack paint cans into cubic yard bins. A few sites pack paint cans into 55-gallon drums and large shipping containers (20 cubic yards or larger), and some bulk (pour off) paint into drums. Full collection bins of commingled paint (latex and oil-based paint cans in the same collection container) are transported to the transporters' facilities for sorting by type. From there, latex paint is transported to a latex paint recycler and oil-based paint

is transported to downstream processors. Collection containers of paint sorted by type at drop-off sites (typically by HHW programs) are either shipped to the transporters' facilities or are shipped directly to downstream processors.

Containers are shipped using either a bill of lading or a hazardous waste manifest as appropriate.

B2. Latex Paint Processing

The following methods were used to process latex paint:

Reuse. Latex paint was sold or given away in its original labeled containers without any alteration of the container contents.

Paint-to-Paint Recycling. Latex paint was sorted, blended, and sometimes re-tinted into recycled-content latex paint for local use or domestic or international sale.

Lightweight Aggregate. Latex paint was used as a component in lightweight aggregate. The lightweight aggregate was then offered for sale as lightweight aggregate, used to produce landscape products, or used as a component in various precast concrete products.

Alternative Daily Cover. Latex paint was used as a component in alternative daily landfill cover (ADC).

Disposal. Dry or solidified latex paint was landfilled.

B3. Oil-Based Paint Processing

The following methods were used to process oil-based paint:

Reuse. Oil-based paint was sold or given away in its original labeled containers without any alteration of the container contents.

Energy Recovery. Oil-based paint was processed for energy recovery at a waste-to-energy facility and/or cement kiln.

Incineration. Oil-based paint was incinerated.

B4. Container Recycling

The following table shows the tons of metal and plastic paint containers recycled during the year.

Container Recycling

Description	2021	2022	2023
Tons	2,038	1,845	2,002

Downstream paint processors and HHW programs sent empty metal and plastic paint containers for recycling when possible. Commodity market conditions have an impact on the extent to which container recycling is feasible.

C. Best Management Practices for Drop-Off Sites

The program has agreements with owners or operators of all drop-off sites, and other partners, that set forth collection procedures. PaintCare agreements require that sites meet all requirements of local, state and federal law, regulations and policies.

PaintCare requires all sites to be staffed during operating hours, store PaintCare products in a secure location, and follow all procedures covered in site trainings and PaintCare site guidelines.

C1. Site Training and Guidelines

All new sites (other than LVPs) receive a program procedures manual and all sites (other than HHWs and LVPs) also received on-site, in-person training that covered the topics in the manual including identification and screening of program products, paint storage, spill response, arranging to have paint picked up, and record keeping. A copy of the current site guidelines from the procedures manual for drop-off sites is included in the appendix.

Site personnel are required to visually inspect, but not open, containers of paint to confirm that they are acceptable program products and then place them in spill proof collection bins provided by the program. Unlabeled and leaking containers are not accepted at retail or other non-HHW sites; however, trained staff at HHW facilities and events can accept and prepare them for management under their program to the extent permissible under applicable law.

C2. Site Visits

PaintCare staff visit most drop-off sites on a regular basis to check on their operations and to provide additional training and consumer outreach materials as needed.

PaintCare also conducted educational site visits to paint retailers that are not active drop-off sites. The purpose of these visits was to educate the retailers on the program, recruit new drop-off sites, and offer point-of-sale educational materials.

C3. Paint Collection Bins

Drop-off sites are equipped with collection bins to store PaintCare products, with sites required to ship a minimum of two bins unless otherwise granted an exception by PaintCare. Sites are required to keep collection bins in a secure location that is not directly accessible to the public. Depending on the location of the bins, and preference of the site, PaintCare supplies two types of bins: fiber bins (made of corrugated cardboard) and reusable bins (plastic).

C4. Paint Acceptance Limits

PaintCare requires sites to accept at least 5 gallons of paint per customer per day. Some drop-off sites voluntarily accept more than 5 gallons; many accept up to 20 gallons, and a few sites accept up to 500 gallons per customer.

C5. Scheduling Bin Pickups

All drop-off sites are advised to order a bin pickup before they reach their storage capacity. Sites in urban areas receive pickups within five business days of a request; sites in rural areas receive pickups within ten business days. Many sites in high volume areas have also been placed on an automatic pickup schedule.

D. Coordination with Existing HHW Programs and Retailers

D1. HHW Programs and Solid Waste Facilities

PaintCare continued its efforts to partner with all HHW programs and maintained all existing HHW partnerships. Kings County is the only HHW program in the state collecting paint that does not partner with PaintCare. Imperial County has chosen not to collect paint at their HHW facility and refers households and businesses to local PaintCare retail locations. PaintCare reached out to Kings and Imperial counties to discuss joining the program.

D2. Paint Retailers and Reuse Stores

PaintCare maintains a database of California paint retailers and reuse stores, including independent and corporate stores. PaintCare recruits new sites through in-person site visits and coordination with corporate contacts at paint retailers. PaintCare continues its efforts to recruit and retain retail and reuse store drop-off sites. While some retail and reuse stores closed or moved within the year, PaintCare gained a net of 25 retail and reuse store drop-off sites during the reporting period.

Section 4. Description of Goals and Activities

Annual Report Statutory Citation

California PRC, Division 30. Part 7. Chapter 5. Architectural Paint Recovery Program, Section 48705 requires PaintCare to submit an annual report that includes, in relevant part:

- (1) The total volume of architectural paint sold in this state during the preceding fiscal year.
- (2) The total volume of postconsumer architectural paint recovered in this state during the preceding fiscal year.

Annual Report Regulatory Citation

California Code of Regulations, Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program, Section 18954. Annual Report Compliance Criteria requires PaintCare to submit an annual report that includes, in relevant part: (4) Description of goals and activities based on the stewardship plan. State goals from the approved stewardship plan, the baseline from which goals were measured, and report on achievement during the reporting period. Describe any adjustments to goals stated in the approved stewardship plan that may be made for the upcoming reporting period and accompanying rationale for those changes. The annual report must include quantitative information and discussion on the following categories pursuant to PRC §48705(a) and PRC §48703(d):

- (A) The total volume of architectural paint sold, by type, in the state during the preceding reporting period.
- (B) The total volume of postconsumer architectural paint recovered, by type, in the state during the preceding reporting period.
- (C) Disposition of postconsumer paint collected, by type and by estimated volume, including name(s) and corporate address(es) for contracted processors for each

A. Program Goals

The California Paint Stewardship Law requires PaintCare to establish goals to reduce the generation of postconsumer paint, to promote the reuse of postconsumer paint, and for the proper end-of-life management of postconsumer paint, based on current household hazardous waste program information.

This section of the report addresses architectural paint recovery and recycling goals. Section 6 (Education and Outreach) addresses postconsumer paint reduction and reuse goals.

B. Program Convenience

PaintCare analyzed the convenience level offered by drop-off sites using ArcGIS, a mapping and analytics software, and U.S. Census Bureau 2020 population data.

Some sites (e.g., HHW facilities) have geographic limitations; they are only available to residents of their own city, county, or jurisdiction. For these sites, PaintCare tracks their service area restrictions and only counts the population for those residents who are (1) within a 15-mile radius, and (2) within the site's service area.

PaintCare established goals to provide paint drop-off sites according to the criteria that follow. Application of these criteria resulted in a goal of 790 drop-off sites as approved in the program plan.

Distribution Criterion. Provide 95% of the state's residents access to a drop-off site within 15 miles.

The program's 875 year-round drop-off sites provided 99.1% of the state's residents access to a drop-off site within 15 miles. When supplemental sites were included, coverage increased to 99.4%.

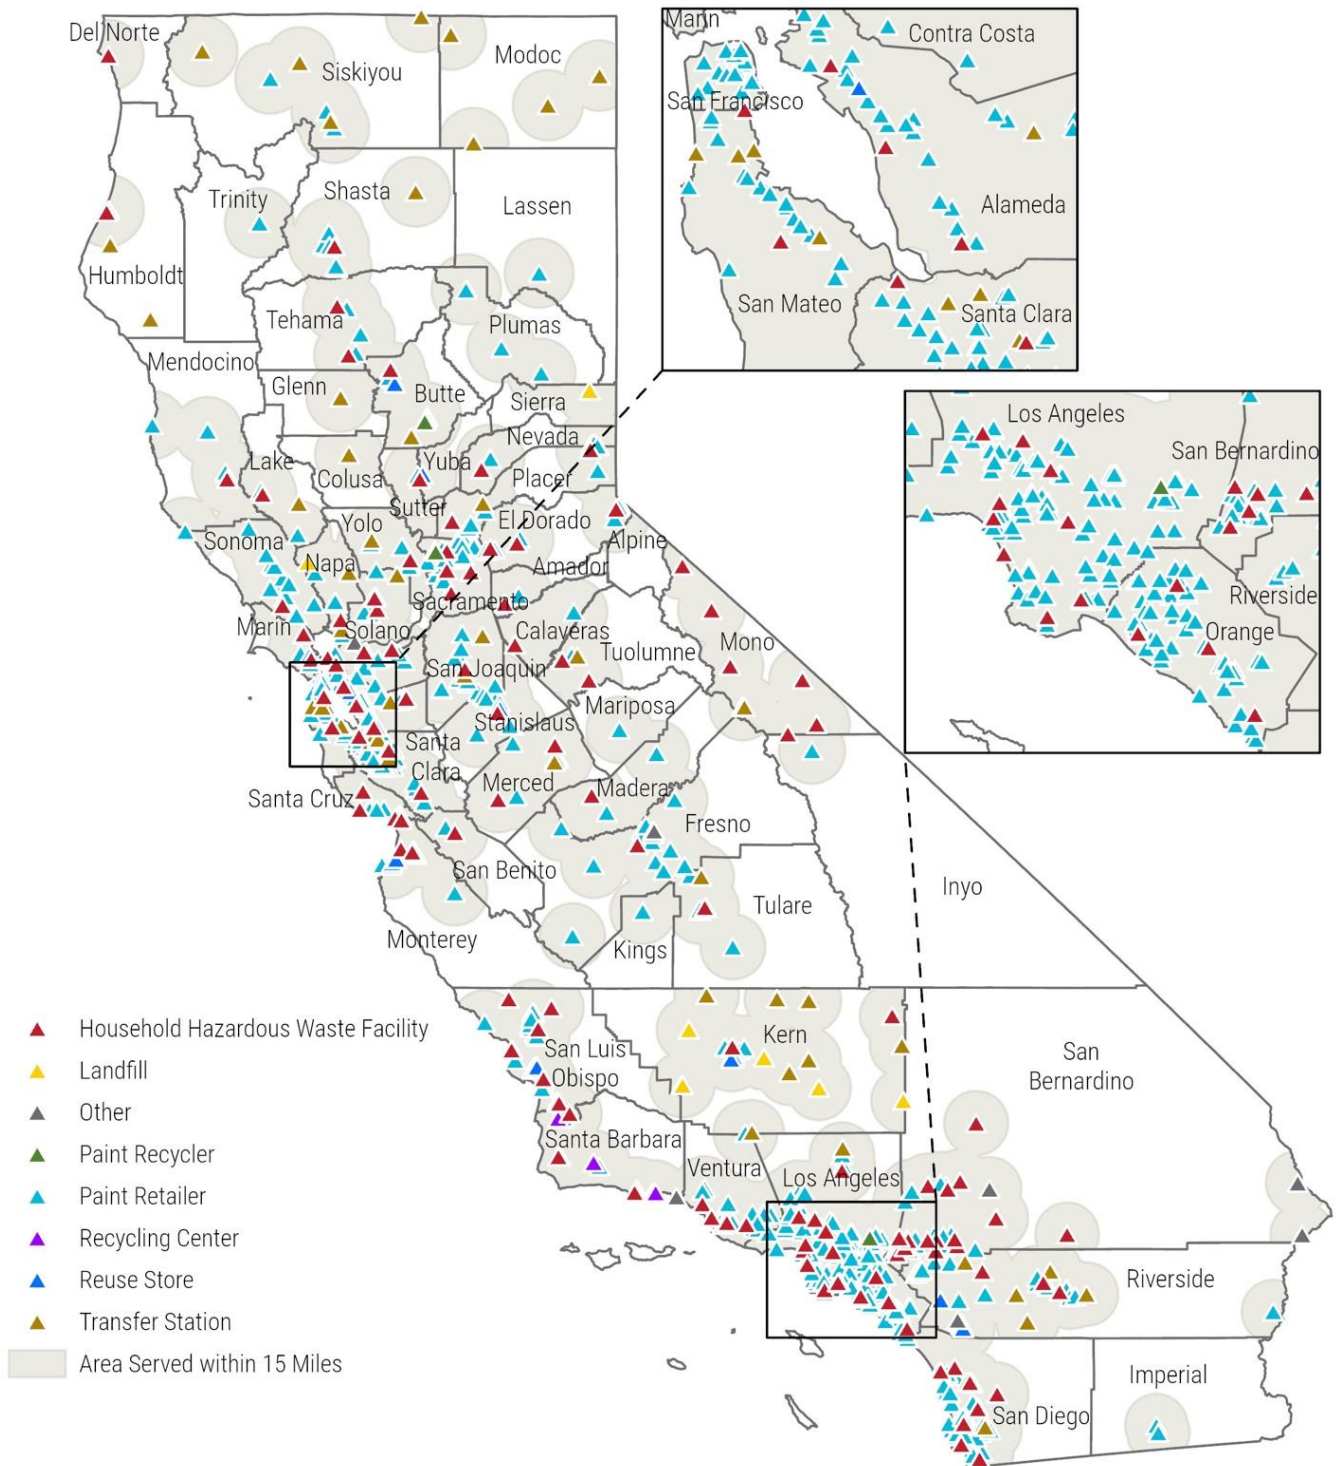

Population Criterion. Provide at least one drop-off site for every 50,000 residents in California.

California's population as determined by the U.S. Census Bureau for 2020 was 39,538,223. The program's 875 year-round drop-off sites provided one site for every 45,187 residents of the state. When the program's 186 supplemental sites were included, coverage increased to one site for every 37,265 residents of the state.

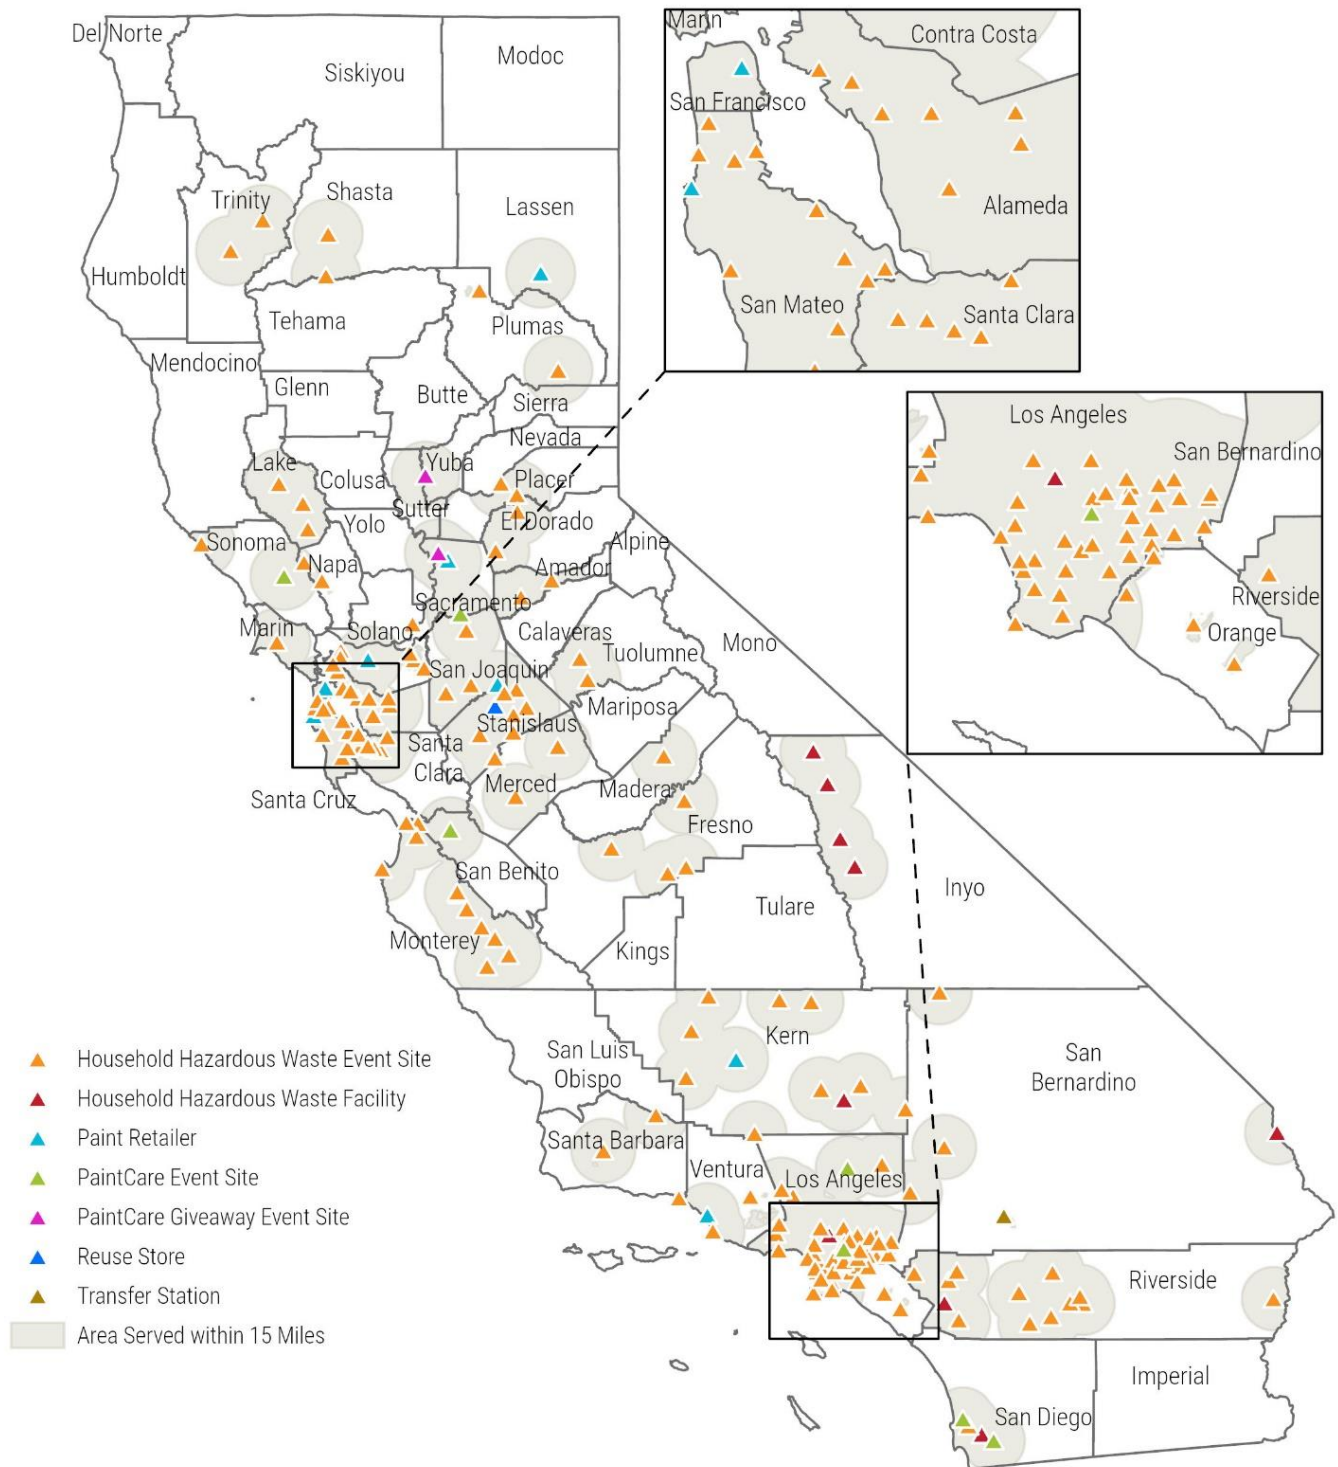

Prior to the implementation of the PaintCare program, there were a fair number of HHW programs across California, but service levels varied and some HHW programs did not accept from businesses. With the addition of 755 year-round sites, PaintCare has made it significantly more convenient to recycle paint in California.

Maps. The following maps show the locations of the sites and services available during the year: (1) year-round sites; (2) supplemental sites; (3) year-round and supplemental sites; and (4) large volume pickup sites, which were not included when conducting convenience analysis.

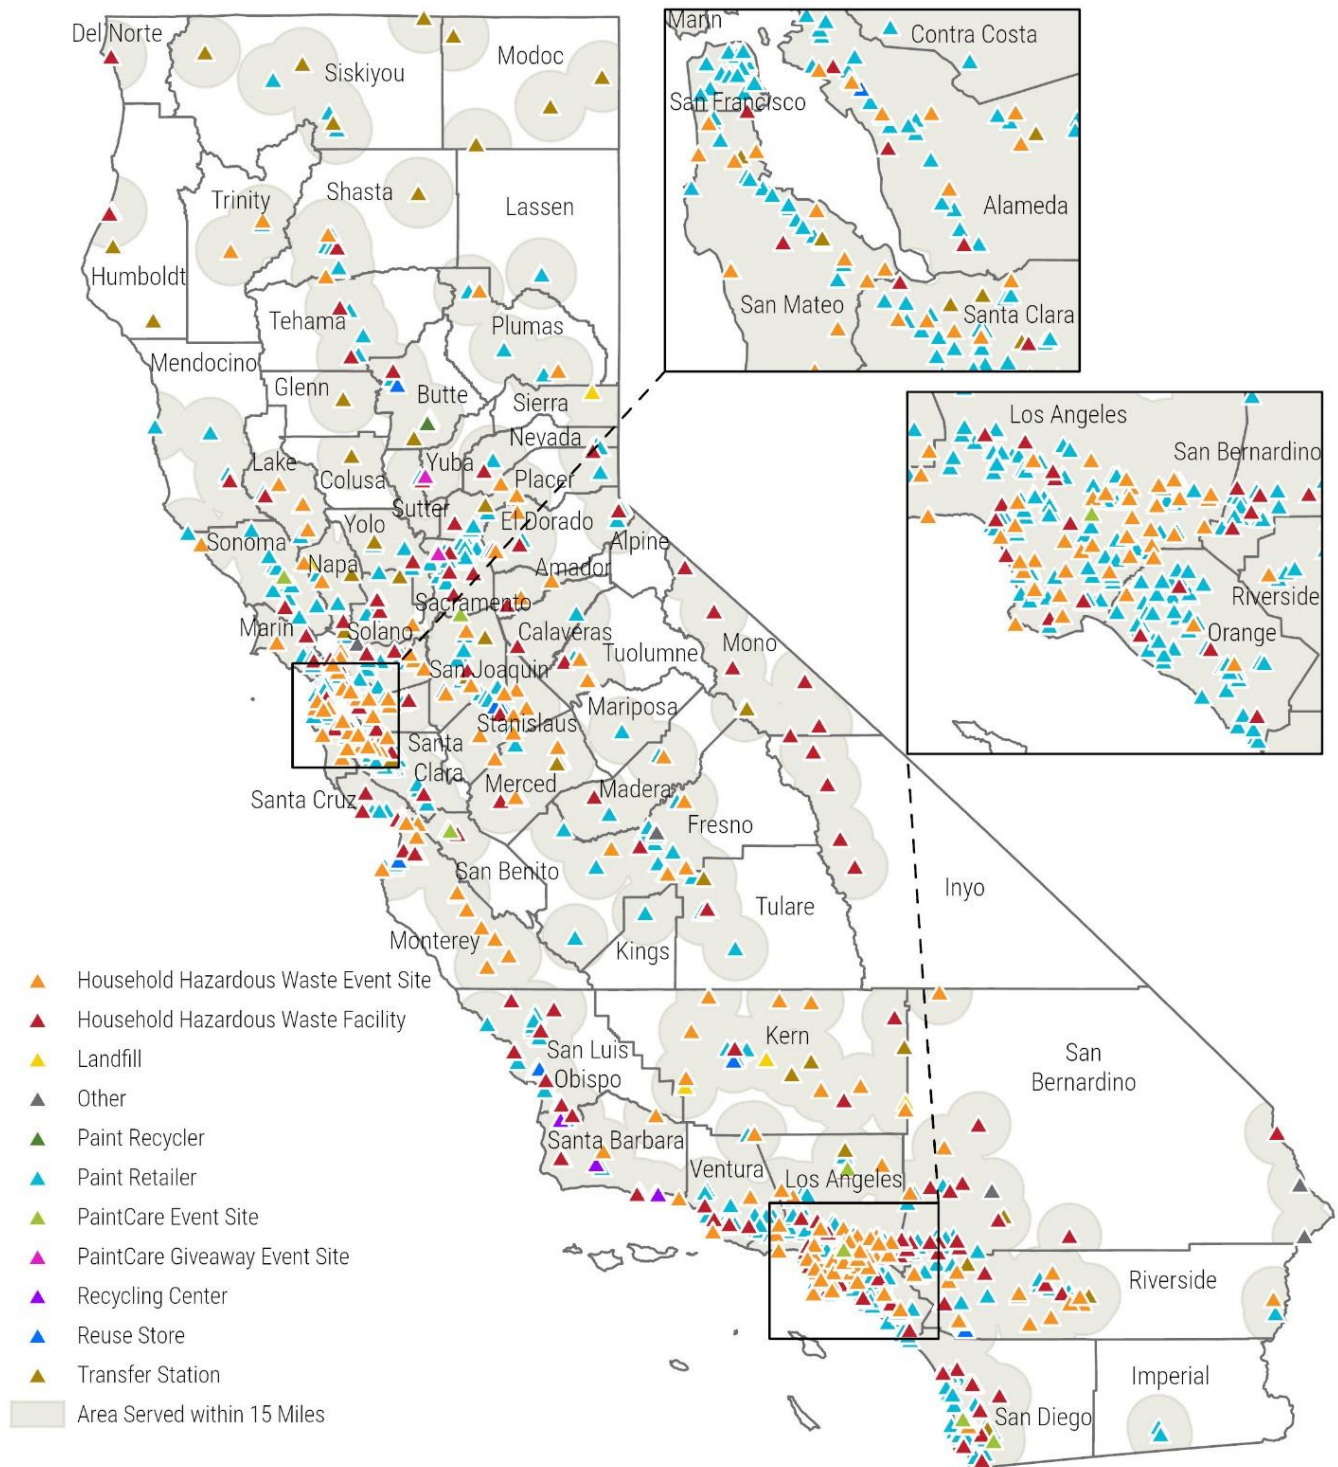

Map 1. Year-Round Drop-Off Sites

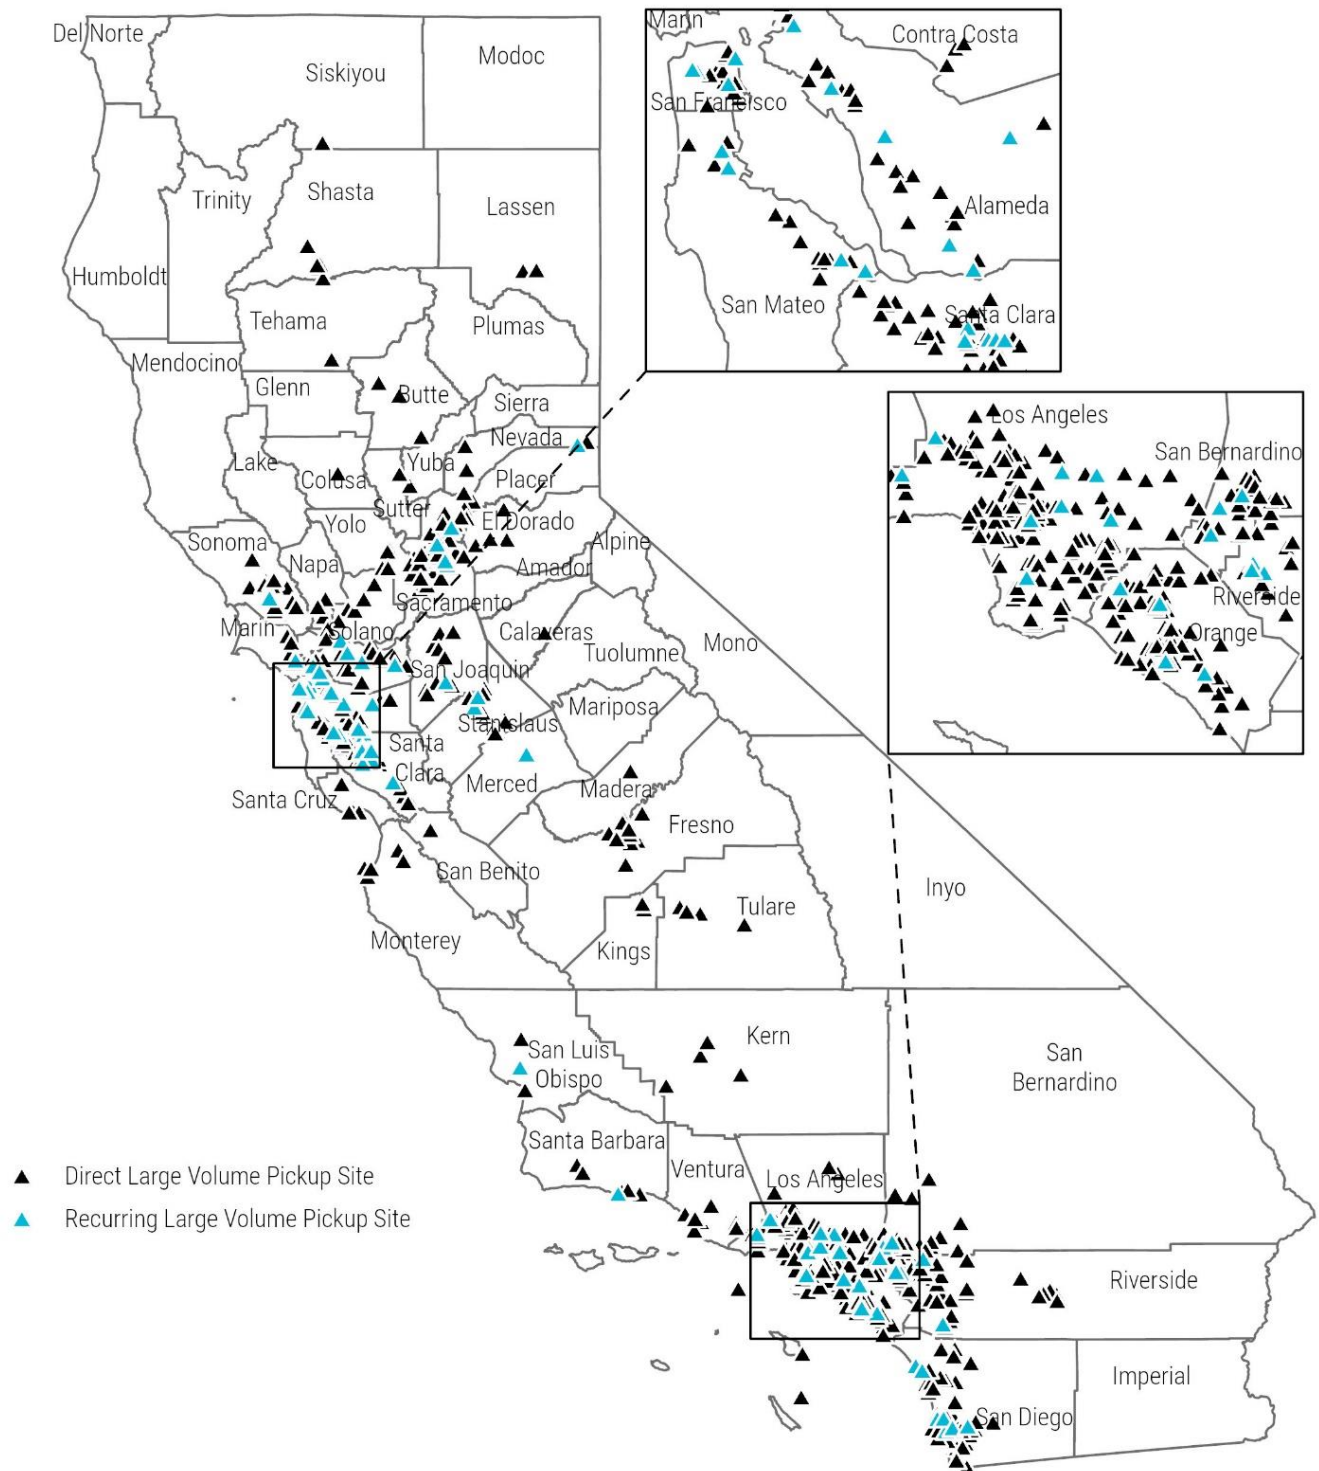

Map 2. Supplemental Drop-Off Sites

Map 3. Year-Round and Supplemental Drop-Off Sites

Map 4. Large Volume Pickup Sites

C. Paint Sales

The volume of architectural paint sold in the year fell to approximately 65 million gallons. The following table shows paint sales, broken out by container size categories, in the last three program years.

Paint Sales in Gallons

Container Size	2021	2022	2023
Half pint or smaller	73,412	68,175	68,037
Larger than half pint up to smaller than 1 gallon	2,365,551	1,887,429	1,904,279
1 gallon	24,080,068	21,375,054	20,602,974
Larger than 2 gallons up to 5 gallons	47,469,569	46,309,130	42,454,805
Total	73,988,600	69,639,788	65,030,095

D. Collection Volume and Recovery Rate

The table below provides the gallons of paint collected, gallons of new paint sold, and the resulting recovery rate. The recovery rate is a ratio of the volume (number of gallons) of paint collected compared to the volume of paint sold in the program during the same time period.

Gallons Collected, Sold and Recovery Rate

Description	2021	2022	2023
Paint Collected (gallons)	3,909,393	3,494,072	3,432,553
New Paint Sold (gallons)	73,988,600	69,639,788	65,030,095
Recovery Rate	5.3%	5.0%	5.3%

E. Methodology for Determining Volumes

PaintCare typically receives reports of gross pounds of paint collected, along with the number of bins or other collection containers from its transporters or drop-off site partners. Gallons of paint collected are calculated by removing the estimated weight of collection bins and paint cans and converting the remaining weight to volume, typically using 10 pounds per gallon for the conversion.

An estimate of gallons collected at each site during the year is included in the appendix.

For HHW programs that reprocessed latex paint, data provided to PaintCare was the volume of paint reprocessed and given out to the public. If the paint was not given away in the year, even if reprocessed during the year, it was not counted in the year.

Data for reuse was reported by gallons given away. Documentation supporting the volume of paint given away for reuse was provided to PaintCare.

F. Paint Processing Methods (Disposition) and Volume

The following tables provide the volumes and paint processing methods for latex and oil-based paint during the year. Processed volume differs from collected volume because not all paint is processed in the same year that it is collected; the volumes reported as processed in one year may include some paint that was collected at the end of the previous year. Due to rounding, percentages may not add up to 100%.

Latex Paint Processing Methods

Disposition	2021 Gallons	2021 Percent	2022 Gallons	2022 Percent	2023 Gallons	2023 Percent
Reuse	252,550	7	219,568	8	123,143	4
Paint-to-Paint Recycling	2,294,571	68	2,043,057	71	2,446,480	83
Lightweight Aggregate	210,157	6	154,687	5	0	0
Energy Recovery	402,255	12	157,612	6	0	0
ADC	0	0	469	<1	0	0
Disposal	238,582	7	307,652	11	382,843	13
Total	3,398,115	100	2,883,045	100	2,952,466	100

Oil-Based Paint Processing Methods

Disposition	2021 Gallons	2021 Percent	2022 Gallons	2022 Percent	2023 Gallons	2023 Percent
Reuse	14,094	3	15,658	4	12,363	3
Energy Recovery	349,911	74	205,683	49	167,406	46
Incineration	109,669	23	196,749	47	185,467	51
Total	473,674	100	418,090	100	365,236	100

Latex paint recycling increased due to two recyclers changing their processing methods. A recycler that utilized energy recovery closed, and another recycler that utilized light weight aggregate as a processing method made an operational change. Reuse decreased because a recycler made an operational change to divert less paint for reuse.

Incineration for oil-based increased due to operational decisions made by a transporter.

G. Latex Paint Processing Methods and Processors

As described previously, the following methods were used to process latex paint:

Reuse, paint-to-paint recycling, and disposal.

Latex Paint Processors

Processor	Location	Process
Acrylatex Coatings & Recycling, Inc.	1000 W Kirkwall Rd Azusa, CA 91702	Reuse, Paint-to-Paint Recycling
Apex Regional Landfill	13550 US Hwy 93 N Las Vegas, NV 89165	Disposal
Chiquita Canyon Landfill	29201 Henry Mayo Dr Castaic, CA 91384	Disposal
GDB International, Inc.	6775 Speedway Blvd Las Vegas, NV 89115	Paint-to-Paint Recycling
HHW Facilities	Anaheim, Chico, Elk Grove, Fremont, Grass Valley, Huntington Beach, Irvine, Lakeport, Manteca, Marina, Martinez, Modesto, Mojave, Petaluma, Red Bluff, Redding, Richmond, Riverside, Sacramento, San Bernardino, San Francisco, San Juan Capistrano, San Mateo, San Rafael, Stockton, Ukiah, Vacaville, Woodland, Yuba City	Reuse, Paint-to-Paint Recycling
La Paz County Landfill	26999 Hwy 95, Mile Post 128 Parker, AZ 85344	Disposal
Reuse Stores	Chico, Oakland	Reuse
South Yuma County Landfill	19536 S Ave 1 E Yuma, AZ 85365	Disposal
Visions Paint Recycling, Inc.	4105 S Market Ct Ste A Sacramento, CA 95834	Reuse, Paint-to-Paint Recycling

H. Oil-based Paint Processing Methods and Processors

As described previously, the following methods were used to process oil-based paint:

Reuse, energy recovery, incineration.

Oil-Based Paint Processors

Processor	Location	Process
Ash Grove Cement	1801 North Santa Fe Ave Chanute, KS 66720	Energy Recovery
Ash Grove Cement	4343 Hwy 108 Foreman, AR 71836	Energy Recovery
Buzzi Unicem	2524 South Sprigg St Cape Girardeau, MO 63703	Energy Recovery
Buzzie Unicem	3301 South County Rd 150W Greencastle, IN 46135	Energy Recovery
Clean Harbors Environmental Services (Aragonite facility)	11600 North Aptus Rd Grantsville, UT 84029	Incineration
Clean Harbors Environmental Services (Kimball Facility)	2247 South Hwy 71 Kimball, NE 69145	Incineration
Green America	10107 MO-79 Hannibal MO, 63401	Energy Recovery
HHW Facilities	Anaheim, Chico, Elk Grove, Fremont, Grass Valley, Huntington Beach, Irvine, Lakeport, Manteca, Marina, Martinez, Modesto, Mojave, Petaluma, Red Bluff, Redding, Richmond, Riverside, Sacramento, San Juan Capistrano, San Mateo, San Rafael, Stockton, Ukiah, Vacaville, Woodland, Yuba City	Energy Recovery
Lehigh Cement	3084 West County Rd 225 South Logansport, IN 46947	Energy Recovery
Reuse Stores	Chico	Reuse

J. Paint Collection Volume by Site Type or Service

The following table shows the volume of paint collected by site type or service. Due to rounding, percentages may not add up to 100%.

Collection Volume by Site Type or Service

Site Type/ Service	2021 Gallons	2021 Percent	2022 Gallons	2022 Percent	2023 Gallons	2023 Percent
HHW D2D Collection Program	19,070	1	12,028	<1	12,973	<1
HHW Facility/ Event	2,019,603	52	1,749,177	50	1,641,183	48
Landfill	9,655	<1	9,368	<1	2,213	<1
LVP/RLVP	262,650	7	260,677	7	293,412	9
Other Site	12,614	<1	10,731	<1	13,494	<1

Total	3,909,393	100	3,494,072	100	3,432,553	100

Section 5. Financing Mechanism

Annual Report Statutory Citation

California PRC, Division 30. Part 7. Chapter 5. Architectural Paint Recovery Program, Section 48705 requires PaintCare to submit an annual report that includes, in relevant part:

- (4) The total cost of implementing the architectural paint stewardship program.
- (5) An evaluation of how the architectural paint stewardship program's funding mechanism operated.
- (6) An independent financial audit funded from the paint stewardship assessment.

Annual Report Regulatory Citation California Code of Regulations, Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program, Section 18954. requires PaintCare to submit an annual report that includes, in relevant part:

(5) Financing Mechanism. The annual report shall include the total cost of implementing the architectural paint stewardship program and an evaluation of how the program's funding mechanism operated, including whether or not the funding was sufficient to recover, but not exceed, the administrative, operational, and capital costs of the manufacturer or stewardship organization's program. Include a statement that any surplus funds are put back into the program to reduce the costs of the program, including the assessment amount. Any proposed change in the amount of the architectural paint stewardship assessment must be submitted to the department for re-approval (see §18952. Submittals). If a manufacturer or stewardship organization conducts activities that are separate from the implementation and management of the California paint stewardship program, then the annual report shall include documentation on how the collection and expenditure of assessment funds shall be kept separate from other activities of the manufacturer or stewardship organization and the methodology for distribution of shared costs. Consistent with PRC §48705(a)(5), the annual report shall include the following:

- (A) Assessment amount per container
- (B) Total program cost
- (C) Capital costs
- (D) Cost(\$)/capita
- (E) Cost(\$)/gallon collected
- (F) Education/Outreach (% of total program cost)

- (G) End-of-life materials management (% of total program cost, with line items for reuse, transportation, recycling, fuel incineration, and proper disposal)
- (H) Program administration (% of total program cost, including annual administrative fee for service payments to the department)
- (I) Surplus funding, if any, and how it will be applied to reduce program costs

A. Financing Mechanism

PaintCare maintained its financing mechanism and fully covered the cost of continuing to implement the program through the year. The funding system places an assessment (PaintCare fee) on every container of architectural paint sold in California. The fees were set at a rate to cover but not exceed the cost of implementing the California program.

A1. PaintCare Fee

PaintCare fees placed on the sale of new paints are based on container sizes as follows:

2023 PaintCare Fee Schedule

Size	Container Size	Fee
Very Small	Half pint or smaller	\$0.00
Small	Larger than half pint up to smaller than 1 gallon	\$0.30
Medium	1-2 gallons	\$0.65
Large	Larger than 2 gallons up to 5 gallons	\$1.50

Manufacturers and/or their designated representatives reported sales and remitted fees to PaintCare directly.

Based on the program's financial performance, no adjustment to either the fee structure or the reporting system is presently necessary.

A2. Total Program Cost

Total program cost for the year was \$38,409,328.

The independent financial audit of the California PaintCare program (referred to in the financial audit by its formal name, the California Architectural Paint Recovery Program) is in the appendix. Detailed information on program costs are included in the audit.

A3. Capital Costs

There were no capital costs during the year.

A4. Cost per Capita

The cost per capita for the year was \$0.97.

Cost per capita was calculated using the U.S. Census Bureau 2020 population of 39,538,223.

A5. Cost per Gallon

The cost per gallon (of the 3,432,553 gallons of paint collected) during the year was \$11.19, compared to \$10.06 the previous year.

Note that PaintCare reports and uses collected gallons in its calculation, rather than processed volume, because PaintCare is charged for all services (transportation and processing) when the paint is collected rather than when it is actually processed.

A6. Education/Outreach

Education/outreach cost for the year was \$4,624,855—12% of total program costs.

A7. End-of-Life Materials Management

Transportation cost for the year was \$4,108,780—11% of total program costs.

Processing cost for all disposition methods was \$18,398,323 for the year—48% of total program costs.

Actual cost broken down by specific processing method is not available due to the format of transport and processing vendors' contract pricing, which maximizes (and charges the program for) highest-best use, generally considered to be paint-to-paint recycling at this time.

The costs for each disposition method are estimated below:

Disposition Method	Estimated Cost	Percent of Total Program Cost
Reuse	751,448	2
Paint-to-Paint Recycling	13,566,960	35
Energy Recovery	928,350	2
Incineration	1,028,508	3
Disposal	2,123,057	6
Total	\$18,398,323	48%

A8. Administrative Costs

Administrative costs (also called General and Administrative) included administrative and corporate staff, back-office support (e.g., information technology, human resources, legal, accounting, and government affairs), insurance, data management systems, annual financial audit, software licenses, professional services for corporate or organization-wide matters, occupancy, general communications, and other supplies and services that support all PaintCare programs. These costs were shared across all PaintCare programs and allocated relative to population.

California's share of the administrative allocation was \$3,154,232 or 8% of total program costs.

Service payments to CalRecycle are not presented as an administrative expense in the audited financial statements, but rather as a direct California operational expense. Payment to CalRecycle was \$547,035 or 1% of total program costs.

A9. Surplus Funding

The net assets of the California program at the end of the year were \$50,130,107 or 131% of annual expenses. Net assets (investments and/or checking account balance) are also referred to as reserves. Reserves are projected to fall below 100% of annual operating expenses by the end of 2025.

A10. Financial Summary

The following tables shows program revenue and expenses.

Revenue and Expenses

Revenue Category	2021	2022	2023
Small Containers	\$3,311,771	\$2,456,408	\$2,273,585
Medium Containers	18,060,051	14,991,175	13,337,087
Large Containers	15,190,262	14,369,156	12,657,858
Total Revenue	36,562,083	31,816,739	28,268,530

Expense Category	2021	2022	2023
Paint Processing	19,585,838	18,343,332	18,398,323
Paint Transportation	3,671,922	4,014,670	4,108,780
Paint Collection Supplies and Support	3,382,046	3,788,395	3,637,199
Communications	4,491,661	4,517,754	4,624,855
Personnel, Professional Fees, Other	1,179,108	1,308,612	3,938,904
State Agency Administration Fees	294,095	255,007	547,035
General and Administrative	2,954,448	2,922,284	3,154,232
Total Expenses	35,559,118	35,150,053	38,409,328

Other Expenses	2021	2022	2023
Allocation of Investment Activity	2,681,305	(5,723,364)	3,967,976
Change in Net Assets	3,684,270	(9,056,678)	(6,172,822)
Net Assets, Beginning of Year	61,675,337	65,359,607	56,302,929
Net Assets, End of Year	\$65,359,607	\$56,302,929	\$50,130,107

Reserve Level	184%	160%	131%
Cost Per Gallon of Paint Collected	\$9.10	\$10.06	\$11.19

Note: (1) Values in this table are obtained from a financial worksheet that includes additional subcategories and cents. Due to rounding, Total Revenue and/or Total Expenses may differ by a few dollars in some years. (2) California's program regulations require reporting of capital costs. None were incurred in the period covered in the Financial Summary table.

Notable changes between the last two program years:

- Paint sales continue to be slower than anticipated resulting in lower than anticipated revenue.
- The Personal, Professional Fees and Other category increased in 2023 primarily due to bad debt expense incurred from accounts receivable that were deemed unrecoverable and were written off.
- The General and Administrative expenses increased in 2023 because of new corporate-level positions.

B. Reserves

Reserves represent the net assets (investments and/or checking account balance) of the program. Reserves provide the program with a balance that is sufficient to pay its bills in times of either higher than expected paint collection (higher expenses), lower than expected paint sales (lower revenue), or a combination of the two.

C. Investment Activity

PaintCare invests a portion of its reserves (from most PaintCare programs) in a financial portfolio. PaintCare maintains investments for all programs in a single portfolio. Claim of ownership in the investment portfolio was shared by all participating programs and allocated among them based on relative net asset balances. Programs that have positive net asset balances have a claim on the assets invested in the portfolio; programs with negative net asset balances carry a liability representing an amount due to the portfolio.

D. Formation of Limited Liability Companies

In 2015, to better separate each state program in terms of liability and financial independence, PaintCare Inc. began implementing a plan to establish sole-member limited liability companies that are each dedicated to administering the paint stewardship program in a particular state. As of the date of this report, PaintCare programs now operate under an LLC format in Colorado, Connecticut, District of Columbia, Maine, Oregon, Rhode Island, Washington, and New York. The remaining programs continue as before. While this process has taken longer than expected, PaintCare still plans to transition the remaining jurisdictions to sole-member limited liability companies over the course of the next few years.

Section 6. Education and Outreach

Annual Report Statutory Citation

California PRC, Division 30. Part 7. Chapter 5. Architectural Paint Recovery Program, Section 48705 requires PaintCare to submit an annual report that includes, in relevant part:

(7) Examples of educational materials that were provided to consumers the first year and any changes to those materials in subsequent years.

Annual Report Regulatory Citation

California Code of Regulations, Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program, Section 18954 requires PaintCare to submit an annual report that includes, in relevant part:

(4) Description of goals and activities based on the stewardship plan. State goals from the approved stewardship plan, the baseline from which goals were measured, and report on achievement during the reporting period.

(6) Education and Outreach. Describe educational and outreach activities in context of those identified in the stewardship plan. Provide a description of educational materials that were provided to retailers, consumers, and contractors during the reporting period and provide electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), if applicable. These education and outreach materials may include, but are not limited to, any of the following per PRC §48703(e):

- (A) Signage that is prominently displayed and easily visible to the consumer.
- (B) Written materials and templates of materials for reproduction by retailers to be provided to contractors and consumers at the time of purchase or delivery or both.
- (C) Promotional materials or activities, or both, that explains the purpose of paint stewardship and the means by which it is being carried out.
- (D) Links to website(s) created and maintained by the stewardship organization.

Introduction

PaintCare's education and outreach efforts focus on building awareness of the program and encompass four primary messages: reduce, reuse, recycle, which PaintCare has modified to "Buy right, Use It Up, Recycle the Rest" and proper disposal. PaintCare is committed to providing robust and successful education and outreach using a variety of

communication tools. The main objective of outreach was to drive the public to PaintCare's website to find a drop-off site using PaintCare's site locator search tool.

PaintCare created several new educational outreach materials in 2023. These included a general consumer brochure and poster series highlighting tips for source reduction and reuse, a brochure for retail staff encouraging participation as a drop-off site, and an illustrated youth outreach activity booklet.

The relative amount of spending dedicated to outreach activities about the California program are summarized in the following table:

Relative Spending on Outreach Activities

Activity	Percent
Digital Ads	31
Media Agency Support	16
Social Media	15
Video	15
Print	11
Streaming Audio	3
Event Promotion	2
Radio	2
Production	2
Fulfillment	1
Conferences & Memberships	1
Translations	<1
Surveys	<1

A. Signage Displayed to Customer

PaintCare provides several signs to drop-off sites to help them educate the public about the program, screen program products, and address any concerns about illegal dumping. Drop-off sites may order the following signs: Program Products (English/Spanish), Program Partner, Combination (program partner with simplified products list), No Dumping, and Please Wait for Assistance.

B. Print Materials

B1. Point of Sale Print Materials

PaintCare continued to distribute print materials to retailers for them to make available to consumers to educate them about the PaintCare program. Staff fulfilled requests for materials totaling 80,268 brochures, mini cards, fact sheets, posters, and other materials during the year. Program staff also delivered additional materials in person during site visits.

PaintCare provided counter mats to retailers for use in the paint department to reference when customers have questions. The counter mat is popular with retailers and more likely than the poster to be seen by customers while they wait for their paint to be mixed.

Larger versions of the materials shown below are included in the appendix and are available on the PaintCare website.

In August, PaintCare sent postcards to paint retailers with information about state pricing laws.

In December, PaintCare sent letters and fact sheets to 60 paint retailers known to sell paint online. The letter provided a summary of PaintCare program information for retailers and a reminder that online paint sales are included under the paint stewardship law.

B2. Fact Sheets

Several fact sheets are available on PaintCare's website for different target audiences, and printed versions are distributed upon request. Minor updates are made throughout the year. Current versions of the fact sheets on PaintCare's website include:

- How Does the Paint Stewardship Program Affect Paint Retailers?
- How to Become a Retail Drop-Off Site
- About PaintCare Fees
- Information for Solid Waste Facilities Including Transfer Stations, Recycling Centers, and Landfills
- Reuse Programs – Compensation and Reporting
- Information about the Large Volume Pickup Service
- Information for Painting Contractors

B3. Translations

PaintCare translates program brochures and fact sheets into languages other than English upon requests from paint retailers and other stakeholders. PaintCare has translated its program brochure into Amharic, Arabic, Armenian, Bengali, Cantonese, Farsi, French, Haitian Creole, Hawaiian, Hmong, Italian, Japanese, Khmer, Korean, Lao, Mandarin, Polish, Portuguese, Punjabi, Russian, Somali, Spanish, Tagalog, Thai, Turkish, Ukrainian, Vietnamese, and Yiddish. Three widely used fact sheets that provide information about the LVP service, guidance for painting contractors, and the program products list are also available in the 29 languages listed above. PaintCare maintains a Spanish language translation button on its website, making the site fully bilingual. Additionally, live interpretation in Spanish and other languages is available on PaintCare's telephone hotline by request. PaintCare provides information on how to access translations and hotline interpretation at www.paintcare.org/language-assistance/.

C. Promotional Materials/Activities Explaining Product Stewardship

C1. Press Releases and Earned Media

PaintCare issued press announcements throughout the year that resulted in the program being mentioned in at least 52 press stories in the following outlets:

Date	Media Outlet	Date	Media Outlet
1/13	Coatings World	5/20	San Diego Magazine
2/9	Claremont Courier	5/30	AV Daily News

C2. Digital Advertising

Monthly from March through August, PaintCare ran digital ad campaigns on numerous websites promoting its key messages. Ads in a variety of dimensions were used, and some ads were translated into Spanish language. An example of the digital ads is shown below:

PaintCare also ran a digital ad campaign throughout the year promoting its individual paint retail drop-off sites. The campaign consisted of an interactive digital banner ad displayed on websites and apps on smartphones. When viewers touch the banner, it opens to full screen displaying PaintCare's image and message. Using the phone's location settings, it also displays the PaintCare drop-off site nearest to the viewers at that time. This ad allows viewers to click through to the PaintCare website to learn more or call the store directly by clicking on the store phone number.

Monthly from March through September, PaintCare ran "native display" digital ads in English and Spanish, which are ads that appear to be embedded within a web article. Native display ads were used to promote paint reuse messaging. The following images show examples of PaintCare's native display ads in English:

C3. Streaming Audio

In February through October, PaintCare utilized streaming audio services to run 15- and 30-second commercials that were geotargeted to service users throughout the state. The ad script features a dad clearing out garage storage space and throwing things away. The dad's teen child informs them that paint can be recycled through a PaintCare drop-off site and should not be thrown in the garbage.

C4. Social Media

Throughout the year PaintCare maintained its social media presence on sites including Facebook, Instagram, and TikTok and posted messaging to audiences on those platforms. Social media messages included promotion of PaintCare's three key messages: buy the right amount of paint, use up leftover paint, and recycle the rest with PaintCare. The following image shows a PaintCare Instagram post promoting the LVP service:

From February through November, PaintCare ran social media ads on Facebook, Instagram, Pinterest, and TikTok in English and Spanish with messages about buying the right amount of paint, using up leftovers, and recycling the rest at drop-off sites. The following image shows a sample of a Facebook advertisement promoting using up leftover paint.

C5. Video

From March through August, PaintCare ran online video and connected television device commercials. Commercials included one showing a single room painted and decorated several times in changing eras by contractors and a DIYer homeowner. While the styles and fashions of décor evolve with time, the leftover paint stacks up in the closet. The audience learns that, finally, in the present era there is a new solution for an ongoing problem; now you can recycle leftover paint with PaintCare. The following image is a still frame from the video commercial:

C6. Radio

Monthly throughout the year PaintCare sponsored KQED-FM's California Report program. Since the California Report is picked up by numerous public radio stations throughout the state, PaintCare's message ran thousands of times on 19 public radio organizations in over 70 cities. Additionally, an accompanying digital banner advertisement was placed on KQED's website. The following script was used:

"Support for the California Report comes from PaintCare. Now with more than 850 drop-off sites in California where households and businesses can recycle their leftover paint. More at PaintCare dot org."

C7. Print Advertising

In March to September, PaintCare sent direct mail cards to households in English and Spanish throughout Northern California promoting the message "Recycle Your Leftover Paint" and encouraging recipients to use PaintCare's large volume pickup service and year-round drop-off sites. The following image shows the direct mailer:

Recycle Your Leftover Paint

CONVENIENT DROP-OFF SITES

There are more than 850 sites in California where households and businesses can recycle unwanted paint, stain, and varnish all year round. Find a drop-off location near you: www.paintcare.org/drop-off-sites

FREE PICKUP SERVICE

Households and businesses with 100 gallons or more can request a free large volume pickup. Review eligibility requirements and request a pickup: www.paintcare.org/pickup

PAINT SMARTER

Reduce paint waste by buying right and using up what's left! Get tips: www.paintcare.org/paint-smarter

In April, June, and August, PaintCare sent direct mail cards to businesses throughout the state promoting the message “Paint Recycling is Good for Business” and encouraging recipients to use PaintCare’s large volume pickup service and year-round drop-off sites. The following image shows the direct mailer:

Paint Recycling is Good For Business

Managing leftover paint is easier than ever for businesses with year-round recycling services offered by PaintCare. There is no charge for a free large volume pickup or to drop off paint—costs are already covered by the PaintCare fee placed on sales of new paint products.

paintcare.org/business

FREE LARGE VOLUME PICKUPS
Have a lot of paint, stain, and varnish to recycle? Households and businesses with 100 gallons or more can contact PaintCare for a pickup. Visit paintcare.org/pickup to learn more about eligibility requirements and to submit a request for a free pickup.

DROP OFF PAINT FOR RECYCLING
For smaller amounts of paint to recycle, there are more than 850 PaintCare sites in California where households and businesses can dispose of unwanted paint, stain, and varnish all year round for free.

Visit paintcare.org/drop-off-sites to find a drop-off site near you. Please call ahead to confirm business hours and to ask if they can accept the type and amount of paint you would like to recycle.

PaintCare also used newspaper and direct mail advertising to promote PaintCare drop-off sites and drop-off events held during the year.

In May and June PaintCare ran print ads in newspapers in Spanish promoting recycling paint at PaintCare drop-off sites. The following image shows an example of a print advertisement in Spanish in El Observador newspaper:

Recicle su pintura sobrante

Centros de entrega prácticos

Hay más de 850 centros en California —160 en la bahía de San Francisco— donde los hogares y las empresas pueden reciclar o desechar pinturas, tintes y barnices no deseados durante todo el año. La mayoría están a pocas millas de casa.

Escanee el código para encontrar un centro de entrega de pintura o visite <https://www.paintcare.org/es/drop-off-sites/>

Servicio de recolección gratuito

Si tiene más de 100 galones, puede solicitar la recolección gratuita de grandes volúmenes. Revise los requisitos y solicite la recolección: <https://www.paintcare.org/es/large-volume-pickups/>

Pinte mejor

Reduzca los residuos de pintura comprando lo justo y utilizando lo que sobra. Obtenga consejos: <https://www.paintcare.org/es/paint-smarter/>

C8. Joint Outreach Projects with Local Government

PaintCare welcomes the opportunity to work with local HHW programs on outreach projects. PaintCare provides creative support and funding in the form of reimbursement for projects that are preapproved. This year PaintCare provided funding support to the County of Yolo to create a paint recycling themed mural on their reuse shed.

D. Website

Most PaintCare advertising and outreach materials direct the public to PaintCare’s website for more information and to find a local PaintCare site. The website is easy to navigate and features content on buying the right amount of paint, storage and reuse tips, and recycling. It contains special pages for manufacturers, retailers, contractors, waste facilities, products covered by the program, and the California program. PaintCare’s website is updated throughout the year. The most frequently visited part of the website is the PaintCare site locator.

Monthly Website Traffic from California

Month	Visitors
January 2023	9,835
February 2023	35,543
March 2023	101,668

October 2023	134,046
November 2023	38,918
December 2023	8,732

E. Awareness Survey

In October PaintCare ran its annual public awareness survey to measure the ongoing effectiveness of its outreach activities with the assistance of market research firm KB Insights. KB Insights analyzed the data to help PaintCare better understand trends and guide future outreach targeting.

Following are some highlights from the survey results:

- 532 surveys were completed by California residents, allowing 90% confidence in the accuracy of the measured results for the population within +/-3%.
- Over half of respondents (60%) purchased paint in the last year. Of those, 43% reported seeking help from paint retail staff to purchase the right amount and 40% reported taking measurements in order to purchase the right amount of paint.
- 81% of respondents said they were “extremely likely” or “likely” to drop off paint for recycling the next time they have leftover paint to dispose of.
- 52% of end-consumers who had purchased paint in the last year were aware that paint can be recycled, of available drop-off opportunities in the state, or both.

The full report for this year’s awareness survey is included in the appendix of this report.

Section 7. Audits

Annual Report Statutory Citation

California PRC, Division 30. Part 7 Chapter 5. Architectural Paint Recovery Program, Section 48705 requires PaintCare to submit an annual report that includes, in relevant part:

(6) An independent financial audit funded from the paint stewardship assessment.

Annual Report Regulatory Citation

California Code of Regulations, Title 14. Division 7. Chapter 11. Article 2. Architectural Paint Recovery Program, Section 18954 requires PaintCare to submit an annual report that includes, in relevant part:

(7) Audits. The annual report shall include an independent financial audit of the California Architectural Paint Recovery Program funded from the paint stewardship assessment. The audit shall be conducted in accordance with auditing standards generally accepted in the United States of America, and standards set forth in Government Auditing Standards issued by the Comptroller General of the United States. The financial audit submitted to the department shall be prepared by an Independent Certified Public Accountant (CPA). The CPA shall not perform non-audit services for the manufacturer or stewardship organization that would impair independence as defined in the Government Auditing Standards issued by the Comptroller General of the United States (e.g., accounting services, development of internal controls, management decisions). The independent financial audit shall include:

- (A) California Architectural Paint Recovery Program financial statements, as required by GAAP.
- (B) An opinion on the manufacturer or stewardship organization's compliance with the financial aspects of PRC §48700 and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations.
- (C) Findings and recommendations as they relate to the financial aspects of the Architectural Paint Recovery Program.
- (D) Management Letter, if issued, by the manufacturer or stewardship organization's CPA.

A. Independent Financial Audit

An independent financial audit of the California PaintCare program was conducted by Rogers & Company PLLC. This independent CPA firm conducted the audit in accordance with auditing standards generally accepted in the United States. Those

standards require that the firm plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. The audit process includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. The audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In Rogers & Company's opinion, the financial statements of PaintCare present fairly, in all material respects, the financial position as of December 31, 2023, and the changes in its net assets and its cash flows for the year ended in conformity with accounting principles generally accepted in the United States. The independent financial audit of the California program is available in the appendix.

Section 8. 2024 and Future

This section of the annual report describes activities or plans for the program that have happened since December 31, 2023 or are being planned.

A. Personnel

PaintCare hired a Program Coordinator for Northern California.

B. Drop-Off Sites and Services

Kelly Moore closed all its operations in January 2024, which resulted in a loss of 105 retail sites. Staff are actively recruiting new locations to fill the gap in drop-off sites.

C. Operations

PaintCare plans to continue hosting reuse focused paint giveaway events.

In early 2024, PaintCare began planning for the addition of aerosol coatings in the program, per AB1526.

D. Special Projects

PaintCare intends to continue a three-year effort to visit non-drop-off sites in order to increase awareness of the program among retailers. Plans for the visits include providing updated outreach materials, checking site staff familiarity with the program, and observing whether the PaintCare fee is being applied to covered products. During these visits, staff will also invite retailers and other locations (recycling facilities, solid waste transfer stations) to participate in the program as drop-off sites.

E. Communications

PaintCare plans to continue promoting paint recycling opportunities to California households and businesses, and to conduct awareness surveys of consumers.

Appendix A. Drop-Off Sites and Services

PaintCare California Year-Round Sites - 2023

County	City/Town	Site Name	Address	Site Type

Independent Auditor's Report

To the Board of Directors of PaintCare Inc.

Opinion

We have audited the accompanying financial statements of PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program ("the Program"), which comprise the statement of financial position as of December 31, 2023; the related statements of activities, functional expenses, and cash flows for the year then ended; and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Program as of December 31, 2023, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Program and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Responsibilities of Management for the Financial Statements (continued)

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Program's ability to continue as going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Program's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Program's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also used our report dated March 25, 2024, on our consideration of PaintCare's internal control over the Program's financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering PaintCare's internal control over the Program's financial reporting and compliance.

Cash, beginning of year	0
Cash, end of year	0

Notes to Financial Statements

PaintCare Inc. California Architectural Paint Recovery Program – December 31, 2023

1. Nature of Operations

The California Architectural Paint Recovery Program (“the Program”) is authorized by Public Resources Code Section 48700 to implement measures to require paint manufacturers to develop and implement a program to collect, transport, and process postconsumer paint to reduce the costs and environmental impacts of the disposal of postconsumer paint in California. The Program is administered by PaintCare Inc. (“PaintCare”).

PaintCare, a not-for-profit 501(c)(3) organization, was created in October 2009 by the American Coatings Association (ACA), who, working with state and local government stakeholders, passed the first ever paint product stewardship law in the United States in the state of Oregon in 2009. The paint stewardship legislation guides an industry-led, end-of-life management program for post-consumer paint, which PaintCare operates. The PaintCare Board is made up of architectural paint manufacturers and participation in PaintCare is not limited to ACA members, but open to all architectural paint manufacturers. There are no dues or registration fees associated with PaintCare.

2. Summary of Significant Accounting Policies

Basis of Accounting and Presentation

The Program’s financial statements are prepared on the accrual basis of accounting. Net assets without donor restrictions represent funds that are not subject to donor-imposed stipulations and are available for support of the Program’s operations. There were no assets with donor restrictions as of December 31, 2023.

Accounts Receivable

Accounts receivable consist of amounts due from post-consumer paint recovery fees and are presented net of an allowance for credit losses resulting from the inability of customers to make required payments. The allowance for credit losses is based upon historical loss experience in combination with current economic conditions and a forecast of future economic conditions. Any change in the assumptions used in analyzing a specific account receivable might result in an additional allowance for credit losses being recognized in the period in which the change occurs.

Accounts Receivable (continued)

Allowance for credit losses consists of the following at December 31, 2023:

Allowance for credit losses, beginning of year	20,041
Additions (charges to expense)	374,089
Deductions (write-offs, net of recoveries)	0
Allowance for credit losses, end of year	394,130

Investment Allocation

PaintCare invests a portion of its accumulated surplus in a portfolio with Bank of America/Merrill Lynch. The sole objective of the portfolio is to earn a return equal to the rate of inflation and thus preserve the purchasing power of its capital. Interest, dividends, changes in market value, and other investment activities are allocated to each state program based on the relative net asset balances of each state program. Oversight of the investments is provided by the PaintCare Budget and Finance Committee and by the PaintCare Board of Directors.

Revenue Recognition

The Program recognizes revenue from post-consumer paint recovery fees at the time the architectural paint product is sold by a manufacturer participant of the paint product stewardship program. Manufacturer participants in the Program pay the PaintCare recovery fee to PaintCare based on the amount of program products they sell on a monthly basis.

Program participants report their monthly unit sales of paint through a secure, HTTPS online system using their unique user ID and password. The participant must pay a paint recovery fee per unit sold, based on container size, according to the established fee schedule. As the PaintCare recovery fee is added to the wholesale price of paint and passed through uniformly to the retail purchase price of paint—so that the manufacturer, distributor, and/or retailer is made whole—in some cases, distributors or retailers have elected to undertake the obligation of the manufacturer for these fees. Thus, PaintCare has allowed remitter agreements in the Program, whereby a distributor or retailer reports and remits directly to PaintCare on behalf of a participant manufacturer's brand or brands. Reports and payment are due by the end of the month following the reporting period.

Functional Allocation of Expenses

The costs of providing the various program and supporting activities have been summarized on a functional basis in the accompanying financial statements. The statement of functional expenses presents the natural classification detail of expenses

by function. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

Subsequent Events

In preparing these financial statements, the Program has evaluated events and transactions for potential recognition or disclosure through March 25, 2024, the date the financial statements were available to be issued.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

3. Liquidity and Availability

At December 31, 2023, financial assets available for general expenditures, that is, without donor or other restrictions limiting their use, within one year of the statement of financial position date, consist of net accounts receivable totaling \$2,066,932. There are additional liquid assets available to the Program that are the liquid assets of PaintCare as a whole. PaintCare strives to maintain liquid financial assets sufficient to cover 90 days of general expenditures for the Program. Financial assets in excess of daily cash requirements are handled and invested in money market funds and highly liquid securities by PaintCare.

4. Note Receivable

Effective September 20, 2023, PaintCare entered into a settlement agreement with a manufacturer who participates in the post-consumer paint recovery program. PaintCare and the manufacturer agreed to convert \$2,476,720 of outstanding paint recovery fees due to the Program into a structured note receivable. The terms of the note require the manufacturer to make 36 monthly payments of principal and interest commencing on October 1, 2023, with two additional payments of principal only due on July 1, 2024 and July 1, 2025. The note bears an interest rate of 6.6% and accrues monthly on the outstanding balance. As of December 31, 2023, PaintCare established an allowance totaling \$2,351,584 on this note receivable in the event collection does not occur.

The future minimum receipts are as follows for the years ending December 31:

2024	1,134,011
2025	878,802
2026	554,214
Total future receipts of principal and interest	2,567,027
Less: allowance for credit losses	(2,351,584)
Less: amounts representing interest	(215,443)
Note receivable, net	0

5. Related Party Transactions

ACA, a related party, is a separate, 501(c)(6) nonprofit organization working to advance the needs of the paint and coatings industry and the professionals who work in it. ACA serves its members as an advocate on legislative, regulatory, and judicial issues at the federal, state, and local levels. ACA also provides members with such services as research and technical information, statistical management information, legal guidance, and community service project support, and acts as a forum for the exchange of information and ideas among the industry and its business partners. ACA incorporated PaintCare for the sole purpose of implementing programs for post-consumer architectural paint, including the recovery program pursuant to Public Resources Code Section 48700. ACA maintains a controlling interest in PaintCare through the ability to appoint its Board of Directors.

In February 2011, ACA and PaintCare entered into an affiliation agreement whereby ACA charges PaintCare an administrative fee, annually, to cover the following expense categories: allocation of time incurred by PaintCare officers, allocation of other direct labor, and allocation of occupancy and infrastructure costs. The term of the agreement is for one year and automatically renews for one-year terms unless canceled by either party.

For the year ended December 31, 2023, total administrative fees charged by ACA to PaintCare were \$3,431,733 and of this amount, \$1,498,276 related to the Program. At December 31, 2023, PaintCare owed the Program \$39,453,316 related to paint recovery fees and \$13,001,901 related to investment allocation that are being held on behalf of the Program and are included in the accompanying statement of financial position.

6. Methods Used for Allocation of Expenses from Management & General Activities

The financial statements report certain categories of expenses using the direct allocation method. Each expense is assigned to a functional category based on direct usage.

7. Income Taxes

The Program itself is not subject to income taxes. The steward of the Program, PaintCare, is recognized as a tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code, and is exempt from income taxes except for taxes on unrelated business activities.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Directors of PaintCare Inc.

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States, the financial statements of PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program ("the Program"), which comprise the statement of financial position as of December 31, 2023; the related statements of activities, functional expenses, and cash flows for the year then ended; and the related notes to the financial statements; and have issued our report thereon dated December 31, 2023.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered PaintCare's internal control over financial reporting ("internal control") over the Program as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of PaintCare's internal control over the Program. Accordingly, we do not express an opinion on the effectiveness of PaintCare's internal control over the Program.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements, on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Program's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the organization's internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the organization's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

**EXAMINATION REPORT OVER COMPLIANCE WITH THE FINANCIAL ASPECTS
OF THE PUBLIC RESOURCES CODE SECTION 48700, AND TITLE 14, DIVISION 7,
CHAPTER 11, ARTICLE 2 OF THE CALIFORNIA CODE OF REGULATIONS**

To the Board of Directors of PaintCare Inc.

We have examined PaintCare Inc. ("PaintCare") California Architectural Paint Recovery Program's ("the Program") compliance with the financial aspects of the Public Resources Code Section 48700, and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations during the year ended December 31, 2023. Management is responsible for PaintCare's compliance with those requirements. Our responsibility is to express an opinion on PaintCare's compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence about PaintCare's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on PaintCare's compliance with specified requirements.

In our opinion, PaintCare complied, in all material respects, with the financial aspects of the Public Resources Code Section 48700, and Title 14, Division 7, Chapter 11, Article 2 of the California Code of Regulations during the year ended December 31, 2023.

This report is intended solely for the information and use of the Board of Directors, management, and the California Department of Resources Recycling and Recovery, and is not intended to be and should not be used by anyone other than these specified parties.

Schedule of Findings

PaintCare Inc. - California Architectural Paint Recovery
Program for the Year Ended December 31, 2023

Section I – Summary of Independent Auditor’s Results

Financial Statements

Description	Result
Type of auditor’s report issued:	Unmodified
Internal control over financial reporting: Material weakness(es) identified?	No
Internal control over financial reporting: Significant deficiency(ies) identified that are not considered to be material weaknesses?	None Reported
Noncompliance material to financial statements	No

Section II – Financial Statement Findings

There were no financial statement findings reported during the 2023 audit.

Appendix C. Outreach Materials

Brochure

CALIFORNIA

PaintCare Products
These products have a fee when you buy them and are accepted for drop-off at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled, and empty containers are not accepted at drop-off sites.

Non-PaintCare Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulk, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For information about recycling and proper disposal of non-PaintCare products, please contact your garbage hauler, local environmental health agency, household hazardous waste program, or public works department.

Recycle WITH PaintCare

Where Do I Take Leftover Paint?
Paint recycling is convenient with PaintCare. We set up paint drop-off sites throughout the state. To find your nearest drop-off site, use PaintCare's search tool at www.paintcare.org or call our hotline at (855) PAINT09.

How to Recycle
PaintCare sites accept all brands of leftover house paint, stain, and varnish, whether recently used or many years old. Containers must be five gallons or smaller, and some types of paint are not accepted. See back panel for a list of what PaintCare accepts. All PaintCare drop-off sites accept up to five gallons of paint per visit. Some sites accept more. Please call sites in advance to confirm business hours and make sure they can accept the amount of paint you would like to recycle. Make sure all paint containers have lids and original labels, and load them securely in your vehicle if driving. Take them to a drop-off site during their regular business hours. We'll take it from there.

What Happens to the Paint?
PaintCare makes sure that your leftover paint is processed into recycled paint, used as a fuel, made into other products, or is properly disposed if no other beneficial use for it can be found.

Who Can Use the Program?
Households may drop off as much latex or oil-based paint as the PaintCare drop-off site is willing to accept. Businesses may drop off any amount of latex-based paint the PaintCare drop-off site is willing to accept, but limits may apply to oil-based paint. Visit www.paintcare.org/hsgg for more information.

Do You Accept Large Volumes of Paint?
If you have at least 100 gallons of paint to recycle at your business or home, ask about our free large volume pickup service. Please visit www.paintcare.org for more details or to request a pickup.

PaintCare Fee
PaintCare is funded by a fee paid by paint manufacturers for each can of paint sold in the state. Manufacturers pass the fee to retailers, who then apply it to the price of paint. Retailers are encouraged to show the fee on customer receipts. The fee is based on the size of the container as follows:

\$0.00	Half pint or smaller
\$0.30	Larger than half pint up to smaller than 1 gallon
\$0.65	1-2 gallons
\$1.50	Larger than 2 gallons up to 5 gallons

Not a Deposit
The fee is not a deposit—it is part of the purchase price. The fee is used to fund the costs of running the program, including recycling, public education, staffing, and other expenses.

Contact Us
To learn more or find a drop-off site, please visit www.paintcare.org or call (855) PAINT09.

CALIFORNIA

Recycle with PaintCare

A Program to Manage Leftover Paint

Each year about 850 million gallons of architectural paint are sold in the United States. Did you know that about 10 percent goes unused and is available for recycling?

California's paint stewardship law requires the paint manufacturing industry to develop a financially sustainable and environmentally responsible program to manage postconsumer (leftover) architectural paint. Paint manufacturers established PaintCare, a nonprofit organization, to run paint stewardship programs in states with applicable laws.

The program includes education about buying the right amount of paint, tips for using up remaining paint, and setting up convenient recycling locations throughout the state.

Where Do I Take Leftover Paint?

Paint recycling is convenient with PaintCare. We set up paint drop-off sites throughout the state. To find your nearest drop-off site, use PaintCare's search tool at www.paintcare.org or call our hotline at (855) PAINT09.

How to Recycle

PaintCare sites accept all brands of leftover house paint, stain, and varnish, whether recently used or many years old. Containers must be five gallons or smaller, and some

types of paint are not accepted. See back panel for a list of what PaintCare accepts for recycling.

All PaintCare drop-off sites accept up to five gallons of paint per visit. Some sites accept more. Please call sites in advance to make sure they can accept the amount of paint you would like to recycle.

Make sure all paint containers have lids and original labels, and load them securely in your vehicle. Take them to a drop-off site during their regular business hours. We'll take it from there.

What Happens to the Paint?

PaintCare makes sure that your leftover paint is remixed into recycled paint, used as a fuel, made into other products, or is properly disposed if no other beneficial use for it can be found.

Who Can Use the Program?

Households may drop off as much latex or oil-based paint as the site is willing to accept, but limits may apply to oil-based paint. Visit www.paintcare.org/vsqq for more information.

Do You Accept Large Volumes of Paint?

If you have at least 100 gallons of paint to recycle at your business or home, ask about our free large volume pickup service. Please visit www.paintcare.org for more details or to request a pickup.

PaintCare Fee

PaintCare is funded by a fee paid by paint manufacturers for each can of paint sold in the state. Manufacturers pass the fee to retailers, who then apply it to the price of paint. Retailers are encouraged to show the fee on customer receipts. The fee is based on the size of the container as follows:

- \$ 0.00 Half pint or smaller
- \$ 0.30 Larger than half pint and smaller than 1 gallon
- \$ 0.65 1-2 Gallons
- \$ 1.50 Larger than 2 gallons up to 5 gallons

Not a Deposit

The fee is not a deposit—it is part of the purchase price. The fee is used to fund the costs of running the program, including recycling, public education, staffing, and other expenses.

Contact Us

To learn more or find a drop-off site, please visit www.paintcare.org or call (855) PAINT09.

PaintCare Products

These products have fees when you buy them and are accepted for free at drop-off sites at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled, and empty containers are not accepted at drop-off sites.

Non-PaintCare Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulk, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins

Paint Smarter

Scan the code above with your smart phone or visit paint.org/paint-smarter to get tips on how to buy the right amount of paint, use up what's left, and recycle the rest with PaintCare.

A nonprofit organization created by paint manufacturers, PaintCare is committed to making it easy and convenient to recycle leftover paint in states with paint stewardship laws.

In-Store Poster

About the Paint Recycling Program

Paint manufacturers created PaintCare, a nonprofit organization, to provide convenient places for households and businesses to recycle leftover paint. PaintCare sets up paint drop-off sites throughout states that pass paint stewardship laws.

PAINTCARE PRODUCTS

These products have a fee when you buy them and are accepted for drop-off at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled, and empty containers are not accepted at drop-off sites.

PAINTCARE FEE

The PaintCare fee is applied to the purchase price of architectural paint as required by law. The fee funds collection, transportation, and processing costs. The fee is based on container size as follows:

\$0.00	Half pint or smaller
\$0.30	Larger than half pint up to smaller than 1 gallon
\$0.65	1–2 gallons
\$1.50	Larger than 2 gallons up to 5 gallons

For more information or to find a place to take your unwanted paint for recycling, please ask for the PaintCare brochure, visit paintcare.org, or call (855) PAINT09.

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulk, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

CA-SP-0223

About the PaintCare Program

Paint manufacturers created PaintCare, a non-profit organization, to set up convenient places for households and businesses to recycle leftover paint. PaintCare sets up paint drop-off sites throughout states that pass paint stewardship laws.

PAINTCARE PRODUCTS

These products have fees when purchased and are accepted for drop-off at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based
- Deck coatings, floor paints, (including textured coatings)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)

Counter Mat

Recycle with PaintCare!

Buy Right: Consult with painting professionals and retailers to buy the right amount of paint and reduce potential waste.

Use It Up: Use up leftover paint on the surface you are painting, on additional painting projects around the house, or give it to someone else in your community.

Recycle the Rest: When you can't use up leftover paint, drop it off with PaintCare to get it recycled!

Visit www.paintcare.org to find a year-round paint drop-off site near you or schedule a large volume pickup.

PaintCare™
RECYCLING MADE EASY

What types of paint products can be recycled with PaintCare?

PAINTCARE PRODUCTS
The following are products included in the program. When purchased, the PaintCare fee is applied. These products are accepted at no additional cost when dropped off at PaintCare's participating drop-off sites.

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based
- Deck coatings, floor paints (including textured coatings)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS
The following are non-PaintCare products and are not included in the program. When purchased, the PaintCare fee is not applied. They are not accepted at PaintCare's participating drop-off sites.

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulk, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturing (OEM) (shop application) paints and finishes
- Containers that are leaking or empty, and containers without the original printed manufacturer's label are not accepted at retail drop-off sites

PROGRAM FUNDING
The PaintCare fee is applied to the purchase price of architectural paint sold in California as required by law. The fee is based on container size:

Half pint or smaller	\$0.00
Larger than half pint up to smaller than 1 gallon	\$0.30
1 gallon up to 2 gallons	\$0.65
Larger than 2 gallons up to 5 gallons	\$1.50

CA CMW-0722

Recycle with PaintCare!

Buy Right: Consult with painting professionals and retailers to buy the right amount of paint and reduce potential waste.

Use It Up: Use up leftover paint on the surface you are painting, on additional painting projects around the house, or give it to someone else in your community.

Recycle the Rest: When you can't use up leftover paint, drop it off with PaintCare to get it recycled!

What types of paint products can be recycled with PaintCare?

PAINTCARE PRODUCTS

The following products are included in the program. When purchased, the PaintCare fee is applied. These products are accepted at no additional cost when dropped off at PaintCare's participating drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based
Deck coatings, floor paints, (including textured coatings)
- Primers, sealers, undercoaters
- Stains

- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

The following are non-PaintCare products and are not included in the program. When purchased, the PaintCare fee is not applied. They are not accepted at PaintCare's participating drop-off sites.

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturing (OEM) (shop application) paints and finishes
- Containers that are leaking or empty, and containers without original manufacturer's labels are not accepted at retail drop-off sites.

PROGRAM FUNDING

The PaintCare Fee is applied to the purchase price of architectural paint sold in your state as required by law. Fees are based on container size:

- Half pint or smaller \$0.00
- Larger than half pint and smaller than 1 gallon \$0.30
- 1-2 gallons \$0.65
- More than 2 gallons up to 5 gallons \$1.50

Fact Sheet for Painting Contractors

PAINT STEWARDSHIP LAWS IN THE U.S.
Information for Painting Contractors
Updated — February 2023

How do paint stewardship laws affect painting contractors?

PaintCare
PaintCare is a nonprofit organization established by the American Coatings Association to implement manufacturer-led paint stewardship programs in states that pass paint stewardship laws. PaintCare currently operates programs in California, Colorado, Connecticut, District of Columbia, Maine, Minnesota, New York, Oregon, Rhode Island, Vermont, and Washington.

Paint Drop-Off Sites
The primary requirement of paint stewardship laws is for paint manufacturers to set up paint drop-off sites at retailers and other locations where households and businesses can take postconsumer (leftover) architectural paint, free of charge. Most drop-off sites are paint and hardware stores; others are waste transfer stations, recycling centers, landfills, and household hazardous waste (HHW) facilities. Participation as a drop-off site is voluntary. There are more than 2,400 drop-off sites across all PaintCare programs. To find a drop-off location, visit paintcare.org/drop-off-sites.

Fee and Funding
As required by laws in PaintCare jurisdictions, the program is funded by a fee (known as the PaintCare fee) that must be added by manufacturers to the wholesale price of all architectural paint sold in the state, including paint sold in stores and online. This fee is paid by manufacturers to PaintCare to fund program operations including paint collection and recycling, consumer education, and program administration. Displaying the fee on receipts is optional for retailers; however, PaintCare encourages retailers to show the fee to inform consumers about the program. (See reverse for complete listing of fees by state.)

Recommendations for Contractors

Preparing Estimates
When estimating jobs, contractors should take the PaintCare fee into account by checking with suppliers to make sure their quotes for paint products include the fee.

Pass Fee to Customers
PaintCare suggests that painting contractors pass on the fee to customers in order to recoup the fee they pay. Tell customers that quotes include the PaintCare fee and that the fee funds a statewide paint recycling program.

Convenient Paint Drop-Off Sites
With paint drop-off sites conveniently located throughout PaintCare states, anyone can drop off their leftover paint year-round. Many contractors report clearing out their storage spaces and no longer stockpiling paint. Contractors now have an answer for customers who ask what to do with old paint they no longer want: they can recommend that they use PaintCare drop-off sites too.

Most drop-off sites take 5 gallons per customer per trip, though some take more. All retail drop-off sites take paint from businesses, although some transfer stations and household hazardous waste programs only serve households. Always call a drop-off site ahead of visiting to make sure they have space for your volume and to confirm they take paint from businesses.

Pickup Service for Large Volumes
Painting contractors with at least 100 gallons of leftover paint to recycle may qualify to have their paint picked up by PaintCare for free. To learn more about this service or to request an appointment, visit www.paintcare.org/pickup or call (855) PAINT99.

Business Limits
To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VISQ for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators may use the pickup service in New York. Contact PaintCare for details.)

What Are the Fee Amounts?
The PaintCare fee is based on container size and varies from one program to another:

	Half pint or smaller	Larger than half pint up to smaller than 1 gallon	1 gallon up to 2 gallons	Larger than 2 gallons up to 5 gallons
California	\$0.00	\$0.30	\$0.60	\$1.50
Colorado	\$0.00	\$0.35	\$0.75	\$1.60
Connecticut	\$0.00	\$0.35	\$0.75	\$1.60
District of Columbia	\$0.00	\$0.30	\$0.70	\$1.60
Maine	\$0.00	\$0.35	\$0.75	\$1.60
Minnesota	\$0.00	\$0.49	\$0.99	\$1.99
New York	\$0.00	\$0.45	\$0.95	\$1.95
Oregon	\$0.00	\$0.44	\$0.95	\$1.95
Rhode Island	\$0.00	\$0.35	\$0.75	\$1.60
Vermont	\$0.00	\$0.49	\$0.99	\$1.99
Washington	\$0.00	\$0.45	\$0.95	\$1.95

What Products Are Covered?
The products accepted by the PaintCare program are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in containers of five gallons or less. They do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing/concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and base paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, colors
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop applications) paints and finishes

PAINT STEWARDSHIP LAWS IN THE U.S.

Information for Painting Contractors

Updated — June 2023

How do paint stewardship laws affect painting contractors?

PaintCare

PaintCare is a nonprofit organization established by the American Coatings Association to implement manufacturer-led paint stewardship programs in states that pass paint stewardship laws. PaintCare currently operates programs in California, Colorado, Connecticut, District of Columbia, Maine, Minnesota, New York, Oregon, Rhode Island, Vermont, and Washington.

Paint Drop-Off Sites

The primary requirement of paint stewardship laws is for paint manufacturers to set up paint drop-off sites at retailers and other locations where households and businesses can take postconsumer (leftover) architectural paint, free of charge. Most drop-off sites are paint and hardware stores; others are waste transfer stations, recycling centers, landfills, and household hazardous waste (HHW) facilities. Participation as a drop-off

site is voluntary. There are more than 2,400 drop-off sites across all PaintCare programs. To find a drop-off location, visit paintcare.org/drop-off-sites.

Fee and Funding

As required by laws in PaintCare jurisdictions, the program is funded by a fee (known as the PaintCare fee) that must be added by manufacturers to the wholesale price of all architectural paint sold in the state, including paint sold in stores and online. This fee is paid by manufacturers to PaintCare to fund program operations including paint collection and recycling, consumer education, and program administration. Displaying the fee on receipts is optional for retailers; however, PaintCare encourages retailers to show the fee to inform consumers about the program.

(See reverse for complete listing of fees by state.)

Recommendations for Contractors

Preparing Estimates

When estimating jobs, contractors should take the PaintCare fee into account by checking with suppliers to make sure their quotes for paint products include the fee.

Pass Fee to Customers

PaintCare suggests that painting contractors pass on the fee to customers in order to recoup the fee they pay. Tell customers that quotes include the PaintCare fee and that the fee funds a statewide paint recycling program.

Convenient Paint Drop-Off Sites

With paint drop-off sites conveniently located throughout PaintCare states, anyone can drop off their leftover paint year-round. Many contractors report clearing out their storage spaces and no longer stockpiling paint. Contractors now have an answer for customers who ask what to do with old paint they no longer want; they can recommend that they use PaintCare drop-off sites too.

Most drop-off sites take 5 gallons per customer per trip, though some take more. All retail drop-off sites take paint from businesses, although some transfer stations and household hazardous waste programs only serve households. Always call a drop-off site ahead of visiting to make sure they have space for your volume and to confirm they take paint from businesses.

Pickup Service for Large Volumes

Painting contractors, property managers, and others with at least 100 gallons of leftover paint to recycle may qualify to have their paint picked up by PaintCare for free. To learn more about this service or to request an appointment, visit www.paintcare.org/pickup or call (855) PAINT09.

Business Limits

To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSQG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators will be able to use the program under development in New York. Contact PaintCare for details.)

What Are the Fee Amounts?

The PaintCare fee is based on container size and varies from one program to another:

State	Larger than half pint up to smaller than 1 gallon	1–2 gallons	Larger than 2 gallons up to 5 gallons
California	\$0.30	\$0.65	\$1.50
Colorado	\$0.35	\$0.75	\$1.60
Connecticut	\$0.35	\$0.75	\$1.60
District of Columbia	\$0.30	\$0.70	\$1.60
Maine	\$0.35	\$0.75	\$1.60
Minnesota	\$0.49	\$0.99	\$1.99
New York	\$0.45	\$0.95	\$1.95
Oregon	\$0.45	\$0.95	\$1.95
Rhode Island	\$0.35	\$0.75	\$1.60
Vermont	\$0.49	\$0.99	\$1.99
Washington	\$0.45	\$0.95	\$1.95

What Products Are Covered?

The products accepted by the PaintCare program are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in containers of five gallons or less. They do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Fact Sheet for Large Volume Pickup Service

PAINT STEWARDSHIP PROGRAMS IN THE U.S.

Large Volume Pickup (LVP) Service

Updated — November 2023

PaintCare offers a free pickup service to painting contractors, property managers, and others with large amounts of leftover architectural paint.

Who Is PaintCare?

PaintCare is a nonprofit organization established by the American Coatings Association to operate paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws.

In states with a paint stewardship program (see www.paintcare.org/states), PaintCare's primary effort is to set up conveniently located drop-off sites—places where households, businesses, and others may take their unwanted paint for no charge. Sites set their own limits on the volume of paint they accept from customers per visit, usually from 5 to 20 gallons. To find a drop-off site near you, visit www.paintcare.org/drop-off-sites or call (855) PAINT09.

Large Volume Pickups

In states where PaintCare operates, those who have accumulated a large volume of paint may be eligible for PaintCare's large volume pickup service (LVP). Large volume means 100 or more gallons, measured by container size, not liquid volume. On a case-by-case basis, PaintCare may approve a pickup for less than 100 gallons. After two or three pickups, you may be switched to a recurring pickup service (see next page).

Drums and Bulk Paint Are Not Accepted

PaintCare only accepts paint in containers that are 5 gallons or smaller in size. Leave paint in original cans with original labels; do not combine or bulk paint from small cans into larger ones. If you have unwanted paint in drums or containers larger than 5 gallons, please contact a paint recycling company or a hazardous waste transportation company to assist you.

HOW TO REQUEST AN LVP

- 1. Sort and count your paint**
Tally the number of each container size and the type of products you have, sorted into two categories: (1) water-based paints and stains, and (2) oil-based paints and stains and any other program products (sealers and clear top-coat products, such as varnish and shellac).
- 2. Fill out the request form**
Fill out the Large Volume Pickup Request Form on our website at www.paintcare.org/pickup. Call PaintCare at (855) PAINT09 if you need assistance using the web form.

Scheduling

After reviewing your form, PaintCare staff will either approve your site for a pickup or inform you of the best place to take your paint if you do not meet the requirements. Once approved, you will be put in contact with our licensed transporter to schedule a pickup. It may be several weeks before your pickup occurs.

On the Day of Your Pickup

Sort your products into the two categories as noted above and store them in an area that has easy access for the transporter. If the paint is far from where the transporter parks, the path between should be at least four feet wide to accommodate movement of the paint collection bins.

PaintCare
RECYCLING MADE EASY

The transporter is responsible for packing the paint into the bins. Once your paint is properly packed and loaded onto the transporter's truck, you will sign a shipping document and receive a copy for your records. Your paint will then be taken to an authorized facility for processing.

Recurring Service for LVPs

For those that generate large volumes of leftover paint on a regular basis, a service for recurring pickups is available. With this service, you will be provided with collection bins and request a pickup when at least two bins are filled. Your full bins will be swapped with empty bins each time a pickup occurs. You will be required to sign a contract with PaintCare, and PaintCare will provide onsite training on how to properly pack the paint.

Business Limits

To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/HWSG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators may use the pickup service in New York. Contact PaintCare for details.)

If You Have Products We Don't Accept

PaintCare does not accept certain paint products (such as aerosol coatings and automotive finishes) or other hazardous waste. If you have solvents, thinners, pesticides, or any non-PaintCare products (see list to right for examples), we recommend that households contact their local household hazardous waste (HWW) program. Some HWW programs also allow businesses to use their program for a modest fee. Otherwise, businesses should contact a licensed hazardous waste transportation company.

What Products Are Covered?

The products accepted by the PaintCare program are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in container sizes of five gallons or less. They do not include aerosol coatings, industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints, latex, acrylic, water-based, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol coatings
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

901 New York Ave NW Washington, DC 20001 (855) PAINT09 www.paintcare.org info@paint.org

PAINT STEWARDSHIP PROGRAMS IN THE U.S.

Large Volume Pickup (LVP) Service

Updated — November 2023

PaintCare offers a free pickup service to painting contractors, property managers, and others with large amounts of leftover architectural paint.

Who Is PaintCare?

PaintCare is a nonprofit organization established by the American Coatings Association to operate paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws.

In states with a paint stewardship program (see www.paintcare.org/states), PaintCare's primary effort is to set up conveniently located drop-off sites—places where households and businesses may take their unwanted paint for no charge. Sites set their own limits on the volume of paint they accept from customers per visit, usually from 5 to 20 gallons. To find a drop-off site near you, please use PaintCare's site locator at www.paintcare.org or call (855) PAINT09.

Large Volume Pickups

In states here PaintCare operates a paint stewardship program, those who have accumulated a large volume of paint may be eligible for PaintCare's large volume pickup service (LVP). Large volume means 100 or more gallons, measured by container size, not liquid volume. On a case-by-case basis, PaintCare may approve a pickup for less than 100 gallons. After two or three pickups, you may be switched to a repeat pickup service (see next page).

Drums and Bulked Paint Are Not Accepted

PaintCare only accepts paint in containers that are 5 gallons or smaller in size. Leave paint in original cans with original labels; do not combine or bulk paint from small cans into larger ones. If you have unwanted paint in drums or containers larger than 5 gallons, please contact a paint recycling company or a hazardous waste transportation company to assist you.

HOW TO REQUEST A LARGE VOLUME PICKUP

1. Sort and count your paint
Tally the number of each container size and the type of products you have, sorted into two categories: (1) water-based paints and stains, and (2) oil-based paint and stains and any other program products (sealers and clear top-coat products, such as varnish and shellac).
2. Fill out the LVP Request Form
Fill out the Large Volume Pickup Request Form on our website at www.paintcare.org/pickup. Call PaintCare at (855) PAINT09 if you have any difficulty using the web form.

Scheduling

After reviewing your form, PaintCare staff will either approve your site for a pickup or inform you of the best place to take your paint if you do not meet the requirements. If approved, you will be put in contact with our licensed hauler to schedule a pickup. It may be several weeks before your pickup occurs.

On the Day of Your Pickup

Sort your products into the two categories as noted above and store them in an area that has easy access for the transporter. If the paint is far from where the transporter parks, the path between should be at least four feet wide to accommodate movement of the paint collection bins.

The transporter is responsible for packing the paint into the bins. Once your paint is properly packed and loaded onto the transporter's truck, you will sign a shipping document and receive a copy for your records. Your paint will then be taken to a state authorized processing facility for recycling.

Recurring Service for LVPs

For businesses that generate large volumes of unwanted paint on a regular basis, a service for recurring direct pickups is available. With this service, you will be provided with reusable collection bins and can request a pickup when at least three bins are filled. Your full bins will be swapped with empty bins each time a pickup occurs. You will be required to sign a contract with PaintCare, and PaintCare will provide onsite training on how to properly pack the paint.

Business Limits

To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSQG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators may use the pickup service in New York. Contact PaintCare for details.)

If You Have Products We Don't Accept

PaintCare does not accept certain paint products (such as aerosols and automotive finishes) or other hazardous waste. If you have solvents, thinners, pesticides, or any non-PaintCare products (see list to right for examples), we recommend that households contact their local household hazardous waste (HHW) program. Businesses should contact their local HHW program to determine if they are eligible to participate. Some HHW programs allow businesses to use their program for a modest fee. Otherwise, businesses should contact a licensed hazardous waste transportation company.

What Products Are Covered?

The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in container sizes of five gallons or less. They do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol coatings
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Appendix D. Site Guidelines

Drop-Off Site Guidelines

This document contains detailed information of PaintCare's program guidelines and operations procedures. In combination with the state-specific guidelines, this comprehensive document can be used for self-training yourself and your staff without PaintCare staff. The training slides that proceeds this document summarizes the most important information of this Drop-Off Site Guidelines document in a concise manner. The training slides are used during training by PaintCare staff and can be used as a supplement for self-training.

Contents

- Guidelines Section 1. Training and Safety
- Guidelines Section 2. General Guidelines
- Guidelines Section 3. Collection Bins and Storage Area
- Guidelines Section 4. Accepting PaintCare Products
- Guidelines Section 5. Limit per Participant
- Guidelines Section 6. Working with Haulers
- Guidelines Section 7. Spill Response
- Guidelines Section 8. Inspections and Records
- Guidelines Section 9. Direct Reuse

Retailer Guidelines Section 1. Training and Safety

Training

For the safety of the program and your staff, all employees handling PaintCare products must receive training in product identification, acceptance, handling, packaging, inspection, and emergency response procedures before collecting PaintCare products or engaging in any PaintCare program activities.

Training helps ensure that employees conduct PaintCare products collection activities in a safe manner that protects workers and the environment.

Ensure that drop-off site employees are equipped for and understand hazards associated with PaintCare products.

Maintain training plans and records for each employee. Record staff training using the form included in the PaintCare training binder.

Safety

Store personal protective equipment (PPE) and spill response equipment in an accessible location adjacent to the collection bins. Ensure those materials are protected from the weather.

The drop-off site must be equipped with appropriate emergency response equipment including a fire extinguisher, spill kit and PPE. Monthly inspections of equipment are recommended.

PaintCare products collection activities need to follow general safety practices including proper lifting techniques.

Post emergency procedures and emergency contact numbers including police, fire department and emergency services by a phone — in close proximity to the drop-off site area, if possible.

If applicable, develop and maintain an emergency action plan as required by OSHA.

If required by federal, state or local law, familiarize police, fire departments, and emergency response teams with the layout of your facility, properties of PaintCare product(s) handled at your facility, and evacuation routes.

For your convenience, a form for recording emergency contacts is included in the PaintCare binder.

Retailer Guidelines Section 2. General Guidelines

PaintCare Provides Your Site

- Operations binder with recordkeeping forms/logs
- Signage identifying your site as a PaintCare drop-off site
- Educational print materials for the public

PaintCare's Hauler Provides Your Site

- Paint collection bins
- Labels and/or markings for paint collection bins

General Guidelines for Drop-Off Sites

Each PaintCare drop-off site has unique logistical and operational considerations. Each drop-off site must make its own decisions and use its best judgment to operate in the safest manner possible in accordance with applicable law. To ensure the highest standards of safety for you and your staff, drop-off sites must:

- Have appropriate signage that informs the public of the hours of operation

- Accept PaintCare products from participants during your regular advertised or posted operating hours
- Display PaintCare signage to identify you as a drop-off site – signage should be posted in a highly visible area, at the entrance of your site
- Assist and supervise participant when they come to drop off PaintCare products. Drop-off site staff should greet participants and must verify eligibility of the participant and their leftover paint products as PaintCare products (see Section 5 for a description of PaintCare products)
- **IMPORTANT:** Never allow a participant to open a PaintCare product container
- Have adequate space, staffing, and training to collect and store PaintCare products
- Provide a secure space for empty and full collection bins
- Except for PaintCare products that you choose to manage on-site (e.g., via direct reuse), place all PaintCare products immediately in collection bins approved for use by PaintCare and provided by its contractors
- Pack only PaintCare products into collection bins
- Schedule shipments of PaintCare products from your drop-off site
- Maintain all records relating to the program (see Section 9)
- Train staff to be familiar with the requirements and practices of this guide
- Follow state-specific guidelines (located in this binder, following the cover page)

Retailer Guidelines Section 3. Collection Bins and Storage Area

Storage Area and Collection Bin Placement

Establish a dedicated storage area for collection bins and PaintCare products.

Place collection bins on an impermeable surface (e.g., sealed wood floor) at all times.

Place collection bins away from ignition sources, storm drains and floor drains.

Ensure there is adequate ventilation if stored indoors.

Protect collection bins from precipitation and temperature extremes. If stored outdoors, keep collection bins under cover (to prevent exposure to precipitation) and move indoors at times to protect against temperature extremes. If you store collection bins outdoors, you may need approval from your local fire or hazardous materials oversight agency.

Comply with any local fire codes or other regulations that might pertain to your storage of collection bins at your site.

Maintain enough space around collection bins to inspect for leakage and emergency access.

Use good housekeeping standards; keep paint storage areas clean and orderly.

Setting Up, Packing and Maintaining Collection Bins

Collection bins must be set up, used, and closed according to the manufacturer's closure instructions. PaintCare's haulers should set up the collection bins that they provide, unless otherwise requested by the drop-off site staff.

Ensure cardboard bins have liners. The liners provide secondary containment to contain liquids in the event a can leaks while in storage or transit. Reusable plastic bins that are leak-proof by design don't need liners. PaintCare's haulers are responsible for including secondary containment with all collection bins they provide to the drop-off site staff.

Collection bins must be structurally sound. If you see any evidence of damage that may cause a leak or spill, notify PaintCare immediately.

Mark the collection bin with the date the first PaintCare product is placed in it.

Place paint containers in bins immediately. Keep collection bins closed except when adding PaintCare products.

Pack 5-gallon buckets on the bottom layer of the collection bins for stability.

Pack all PaintCare products (cans, buckets) upright and as tight as possible in the collection bins to protect contents from shifting and leaking in transit.

Do not open containers to verify product.

Do not overfill collection bins; allow enough space for a lid to fit securely.

Do not take PaintCare product out of the bin.

Security

The drop-off site and collection bin storage area must be secured and locked when closed or not attended.

Only drop-off site staff should have access to the collection bins and storage area until the collection bins are ready for pick-up by PaintCare's hauler. Never allow "self-serve," public access to the collection bins.

Retailer Guidelines Section 4. Accepting PaintCare Products

What are PaintCare Products

PaintCare drop-off sites should accept only PaintCare products (architectural paint products) for management under the PaintCare program.

Listed below are the primary examples of architectural paint products accepted by the PaintCare program and paint or paint-related products not accepted by the PaintCare program.

Generally, PaintCare products include latex and oil-based house paint, stains, and clear coatings (varnish, shellac, etc.). The program excludes anything that is:

- in an aerosol spray can
- intended and labeled “for industrial use only”
- mostly used in the manufacture of equipment
- on the list of specifically excluded products for some other reason

PaintCare products are classified as either latex (water-based) or oil-based (alkyd) and the classification is important in order to decide how the product should be handled and processed. Knowing how to tell the difference between latex and oil-based products is also important in determining which types of businesses/organizations can use the PaintCare program (if your site accepts paint from this audience).

PaintCare Products and Non-PaintCare Products

Acceptable products (PaintCare products)

- Interior and exterior paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings and floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Unacceptable products (Non-PaintCare products)

- Paint thinner, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For more information, please see www.paintcare.org/products-we-accept.

If non-PaintCare Products end up in a drop-off site's bin, such products will not be returned to the drop-off site and will be managed by PaintCare's hauler. Haulers identify Non-PaintCare Products and report all instances to PaintCare. PaintCare staff will notify the site of any contamination in the bins. If the problem persists, additional training may be provided.

Who Can Drop Off PaintCare Products

The program accepts PaintCare products from the following:

Households. Households may drop off any volume of PaintCare product, subject to the volume limit set by the site.

Businesses/Organizations. Non-households may also drop off any volume of latex PaintCare product, subject to the volume limit set by the site. Non-households may only drop off oil-based PaintCare products if they comply with federal and state hazardous waste generator rules that, among other criteria, require that the business/organization (1) generates no more than 100 kilograms (about 25 gallons or 220 pounds) of hazardous waste per calendar month, and (2) does not accumulate more than 1,000 kg of hazardous waste at any time. Painting contractors and commercial property owners typically meet these criteria. For more information about these criteria, please see: <http://www.paintcare.org/vsqq>

How to Know If a Business/Organization Qualifies

Each business or organization is responsible for determining its own generator status under applicable law.

When a business/organization has oil-based PaintCare product to drop off at your site, it must sign the Paint Drop-Off Log included in this binder to verify that it qualifies to use the program for oil-based paint. The log includes an explanation of the requirements. (If a business/organization has only latex paint, it does not need to sign the log.)

Once a business/organization signs the Paint Drop-Off Log, you may accept oil-based paint from that business/organization to the extent permissible under applicable law. Paint Drop-Off Logs may be reviewed by PaintCare or government agencies and compared with a list of registered hazardous waste generators to verify that only qualified businesses/organizations are using the program for their oil-based paint.

Acceptable Containers vs. Unacceptable Containers

Before accepting products from participants for management under the PaintCare program, drop-off site staff must (1) check the condition of the container for acceptance in the program, and (2) check the product label to verify that it contains a PaintCare product.

Acceptable

- The PaintCare product must be in its original container*
- The container is labeled as containing one of the designated PaintCare products listed below*
- The container must be in good condition and not leaking*
- The container must be 5 gallons in size or smaller
- The container contains dry latex paint

Not Acceptable

- The container is not original (e.g., paint was transferred into a jar)*
- The container does not have an original label (Drop-off sites permitted to accept household hazardous waste may accept unlabeled and leaking containers by following the procedures described below.)
- The container is leaking or has no lid*
- The container is larger than 5 gallons
- The container is empty

Unlabeled and Leaking Containers

A drop-off site permitted to accept household hazardous waste may, at its discretion, choose to accept unlabeled and/or leaking containers if it follows the protocols below and otherwise complies with all applicable laws:

Unlabeled Containers: A drop-off site may accept containers that do not have an original label if a staff person appropriately trained in identifying unknown wastes (1) identifies the material in the container as a PaintCare product, and (2) applies a label identifying the contents to the container before placing it in a collection bin.

Leaking Containers: A drop-off site may accept a leaking container or a container with no lid if an appropriately trained drop-off site staff person (1) verifies that the container contains a PaintCare product, (2) places the contents of the leaking/open container into an appropriate substitute container (which can include bulking such PaintCare products into 55-gallon drums), and (3) applies an appropriate label to the substitute container.

Refusing an Unacceptable Product or Container

Do not accept non-PaintCare products from any participant unless they are accepted as part of normal site operations and are not placed in PaintCare collection bins. Do not accept into the PaintCare program any PaintCare products in unacceptable containers unless your site is permitted to manage household hazardous waste as described on the previous page.

When refusing a PaintCare product, drop-off site staff must explain why the PaintCare product cannot be accepted (e.g., material is not part of the program, cannot accept material from non-exempt generator). If you have a participant with products that your location cannot manage, refer the participant to their local hazardous waste disposal program, garbage hauler, environmental health agency, or public works department. Local contact information is provided following the cover page of the binder.

Retailer Guidelines Section 5. Limit per Participant

How to Handle Storage Limitations

While the PaintCare program intends to collect as much PaintCare product as possible, we recognize that your drop-off site may have storage limitations. PaintCare drop-off sites, in agreement with PaintCare, may limit the amount of PaintCare products they accept per participant.

If your collection bins are completely full, inform the participant that you are temporarily unable to accept PaintCare products and redirect them to the nearest alternative PaintCare drop-off site (refer to the site locator at www.paintcare.org or contact PaintCare hotline at 855-724-6809) or ask them to come back at a later date. Contact the PaintCare hauler immediately to have your collection bins picked up and replaced.

If you have a participant with a significant amount of PaintCare products that your location cannot manage, ask the participant to contact PaintCare directly for additional assistance. We may direct the participant to another PaintCare drop-off site that can manage the large load or offer a direct pickup.

Large Volume Pickups (LVP)

PaintCare offers a free pick-up service to painting contractors, property managers, households and others with a large volume of leftover PaintCare products. Typically, a minimum of 200 gallons (by container size) is required to qualify for the LVP service.

To refer a participant to the LVP service:

- Provide the participant an LVP fact sheet
- Ask the participant to request a pick-up using the online LVP form
- The LVP fact sheet and online form are available at www.paintcare.org (select the “Large Volume Pickup” button on the homepage)
- For additional questions, refer the participant to PaintCare for assistance

Retailer Guidelines Section 6. Working with Haulers

PaintCare contracts with haulers for the delivery of supplies, delivery of empty collection bins, and pick-up of full collection bins.

Scheduling the Hauler to Pick Up Collection Bins

When you anticipate your collection bins will be full within your site’s pick-up timeframe (generally 5 business days in urban areas, 10 business days in rural areas), call your hauler to schedule a pickup, or use their online order system if they have one. The name and contact information of your hauler is provided at the front of your training binder.

When establishing an appointment for pick-up, please indicate:

- Your site is a PaintCare drop-off site
- Name of drop-off site and address
- Your name
- Your phone number
- Number of full collection bins to be picked up
- Number of empty collection bins needed for replacement

Preparing Collection Bins for Pickup

On the scheduled pickup day, collection bins and your loading area must be readily accessible to the hauler for quick and efficient loading.

- Identify which bins are full and ready for pickup
- Make sure the path between your bins and the hauler's vehicle is clear and at least 4 feet wide to accommodate movement of bins

The hauler will bring the necessary shipping documents and labels for the collection bins. The hauler is responsible for labeling, loading and off-loading collection bins, and will provide a copy of the shipping documents to the drop-off site. Sign and keep a copy of the shipping documents for your records.

Retailer Guidelines Section 7. Spill Response

Spills

The information in this section will assist with spills from damaged or leaking program containers. It is important that all drop-off site staff understand corrective actions to minimize exposure to people and the environment.

Collection bins must be kept in a clean, accessible area. Clean up any spill or release of PaintCare product immediately and place spill residue in a sealed container, label it and place sealed container in a collection bin. Contact the hauler or PaintCare to replenish spill kit materials as needed.

Reporting

Report spills as required by law, summarized in the state-specific guidelines at the front of this binder. Contact PaintCare within 24 hours of making such a report.

Prominently post emergency contact numbers including police, fire department, and emergency services.

Spill Response Procedures

Always follow all applicable spill response procedures set forth in your operating permit or as otherwise required by applicable law.

If a spill is small enough to be managed by drop-off site staff, follow these steps:

- Isolate the area and restrict access to the spill
- Ensure personal safety, put on protective gear (glasses and gloves) provided in the spill kit
- Stop the movement of paint by placing the leaking container upright or in a position where the least amount will spill, and place leaking container in plastic bags provided in spill kit, or into the spill kit container

- Contain the spill by placing absorbent pads or granular absorbent around and on the spill – if outdoors, place barriers around storm drains to prevent a release to the environment
- Collect the contaminated absorbent material and place it in plastic bag(s) or spill kit container, along with the leaking container and contaminated PPE, seal the bag(s) and place in the collection bin
- Remove any clothing that may be contaminated, wash thoroughly to remove spilled material from your hands or body
- Replace any used spill control supplies
- Document the date, location, and amount and type of material spilled

Retailer Guidelines Section 8. Inspections and Records

Inspections and Record Keeping

Drop-off site staff are responsible for regularly inspecting collection bins and spill kits to ensure that such materials are in proper working order, include any necessary labeling, etc. Please report any damaged materials or other problems to PaintCare immediately so PaintCare may arrange for prompt replacement or repair.

Maintain the following records for a minimum of 3 years:

- Internal and external inspection records
- Paint Drop-Off Logs (provided in PaintCare training binder)
- Direct Reuse and Reprocessed Paint Waivers (provided in PaintCare training binder)
- Employee training records (provided in PaintCare training binder) – discussed in Section 1
- Bills of lading and/or other documentation required by applicable law for outgoing shipments of PaintCare products

Retailer Guidelines Section 9. Direct Reuse and Paint Processing

Direct reuse is an additional service permitted for certain site types. These guidelines only apply to sites with a contract with PaintCare to engage in direct reuse. Paint retailers are not direct reuse sites.

Requirements for Direct Reuse

PaintCare encourages reuse of leftover paint through direct reuse (also known as a “paint exchange” or “swap shop”). Reuse sites return good quality unused paint to the local community at low or no cost.

When selecting products to place in the direct reuse area, products must be in their original container, have an original label, and be in good physical and aesthetic condition. Contents must be liquid and relatively new. The container must be closed securely before placing it in the reuse storage area. Containers must never be opened by participants at the drop-off site. Direct reuse products must be displayed by drop-off site staff in a storage area separate from the PaintCare collection bins.

Requirements for Paint Reprocessing

PaintCare also encourages on-site latex paint reprocessing. On average, 30-60% of latex paint brought to the site is reprocessed back into usable paint available for return to the community. Containers of reprocessed paint offered to the public at a drop-off site must not display any unauthorized third-party branding; generally new containers are used to pack reprocessed paint.

A household hazardous waste facility permitted to conduct paint reprocessing must have and follow its own procedures for sorting and reprocessing paint. At a minimum, these procedures will include:

- Open each container to visually inspect the contents
- Determine if the contents are latex, oil-based, or other paint
- Determine if the condition of the paint is suitable for recycling (e.g., not moldy, rusty, etc.)
- Sort containers according to type, quality, and color

For containers of products suitable for paint reprocessing:

- Bulk contents into larger container (e.g. drum) for mixing
- Mix paint until homogenous
- Repackage paint into 5-gallon or smaller containers
- Label as reprocessed paint

For containers of products unsuitable for reprocessing, either:

- Close container and pack in a collection bin (must be completely resealed and not leaking)
- Sort and bulk the contents into a drum

Participant Waiver

Participants taking paint from a drop-off site must sign the Direct Reuse and Reprocessed Paint Waiver log included in the training binder (or an approved equivalent thereof) explaining that the paint is taken “as-is” with no guarantee of quality or contents. The participant must read, complete, and sign the form and the staff must verify what has been taken by the participant. The staff must record on the log the volume taken by each participant and the total volume.

Appendix E. Registered Manufacturers

Registered Manufacturers
California Paint Stewardship Program as of 1/3/2024

1. 2Guard, 1276 S Lyon St, Santa Ana, CA, 92705, USA

Appendix F. Awareness Survey

2023 Awareness Survey

Introduction

In September 2023, PaintCare surveyed 532 individuals throughout California in order to measure consumer behavior, paint recycling awareness, and effectiveness of outreach activities. Surveys were conducted via web survey using a panel of respondents reflective of the demographic composition of California. The sample size provides 90% confidence in the accuracy of the measured results for the population within +/-3%.

The results were analyzed by KB Insights to help PaintCare better understand trends in the data and help guide future targeting. Data from all PaintCare state programs were included in the analysis, providing the additional benefit of comparing results between programs throughout the nation. The following report focuses only on California outcomes for FY2024.

FY2024 California results are presented below in four categories: behavioral outcomes, awareness outcomes, marketing outcomes, and recycling intentions.

Behavioral Outcomes:

- Almost two thirds (60%) of California respondents purchased paint in the last year. Of those, 43% reported asking a salesperson for assistance in calculating the right amount to buy; 40% reported taking measurements and estimating their needs themselves; 24%, following instructions on the label; 22%, looking up recommendations online; and 18%, using a web-based paint calculator.
- More than half (59%) bought more than they needed for their projects; a third (33%), the right amount such that there was little to no paint left over; a small percentage (7%), less than they needed. Among those who bought more than they needed, most said they didn't want to run out of paint then need to get more or that they wanted some left over for touch-ups.
- More than two thirds (69%) of respondents who knew that paint can be recycled said they had taken paint to be recycled in the past, a key performance index used to track recycling success.
- The percentages of people who store paint at their home/business vs. those who do not are also used as a barometer for recycling success. In FY2024, 80% of respondents said they were storing paint at home; 20% were not. Among those who were storing paint, the median amount stored was "less than a gallon."

Question: “How much leftover or unwanted paint do you have in your home or business at this time (e.g., primer, interior or exterior house paint, stain, deck sealer, or clear finishes like varnish)?” (Sample size: 531)

Answer	Percent
None	20%
Less than 1 gallon	36%
1 to 5 gallons (would fit in a cardboard box)	30%
5 to 15 gallons (would fit in a shopping cart)	8%
15 to 29 gallons (would fit in 2 shopping carts)	1%
More than 30 gallons	<1%
I have some paint, but I do not know how much.	5%

- Almost two thirds (64%) of stored paint is left over from jobs that consumers did themselves or that a contractor/painter left behind. 24% said they intentionally kept paint for future touch-ups.

Question: What is the main reason you have leftover paint currently in your home/business? (Sample Size: 425)

Answer	Percent
I did some painting myself and I had some leftover paint when I was done.	53%
I intentionally bought/kept paint for future touch-ups.	24%
I hired someone to paint, and they left it behind.	11%
I found the paint in my home or business when I moved in.	5%
I don't remember where the paint came from.	3%
I am a professional painter or contractor, and it is from one or more of my jobs.	3%
Other	2%

- In FY2024, we saw a slight increase in the percentage of respondents who had taken paint somewhere to be recycled. Other behavioral outcomes were statistically similar to FY2023 results.

Comparison of FY2019 through FY2024 Behavioral Outcomes

ALL RESPONDENTS

Behavioral Trend (Question)	FY2019 Percent	FY2020 Percent	FY2021 Percent	FY2022 Percent	FY2023 Percent	FY2024 Percent
Have you purchased paint in the last year? For the purposes of this question, "paint" includes primer, interior or exterior house paint, stain, deck sealer, and clear finishes like varnish.	48%	51%	50%	64%	60%	60%
Have you ever taken paint somewhere to be recycled?	51%	51%	51%	72%	66%	69%
How much leftover or unwanted paint do you have in your home or business at this time? (% "None")	29%	28%	30%	21%	21%	20%

- We also analyzed the segment of end-consumer respondents who purchased in the last year. This analysis excludes professional painters and those who have not recently purchased paint so that we can more accurately examine consumer behavior. Note that this segment is represented by 288 respondents; thus, our margin of error at a 90% level of confidence is +/-4.8%.
- The percentage of end consumers who purchased in the last year was the same in FY2024 and FY2023 (59%). The percentage who had previously recycled increased substantially (from 64% to 77%), which seems to correspond to an increase in those who were not storing paint (from 4% to 8%).

Comparison of FY2019 through FY2024 Behavioral Outcomes
END CONSUMERS ONLY; PURCHASED PAINT IN LAST YEAR

Behavioral Trend (Question)	FY2019 Percent	FY2020 Percent	FY2021 Percent	FY2022 Percent	FY2023 Percent	FY2024 Percent
Have you purchased paint in the last year? For the purposes of this question, "paint" includes primer, interior or exterior house paint, stain, deck sealer, and clear finishes like varnish.	45%	46%	46%	51%	59%	59%
Have you ever taken paint somewhere to be recycled?	48%	49%	58%	60%	64%	77%
How much leftover or unwanted paint do you have in your home or business at this time? (% "None")	6%	5%	8%	6%	4%	8%

- Fewer respondents in this segment were storing paint at home than in the full respondent base (8% vs. 20%, respectively). This infers that recent painters dispose leftover paint rather quickly compared to those who painted years ago.

Awareness Outcomes:

- Almost half (45%) of respondents were aware of paint disposal opportunities in California, such as drop off locations at paint stores and hazardous waste facilities.
- 11% were aware of the availability of free on-site pickup services for those with 100+ gallons of leftover paint.
- About a quarter (26%) knew that paint could be recycled (disposed in such a way that it may be re-used). This question is asked after the questions above in order to differentiate between knowledge of drop off/pick up opportunities and recycling.
- Of those who knew about paint recycling, 78% knew where to take it and 37% knew about the fee added to paint purchases to support future recycling.

- In FY2024, drop-off/pick-up knowledge was statistically similar to FY2023. However, paint recycling knowledge declined slightly (from 30% to 26%) and knowledge of the recycling fee at purchase declined substantially (from 54% to 37%). However, knowledge of where to take paint for recycling increased significantly (from 71% to 78%).

Comparison of FY2019 through FY2024 Awareness Outcomes

ALL RESPONDENTS

Awareness Trends (Question)	FY2019 Percent	FY2020 Percent	FY2021 Percent	FY2022 Percent	FY2023 Percent	FY2024 Percent
Prior to this survey, were you aware of paint disposal opportunities in your state, such as drop off locations at paint stores and household hazardous waste facilities?	N/A*	N/A*	N/A*	N/A*	48%	45%
Prior to this survey, were you aware there is a free on-site pickup service available to households, professional painters, businesses and organizations with 100 gallons or more of leftover paint?	N/A*	N/A*	N/A*	N/A*	14%	11%
Prior to this survey, did you know that paint can be recycled (disposed in such a way that it can be reused)?	N/A*	N/A*	N/A*	N/A*	30%	26%
Prior to this survey, did you know that	40%	42%	43%	57%	N/A*	N/A*

paint can be recycled?						
Are you aware that when you buy paint in California, there is a small fee added to the price to pay for a program to recycle any leftover paint you have?	58%	62%	61%	77%	54%	37%
If you wanted to take paint somewhere to be recycled, do you know where to take it?	65%	70%	60%	80%	71%	78%

**new questions or new wording starting in FY2023*

- Once again, we also analyzed the segment of end-consumer respondents who purchased in the last year to more accurately examine consumer behavior. Within this segment, all changes were also insignificant other than the percentage who were aware of the fee added at purchase for future recycling, which decreased substantially (from 60% to 38%).

Comparison of FY2019 through FY2024 Awareness Outcomes

END CONSUMERS ONLY; PURCHASED PAINT IN LAST YEAR

Awareness Trends (Question)	FY2019 Percent	FY2020 Percent	FY2021 Percent	FY2022 Percent	FY2023 Percent	FY2024 Percent
Prior to this survey, were you aware of paint disposal opportunities in your state, such as drop off locations at paint stores and household hazardous waste facilities?	N/A*	N/A*	N/A*	N/A*	51%	50%
Prior to this survey, were you aware	N/A*	N/A*	N/A*	N/A*	15%	13%

there is a free on-site pickup service available to households, professional painters, businesses and organizations with 100 gallons or more of leftover paint?						
Prior to this survey, did you know that paint can be recycled (disposed in such a way that it can be reused)?	N/A*	N/A*	N/A*	N/A*	30%	28%
Are you aware that when you buy paint in California, there is a small fee added to the price to pay for a program to recycle any leftover paint you have?	59%	64%	70%	66%	60%	38%
If you wanted to take paint somewhere to be recycled, do you know where to take it?	57%	71%	64%	71%	78%	78%

**new questions or new wording starting in FY2023*

- New in FY2024, respondents were asked how familiar they were with various best practices relative to paint storage. About half of respondents were familiar with the practice of using a rubber mallet when putting the lid back on the paint can (50%), cleaning the rim before putting the lid back on (48%) and keeping paint away from rain and damp locations (47%). Fewer knew to keep paint away from freezing temperatures (40%) and use a paint key (38%). A fifth (20%) weren't aware of any of these paint storage best practices.

Question: Below is a list of best practices when it comes to paint storage. Which best practices were you aware of before taking this survey? Select all that apply. (Sample Size: 531)

Answer	Percent
When putting the lid back on the can, tap it with a rubber mallet instead of pounding it with a hammer to prevent the lid from bending.	50%
Clean any paint out of the container's rim before putting the lid back on.	48%
Keep paint away from rain or damp locations.	47%
Keep paint away from freezing temperatures.	40%
Use a paint key or paint can opener instead of a screwdriver to prevent the lid from bending.	38%
None of the above - I didn't know any of these best practices before taking this survey.	20%

Marketing Outcomes:

- 8% of all respondents said they had heard of PaintCare before completing the survey.
- 3% remembered a PaintCare advertisement.
- 7% had heard of PaintCare via other means, such as from a friend/relative/colleague, brochure/card at a paint retail store, sign/poster at a paint retail store, from a local hazardous waste center, received information in the mail, Facebook/social media, and/or online research.
- FY2024 results for each of the aforementioned marketing measures were statistically similar to those in FY2023. FY2022 should be treated as an anomaly due to the fact that the percentage of professional painters was much higher in FY2022, creating an unusual increase in results due to their higher awareness levels.

Comparison of FY2019 through FY2024 Marketing Outcomes

ALL RESPONDENTS

Marketing Trend (Question)	FY2019 Percent	FY2020 Percent	FY2021 Percent	FY2022 Percent	FY2023 Percent	FY2024 Percent
Have you ever heard of PaintCare before?	11%	13%	13%	35%	6%	8%
Do you recall seeing an advertisement for PaintCare in the last several months?	8%	10%	9%	31%	3%	3%
Do you recall hearing about PaintCare in any of the following other ways (list)?	10%	12%	12%	34%	4%	7%

Recycling Intentions:

- In order to contrast future recycling intentions to past behavior, questions were asked both about how consumers have disposed of paint in the past and what they intend to do in the future.
- Over a third of respondents (36%) reported that they chose a sustainable option for paint disposal in the past, including: dropping it off at a paint retail store (7%) or HHW (22%), or giving it away to someone else who needs it (7%).

Question: Which has been your preferred method to dispose of leftover or unwanted paint? (Sample Size: 528)

Answer	Percent
Stored it in the basement, garage, or a closet because I intended to use it someday	24%
Not applicable - I have never stored or disposed of leftover or unwanted paint.	12%
Took it to a household hazardous waste facility/event or transfer station	22%
Dried it out and put it in the trash	11%

Put cans of liquid paint in the trash	4%
Took it to a paint, hardware, or lumber store	7%
I don't remember what I did with the leftover or unwanted paint.	7%
Mixed it with hardener or kitty litter and put it in the trash	2%
Gave it away to family, friends, or a community organization	7%
Poured paint down the drain	1%
Left it behind when I moved	3%
Other	1%

- In contrast, almost two thirds (64%) of respondents reported that they will choose a sustainable option if they have leftover paint in the future, such as dropping it off at a paint retail store (18%) or HHW (32%) or giving it away to someone else who needs it (14%).

Question: If you wanted to get rid of unwanted paint in the near future, what would you most likely do with it? (Sample Size: 527)

Answer	Percent
Take it to a household hazardous waste facility/event or transfer station	32%
I don't know	14%
Dry it out and put it in the trash	12%
Take it to a paint/hardware/lumber store	18%
Give it away to a family member, friend, or community organization	14%
Put cans of liquid paint in the trash	3%
Mix it with hardener or kitty litter and put it in the trash	3%
Pour paint down the drain	1%
Other	2%

- Finally, respondents were asked to rate the likelihood that they would recycle paint in the future. 81% said they would be either extremely likely or likely to recycle paint in the future, slightly lower than FY2023 results.

Comparison of FY2020 through FY2024 Recycling Intentions*

ALL RESPONDENTS

Intentions Trend (Question)	FY2020 Percent	FY2021 Percent	FYI2022 Percent	FY2023 Percent	FY2024 Percent
How likely will you recycle next time you have paint to dispose? (% Extremely Likely or Likely)	75%	77%	86%	85%	81%

**Note: this question was added in FY2020 so no FY2019 trend information is available for this metric.*

- Within the segment of end-consumer respondents who purchased in the last year, the percentage of those who said they would be either extremely likely or likely to recycle paint in the future dropped slightly (from 89% to 83%).

Comparison of FY2020 through FY2024 Recycling Intentions*

END CONSUMERS ONLY; PURCHASED PAINT IN LAST YEAR
