STATUTORY CITATION

California Code of Regulations, Title 14. Chapter 11.

Article 2. Architectural Paint Recovery Program

Section 18952 states, in relevant part:

(a) A corporate officer, acting on behalf of an architectural paint manufacturer or stewardship organization, shall submit as part of the stewardship plan the following information:

(1) Contact information of the corporate officer responsible for submitting stewardship plan and annual report documents to the department and for overseeing paint stewardship program activities.

(2) List and contact information for each architectural paint manufacturer participating in the stewardship organization.

(3) List of brands covered under the stewardship plan.

Section 18953 requires that a stewardship plan contain the following, in relevant part:

(1) Identify the manufacturer or designated stewardship organization responsible for the stewardship plan submittal. A manufacturer or stewardship organization shall provide updates to the list of manufacturers and brands participating in its program within 30 days of any changes to that list.

SECTION OVERVIEW

This section discusses:

- PaintCare Inc.
- Program contacts
- Manufacturer and brand registration
- Private label agreements
- Registration lists
- Program products

A. PAINTCARE INC. AND PAINTCARE CALIFORNIA LLC

On behalf of participating paint manufacturers, PaintCare Inc. is pleased to submit to the Department of Resources Recycling and Recovery (CalRecycle) an updated California paint

stewardship program plan. The primary purpose of this submission is to revise the program's fee structure, per California Code of Regulations, Section 18952(b)(4).

PaintCare Inc. was formed in 2009 by the American Coatings Association, the primary trade association for the paint and coatings industry. PaintCare Inc. is a 501(c)(3) non-profit entity. PaintCare's corporate office is in Washington, D.C. State program staff work in the states in which PaintCare programs operate. PaintCare Inc. is overseen by an 11-member unpaid Board of Directors representing architectural paint manufacturing companies.

PaintCare Inc. is in the process of establishing sole-member limited liability companies that are each dedicated to administering the paint stewardship program in a particular state. PaintCare intends to establish such a sole-member LLC entity to administer the California paint stewardship program under the anticipated name of PaintCare California LLC. PaintCare California LLC will share PaintCare Inc.'s non-profit status and will meet all necessary qualifications for administering the paint stewardship program under California law. PaintCare Inc. plans to transfer responsibility for management of the California PaintCare program described in this program plan to PaintCare California LLC. When PaintCare Inc. is ready to effectuate that transition, it will submit a written request to CalRecycle to seek approval of that proposed change.

B. PROGRAM CONTACTS

Below are the current contacts for the California program:

Jeremy Jones
West Coast Program Manager
(415) 590-0259
jjones@paint.org

Nichole Dorr
California Program Manager
(530) 446-4017
ndorr@paint.org

The names and titles of PaintCare staff are listed on PaintCare's website (www.paintcare.org).

C. MANUFACTURER AND BRAND REGISTRATION

Representation by PaintCare is open to all architectural paint manufacturers who are obligated to take part in the California paint stewardship program. Manufacturers register their company and brands of architectural paint with PaintCare.

D. PRIVATE LABEL AGREEMENTS

Private label agreements (or services) represent products manufactured or distributed by one company for use under another company's label. The products are also referred to as store brands or generic brands, and the agreements are also known as tolling agreements. These agreements are often kept confidential to protect the arrangements from competitive interests. Therefore, PaintCare does not specify which brands are produced by which manufacturer, unless the name of the manufacturer is included in the brand name. Instead, registered manufacturers and their registered brands are always presented in separate lists to ensure the confidentiality of these agreements.

E. REGISTRATION LISTS

PaintCare posts the lists of registered manufacturers and brands on its website to make them available for retailers, distributors and CalRecycle. Retailers and distributors will use the brand list to learn which brands may be legally sold in California.

The list of registered manufacturers and brands as of the submission date of this plan are provided in Appendix A. PaintCare will provide CalRecycle with current lists within 30 days of any changes. CalRecycle should contact PaintCare if CalRecycle ever needs contact information for a given manufacturer that is participating in the program.

F. PROGRAM PRODUCTS

The terms "program products," "PaintCare products," "architectural paint," and "paint" are used interchangeably in this plan and in PaintCare communications. In addition, this plan uses the common term latex paint to mean non-combustible or water-based program products, and oil-based paint to mean combustible or petroleum solvent-based program products.

Program products are architectural paints in containers no larger than five gallons in size. They do not include industrial coatings, coatings used for original equipment manufacturing, and other specialty coatings. The full definition and examples of both program and non-program products are provided in Appendix B. This definition is used to determine the products on which manufacturers are to apply the paint stewardship assessment (called the PaintCare fee) to fund the program, as well as to determine which products are accepted by the program's paint drop-off sites.

As needed, PaintCare issues product notices to explain or clarify whether and why certain types of products are a part of the program or not. PaintCare posts these product notices on its website and notifies stakeholders, as needed, when such notices are issued. An example of these notices is provided in Appendix B.

2. Program Goals and Activities

STATUTORY CITATION

California Code of Regulations, Title 14. Chapter 11.
Article 2. Architectural Paint Recovery Program

Section 18953 requires that a stewardship plan contain the following, in relevant part:

(2) Program Goals and Activities. Include program goals that are specific to and appropriate for California. Description of goals must include a baseline, to be provided by the manufacturer or stewardship organization, from which the goals will be measured and reported in the manufacturer or stewardship organization's annual reports. The baseline should indicate the status of household hazardous waste management in California at the time of plan submission.

Describe how the program will:

(A) Reduce the generation of postconsumer paint;

(B) Promote the reuse of postconsumer paint;

(C) Properly manage postconsumer paint at end-of-life in an environmentally sound fashion, including recovery, recycling, and proper disposal of postconsumer paint; and

(D) Manage paint containers and undertake market development activities, if a manufacturer or stewardship organization chooses to engage in these activities.

(3)(D) Description of how each consumer of architectural paint in California will have an opportunity to recycle and properly manage their unwanted architectural paint on a statewide basis, including the proposed number, location, and type of collection points located in the state.

(E) Address the coordination of the architectural paint stewardship program with existing local household hazardous waste collection programs.

(F) Address the coordination of the architectural paint stewardship program with potential retail collection points.

California Public Resources Code

Section 48703 states, in relevant part:

(d) The plan shall include goals established by the manufacturer or stewardship organization to reduce the generation of postconsumer paint, to promote the reuse of postconsumer paint, and for the proper end-of-life management of postconsumer paint, including recovery and recycling of postconsumer paint, as practical, based on current household hazardous waste program information.

SECTION OVERVIEW

This section discusses:

- Program audience
- Paint drop-off sites and services
- Drop-off site operations
- Program goals

A. PROGRAM AUDIENCE

The California PaintCare program will serve California's households, businesses, schools, government agencies and other entities that have leftover, unwanted paint, as described below.

A1. Households

Households may drop off any quantity of postconsumer latex or oil-based paint at PaintCare drop-off sites, subject to quantity limits set by each site.

A2. Very Small Quantity Generators (VSQGs)

Painting contractors, small businesses, and other small to medium-sized organizations are typical VSQGs (as described in federal rules in 40 CFR 262.14). The program will accept any quantity of postconsumer latex paint from VSQGs, and it will accept postconsumer oil-based paint at or below the limits applied to hazardous waste generation for VSQGs. To qualify as a VSQG, among other criteria, a business/organization must (1) generate no more than 100 kilograms (about 25 gallons or 220 pounds) of non-acute hazardous waste per calendar month, (2) generate no more than 1 kilogram (about 2.2 pounds) of acute hazardous waste per calendar month, and (3) accumulate no more than 1,000 kilograms (about 250 gallons or 2,200 pounds) of hazardous waste at any given time

A3. Small Quantity Generators and Large Quantity Generators

The program will accept any quantity of postconsumer latex paint from SQGs and LQGs (as described in federal rules in 40 CFR 260.10). An organization is an SQG or LQG if it exceeds the generation or accumulation limits stated above for VSQGs. As of the date of this plan, the program does not provide for acceptance of postconsumer oil-based paint from SQGs or LQGs, as oil-based paint from industrial generators is regulated as hazardous waste under federal law. If the program accepts oil-based paint from SQGs or LQGs in the future, such acceptance will be in accordance with all applicable law.

B. PAINT DROP-OFF SITES AND SERVICES

PaintCare partners with household hazardous waste (HHW) programs (facilities and events) that collect paint and increases paint collection by setting up new paint drop-off sites and services. The California program includes the following:

- HHW programs
- Solid waste facilities (transfer stations, recycling centers and landfills)
- Retail stores
- Material reuse stores
- Direct pickup services
- PaintCare events

All eligible locations are invited to participate as paint drop-off sites if they can meet PaintCare's operational and other program requirements. For example, the bin storage space must be secure, inaccessible to the public, have an impermeable surface, and be protected from the elements.

Paint drop-off sites generally must accept all program products, have staff available to accept paint during operating hours, accept paint from households and businesses, and accept paint free of charge from participants who drop off paint. In addition, sites must be willing to be listed on the site locator on PaintCare's website and post and distribute PaintCare point-of-sale outreach materials, including a poster advertising their site as a paint drop-off site.

Some exceptions may be allowed in recognition of pre-existing restrictions on HHW facilities and other non-retail sites. Current examples include:

- Non-retail sites with a limited geographical service area due to their funding source (e.g., local tax or utility) will not be required to accept paint from participants outside of their service area.
- Non-retail sites that do not accept waste from businesses/VSQGs will not be required to do so.
- Non-retail sites that accept oil-based paint but do not currently accept latex paint will not be required to change their operations to accept latex paint.
- Non-retail sites that already charge a fixed amount to businesses/VSQGs to schedule an appointment for paint drop-off may continue this practice as long as it is clear to the customers that the charges do not relate to services funded by the PaintCare program, including paint collection bins, transportation and processing.

For all sites, PaintCare provides and covers the cost for paint collection bins, paint transportation, and paint processing (end-of-life management). In addition, most sites are provided spill kits, signage, training and training materials.

B1. Household Hazardous Waste Programs

HHW programs are excellent partners because they provide their customers the convenience of dropping off other products at the same time as paint, and they often have regular customers that have used their programs for many years.

HHW Program Recruitment and Outreach Activities

With assistance from CalRecycle and other organizations involved with waste management in California, PaintCare identified and reached out to all known HHW programs in the state to learn about their services, inform them about the PaintCare program, highlight the benefits, and outline the steps to partnering with PaintCare. These benefits include cost savings, offering expanded services to their community, reducing waste, and increasing paint recycling.

Over the first ten years of the program, PaintCare has had great success in forming and maintaining relationships with HHW programs across the state. PaintCare staff regularly provide updates and receive program input from local program representatives at meetings held by the HHW Information Exchange (HHWIE) and the Environmental Services Joint Powers Authority (ESJPA). Efforts to identify and recruit HHW programs to be paint drop-off sites will be on-going.

B2. Solid Waste Facilities (Transfer Stations, Recycling Centers, Landfills)

Solid waste facilities, transfer stations in particular, are important program partners because like HHW programs, they provide their customers the convenience of dropping off other products at the same time as paint, and they may also have regular customers that have used their facilities for many years. Solid waste facilities also tend to fill the gap, particularly in rural areas, where there might not be HHW facilities or paint retailers to be drop-off sites.

PaintCare has typically observed that solid waste facilities become more interested in joining the program after retailers and HHW programs have joined. Efforts to identify and recruit both public and private solid waste facilities to be paint drop-off sites will be on-going. As of the submission of this plan, PaintCare has 60 year-round drop-off sites at solid waste facilities.

B3. Retailers

Paint retailers are valuable program partners because they are located throughout the state, are often centrally located in cities and towns, are open five or more days per week, and have staff familiar with paint products and how to handle them safely. In addition, their customers are likely to have some leftover paint and often ask store staff for advice on what to do with it. Retailer participation as a paint drop-off site is voluntary. Retailers are not compensated for being a drop-off site.

Material Reuse Stores

Material reuse stores, such as Habitat for Humanity ReStores, are a subset of retailers that can offer reuse in addition to serving as paint drop-off sites. At these sites, paint can be screened for possible reuse and then donated or sold back to the local community. Paint that is not set aside for reuse will be placed in paint collection bins.

B4. Direct Pickup Services

Large Volume Pick-Up (LVP) Service

The LVP service is free and will be offered to California painting contractors, other businesses, organizations, and households with large volumes of paint with a minimum quantity, currently 100 gallons or more, measured by container volume and not liquid paint volume. This service allows approved users to have paint picked up at their business or homes.

Users of the LVP service will be asked to provide specific information about their volume of leftover paint, paint type (latex or oil-based), and container sizes. Once approved for pickup, they will be put in direct contact with PaintCare's transporter to arrange an appointment.

Recurring Large Volume Pickup (RLVP) Service

The RLVP service is a free service and will be offered to painting contractors and other businesses and organizations that generate large volumes of paint on an on-going basis. These sites will be set up and trained by PaintCare staff on program requirements similar to public drop-off sites, but they will only use the program for paint from their own operations.

Users of the RLVP service will be asked to provide information about the volume and type of paint they generate on a regular basis, and they must have an agreement for service with PaintCare.

SQG/LQG Pickup Service

PaintCare may conduct an SQG/LQG pickup service, accepting both latex and oil-based paint from these generators that are not allowed to use drop-off sites. Any such service that PaintCare provides will be structured to comply with all applicable law.

B5. PaintCare Events

Paint drop-off events may be held by PaintCare in areas of the state that are not within 15 miles of a paint drop-off site or have too few drop-off sites for the population of the area. Participation at PaintCare events will not be restricted by county or other geographical boundaries; participants from any place in California will be allowed to use the events.

C. DROP-OFF SITE OPERATIONS

All PaintCare drop-off sites must have an agreement in place with PaintCare, follow PaintCare's operational requirements, and operate in accordance with applicable federal, state, and local environmental laws, regulations and permits.

C1. Drop-Off Site Training

PaintCare offers training by PaintCare staff and a training binder for all drop-off sites. PaintCare typically requires such training for retail drop-off sites and RLVP sites. The binder includes the site guidelines and a training log to be signed by all employees at the site who handle paint for the program. Examples of current training topics include:

- History and goals of paint stewardship programs
- Identification of program products
- Safe handling and storage of program products
- Spill clean-up and reporting
- Procedures for scheduling a paint pick-up
- Screening for generator status to determine if a business qualifies to use the program for oil-based paint
- Recordkeeping

C2. Collection Volumes

Drop-off sites may set their own limit on the amount of paint they will accept from the public, as long as the limit is no less than five gallons per participant per day and is consistent applicable law (e.g., legal limits applicable to VSQGs).

C3. Paint Storage Bins

Paint collection bins used in the program may include but are not limited to reusable plastic bins or cardboard bins with liners (approximately 1 cubic yard in size); 55-gallon metal or plastic drums; 30- and 50-gallon cardboard boxes with liners; and 20- and 30-yard roll-off containers.

Drop-off sites will be required to follow PaintCare's bin storage requirements. For example, sites are currently required to keep paint collection bins in a secure location that does not have public access, place the bins on an impermeable surface, and protect the bins from the elements if stored outside.

C4. Non-Program Products

The volume of non-program products entering the program will be minimized through public education, signage at drop-off sites, and drop-off site training on product identification.

PaintCare's transporters and downstream processors will manage any incidental non-program products that they receive. They will be instructed to notify PaintCare of incidents and identify the specific drop-off site from where the non-program products originated and the quantity and type that were found. Depending on the number of non-program products, PaintCare may do one or more of the following: (1) contact the site to let them know about the incident, (2) provide additional/refresher training on identification of program and non-program products, or (3) in extreme cases, remove the site from the program.

C5. Site Visits and Monitoring

PaintCare plans to continue visiting drop-off sites on a regular basis. PaintCare will target visiting retail drop-off sites about every six months and target visiting HHW facilities, solid waste facilities, and RLVP sites annually. The purpose of these visits is to ensure compliance with program requirements, provide refresher trainings if needed, address any needs or concerns the sites may have, check their supplies of outreach materials, and solicit feedback about the program.

D. PROGRAM GOALS

The law requires PaintCare to establish goals to reduce the generation of postconsumer paint, to promote the reuse of postconsumer paint, and for the proper end-of-life management of postconsumer paint, based on current household hazardous waste program information. Program goals must be specific to and appropriate for California and include a baseline from which the goals will be measured and reported in annual reports. The baseline should indicate the status of household hazardous waste management in California at the time of plan submission.

This section of the report addresses architectural paint recovery and recycling. Section 5 (Education and Outreach) addresses how outreach will be used to meet the goals to reduce the generation and promote the reuse of postconsumer paint.

D1. Program Convenience

PaintCare uses GIS analysis to determine goals and evaluates them each year in the annual report. For the purpose of defining convenience, PaintCare defines a site (including an event site) by its physical address and considers it to be "year-round" if the site is open at least one day per month, every month of the year. Sites that are open less frequently are considered supplemental sites. To ensure that the program provides adequate and convenient paint recycling opportunities throughout the state, PaintCare has goals to provide paint drop-off sites according to the following criteria:

Distribution Criterion

PaintCare aims to provide at least 95% of California's population with a drop-off site available to them within a 15-mile radius of their home.

The population of California is 39,538,223, as of the 2020 U.S. Census, creating a baseline of 37,561,312 of the population within 15 miles of a site needed to meet this criterion. As of July 1, 2021, the program provided year-round sites within 15 miles of 99% of the state's population – surpassing the distribution criterion. When including supplemental sites in the distribution analysis, population coverage increased to 99.4%.

Population Criterion

PaintCare will provide at least one drop-off site for every 50,000 of the population of California. Retailers and other potential drop-off sites are typically located in or near population centers, creating the site density needed to address convenient local access to drop-off sites.

The population of California is 39,538,223, as of the 2020 U.S. Census, creating a baseline of 790 sites needed to meet this criterion. As of July 1, 2021, the program provided 820 year-round sites – surpassing the criterion.

PaintCare is changing from its previous baseline metric which focused on urbanized areas. A baseline premised on statewide goal more closely aligns with the law's requirement that opportunities for paint recycling and proper management be considered on a statewide basis. While the previous baseline required fewer than 650 sites, and only in urbanized areas, the population criterion will now require 790 sites statewide.

In addition to a commitment to meeting this numeric goal, PaintCare assigns regional program coordinators whose purpose is to understand the paint drop-off site distribution and density in their region. Together with California's program manager, they work with stakeholders to ascertain localized needs, and attempt to provide equitable access to program services, as appropriate.

D2. PaintCare Sites and Services Summary

The following tables summarize the number and type of PaintCare drop-off sites, as of July 1, 2021. The total number of year-round sites listed below is a measurement against the baseline of 790 sites. Included are HHW program partners. As of the date of submission, Kings County is the only HHW program that has expressed interest but has yet to complete a contract. Imperial County has chosen not to collect paint at their HHW facility and refers households and businesses to local PaintCare retail locations. PaintCare partners with 124 year-round and seven seasonal HHW facilities and typically supports 300-350 HHW drop-off events each year.

SUMMARY OF PAINTCARE YEAR-ROUND DROP-OFF SITES AS OF JULY 1, 2021

Site Type	Number of sites
Paint Retailers	615
HHW Facilities	124
Transfer Stations	49
Landfills	7
Recycling Centers	4
Other Sites	6
Paint Recyclers	5
Reuse Stores	9
HHW Event Site	1
Total	820

SUMMARY OF PAINTCARE SUPPLEMENTAL SITES – FY21

Site Type	Number
HHW Events	274
Large Volume Pickups	601
Recurring Large Volume Pickup Sites	75
Door-to-Door Programs	17
Seasonal HHW Facilities	7
PaintCare Paint-Only Events	9
Paint Retailers (partial-year only)	9
Other Sites (partial-year only)	1

The following map shows the number and location of PaintCare paint drop-off sites in California, demonstrating that paint recycling opportunities are both distributed throughout the state and concentrated in population centers.

D3. Recovery Rate

Paint is designed to be fully consumed through application to walls, buildings and other surfaces. Although the amount of postconsumer paint received through collection programs is measurable, it is very difficult to determine the precise quantity of postconsumer paint that is unused and available for collection.

The lag time between the purchase of paint, the decision that the unused product is unwanted, and the additional time taken to return it to a collection site can vary greatly. Architectural paint products have a long shelf-life; consumers purchasing paint in one year may not decide that the unused portion is “unwanted” until years later.

In its first decade of operation, the PaintCare program has monitored closely the volume of paint sold and collected. In its annual reports, PaintCare compares annual sales data to collections during the same time period to calculate the recovery rate. However, a key challenge persists in setting volume-based goals for collection. The impact of source reduction on the volume available for collection cannot be factored into a paint collection goal. “Buy Right” is a key component of the PaintCare program and source reduction is a key goal of the law. The more successful PaintCare is at teaching consumers to purchase the correct amount and/or to use up their leftover paint, the less postconsumer architectural paint will be available for recovery. This is the most desirable outcome of the program but cannot be recognized if success is determined by deviations of collection volumes from a baseline.

PaintCare is not setting a volume-based collection goal and will focus on achieving goals for program convenience in this section and the postconsumer paint reduction and reuse goals in Section 5 (Education and Outreach). PaintCare will continue to report the recovery rate in its annual report.

3. Collection Systems

STATUTORY CITATION

California Code of Regulations, Title 14. Chapter 11.
Article 2. Architectural Paint Recovery Program

Section 18953 requires that a stewardship plan contain the following, in relevant part:

(3) Describe the system that will be used to collect and properly manage postconsumer architectural paint to demonstrate how there will be sufficient funding for the program and how it will be implemented in an environmentally sound fashion. This description must include the following:

(A) Collection methods used for architectural paint, by type.

(B) Destination for reuse activities, processing (including recycling) and/or disposal for architectural paint, by type.

(C) Description of best management practices to be followed by service providers that are acting as collection points, which may include any training that the manufacturer or stewardship organization intends to provide to or require of service providers to ensure proper collection and management of postconsumer architectural paint.

SECTION OVERVIEW

This section discusses:

- Paint transportation
- Paint processing
- Non-program products and empty containers
- Legal compliance
- Insurance and financial assurance

All descriptions in this section refer to current or typical activities as of the submission of this program plan.

A. PAINT TRANSPORTATION

A1. Transportation System

An efficient transportation system is needed to move paint from a large number of paint drop-off sites to processing facilities. The transporters hired by PaintCare, which may include both private and public entities, usually have significant experience in scheduling pickups and

routing to maximize efficiency – taking into account the number of stops, locations, volume of paint to be transported, and projected weight of the loads. Transporters must comply with all applicable state and federal rules and regulations and must track the paint from the point of collection to its final destination. Transporters, subsequent processors, and their records, are subject to audit by PaintCare.

PaintCare requires its transporters to provide service to paint drop-off sites on an on-call basis (e.g., sites call for pickup when their storage capacity is 50% full) or on a set schedule (e.g., every Tuesday) – determined on a site-by-site basis. Transporters are required to deliver empty paint collection bins and spill kits to drop-off sites and pick up full bins in a timely manner. Transporters are typically required to provide service to drop-off sites within five days in urban areas and ten days in rural areas. The longer time period in rural areas is to maximize route efficiency and pick up from multiple locations, yet still serve the location in a reasonable amount of time. For HHW events, transporters are required to deliver empty paint collection bins prior to the start of the event and pick up full bins on the day of the event, unless other arrangements are agreed to prior to the day of the event.

All sites (both rural and urban) are asked to accommodate a minimum of two paint collection bins because it is less expensive and more efficient to pick up two or more bins from one location than to serve the same location several times and pick up only one bin each time.

A2. Transporters

As of the submission of the plan, PaintCare anticipates using one or more of the following transporters to service sites in the state:

- Acrylatex
- ACTenviro
- Clean Earth
- Clean Harbors
- US Ecology
- Veolia
- Visions Paint
- Waste Management

Additional transporters may be added if needed.

B. PAINT PROCESSING

B1. Processing System

PaintCare contracts for processing and proper end-of-life management of postconsumer paint collected in the program. PaintCare requires that the following hierarchy be followed when prioritizing management of paint collected through the program, subject to availability and feasibility in a given area. The options are prioritized by highest, best use:

Latex Paint

- Reuse
- Paint-to-paint recycling or recycling into another product
- Energy recovery
- Alternative daily landfill cover
- Disposal

Oil-Based Paint

- Reuse
- Paint-to-paint recycling or recycling into another product
- Energy recovery
- Incineration

The condition of postconsumer paint when it is received by the program is an important consideration in determining how it will be managed. If paint containers are not sealed well or stored properly (indoors, out of rain or freezing temperatures), latex and oil-based paint can dry out or otherwise be spoiled by mold, rusting cans, or multiple freeze/thaw cycles making some or all of the contents of an individual container of paint unusable or not recyclable.

The following provides a more detailed description of the latex and oil-based paint management methods listed above. With regard to the above hierarchies, PaintCare determines how to classify each management method based primarily on guidance provided by the EPA and the applicable state environmental agency. Due to differing state views on how particular management methods are classified, PaintCare may classify the same management method differently in different states. For all management methods, processors are required to comply with all applicable law. Because legal requirements vary from state to state, some management methods may not be feasible in every state. Likewise, as of the submission of this program plan, some processing methods described below are only available in certain geographic areas but are included to allow for future possibility for the California program.

B2. Latex Paint Management

Reuse

Latex paint may be managed via reuse, meaning that the collected paint is sold or given away in its original labeled container without any alteration of the container contents.

PaintCare supports reuse of latex paint through its partnerships with reuse sites including HHW facilities and material reuse stores. These sites will be required to document their reuse activities to receive compensation for the paint distributed to the public and are encouraged to obtain a participant waiver acknowledging that they accept the material “as is.”

PaintCare may also support reuse of latex paint at PaintCare events. Latex paint collected at the event which is deemed suitable for reuse may be made available to the public at no cost. Participants will complete a waiver acknowledging that they accept the material “as is.”

Paint-to-Paint Recycling

Latex paint may be used to make recycled-content latex paint. Drop-off sites (most commonly HHW facilities) that make recycled-content latex paint typically sort the paint by color, then combine and blend the leftover latex paint into a uniform color which will vary from batch to batch. The recycled-content latex paint is then typically given away or sold locally. Commercial latex paint recyclers typically manufacture a color-sorted, blended, and filtered recycled-content paint that is used domestically and/or internationally. Typically, purchasers of this product either use/re-sell it as is or use it as an input in further paint production.

Lightweight Aggregate

Latex paint may be used as a component in lightweight aggregate. The lightweight aggregate is then offered for sale as lightweight aggregate, used to produce landscape products, or used as a component in various precast concrete products.

Decorative Ground Cover

Dry latex paint may be used as the primary ingredient in a decorative ground cover product.

Energy Recovery

Latex paint may be processed for energy recovery. For example, latex paint may be combined with sawdust to create a biomass fuel.

Alternative Daily Landfill Cover

Latex paint may be used as a component in alternative daily landfill cover (ADC).

Disposal

Dry and solidified latex paint may be solidified and sent to a permitted landfill for disposal. Use of a landfill for disposal is the least preferred management method for latex paint.

B3. Oil-Based Paint Management

Reuse

Oil-based paint may be managed via reuse, meaning that the collected paint being sold or given away in its original labeled container without any alteration of the container contents.

PaintCare supports reuse of oil-based paint through its partnerships with reuse sites including HHW facilities and material reuse stores. These sites are required to document their reuse activities to receive compensation for the paint distributed to the public and are encouraged to obtain a participant waiver acknowledging that they accept the material “as is.”

PaintCare may also support reuse of oil-based paint at PaintCare events. Oil-based paint collected at the event which is deemed suitable for reuse may be made available to the public at no cost. Participants will complete a waiver acknowledging that they accept the material “as is.”

Paint-to-Paint Recycling

Oil-based paint may be used to make recycled-content oil-based paint. Commercial oil-based paint recyclers typically manufacture recycled-content oil-based paint in a variety of colors that is sold domestically and/or internationally.

Energy Recovery

Oil-based paint may be processed for energy recovery. Any facility, including cement kilns and waste-to-energy facilities, used to manage materials through the program are required to be fully permitted in accordance with all applicable federal, state, and local requirements for such waste management.

Incineration

Oil-based paint may be incinerated. Some hazardous waste incinerators process oil-based paint, flammable liquids, and other hazardous wastes and industrial byproducts as a substitute fuel source because they are readily available and have a high BTU value. Any incinerator used to manage materials through the program are required to be fully permitted in accordance with all applicable federal, state, and local requirements for hazardous waste management.

B4. Processors

As of the submission of the plan, the following processors may be utilized by the transporters listed in Section 4-A2:

Latex Paint Processors

Processor	Location	Process
Acrylatex Coatings	Azusa, CA	Recycled-Content Paint, Reuse
Amazon Environmental	Riverside, CA	Recycled-Content Paint, Energy Recovery
Amazon Environmental	Sacramento, CA	Recycled-Content Paint, Energy Recovery
Clean Harbors	Riverside, CA	Recycled-Content Paint
GDB International	Las Vegas, NV	Recycled-Content Paint
Visions Environmental	Oroville, CA	Lightweight Aggregate
Visions Paint Recycling	Sacramento, CA	Recycled-Content Paint, Reuse

Oil-Based Paint Processors

Processor	Location	Process
Buzzi-Unicem USA	Cape Girardeau, MO	Energy Recovery
Cadence Environmental Energy	Chanute, KS	Energy Recovery
Clean Harbors	Kimball, NE	Fuel Incineration
Clean Harbors	Grantsville, UT	Fuel Incineration
Green America	Chesterfield, MO	Energy Recovery
Rineco	Haskell, AR	Energy Recovery
Systech Environmental	Fredonia, KS	Energy Recovery

Additional processors may be added if needed.

C. NON-PROGRAM PRODUCTS AND EMPTY CONTAINERS

C1. Non-Program Products

Although drop-off sites will be instructed and trained to screen for non-program products, a small number of containers of non-program products may enter the program and be screened out during the sorting process by PaintCare's transporters and processors. These products will be managed appropriately under applicable law, rather than returned to a drop-off site.

C2. Empty Paint Containers

To the extent feasible, empty metal and plastic paint containers will be recycled. PaintCare will work with the program's contracted transporters, processors, and interested recyclers to identify and utilize available opportunities for container recycling, as necessary. Unrecyclable containers will be disposed of as solid waste.

D. LEGAL COMPLIANCE

As part of their contract, all transporters, processors and their subcontractors will be required by PaintCare to have processes in place to ensure compliance with applicable federal, state, and local environmental laws, regulations, and permits. Transporters and processors must require any subcontractors they use to comply with all applicable environmental regulations and other laws relating to the services provided by those subcontractors. Under the contract terms, violations of law constitute a breach and can be grounds for termination.

PaintCare has established procedures for monitoring both transporters and processors that manage materials in connection with the PaintCare program. Such procedures include both routine monitoring of performance by transporters and processors, as well as a vendor audit program. These procedures are designed to provide reasonable assurances that all transporters and processors comply with all applicable laws and engage in appropriate recordkeeping, tracking, and reporting of materials managed through the program.

Examples of typical audit criteria include the following: a review of applicable licenses/permits, emergency response planning, insurance carriage (including environmental insurance for vendors that transport or process hazardous materials in connection with the PaintCare program), data tracking, and reporting practices.

E. INSURANCE AND FINANCIAL ASSURANCE

PaintCare requires all contractors – drop-off sites, transporters, processors, etc. – to carry insurance appropriate to the services provided for the PaintCare program. Specific amount and terms may vary from contractor to contractor and may include the following:

- Commercial General Liability Insurance
- Commercial Automobile Liability Insurance
- Workers' Compensation Insurance
- Environmental Pollution Liability Insurance
- Endorsements to name PaintCare as an additional insured on relevant insurance policies

Because contractors have widely different insurance policies (e.g., commercial insurance vs. self-insurance, differing limits), PaintCare will evaluate (often with the assistance of outside legal counsel) the insurance terms in each contract on a case-by-case basis to ensure that the contractor maintains insurance of the types and in the amounts appropriate for the services the contractor provides to the PaintCare program. PaintCare itself also carries Pollution Liability and Commercial General Liability Insurance.

PaintCare also requires all contractors to comply with all federal, state, and local laws. If financial assurance requirements are applicable to a PaintCare contractor by law, then they must be in compliance with those laws.

4. Financing Mechanism

STATUTORY CITATION

California Code of Regulations, Title 14. Chapter 11.
Article 2. Architectural Paint Recovery Program

Section 18953 requires that a stewardship plan contain the following, in relevant part:

(4) Include a funding mechanism that provides sufficient funding to recover, but not exceed, the cost of the architectural paint stewardship program, including the administrative (including financial audits per PRC § 48705(a)(6)), operational, and capital costs of the program.

California Public Resources Code

Section 48703 states, in relevant part:

(b)(1) The plan shall demonstrate sufficient funding for the architectural paint stewardship program as described in the plan, including a funding mechanism for securing and dispersing funds to cover administrative, operational, and capital costs, including the assessment of charges on architectural paint sold by manufacturers in this state.

(2) The funding mechanism shall provide for an architectural paint stewardship assessment for each container of architectural paint sold by manufacturers in this state and the assessment shall be remitted to the stewardship organization, if applicable.

(3) The architectural paint stewardship assessment shall be added to the cost of all architectural paint sold to California retailers and distributors, and each California retailer or distributor shall add the assessment to the purchase price of all architectural paint sold in the state.

(4) The architectural paint stewardship assessment shall be approved by the department as part of the plan, and shall be sufficient to recover, but not exceed, the cost of the architectural paint stewardship program. The plan shall require that any surplus funds be put back into the program to reduce the costs of the program, including the assessment amount.

SECTION OVERVIEW

This section discusses:

- Funding mechanism
- Paint sales
- Paint collection volume
- Budget description

- PaintCare fee
- Program budget

A. FUNDING MECHANISM

The PaintCare fee is applied to qualifying containers of architectural paint sold in California. The PaintCare fee is set at a rate to cover but not exceed the cost of operating and sustaining the California program. All revenue generated by the fee on California paint sales will be spent to support the California program. The following steps describe the application of the PaintCare fee:

- Manufacturers add the PaintCare fee to containers of architectural paint sold in California, whether it is sold directly or through dealers (retailers and distributors).
- Retailers and distributors pass the PaintCare fee to their customers by including it in the price of architectural paint they sell in California. This is how retailers and distributors recoup the PaintCare fee they paid when purchasing architectural paint from their suppliers.
- When someone buys architectural paint in California, the PaintCare fee is included in the purchase price. While the fee is part of the product price, retailers have the option to list it as a line item on the receipt. PaintCare encourages retailers to show the fee to aid in customer education and provide consistency across the program.
- Manufacturers report sales and remit to PaintCare the PaintCare fee for architectural paint they sold in California in the preceding month. Manufacturers will have already recouped the PaintCare fee they pay to PaintCare because the fee will be included in the price of their architectural paint when they sold it to their dealers. Some companies may be allowed to report sales on a less frequent schedule if their sales are minimal.

B. PAINT SALES

While paint sales spiked in FY2021, based on the latest available data, PaintCare believes that sales volumes will return to the pre-pandemic level of approximately 71,000,000 gallons annually.

Description	FY2018	FY2019	FY2020	FY2021
Gallons Sold	71,158,122	70,038,896	71,933,636	76,586,693

C. PAINT COLLECTION VOLUME

While paint collection activities were impacted by the pandemic in FY2020, based on the stable nature of the collection infrastructure, PaintCare believes that volumes will track closely to the current annual level of approximately 3,900,000 gallons. Costs related to collection,

transportation and processing are likely to rise due to anticipated rate increases for these services.

Description	FY2018 (gallons)	FY2019 (gallons)	FY2020 (gallons)	FY2021 (estimated gallons)
Latex Processed	3,230,925	3,221,725	2,863,132	3,350,000
Oil-Based Processed	650,988	666,519	702,749	700,000
Total	3,881,913	3,888,244	3,565,881	4,050,000

D. BUDGET DESCRIPTION

Based on anticipated collection volumes and paint sales as discussed above, PaintCare has developed a budget projection for FY2022-FY2026. The primary elements of the budget are discussed here.

D1. Revenue

Revenue calculations utilize the proposed PaintCare fee structure, based on an expected changeover date of July 1, 2022. Based on average paint sales from years before FY2021 and anticipated future sales, the proposed fee structure will reduce revenue by approximately \$3.6 million annually.

A modest annual increase in sales is expected to follow the yearly change in state population. State population growth has typically proven to be strongly correlated to paint sales growth in California and other states. An exception to this observed trend is likely to occur in FY2022 when year-over-year sales are forecast to decline, but only after having increased by nearly 7% in FY2021 as a result of an influx of home improvement purchases during the pandemic.

Changes to paint sales volumes and the timing of the change to the proposed fee structure would alter actual revenue available when compared to the forecast provided.

D2. Operations Expenses

Operations includes all in-state expenses (also called direct expenses) specific to operating the California program. These costs will be borne entirely by the California program and not shared with other PaintCare programs. They are categorized as follows:

- **Paint processing.** This is the most significant expense of the program. Costs are based on pricing from the vendors discussed in Section 4. The projected processing expenses range from 56% to 57% of program costs over the next five years.
- **Paint transportation.** This expense includes the cost of transporting paint bins from paint drop-off sites. The projected transportation expenses range from 9% to 10% of program costs over the next five years.

- **Paint collection supplies and support.** These will include the cost of paint collection bins, spill kits, PaintCare event expenses, training materials, signs, labor to assist LVP sites pack their paint, payments for additional activities (e.g., reuse) at sites, and other paint collection-related support. The projected expenses range from 9% to 10% of program costs over the next five years.
- **Communications.** These expenses will include advertising and educational materials to increase awareness of the program and to promote drop-off sites and services. The projected expenses range from 11% to 12% of program costs over the next five years.
- **Personnel, professional services, and other.** These expenses will include the cost of staff working directly to implement the California program; legal costs for regulatory review and developing contracts; and other logistical, professional support, and office expenses. The projected expenses range are expected to be 5% of program costs over the next five years.
- **State agency administrative fees.** This expense will be paid by PaintCare to CalRecycle and is estimated to be \$272,000 annually. The projected expenses are expected to be 0.7% of program costs over the next five years.

D3. Corporate Expenses

Corporate expenses (also called indirect expenses) are those that are not specific to the California program but support all current and future PaintCare programs. These costs include but are not limited to corporate staffing (e.g., PaintCare's president, director of operations, communications team); back-office support (e.g., information technology, legal, government affairs, and accounting); company-wide auditing, insurance, outside counsel, and other professional services; software licenses and maintenance of data management systems; occupancy; general communications; and other supplies and services that support all PaintCare programs.

Corporate expenses are allocated among all PaintCare programs based on their relative populations in the most recent census and begin to be assessed about six months before program start. At the time of plan submission, California represents 56% of the combined population of the PaintCare programs. This allocation will decrease in late 2021 to approximately 44% as a result of the inclusion of PaintCare's new program in New York. The projected expenses range from 7% to 8% of program costs over the next five years. In future years, PaintCare may update the corporate allocation based on the population estimates published annually by the Census Bureau.

As additional states pass paint stewardship legislation, those states will be added to the corporate allocation formula and the percentage share of corporate expenses will decrease for each of the current programs.

D4. Operating Reserves

Reserves represent the net assets (cash and investments) of the California program. Reserves are needed to sustain the program in times of either higher than expected paint collection volumes resulting in higher-than-expected expenses, lower than expected paint sales resulting in lower-than-expected revenue, or a combination of the two. PaintCare's reserves policy establishes a target reserve as a percentage of annual expenses and sets a minimum and maximum threshold. If the reserves fall below the minimum threshold or rise beyond the maximum threshold, an evaluation of the program's expenses and revenue will be performed to determine if changes are needed in operations, outreach, and/or the fee structure to bring the reserve balance within range. PaintCare currently has a target reserve of 100% of annual expenses (i.e., 12-months of operating expenses), with a minimum threshold of 75% (i.e., nine months) and a maximum threshold of 125% (i.e., 15 months).

E. PAINTCARE FEE

Based on the projected paint sales, revenue, and expenses, PaintCare proposes the following fee structure, with an intended implementation date of July 1, 2022:

Container Size	Current Fee (\$)	Proposed Fee (\$)
Half pint or smaller	0.00	0.00
Larger than half pint up to smaller than 1 gallon	0.35	0.30
1 gallon	0.75	Not Applicable
1 gallon up to 2 gallons	Not Applicable	0.65
Larger than 1 gallon up to 5 gallons	1.60	Not Applicable
Larger than 2 gallon up to 5 gallons	Not Applicable	1.50

F. PROGRAM BUDGET

The following table shows actual revenue and expenses for FY2021 and projections for FY2022 to FY2026.

Projection of Revenue

Description	FY2021 (\$)	FY2022 (\$)	FY2023 (\$)	FY2024 (\$)	FY2025 (\$)	FY2026 (\$)
Total revenue	38,561,592	34,992,383	31,367,304	31,430,039	31,492,899	31,555,885

Projection of Expenses

Description	FY2021 (\$)	FY2022 (\$)	FY2023 (\$)	FY2024 (\$)	FY2025 (\$)	FY2026 (\$)
Paint processing	21,488,016	20,822,000	22,279,540	22,725,131	22,725,131	22,725,131
Transportation	3,925,563	3,691,000	3,949,370	4,028,357	4,028,357	4,028,357
Collection support	3,515,795	3,310,000	3,541,700	3,612,534	3,612,534	3,612,534
Communications	3,981,907	4,500,000	4,500,000	4,500,000	4,500,000	4,500,000
Personnel, prof. fees, and other	1,009,818	1,895,822	1,944,187	1,994,244	2,046,054	2,099,676
State admin. fees	322,228	272,645	272,645	272,645	272,645	272,645
Corporate activity	2,860,498	2,505,000	2,555,100	2,606,202	2,658,326	2,711,493
Total expenses	37,103,825	36,996,467	39,042,541	39,739,113	39,843,047	39,949,836

Projection of Other Revenue

Description	FY2021 (\$)	FY2022 (\$)	FY2023 (\$)	FY2024 (\$)	FY2025 (\$)	FY2026 (\$)
Investments	4,909,930	1,755,538	1,755,538	1,755,538	1,755,538	1,755,538

Other

Description	FY2021 (\$)	FY2022 (\$)	FY2023 (\$)	FY2024 (\$)	FY2025 (\$)	FY2026 (\$)
Change in net assets	6,367,697	(248,546)	(5,919,699)	(6,553,536)	(6,594,610)	(6,638,413)
Net assets, beginning of year	56,855,233	63,222,930	62,974,384	57,054,685	50,501,149	43,906,540
Net assets, end of year	63,222,930	62,974,384	57,054,685	50,501,149	43,906,540	37,268,127
Reserves (% of yearly expenses)	170%	170%	146%	127%	110%	93%

5. Education and Outreach

STATUTORY CITATION

California Code of Regulations, Title 14. Chapter 11.
Article 2. Architectural Paint Recovery Program

Section 18953 requires that a stewardship plan contain the following, in relevant part:

(5) Include a description of education and outreach efforts to consumers, contractors, and retailers to promote source reduction and recycling of architectural paint. The description shall include how the outreach and education methods will be used and distributed. Educational information may include, but is not limited to, signage, written materials, advertising, or other promotional materials pursuant to PRC § 48703(e).

California Public Resources Code

Section 48703 states, in relevant part:

(d) The plan shall include goals established by the manufacturer or stewardship organization to reduce the generation of postconsumer paint, to promote the reuse of postconsumer paint, and for the proper end-of-life management of postconsumer paint, including recovery and recycling of postconsumer paint, as practical, based on current household hazardous waste program information. The goals may be revised by the manufacturer or stewardship organization based on the information collected for the annual report.

(e) The plan shall include consumer, contractor, and retailer education and outreach efforts to promote the source reduction and recycling of architectural paint. This information may include, but is not limited to, developing, and updating as necessary, educational and other outreach materials aimed at retailers of architectural paint. These materials shall be made available to the retailers. These materials may include, but are not limited to, one or more of the following:

(1) Signage that is prominently displayed and easily visible to the consumer.

(2) Written materials and templates of materials for reproduction by retailers to be provided to the consumer at the time of purchase or delivery, or both. Written materials shall include information on the prohibition of improper disposal of architectural paint.

(3) Advertising or other promotional materials, or both, that include references to architectural paint recycling opportunities.

SECTION OVERVIEW

This section discusses:

- Outreach methods
- Message platform
- Target audiences
- Phased outreach approach
- Stakeholder input from paint retailers
- Joint outreach with local government programs
- Website and site locator
- Hotline
- Evaluation of outreach
- Examples of outreach materials

A. OUTREACH METHODS

PaintCare is committed to providing robust and effective statewide education and outreach for the California paint stewardship program using a variety of communication methods, which typically include:

- Print materials (e.g., brochures, fact sheets, cards, signage)
- Digital media (e.g., streaming audio channels, online video, website banner ads)
- Social media (e.g., organic and paid promotion on Twitter, Instagram, Facebook)
- Traditional media (e.g., newspaper, radio, television)
- Earned media (e.g., articles in news outlets, TV & radio interviews, other press coverage)
- Face-to-face communications (e.g., retail site visits, presentations, tabling at conferences, expos and public events, webinars)

B. MESSAGE PLATFORM

B1. Paint Smarter – Buy Right, Use It Up, Recycle the Rest

The “Reduce, Reuse, Recycle” message platform has been used by environmental organizations and waste management programs for many years. To reduce the amount of

postconsumer paint and to inform the public how and where to recycle their leftover paint, PaintCare uses an instructive, paint-specific version of Reduce, Reuse, Recycle:

- Reduce: Buy Right.
- Reuse: Use It Up. (Also: Store Right and Give It Away)
- Recycle: Recycle the Rest.

“Buy Right” means purchase the right amount of paint for a job to reduce potential waste; “Use It Up” means use up leftover paint whenever possible; and “Recycle the Rest” means if you still have unwanted paint, drop it off at a PaintCare site for management. PaintCare also promotes “Store Right” and “Give It Away” as part of Reuse. “Store Right” means that if you hold on to paint, keep it in good condition for use later, and “Give it Away” means pass it on to other households or organizations in the community in need of paint.

B2. Program Awareness

Additional messages are used to create awareness of the program and answer these questions:

- What is PaintCare and why does the program exist?
- Why was the law passed (e.g., product stewardship, potential cost savings to local government waste collection programs)?
- How much is the PaintCare fee and what is it for?
- Which products are accepted in the program and which products are not?

C. TARGET AUDIENCES

PaintCare’s outreach and education strategy will focus appropriate messages to the following audiences:

- Households
- Businesses and organizations that generate paint (e.g., professional painters, contractors, property managers, schools and universities, hotels)
- Relevant trade groups (e.g., associations that serve professional painters, contractors, realtors, and building managers)
- Paint retailers
- HHW programs and solid waste facilities
- Non-English speakers

The following examples illustrate how the program will adjust the emphasis of messaging in outreach materials based on target audience:

C1. Households

Educate consumers on how to buy the right amount of paint by describing factors involved (e.g., square footage of walls, surface texture, coverage rate of paint, whether surfaces have been primed) and prompting consumers to consult with paint professionals.

Promote using up leftover paint to do-it-yourselfers as a primer or for creative projects.

Emphasize how to find a drop-off site to recycle paint, the information most often requested.

C2. Businesses that Generate Paint

Emphasize “Recycle the Rest.”

Promote using up leftover paint.

Promote the LVP service so they can request a direct pickup of large quantities of leftover paint rather than transport their paint to drop-off sites a little at a time.

C3. Relevant Trade Groups

Associations of painting and building contractors have proven an effective avenue for PaintCare to reach out to professional painters who use large amounts of paint. In addition to utilizing PaintCare’s services for leftover paint, professionals also often purchase paint on behalf of clients and can make them aware of the PaintCare program.

PaintCare will seek out other professional associations, such as networks of realtors and building managers. Realtors can provide information to home buyers who may find paint left behind by previous owners, or they may work with contractors to paint homes being prepared for sale. Building managers often accumulate leftover paint while maintaining buildings and facilities.

C4. Paint Retailers

PaintCare has developed print materials for use by all paint retailers to educate store staff and the general public about the program, regardless of whether they are drop-off sites. PaintCare provides the following materials at no charge. Examples include:

- Brochures and cards that help the public find drop-off sites and explain the program.
- Signage that promotes general awareness of the program, explains the PaintCare fee, lists accepted products, and displays how to find a paint drop-off site.
- Fact sheets designed for a variety of audiences and subjects (e.g., general information, how to become a paint drop-off site, how to use the LVP service).

Retailers are able to download or order printed materials using PaintCare’s website order form or by phone. Drop-off sites also receive materials from PaintCare staff during site visits.

Retailers will receive several mailed notifications from PaintCare before the revised fee structure goes into effect as well as a package of printed materials. The mailers will include:

- Program brochures and LVP service fact sheets to inform their customer about the revised fee structure.
- Information about how to request additional print materials, and how to access them online.

C5. HHW Programs and Solid Waste Facilities

PaintCare provides fact sheets and interest forms to explain how HHW programs and solid waste facilities, including transfer stations, recycling centers, and landfills, can partner as paint drop-off sites and the benefits of participating in the program.

C6. Non-English Speakers

PaintCare has translated its program brochure for all PaintCare programs into Amharic, Arabic, Armenian, Bengali, Chinese, Farsi, French, Haitian Creole, Hawaiian, Hmong, Italian, Japanese, Khmer, Korean, Lao, Polish, Portuguese, Russian, Somali, Spanish, Tagalog, Thai, Turkish, Ukrainian, Vietnamese, and Yiddish. Two widely used fact sheets are available in translated versions: the fact sheet for the LVP service is available in Spanish, and the fact sheet for painting contractors is available in 27 languages other than English. Translated materials are available to retailers, HHW program and other stakeholders, and electronic copies are posted on PaintCare's website. PaintCare will consider translating materials to other languages upon request.

D. JOINT OUTREACH WITH LOCAL GOVERNMENT PROGRAMS

PaintCare promotes HHW and other local government drop-off site partners through its outreach efforts if they wish to be promoted. PaintCare has also established a process for local governments to coordinate joint outreach projects, through which PaintCare assists them with funding and developing outreach campaigns focused on paint recycling for digital, print, radio, and other media. To initiate a project, the local government partner will be asked to complete a form describing the project and budget for approval. PaintCare will consider a reimbursement proportional to the amount of the campaign devoted to the PaintCare program services. For example, when staff of the Shasta County Department of Resource Management printed flyers in 2019 promoting its HHW collection events and distributed them to businesses, transfer stations, and other local sites, they devoted about one third of the flyer space to paint recycling information and PaintCare funded one third of the cost. Local governments may propose any project that includes a PaintCare message using any medium. The current version of the joint outreach fact sheet is provided in Appendix C.

E. WEBSITE AND SITE LOCATOR

PaintCare's website provides public access to information about all key aspects of the program. The site makes it easy for the public to find paint drop-off options, request LVPs, view accepted products, and answer questions about the program. It also provides targeted resources for retailers, manufacturers, painting contractors, and local government waste facilities. State-specific pages for each PaintCare program contain links to program plans, annual reports, laws, and other official documents. The "Paint Smarter" section educates the public about PaintCare's "Buy Right, Use It Up, Recycle the Rest" messages, including useful tips and resources. PaintCare's website is available in Spanish translation.

PaintCare strives to continually provide accurate, up-to-date information regarding paint recycling options available to the public. PaintCare has developed and maintains a national database of paint drop-off sites and makes the information available through a drop-off site locator on PaintCare's website. The locator provides a paint-specific, easy-to-use way to search for the nearest available paint drop-off site. Site-specific information explains who is eligible to use a site and what limitations apply.

The site locator resource is currently organized as follows: for PaintCare states, the locator lists only paint drop-off sites, including HHW programs, that partner with PaintCare. For non-PaintCare states, it lists HHW programs as locations where the public can bring leftover paint.

F. HOTLINE

PaintCare operates a weekday hotline to assist the public with finding the nearest drop-off site and to answer questions about the program. The hotline staff speak English and can access live language interpretation in Spanish and a number of other languages when requested.

G. EVALUATION OF OUTREACH

PaintCare typically conducts surveys to evaluate the effectiveness of the education and outreach efforts. The surveys measure awareness of paint recycling among households and painting professionals and include questions about reducing leftover paint, opportunities for reuse and recycling paint, and intention to use those options in the future. Other questions may vary from one survey to another. PaintCare typically reports on the results of each survey in annual reports.

H. EXAMPLES OF OUTREACH MATERIALS

Current versions of the following outreach materials are provided in Appendix C:

- Program trifold brochure
- Fact sheet for HHW programs about becoming a PaintCare partner
- Fact sheet for solid waste facilities about becoming a paint drop-off site
- Fact sheet for retailers describing their responsibility under the new law and providing a program overview
- Fact sheet for retailers about becoming a paint drop-off site
- Fact sheet for material reuse stores about becoming a paint drop-off site
- Fact sheet for painting contractors describing the PaintCare fee, paint drop-off sites, and the LVP service
- Fact sheet about the LVP service
- In-store informational poster
- “Recycle Here” poster for paint drop-off sites
- Fact sheet on joint outreach with local governments

6. Stakeholder Consultation

STATUTORY CITATION

California Code of Regulations, Title 14. Chapter 11.
Article 2. Architectural Paint Recovery Program

Section 18953 requires that a stewardship plan contain the following, in relevant part:

(3)(E) Address the coordination of the architectural paint stewardship program with existing local household hazardous waste collection programs. A manufacturer or stewardship organization must negotiate with existing local household hazardous waste collection programs wanting to participate in the paint stewardship program as a collection point as much as is reasonably feasible and is mutually agreeable.

(F) Address the coordination of the architectural paint stewardship program with potential retail collection points.

(6) In addition to existing local household hazardous waste collection programs per §18953(a)(3)(E), other stakeholders that may be consulted include, but are not limited to, consumers, retailers, architectural paint recyclers, architectural paint contractors, and haulers.

SECTION OVERVIEW

This section discusses PaintCare's relationships with program stakeholders.

A. Stakeholder Consultation

As a nonprofit stewardship organization established for the purpose of representing paint producers to work with distributors, retailers, and public agencies, PaintCare's very existence is the manifestation of extensive stakeholder consultation. To develop and operate the California program, PaintCare staff have visited or met with nearly all agencies and companies in California involved with the management of postconsumer paint from households and businesses. The program was recognized for its efforts in 2016, when PaintCare received the California Product Stewardship Council's Bow and Arrow Award for Coalition Building.

The program's substantial achievements would not have been possible without its collaborative partnerships. Over the past decade, PaintCare has established excellent relationships with HHW Programs, CalRecycle, paint distributors and retailers, and the operators of transfer stations, landfills and recycling centers—whether they are owned and/or operated by local government or private companies. From the planning phase to the present, PaintCare has educated retailers and distributors about the paint stewardship law and has answered their questions regarding their roles and responsibilities. Other key partners are the program's transporters and processors and paint contractor trade associations.

The local agencies and other groups that represent HHW programs are a cornerstone of the program's stakeholder interactions. In 2011, PaintCare staff began attending meetings of the northern and southern Household Hazardous Waste Information Exchange (HHWIE) and the Rural Counties Environmental Services Joint Powers Authority (ESJPA). PaintCare plans to continue regularly attending these regional events in order to keep these key groups informed and solicit their feedback on the program, clear up misperceptions, identify areas of improvement, and meet their needs and aspirations.

PaintCare has monthly status calls with CalRecycle to discuss current issues and progress and to solicit feedback. Following each annual report PaintCare that submits to CalRecycle, PaintCare has participated in CalRecycle's stakeholder meetings to give presentations and discuss any questions from the agency or the public. The programs works with both the planning and compliance branches of CalRecycle to review program product questions and to discuss brand registrations.

PaintCare is also a perennial participant at CalRecycle's Used Oil Recycling and HHW Symposium, and conferences for the California Resource Recovery Association (CRRA) and the Certified Unified Program Agency (CUPA). PaintCare representatives have presented at sessions at these conferences frequently over the years, most recently in 2021 at CRRA in cooperation with the California stewardship programs for carpet and mattress.

The core goal of these interactions is to provide information, solicit feedback, and work together to develop solutions — all of which form the basis of a successful paint stewardship program. PaintCare is proud of the strong relationships it has built with program stakeholders and intends to maintain these relationships going forward through continued coordination with these groups.

Appendix A. Registered Manufacturers and Brands

Registered Manufacturers

1. 2Guard, 1276 S Lyon St, Santa Ana, CA 92705 (USA)
2. A. P. Nonweiler Co., 3321 County Rd A, Oshkosh, WI 54901 (USA)
3. Absolute Coatings, Inc., 38 Portman Rd, New Rochelle, NY 10801 (USA)
4. Ace Hardware Corporate, 2200 Kensington Ct, Oakbrook, IL 60523 (USA)
5. Acrylatex Coatings & Recycling Inc., 1001 W Kirkwall Rd, Azusa, CA 91702 (USA)
6. Acrylic Technologies Inc., 8914 NE Alderwood Rd, Portland, OR 97220 (USA)
7. Advanced Protective Products, Inc., 17 -12 River Rd, Fair Lawn, NJ 07410 (USA)
8. Akzo Nobel Paints, 16651 W Sprague Rd, Strongsville, OH 44136 (USA)

Appendix B. Definition of Program Products / Sample Product Notice

Definition of Program Products

Defining Architectural Paint Products for the Purposes of the Assessment

Updated — January 2020

Architectural paint is defined under the Paint Stewardship Program as:

Interior and exterior architectural coatings sold in containers of five gallons or less.

Architectural paint does not include:

Industrial maintenance (IM), original equipment manufacturer (OEM) or specialty coatings.

In order to distinguish between what is an architectural coating for the purpose of the assessment and what coatings should not be assessed the fee, we are using definitions and terminology from the U.S. Environmental Protection Agency, California Air Resources Board and other state and local Architectural and Industrial Maintenance (AIM) rules.

In order to determine the products on which the fee is assessed, and the products on which the fee is not assessed, a company should follow these steps:

A. Start with the type of coating. If the coating is an architectural coating, go to B. If the coating is not an architectural coating, it is not assessed a fee.

B. If the coating meets the definition of architectural coatings (see below), does not meet the definition of Industrial Maintenance Coatings (also below), and is not specifically excluded, it is assessed a fee.

I. Architectural Coatings

Architectural coating means a coating recommended for application to stationary structures and their appurtenances, portable buildings, pavements, curbs, fields and lawns. This definition excludes adhesives, aerosols and coatings recommended by the manufacturer or importer solely for shop applications or solely for application to non-stationary structures, such as airplanes, ships, boats, and railcars.

II. Industrial Maintenance Coatings

Industrial Maintenance (IM) coating means a high performance architectural coating, including primers, sealers, undercoaters, intermediate coats, and topcoats formulated and recommended for application to substrates exposed to one or more of the following extreme environmental conditions in an industrial, commercial, or institutional setting:

1. Immersion in water, wastewater, or chemical solutions (aqueous and non-aqueous solutions), or chronic exposure of interior surfaces to moisture condensation;
2. Acute or chronic exposure to corrosive, caustic, or acidic agents, or to chemicals, chemical fumes, or chemical mixtures or solutions;
3. Repeated exposure to temperatures above 120 °C (250 °F);
4. Repeated (frequent) heavy abrasion, including mechanical wear and repeated (frequent) scrubbing with industrial solvents, cleansers, or scouring agents; or
5. Exterior exposure of metal structures and structural components.

One of the primary ways AIM rules distinguish IM coatings from other architectural coatings is the manufacturer's recommendation for restricted usage. IM coatings must be labeled under the rules as:

1. "For industrial use only."
2. "For professional use only."
3. "Not for residential use" or "Not intended for residential use."

Thus, if the product is not intended for and not labeled as an IM coating, it should be deemed a covered architectural coating and the fee should be assessed, unless it is specifically excluded.

III. Original Equipment Manufacturer (OEM) Coatings

Shop application means that a coating is applied to a product or a component of a product in a factory, shop, or other structure as part of a manufacturing, production, finishing or repairing process (e.g., original equipment manufacturing coatings).

Since OEM (shop application) coatings may be intended but not labeled for industrial or professional use, and may be sold in containers of 5 gallons or less, if a company can clearly document that the coating was sold exclusively for OEM use, the fee should not be assessed. However, if this coating can be sold to a consumer or contractor for other than shop application and/or the use cannot be distinguished via the method of sale, the fee should be assessed.

IV. Specialty Coatings

Lastly, in order to identify Specialty or Special Purpose Coatings, we have used the definition from the Federated Society of Coating Technology's Coatings Encyclopedic (since AIM rules don't have a definition), which states that these coatings include arts and crafts, and automotive refinish coatings. These products should be easier to distinguish, however, as they are clearly called out as nonassessed products on the list below. The fee should not be assessed for these coatings.

Assessed Products (maximum container size of 5 gallons)

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Non-Assessed Products (regardless of container size)

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Sample Product Notice

Drywall Primer Surfacers

PRODUCT NOTICE #1

Updated — June 2012

Purpose

The purpose of this notice is to clarify that “Drywall Primer-Surfacers” are covered by the PaintCare program. As part of the program, manufacturers of these products must register with PaintCare and collect and remit the Assessment (PaintCare fee) as with other architectural paints in states with active paint stewardship programs.

Background

In order to assist companies with determining what coatings were architectural coatings subject to the PaintCare fee and what coatings were not, PaintCare developed a fact sheet detailing what factors should be taken into consideration when making these determinations. In addition, the fact sheet listed examples of PaintCare products and examples of non-PaintCare products (products that should not be assessed the fee). PaintCare, however, relies on individual manufacturers to determine what products are part of the program and what products are not, depending on their specific product lines. In some cases, PaintCare helps with this determination based on individual calls with manufacturers. In the case of Drywall Primer-Surfacers, based on these calls, it has come to our attention that some manufacturers were assessing the fee believing they were program products and some were not assessing the fee believing that they were non-program products. It appears that confusion arose when trying to distinguish drywall primer from drywall compound.

In order to ensure that all manufacturers are on a level playing field and the PaintCare fee is indeed placed on all products subject to the assessment, PaintCare herein clarifies that Drywall Primer-Surfacer is considered a PaintCare product and the PaintCare fee must be assessed and remitted by all manufacturers of Drywall Primer-Surfacers. The reason for including this category under the architectural coatings that are subject to the program is as follows:

- The Drywall Primer-Surfacer products are primers. Primers are considered architectural coatings.
- MSDS sheets, either in their title and or elsewhere in the product description, for these products indicate that they are paint or primers.
- MSDS sheets indicate that they contain some type of binder or resin.

- Marketing information published by manufacturers for their own products indicate that they are vapor barriers or coatings.
- Information published by manufacturers for their own products indicate that they are vinyl, acrylic, and/or latex-based.
- Competitors have reported that they make and sell equivalent products that are not excluded by PaintCare.
- Consumers with leftover/unwanted Drywall Primer-Surfacers may bring them to a PaintCare collection site for proper recycling/disposal.

Action

Starting August 1, 2012, manufacturers of “Drywall Primer-Surfacers” need to ensure that these products are registered with PaintCare and add the PaintCare fee to the wholesale price of these products to all distributors and retailers. Manufacturers are not required to pay the fee on past sales because the fees were not charged to distributors, retailers, or consumers.

More Information

For more information about the PaintCare program and the responsibilities of manufacturers, please visit www.paintcare.org or contact:

Appendix C. Examples of Education and Outreach Materials

Brochure: Recycle with PaintCare

A Program to Manage Leftover Paint

Each year about 800 million gallons of architectural paint are sold in the United States. Did you know that about 10 percent goes unused and is available for recycling?

California's paint stewardship law requires the paint manufacturing industry to develop a financially sustainable and environmentally responsible program to manage postconsumer (leftover) architectural paint. Paint manufacturers established PaintCare, a nonprofit organization, to run paint stewardship programs in states with applicable laws.

The program includes education about buying the right amount of paint, tips for using up remaining paint, and setting up convenient recycling locations throughout the state.

PaintCare Products

These products have a fee when you buy them and are accepted for drop-off at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled, and empty containers are not accepted at drop-off sites.

Non-PaintCare Products

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Chalk, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For information about recycling and proper disposal of non-PaintCare products, please contact your garbage hauler, local environmental health agency, household hazardous waste program, or public works department.

CA-BREN-0021

Recycle WITH PaintCare

CALIFORNIA

Places to Take Leftover Paint

Paint recycling is more convenient with PaintCare. We set up paint drop-off sites throughout the state. To find your nearest drop-off site, use PaintCare's search tool at www.paintcare.org or call our hotline at (855) PAINT09.

How to Recycle

PaintCare sites accept all brands of leftover house paint, stain, and varnish, whether recently used or many years old. Containers must be five gallons or smaller, and some types of paint are not accepted. See back panel for a list of what PaintCare accepts for recycling.

All PaintCare drop-off sites accept up to five gallons of paint per visit. Some sites accept more. Please call sites in advance to make sure they can accept the amount of paint you would like to recycle.

Make sure all paint containers have lids and original labels, and load them securely in your vehicle. Take them to a drop-off site during their regular business hours. We'll take it from there.

What Happens to the Paint?

PaintCare makes sure that your leftover paint is remixed into recycled paint, used as a fuel, made into other products, or is properly disposed if no other beneficial use for it can be found.

Who Can Use the Program?

Households may drop off as much latex or oil-based paint as the site is willing to accept.

Businesses may drop off any amount of latex-based paint the site is willing to accept. To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSGG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products.

Do You Accept Large Volumes of Paint?

If you have at least 100 gallons of paint to recycle at your business or home, ask about our free large volume pickup service. Please visit www.paintcare.org for more details or to request a pickup.

PaintCare Fee

PaintCare is funded by a fee paid by paint manufacturers for each can of paint sold in the state. Manufacturers pass the fee to retailers, who then apply it to the price of paint. Retailers are encouraged to show the fee on customer receipts. The fee is based on the size of the container as follows:

\$0.00	Half pint or smaller
\$0.35	Larger than half pint up to smaller than 1 gallon
\$0.75	1 gallon
\$1.60	Larger than 1 gallon up to 5 gallons

Not a Deposit

The fee is not a deposit—it is part of the purchase price. The fee is used to fund the costs of running the program, including recycling, public education, staffing, and other expenses.

Contact Us

To learn more or find a drop-off site, please visit www.paintcare.org or call (855) PAINT09.

In-Store Poster

About the PaintCare Program

Paint manufacturers created PaintCare, a non-profit organization, to set up convenient places for households and businesses to recycle leftover paint. PaintCare sets up paint drop-off sites throughout states that adopt paint stewardship laws.

PAINTCARE PRODUCTS

These products have fees when you buy them and are accepted for drop-off at no additional cost:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based
- Deck coatings, floor paints, (including textured coatings)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen based)
- Metal coatings, rust preventatives
- Field and lawn paints

Leaking, unlabeled, and empty containers are not accepted at drop-off sites.

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturing (OEM) (shop application) paints and finishes

PAINTCARE FEE

The PaintCare fee is applied to the purchase price of architectural paint as required by law. The fee funds collection, transportation and processing costs. The fee is based on container size as follows

\$0.00 Half pint or smaller

\$0.35 Larger than half pint and smaller than 1 gallon

\$0.75 1 gallon \$ 0.75

\$1.60 More than 1 gallon up to 5 gallons \$ 1.60

For more information or to find a place to take your unwanted paint for recycling, please ask for the PaintCare brochure, visit paintcare.org or call (855) PAINT09.

Counter Mat

Recycle with PaintCare!

Buy Right: Consult with painting professionals and retailers to buy the right amount of paint and reduce potential waste.

Use It Up: Use up leftover paint on the surface you are painting, on additional painting projects around the house, or give it to someone else in your community.

Recycle the Rest: When you can't use up leftover paint, drop it off with PaintCare to get it recycled!

What types of paint products can be recycled with PaintCare?

PAINTCARE PRODUCTS

The following products are included in the program. When purchased, the PaintCare fee is applied. These products are accepted at no additional cost when dropped off at PaintCare's participating drop-off sites:

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based
- Deck coatings, floor paints, (including textured coatings)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)

- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

The following are non-PaintCare products and are not included in the program. When purchased, the PaintCare fee is not applied. They are not accepted at PaintCare's participating drop-off sites.

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturing (OEM) (shop application) paints and finishes
- Containers that are leaking or empty, and containers without original manufacturer's labels are not accepted at retail drop-off sites.

PROGRAM FUNDING

The PaintCare Fee is applied to the purchase price of architectural paint sold in your state as required by law. Fees are based on container size:

- Half pint or smaller \$0.00
- Larger than half pint and smaller than 1 gallon \$0.35
- 1 gallon \$0.75
- More than 1 gallon up to 5 gallons \$1.60

Fact Sheet for Painting Contractors

PAINT STEWARDSHIP LAWS IN THE U.S.

Information for Painting Contractors

Updated — June 2021

PaintCare
RECYCLING MADE EASY

How do paint stewardship laws affect painting contractors?

PaintCare
PaintCare is a nonprofit organization established by the American Coatings Association to implement manufacturer-led paint stewardship programs in states that pass paint stewardship laws. PaintCare currently operates programs in California, Colorado, Connecticut, District of Columbia, Maine, Minnesota, Oregon, Rhode Island, Vermont, and Washington, and is developing a program for New York.

Paint Drop-Off Sites
The primary requirement of paint stewardship laws is for paint manufacturers to set up paint drop-off sites at retailers and other locations where households and businesses can take postconsumer (leftover) architectural paint, free of charge. Most drop-off sites are paint and hardware stores; others are waste transfer stations, recycling centers, landfills, and household hazardous waste (HHW) facilities. Participation as a drop-off site is voluntary. There are more than 2,000 drop-off sites across all PaintCare programs. To find a drop-off location, visit www.paintcare.org.

Fee and Funding
As required by laws in PaintCare jurisdictions, the program is funded by a fee (known as the PaintCare fee) that must be added by manufacturers to the wholesale price of all architectural paint sold in the state, including paint sold in stores and online. This fee is paid by manufacturers to PaintCare to fund program operations including paint collection and recycling, consumer education, and program administration. Displaying the fee on receipts is optional for retailers; however, PaintCare encourages retailers to show the fee to inform consumers about the program.

The PaintCare fee is based on container size and varies from one program to another:

California, Colorado, Connecticut, Maine, Rhode Island
\$0.00 — Half pint or smaller
\$0.35 — Larger than half pint up to smaller than 1 gallon
\$0.75 — 1 gallon
\$1.60 — Larger than 1 gallon up to 5 gallons

District of Columbia, Oregon, Washington
\$0.00 — Half pint or smaller
\$0.45 — Larger than half pint up to smaller than 1 gallon
\$0.95 — 1 gallon up to 2 gallons
\$1.95 — Larger than 2 gallons up to 5 gallons

Minnesota
\$0.00 — Half pint or smaller
\$0.49 — Larger than half pint up to smaller than 1 gallon
\$0.99 — 1 gallon up to 2 gallons
\$1.99 — Larger than 2 gallons up to 5 gallons

Vermont
\$0.00 — Half pint or smaller
\$0.49 — Larger than half pint up to smaller than 1 gallon
\$0.99 — 1 gallon
\$1.99 — Larger than 1 gallon up to 5 gallons

New York
The fee structure for New York is not yet known. PaintCare will propose a fee structure in the program plan for New York, and it will be based on the anticipated costs to run the program. The fee must be approved by the state oversight agency. Visit www.paintcare.org for updates.

Recommendations for Contractors

Preparing Estimates
When estimating jobs, contractors should take the PaintCare fee into account by checking with suppliers to make sure their quotes for paint products include the fee.

Pass Fee to Customers
PaintCare suggests that painting contractors pass on the fee to customers in order to recoup the fee they pay. Tell customers that quotes include the PaintCare fee and that the fee funds a statewide paint recycling program.

Convenient Paint Drop-Off Sites
With paint drop-off sites conveniently located throughout PaintCare states, anyone can drop off their leftover paint year round. Many contractors report clearing out their storage spaces and no longer stockpiling paint. Contractors now have an answer for customers who ask what to do with old paint they no longer want; they can recommend that they use PaintCare drop-off sites too.

Most drop-off sites take 5 gallons per customer per trip, though some take more. All retail drop-off sites take paint from businesses, although some transfer stations and household hazardous waste programs only serve households. Always call a drop-off site ahead of visiting to make sure they have space for your volume and to confirm they take paint from businesses.

Pickup Service for Large Volumes
Painting contractors, property managers, and others with at least 100 gallons of leftover paint to recycle may qualify to have their paint picked up by PaintCare for free. To learn more about this service or to request an appointment, visit www.paintcare.org/pickup or call (855) PAINT09.

Business Limits
To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSQS for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators will be able to use the program under development in New York. Contact PaintCare for details about the New York program.)

What Products Are Covered?
The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in containers of five gallons or less. They do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Information for Painting Contractors

How do paint stewardship laws affect painting contractors?

PaintCare

PaintCare is a nonprofit organization established by the American Coatings Association to implement manufacturer-led paint stewardship programs in states that pass paint stewardship laws. PaintCare currently operates programs in California, Colorado, Connecticut, District of Columbia, Maine, Minnesota, Oregon, Rhode Island, Vermont, and Washington, and is developing a program for New York.

Paint Drop-Off Sites

The primary requirement of paint stewardship laws is for paint manufacturers to set up paint drop-off sites at retailers and other locations where households and businesses can take postconsumer (leftover) architectural paint, free of charge. Most drop-off sites are paint and hardware stores; others are waste transfer stations, recycling centers, landfills, and household hazardous waste (HHW) facilities. Participation as a drop-off site is voluntary. There are more than 2,000 drop-off sites across all PaintCare programs. To find a drop-off location, visit www.paintcare.org.

Fee and Funding

As required by laws in PaintCare jurisdictions, the program is funded by a fee (known as the PaintCare fee) that must be added by manufacturers to the wholesale price of all architectural paint sold in the state, including paint sold in stores and online. This fee is paid by manufacturers to PaintCare to fund program operations including paint collection and recycling, consumer education, and program administration. Displaying the fee on receipts is optional for retailers; however, PaintCare encourages retailers to show the fee to inform consumers about the program.

The PaintCare fee is based on container size and varies from one program to another:

California, Colorado, Connecticut, Maine, Rhode Island

\$ 0.00 — Half pint or smaller

\$ 0.35 — Larger than half pint up to smaller than 1 gallon

\$ 0.75 — 1 gallon

\$ 1.60 — Larger than 1 gallon up to 5 gallons

District of Columbia, Oregon, Washington

\$ 0.00 — Half pint or smaller

\$ 0.45 — Larger than half pint up to smaller than 1 gallon

\$ 0.95 — 1 gallon up to 2 gallons

\$ 1.95 — Larger than 2 gallons up to 5 gallons

Minnesota

\$ 0.00 — Half pint or smaller

\$ 0.49 — Larger than half pint up to smaller than 1 gallon

\$ 0.99 — 1 gallon up to 2 gallons

\$ 1.99 — Larger than 2 gallons up to 5 gallons

Vermont

\$ 0.00 — Half pint or smaller

\$ 0.49 — Larger than half pint up to smaller than 1 gallon

\$ 0.99 — 1 gallon

\$ 1.99 — Larger than 1 gallon up to 5 gallons

New York

The fee structure for New York is not yet known. PaintCare will propose a fee structure in the program plan for New York, and it will be based on the anticipated costs to run the program. The fee must be approved by the state oversight agency. Visit www.paintcare.org for updates.

Recommendations for Contractors

Preparing Estimates

When estimating jobs, contractors should take the PaintCare fee into account by checking with suppliers to make sure their quotes for paint products include the fee.

Pass Fee to Customers

PaintCare suggests that painting contractors pass on the fee to customers in order to recoup the fee they pay. Tell customers that quotes include the PaintCare fee and that the fee funds a statewide paint recycling program.

Convenient Paint Drop-Off Sites

With paint drop-off sites conveniently located throughout PaintCare states, anyone can drop off their leftover paint year round. Many contractors report clearing out their storage spaces and no longer stockpiling paint. Contractors now have an answer for customers who ask what to do with old paint they no longer want; they can recommend that they use PaintCare drop-off sites too.

Most drop-off sites take 5 gallons per customer per trip, though some take more. All retail drop-off sites take paint from businesses, although some transfer stations and household hazardous waste programs only serve households. Always call a drop-off site ahead of visiting to make sure they have space for your volume and to confirm they take paint from businesses.

Pickup Service for Large Volumes

Painting contractors, property managers, and others with at least 100 gallons of leftover paint to recycle may qualify to have their paint picked up by PaintCare for free. To learn more about this service or to request an appointment, visit www.paintcare.org/pickup or call (855) PAINT09.

Business Limits

To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSQG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators will be able to use the program under development in New York. Contact PaintCare for details about the New York program.)

What Products Are Covered?

The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in containers of five gallons or less. They do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Fact Sheet for Large Volume Pickup Service

PAINT STEWARDSHIP PROGRAMS IN THE U.S.

Large Volume Pickup (LVP) Service

Updated — June 2021

PaintCare offers a free pickup service to painting contractors, property managers, and others with large amounts of leftover architectural paint.

Who Is PaintCare?

PaintCare is a nonprofit organization established by the American Coatings Association to operate paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws.

Paint Drop-Off Sites

In states with a paint stewardship program, PaintCare's primary effort is to set up conveniently located drop-off sites—places where households and businesses may take their unwanted paint for no charge. Sites set their own limits on the volume of paint they accept from customers per visit (usually from 5 to 20 gallons). To find a drop-off site near you, please use PaintCare's site locator at www.paintcare.org or call (855) PAINT09.

Large Volume Pickups

For those who have accumulated a large volume of paint, PaintCare offers a pickup service. Large volume means 100+ gallons, measured by container size (not liquid volume). On a case-by-case basis, PaintCare may approve a pickup for less than 100 gallons. To find a drop-off site near you, please use PaintCare's site locator at www.paintcare.org or call (855) PAINT09.

Drums and Bulk Paint Are Not Accepted

PaintCare only accepts paint in containers that are 5 gallons or smaller in size. Leave paint in original cans with original labels; do not combine or bulk paint from small cans into larger ones. If you have unwanted paint in drums or containers larger than 5 gallons, please contact a paint recycling company or a hazardous waste transportation company to assist you.

HOW TO REQUEST A LARGE VOLUME PICKUP

- Sort and count your paint**
Tally the number of each container size and the type of products you have, sorted into two categories: (1) water-based paints and stains, and (2) oil-based paint and stains and any other program products (sealers and clear top-coat products, such as varnish and shellac).
- Fill out the LVP Request Form**
Fill out the Large Volume Pickup Request Form on our website. Upon request, the form is also available as a PDF and can be returned to PaintCare by email, fax, or regular mail. Visit www.paintcare.org/pickup or call PaintCare for the form.

Scheduling

After reviewing your form, PaintCare staff will either approve your site for a pickup or inform you of the best place to take your paint if you do not meet the requirements. If approved, you will be put in contact with our licensed hauler to schedule a pickup. It may be several weeks before your pickup occurs.

On the Day of Your Pickup

Sort your products into the two categories noted above and store them in an area that has easy access for the hauler. If the paint is far from where the hauler parks, the path between should be at least four feet wide to accommodate movement of the boxes.

The hauler is responsible for packing the paint into the shipping containers. Once your paint is properly packed and loaded onto the hauler's truck, you will sign a shipping document and receive a copy for your records. Your paint will then be taken to an authorized processing facility for recycling.

Repeat Service for Large Volume Pickups

For businesses that generate large volumes of unwanted paint on a regular basis, a service for recurring direct pickups is available. With this service, you will be provided with empty bins and can request a pickup when at least three bins are filled. Your full bins will be swapped with empty bins each time a pickup occurs. You will be required to sign a contract with PaintCare, and PaintCare will provide onsite training on how to properly pack the paint.

Business Limits

To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSQG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators will be able to use the program under development in New York. Contact PaintCare for details about the New York program.)

If You Have Products We Don't Accept

PaintCare does not accept all paints (such as aerosols and automotive finishes) or other hazardous waste. If you have solvents, thinners, pesticides, or any non-PaintCare products (see list to right for examples), we recommend that households contact their local household hazardous waste (HHW) program. Businesses should contact their local HHW program to determine if they are eligible to participate. Some HHW programs allow businesses to use their program for a modest fee. Otherwise, businesses should contact a licensed hazardous waste transportation company.

What Products Are Covered?

The products accepted at PaintCare drop-off sites are the same products that have a fee when they are sold. PaintCare products include interior and exterior architectural coatings sold in container sizes of five gallons or less. They do not include aerosol products (spray cans), industrial maintenance (IM), original equipment manufacturer (OEM), or specialty coatings.

PAINTCARE PRODUCTS

- Interior and exterior architectural paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings, floor paints
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

NON-PAINTCARE PRODUCTS

- Paint thinners, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints
- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

Large Volume Pickup (LVP) Service

PaintCare offers a free pickup service to painting contractors, property managers, and others with large amounts of leftover architectural paint.

Who Is PaintCare?

PaintCare is a nonprofit organization established by the American Coatings Association to operate paint stewardship programs on behalf of paint manufacturers in states that pass paint stewardship laws.

Paint Drop-Off Sites

In states with a paint stewardship program, PaintCare's primary effort is to set up conveniently located drop-off sites—places where households and businesses may take their unwanted paint for no charge. Sites set their own limits on the volume of paint they accept from customers per visit (usually from 5 to 20 gallons). To find a drop-off site near you, please use PaintCare's site locator at www.paintcare.org or call (855) PAINT09.

Large Volume Pickups

For those who have accumulated a large volume of paint, PaintCare offers a pickup service. Large volume means 100+ gallons, measured by container size (not liquid volume). On a

case-by-case basis, PaintCare may approve a pickup for less than 100 gallons. After two or three pickups, you may be switched to a repeat pickup service (see next page).

Drums and Bulk Paint Are Not Accepted

PaintCare only accepts paint in containers that are 5 gallons or smaller in size. Leave paint in original cans with original labels; do not combine or bulk paint from small cans into larger ones. If you have unwanted paint in drums or containers larger than 5 gallons, please contact a paint recycling company or a hazardous waste transportation company to assist you.

HOW TO REQUEST A LARGE VOLUME PICKUP

1. Sort and count your paint

Tally the number of each container size and the type of products you have, sorted into two categories: (1) water-based paints and stains, and (2) oil-based paint and stains and any other program products (sealers and clear top-coat products, such as varnish and shellac).

2. Fill out the LVP Request Form

Fill out the Large Volume Pickup Request Form on our website. Upon request, the form is also available as a PDF and can be returned to PaintCare by email, fax, or regular mail. Visit www.paintcare.org/pickup or call PaintCare for the form.

Scheduling

After reviewing your form, PaintCare staff will either approve your site for a pickup or inform you of the best place to take your paint if you do not meet the requirements. If approved, you will be put in contact with our licensed hauler to schedule a pickup. It may be several weeks before your pickup occurs.

On the Day of Your Pickup

Sort your products into the two categories noted above and store them in an area that has easy access for the hauler. If the paint is far from where the hauler parks, the path between should be at least four feet wide to accommodate movement of the boxes.

The hauler is responsible for packing the paint into the shipping containers. Once your paint is properly packed and loaded onto the hauler's truck, you will sign a shipping document and receive a copy for your records. Your paint will then be taken to an authorized processing facility for recycling.

Repeat Service for Large Volume Pickups

For businesses that generate large volumes of unwanted paint on a regular basis, a service for recurring direct pickups is available. With this service, you will be provided with empty bins and can request a pickup when at least three bins are filled. Your full bins will be swapped

with empty bins each time a pickup occurs. You will be required to sign a contract with PaintCare, and PaintCare will provide onsite training on how to properly pack the paint.

Business Limits

To use the PaintCare program for oil-based paint, a business must qualify as an exempt generator under federal and any analogous state hazardous waste generator rules. Please visit www.paintcare.org/VSQG for more information on exempt generator rules. If your business does not qualify as an exempt generator, it will not be able to use the program for oil-based paint, but it can still use the program for latex products. (Non-exempt generators will be able to use the program under development in New York. Contact PaintCare for details about the New York program.)

If You Have Products We Don't Accept

PaintCare does not accept all paints (such as aerosols and automotive finishes) or other hazardous waste. If you have solvents, thinners, pesticides, or any non-PaintCare products (see list to right for examples), we recommend that households contact their local household hazardous waste (HHW) program. Businesses should contact their local HHW program to determine if they are eligible to participate. Some HHW programs allow businesses to use their program for a modest fee. Otherwise, businesses should contact a licensed hazardous waste transportation company.

Appendix E. Site Guidelines

California Specific Guidelines

Storage Time Limit: 180 days.

Site/Program Permit: None required.

Spill Reporting: Document the date, location, amount, and type of program product spilled. Report program product spills of more than 10 gallons and release of any quantity through a storm drain, waterway, or into soil to:

- Your local environmental enforcement agency
- California Emergency Management Agency (Cal EMA) 1-800-852-7550
- PaintCare within 24 hours of any report

Basic Local Emergency Contacts

Facility Emergency Coordinator (name/phone)

Alternate Emergency Coordinator (name/phone)

Fire Department Phone Number

Police Phone Number

Hospital Phone Number

Drop-Off Site Guidelines

This document contains detailed information of PaintCare's program guidelines and operations procedures. In combination with the state-specific guidelines, this comprehensive document can be used for self-training yourself and your staff without PaintCare staff. The training slides that proceeds this document summarizes the most important information of this Drop-Off Site Guidelines document in a concise manner. The training slides are used during training by PaintCare staff and can be used as a supplement for self-training.

Contents

Guidelines Section 1. Training and Safety

Guidelines Section 5. Limit per Participant
Guidelines Section 6. Working with Haulers
Guidelines Section 7. Spill Response
Guidelines Section 8. Inspections and Records
Guidelines Section 9. Direct Reuse

Retailer Guidelines Section 1. Training and Safety

Training

For the safety of the program and your staff, all employees handling PaintCare products must receive training in product identification, acceptance, handling, packaging, inspection, and emergency response procedures before collecting PaintCare products or engaging in any PaintCare program activities.

Training helps ensure that employees conduct PaintCare products collection activities in a safe manner that protects workers and the environment.

Ensure that drop-off site employees are equipped for and understand hazards associated with PaintCare products.

Maintain training plans and records for each employee. Record staff training using the form included in the PaintCare training binder.

Safety

Store personal protective equipment (PPE) and spill response equipment in an accessible location adjacent to the collection bins. Ensure those materials are protected from the weather.

The drop-off site must be equipped with appropriate emergency response equipment including a fire extinguisher, spill kit and PPE. Monthly inspections of equipment are recommended.

PaintCare products collection activities need to follow general safety practices including proper lifting techniques.

Post emergency procedures and emergency contact numbers including police, fire department and emergency services by a phone — in close proximity to the drop-off site area, if possible.

If applicable, develop and maintain an emergency action plan as required by OSHA.

If required by federal, state or local law, familiarize police, fire departments, and emergency response teams with the layout of your facility, properties of PaintCare product(s) handled at your facility, and evacuation routes.

For your convenience, a form for recording emergency contacts is included in the PaintCare binder.

Retailer Guidelines Section 2. General Guidelines

PaintCare Provides Your Site

- Operations binder with recordkeeping forms/logs
- Signage identifying your site as a PaintCare drop-off site
- Educational print materials for the public

PaintCare's Hauler Provides Your Site

- Paint collection bins
- Labels and/or markings for paint collection bins

General Guidelines for Drop-Off Sites

Each PaintCare drop-off site has unique logistical and operational considerations. Each drop-off site must make its own decisions and use its best judgment to operate in the safest manner possible in accordance with applicable law. To ensure the highest standards of safety for you and your staff, drop-off sites must:

- Have appropriate signage that informs the public of the hours of operation
- Accept PaintCare products from participants during your regular advertised or posted operating hours
- Display PaintCare signage to identify you as a drop-off site – signage should be posted in a highly visible area, at the entrance of your site
- Assist and supervise participant when they come to drop off PaintCare products. Drop-off site staff should greet participants and must verify eligibility of the participant and their leftover paint products as PaintCare products (see Section 5 for a description of PaintCare products)
- IMPORTANT: Never allow a participant to open a PaintCare product container
- Have adequate space, staffing, and training to collect and store PaintCare products
- Provide a secure space for empty and full collection bins
- Except for PaintCare products that you choose to manage on-site (e.g., via direct reuse), place all PaintCare products immediately in collection bins approved for use by PaintCare and provided by its contractors
- Pack only PaintCare products into collection bins
- Schedule shipments of PaintCare products from your drop-off site
- Maintain all records relating to the program (see Section 9)
- Train staff to be familiar with the requirements and practices of this guide
- Follow state-specific guidelines (located in this binder, following the cover page)

Retailer Guidelines Section 3. Collection Bins and Storage Area

Storage Area and Collection Bin Placement

Establish a dedicated storage area for collection bins and PaintCare products.

Place collection bins on an impermeable surface (e.g., sealed wood floor) at all times.

Place collection bins away from ignition sources, storm drains and floor drains.

Ensure there is adequate ventilation if stored indoors.

Protect collection bins from precipitation and temperature extremes. If stored outdoors, keep collection bins under cover (to prevent exposure to precipitation) and move indoors at times to protect against temperature extremes. If you store collection bins outdoors, you may need approval from your local fire or hazardous materials oversight agency.

Comply with any local fire codes or other regulations that might pertain to your storage of collection bins at your site.

Maintain enough space around collection bins to inspect for leakage and emergency access.
Use good housekeeping standards; keep paint storage areas clean and orderly.

Setting Up, Packing and Maintaining Collection Bins

Collection bins must be set up, used, and closed according to the manufacturer's closure instructions. PaintCare's haulers should set up the collection bins that they provide, unless otherwise requested by the drop-off site staff.

Ensure cardboard bins have liners. The liners provide secondary containment to contain liquids in the event a can leaks while in storage or transit. Reusable plastic bins that are leak-proof by design don't need liners. PaintCare's haulers are responsible for including secondary containment with all collection bins they provide to the drop-off site staff.

Collection bins must be structurally sound. If you see any evidence of damage that may cause a leak or spill, notify PaintCare immediately.

Mark the collection bin with the date the first PaintCare product is placed in it.

Place paint containers in bins immediately. Keep collection bins closed except when adding PaintCare products.

Pack 5-gallon buckets on the bottom layer of the collection bins for stability.

Pack all PaintCare products (cans, buckets) upright and as tight as possible in the collection bins to protect contents from shifting and leaking in transit.

Do not open containers to verify product.

Do not overfill collection bins; allow enough space for a lid to fit securely.

Do not take PaintCare product out of the bin.

Security

The drop-off site and collection bin storage area must be secured and locked when closed or not attended.

Only drop-off site staff should have access to the collection bins and storage area until the collection bins are ready for pick-up by PaintCare's hauler. Never allow "self-serve," public access to the collection bins.

Retailer Guidelines Section 4. Accepting PaintCare Products

What are PaintCare Products

PaintCare drop-off sites should accept only PaintCare products (architectural paint products) for management under the PaintCare program.

Listed below are the primary examples of architectural paint products accepted by the PaintCare program and paint or paint-related products not accepted by the PaintCare program.

Generally, PaintCare products include latex and oil-based house paint, stains, and clear coatings (varnish, shellac, etc.). The program excludes anything that is:

- in an aerosol spray can
- intended and labeled “for industrial use only”
- mostly used in the manufacture of equipment
- on the list of specifically excluded products for some other reason

PaintCare products are classified as either latex (water-based) or oil-based (alkyd) and the classification is important in order to decide how the product should be handled and processed. Knowing how to tell the difference between latex and oil-based products is also important in determining which types of businesses/organizations can use the PaintCare program (if your site accepts paint from this audience).

PaintCare Products and Non-PaintCare Products

Acceptable products (PaintCare products)

- Interior and exterior paints: latex, acrylic, water-based, alkyd, oil-based, enamel (including textured coatings)
- Deck coatings and floor paints (including elastomeric)
- Primers, sealers, undercoaters
- Stains
- Shellacs, lacquers, varnishes, urethanes (single component)
- Waterproofing concrete/masonry/wood sealers and repellents (not tar or bitumen-based)
- Metal coatings, rust preventatives
- Field and lawn paints

Unacceptable products (Non-PaintCare products)

- Paint thinner, mineral spirits, solvents
- Aerosol paints (spray cans)
- Auto and marine paints
- Art and craft paints

- Caulking compounds, epoxies, glues, adhesives
- Paint additives, colorants, tints, resins
- Wood preservatives (containing pesticides)
- Roof patch and repair
- Asphalt, tar, and bitumen-based products
- 2-component coatings
- Deck cleaners
- Traffic and road marking paints
- Industrial Maintenance (IM) coatings
- Original Equipment Manufacturer (OEM) (shop application) paints and finishes

For more information, please see www.paintcare.org/products-we-accept.

If non-PaintCare Products end up in a drop-off site's bin, such products will not be returned to the drop-off site and will be managed by PaintCare's hauler. Haulers identify Non-PaintCare Products and report all instances to PaintCare. PaintCare staff will notify the site of any contamination in the bins. If the problem persists, additional training may be provided.

Who Can Drop Off PaintCare Products

The program accepts PaintCare products from the following:

Households. Households may drop off any volume of PaintCare product, subject to the volume limit set by the site.

Businesses/Organizations. Non-households may also drop off any volume of latex PaintCare product, subject to the volume limit set by the site. Non-households may only drop off oil-based PaintCare products if they comply with federal and state hazardous waste generator rules that, among other criteria, require that the business/organization (1) generates no more than 100 kilograms (about 25 gallons or 220 pounds) of hazardous waste per calendar month, and (2) does not accumulate more than 1,000 kg of hazardous waste at any time. Painting contractors and commercial property owners typically meet these criteria. For more information about these criteria, please see: <http://www.paintcare.org/vsqq>

How to Know If a Business/Organization Qualifies

Each business or organization is responsible for determining its own generator status under applicable law.

When a business/organization has oil-based PaintCare product to drop off at your site, it must sign the Paint Drop-Off Log included in this binder to verify that it qualifies to use the program

for oil-based paint. The log includes an explanation of the requirements. (If a business/organization has only latex paint, it does not need to sign the log.)

Once a business/organization signs the Paint Drop-Off Log, you may accept oil-based paint from that business/organization to the extent permissible under applicable law. Paint Drop-Off Logs may be reviewed by PaintCare or government agencies and compared with a list of registered hazardous waste generators to verify that only qualified businesses/organizations are using the program for their oil-based paint.

Acceptable Containers vs. Unacceptable Containers

Before accepting products from participants for management under the PaintCare program, drop-off site staff must (1) check the condition of the container for acceptance in the program, and (2) check the product label to verify that it contains a PaintCare product.

Acceptable

- The PaintCare product must be in its original container*
- The container is labeled as containing one of the designated PaintCare products listed below*
- The container must be in good condition and not leaking*
- The container must be 5 gallons in size or smaller
- The container contains dry latex paint

Not Acceptable

- The container is not original (e.g., paint was transferred into a jar)*
- The container does not have an original label (Drop-off sites permitted to accept household hazardous waste may accept unlabeled and leaking containers by following the procedures described below.)
- The container is leaking or has no lid*
- The container is larger than 5 gallons
- The container is empty

Unlabeled and Leaking Containers

A drop-off site permitted to accept household hazardous waste may, at its discretion, choose to accept unlabeled and/or leaking containers if it follows the protocols below and otherwise complies with all applicable laws:

Unlabeled Containers: A drop-off site may accept containers that do not have an original label if a staff person appropriately trained in identifying unknown wastes (1) identifies the material

in the container as a PaintCare product, and (2) applies a label identifying the contents to the container before placing it in a collection bin.

Leaking Containers: A drop-off site may accept a leaking container or a container with no lid if an appropriately trained drop-off site staff person (1) verifies that the container contains a PaintCare product, (2) places the contents of the leaking/open container into an appropriate substitute container (which can include bulking such PaintCare products into 55-gallon drums), and (3) applies an appropriate label to the substitute container.

Refusing an Unacceptable Product or Container

Do not accept non-PaintCare products from any participant unless they are accepted as part of normal site operations and are not placed in PaintCare collection bins. Do not accept into the PaintCare program any PaintCare products in unacceptable containers unless your site is permitted to manage household hazardous waste as described on the previous page.

When refusing a PaintCare product, drop-off site staff must explain why the PaintCare product cannot be accepted (e.g., material is not part of the program, cannot accept material from non-exempt generator). If you have a participant with products that your location cannot manage, refer the participant to their local hazardous waste disposal program, garbage hauler, environmental health agency, or public works department. Local contact information is provided following the cover page of the binder.

Retailer Guidelines Section 5. Limit per Participant

How to Handle Storage Limitations

While the PaintCare program intends to collect as much PaintCare product as possible, we recognize that your drop-off site may have storage limitations. PaintCare drop-off sites, in agreement with PaintCare, may limit the amount of PaintCare products they accept per participant.

If your collection bins are completely full, inform the participant that you are temporarily unable to accept PaintCare products and redirect them to the nearest alternative PaintCare drop-off site (refer to the site locator at www.paintcare.org or contact PaintCare hotline at 855-724-6809) or ask them to come back at a later date. Contact the PaintCare hauler immediately to have your collection bins picked up and replaced.

If you have a participant with a significant amount of PaintCare products that your location cannot manage, ask the participant to contact PaintCare directly for additional assistance. We may direct the participant to another PaintCare drop-off site that can manage the large load or offer a direct pickup.

Large Volume Pickups (LVP)

PaintCare offers a free pick-up service to painting contractors, property managers, households and others with a large volume of leftover PaintCare products. Typically, a minimum of 200 gallons (by container size) is required to qualify for the LVP service.

To refer a participant to the LVP service:

- Provide the participant an LVP fact sheet
- Ask the participant to request a pick-up using the online LVP form
- The LVP fact sheet and online form are available at www.paintcare.org (select the “Large Volume Pickup” button on the homepage)
- For additional questions, refer the participant to PaintCare for assistance

Retailer Guidelines Section 6. Working with Haulers

PaintCare contracts with haulers for the delivery of supplies, delivery of empty collection bins, and pick-up of full collection bins.

Scheduling the Hauler to Pick Up Collection Bins

When you anticipate your collection bins will be full within your site’s pick-up timeframe (generally 5 business days in urban areas, 10 business days in rural areas), call your hauler to schedule a pickup, or use their online order system if they have one. The name and contact information of your hauler is provided at the front of your training binder.

When establishing an appointment for pick-up, please indicate:

- Your site is a PaintCare drop-off site
- Name of drop-off site and address
- Your name
- Your phone number
- Number of full collection bins to be picked up
- Number of empty collection bins needed for replacement

Preparing Collection Bins for Pickup

On the scheduled pickup day, collection bins and your loading area must be readily accessible to the hauler for quick and efficient loading.

- Identify which bins are full and ready for pickup
- Make sure the path between your bins and the hauler’s vehicle is clear and at least 4 feet wide to accommodate movement of bins

The hauler will bring the necessary shipping documents and labels for the collection bins. The hauler is responsible for labeling, loading and off-loading collection bins, and will provide a copy of the shipping documents to the drop-off site. Sign and keep a copy of the shipping documents for your records.

Retailer Guidelines Section 7. Spill Response

Spills

The information in this section will assist with spills from damaged or leaking program containers. It is important that all drop-off site staff understand corrective actions to minimize exposure to people and the environment.

Collection bins must be kept in a clean, accessible area. Clean up any spill or release of PaintCare product immediately and place spill residue in a sealed container, label it and place sealed container in a collection bin. Contact the hauler or PaintCare to replenish spill kit materials as needed.

Reporting

Report spills as required by law, summarized in the state-specific guidelines at the front of this binder. Contact PaintCare within 24 hours of making such a report.

Prominently post emergency contact numbers including police, fire department, and emergency services.

Spill Response Procedures

Always follow all applicable spill response procedures set forth in your operating permit or as otherwise required by applicable law.

If a spill is small enough to be managed by drop-off site staff, follow these steps:

- Isolate the area and restrict access to the spill
- Ensure personal safety, put on protective gear (glasses and gloves) provided in the spill kit
- Stop the movement of paint by placing the leaking container upright or in a position where the least amount will spill, and place leaking container in plastic bags provided in spill kit, or into the spill kit container
- Contain the spill by placing absorbent pads or granular absorbent around and on the spill – if outdoors, place barriers around storm drains to prevent a release to the environment

- Collect the contaminated absorbent material and place it in plastic bag(s) or spill kit container, along with the leaking container and contaminated PPE, seal the bag(s) and place in the collection bin
- Remove any clothing that may be contaminated, wash thoroughly to remove spilled material from your hands or body
- Replace any used spill control supplies
- Document the date, location, and amount and type of material spilled

Retailer Guidelines Section 8. Inspections and Records

Inspections and Record Keeping

Drop-off site staff are responsible for regularly inspecting collection bins and spill kits to ensure that such materials are in proper working order, include any necessary labeling, etc. Please report any damaged materials or other problems to PaintCare immediately so PaintCare may arrange for prompt replacement or repair.

Maintain the following records for a minimum of 3 years:

- Internal and external inspection records
- Paint Drop-Off Logs (provided in PaintCare training binder)
- Direct Reuse and Reprocessed Paint Waivers (provided in PaintCare training binder)
- Employee training records (provided in PaintCare training binder) – discussed in Section 1
- Bills of lading and/or other documentation required by applicable law for outgoing shipments of PaintCare products

Retailer Guidelines Section 9. Direct Reuse and Paint Processing

Direct reuse is an additional service permitted for certain site types. These guidelines only apply to sites with a contract with PaintCare to engage in direct reuse. Paint retailers are not direct reuse sites.

Requirements for Direct Reuse

PaintCare encourages reuse of leftover paint through direct reuse (also known as a “paint exchange” or “swap shop”). Reuse sites return good quality unused paint to the local community at low or no cost.

When selecting products to place in the direct reuse area, products must be in their original container, have an original label, and be in good physical and aesthetic condition. Contents

must be liquid and relatively new. The container must be closed securely before placing it in the reuse storage area. Containers must never be opened by participants at the drop-off site. Direct reuse products must be displayed by drop-off site staff in a storage area separate from the PaintCare collection bins.

Requirements for Paint Reprocessing

PaintCare also encourages on-site latex paint reprocessing. On average, 30-60% of latex paint brought to the site is reprocessed back into usable paint available for return to the community. Containers of reprocessed paint offered to the public at a drop-off site must not display any unauthorized third-party branding; generally new containers are used to pack reprocessed paint.

A household hazardous waste facility permitted to conduct paint reprocessing must have and follow its own procedures for sorting and reprocessing paint. At a minimum, these procedures will include:

- Open each container to visually inspect the contents
- Determine if the contents are latex, oil-based, or other paint
- Determine if the condition of the paint is suitable for recycling (e.g., not moldy, rusty, etc.)
- Sort containers according to type, quality, and color

For containers of products suitable for paint reprocessing:

- Bulk contents into larger container (e.g. drum) for mixing
- Mix paint until homogenous
- Repackage paint into 5-gallon or smaller containers
- Label as reprocessed paint

For containers of products unsuitable for reprocessing, either:

- Close container and pack in a collection bin (must be completely resealed and not leaking)
- Sort and bulk the contents into a drum

Participant Waiver

Participants taking paint from a drop-off site must sign the Direct Reuse and Reprocessed Paint Waiver log included in the training binder (or an approved equivalent thereof) explaining that the paint is taken “as-is” with no guarantee of quality or contents. The participant must read, complete, and sign the form and the staff must verify what has been taken by the

participant. The staff must record on the log the volume taken by each participant and the total volume.
